(Bangkok, Thailand, 25-28 March 2008)**

OIE Home Page

OIE Secure Access System

Veterinary Services dedicated Web site

Welcome to the OIE Secure Access System.

Access to this site is only available to authorised users: namely, the Delegates of Member Countries, their designated nominees authorised to report animal disease information to the OIE (aquatic and/or terrestrial animals), Chief Veterinary Officers (CVOs) of non-member countries, system administrators and OIE personnel.

The secure access system provides access to two main areas of the OIE secured web site:

- The World Animal Health Information System (WAHIS) secured web site. Access to this application allows users from Member Countries, namely Delegates or their nominees, to electronically submit standard notification reports (immediate notification and follow-up reports, six-monthly reports and annual reports) to the OIE. This system not only provides countries with a simpler and quicker method of sending notifications and reports on disease information but also allows them to benefit from the new analysis capabilities put in place to produce essential and useful information without delays.
- The "Delegates' Site". This site has been updated to provide secure access to material and information intended only for OIE Delegates.

World Animal Health Information System (WAHIS) - Version: 2.6

Copyright © World Organisation for Animal Health (OIE) 2007

Release date: 16 Oct 2007

Welcome

It has been over one year since you have updated your details for OIE World Animal Health Information System (WAHIS), there are a number of important configuration options that must be verified for you. This need only be done once a year, but if any of the parameters change in future, you can always update them at any time from the main menu of the system.

User Parameters

Checking your contact details and setting up other authorised users of WAHIS

One of the most important functions of OIE and WAHIS is to inform member countries of important disease events. To achieve this, it is essential that we have up-to-date contact details for all delegates and CVOs.

You can also set up user accounts which allow authorised members of your staff to access the system on your behalf. Management of these accounts is your responsibility, but it is important that each person using the system has their own account (never allow anybody else to log in with your (or anybody else's) username and password.) You can authorise users to enter and submit information on only terrestrial animals, only aquatic animals or both, and also specify which types of reports they are authorised to submit (immediate notifications, six-monthly reports and annual questionnaires).

User Parameters

Country Parameters

Setting up country default values

Every country is different. This section allows you to set up parameters so that the system will function in a way that makes sense for your country.

Welcome

Before using the OIE World Animal Health Information System (WAHIS), there are a number of important configuration options that must be completed for your country. This need only be done once, and then verified once a year, but if any of the parameters change in future, you can always update them at any time from the main menu of the system.

Country Parameters

Setting up country default values

Every country is different. This section allows you to set up parameters so that the system will function in a way that makes sense for your country.

Administrative Subdivisions

Editing the list of administrative subdivisions used for disease reporting

In the reports, the geographical location of the outbreak(s) should be specified. This system uses a combination of on-line interactive maps to determine the coordinates of a disease event, as well as named administrative subdivisions (such as states, provinces, districts etc).

This system maintains a list of the names of first- (and optionally second-) level administrative subdivisions for disease reporting. As the lists of administrative subdivisions change frequently, and it is often difficult to access information on the latest lists from outside a country, it is the delegate's or CVOs responsibility to ensure that the list used for reporting to the OIE is kept up to date.

Set Country Parameters

Specify Names of administrative divisions

These names are used when identifying the location of an outbreak

Level 1 (eg. Province)	<input type="text" value="Province"/>
Level 2 (eg. District)	<input type="text" value="District"/>
Level 3 (eg. Subdistrict)	<input type="text" value="Sub-district"/>

**The Delegate can define
the level of administrative div
they want to use
Only the first level is mandatory**

Country/Territory Bounding Rectangle Coordinates

These are used to display the correct area for mapping

Min Longitude (left)	<input type="text" value="97.347297668"/> 🌐
Max Longitude (right)	<input type="text" value="105.63899993"/>
Min Latitude (bottom)	<input type="text" value="5.6334700584"/>
Max Latitude (top)	<input type="text" value="20.454599380"/>

Time Zone and Date Format

This is the default time zone and date format used in your country. The time zone is the number of hours difference from UTC (otherwise known as Greenwich Mean Time) and used to calculate the local date and should normally be the time zone for the capital city. For example, the time zone for Greece (Athens) is 2, and the time zone for Mexico (Mexico City) is -6. The date format examples show how 24th March 2008 would be written.

Time Zone	<input type="text" value="7"/> ▼
Date format	<input type="text" value="dd/mm/yyyy eg 24/03/2008"/> ▼

Note: The maps presented in WAHIS cover all countries in the world. A number of them are inaccurate or out of date and the OIE apologises that this had to occur for certain countries. The OIE is willing to work with the concerned countries to update these maps in WAHIS. Users that notice the presence of an inaccurate map of their country are requested to inform the OIE and to send an updated digital map in shapefiles format (Arc View format, ESRI). The OIE will integrate the received map in WAHIS.

Welcome

Before using the OIE World Animal Health Information System (WAHIS), there are a number of important configuration options that must be completed for your country. This need only be done once, and then verified once a year, but if any of the parameters change in future, you can always update them at any time from the main menu of the system.

Administrative Subdivisions

Editing the list of administrative subdivisions used for disease reporting

In the reports, the geographical location of the outbreak(s) should be specified. This system uses a combination of on-line interactive maps to determine the coordinates of a disease event, as well as named administrative subdivisions (such as states, provinces, districts etc).

This system maintains a list of the names of first- (and optionally second-) level administrative subdivisions for disease reporting. As the lists of administrative subdivisions change frequently, and it is often difficult to access information on the latest lists from outside a country, it is the delegate's or CVOs responsibility to ensure that the list used for reporting to the OIE is kept up to date.

Choosing a good password

- Passwords should be at least 8 characters, but may be longer if desired.
- You should include upper and lower case letters, as well as numbers.
- It should **NOT** be something that is simple to guess, such as the name of your country or a member of your family.
- One good way to make a password is to use the first letter of each word of a favourite expression, poem or song (possibly substituting some numbers). For instance, "All human beings are born free and equal in dignity and rights." might become "AHBaBFaEiDaR", a password which is almost impossible to guess but is easy to remember.

Enter your new password in the form twice to avoid errors, and click on the button below.

Immediate Notification

Non expert mode

This page allows you to:

1. ► Submit a new Immediate Notification

To make a new report for immediate notification of a disease, infection click on the 'New Notification' button. This will then lead you through a chosen.

2. ► Review existing reports

Section 2 of this page allows you to review existing Draft and Submitted reports.

-  Edit a draft or submitted report. Once a report has been edited you can click on the 'Save' button.
-  View a summary of the contents of a draft or submitted report.
-  Delete a draft report. It is not possible to delete submitted reports.
-  Make a follow-up report for a previously submitted notification.

1: Submit a New Immediate Notification

Animal type Terrestrial
 Aquatic

Reason for notification First occurrence of a listed disease

Report applies to a zone or compartment
 the whole country

? Date of Start of Event 23/03/2007
