Customs-Port-Trade Single Window Development - Challenge and Good Practice

Directorate General of Customs, Chinese Taipei
Oct 16-19, 2012

Outline

-  **Automation Journey**
-  **CPT Single Window Development**
-  **Challenge and Approach**
-  **Conclusion**

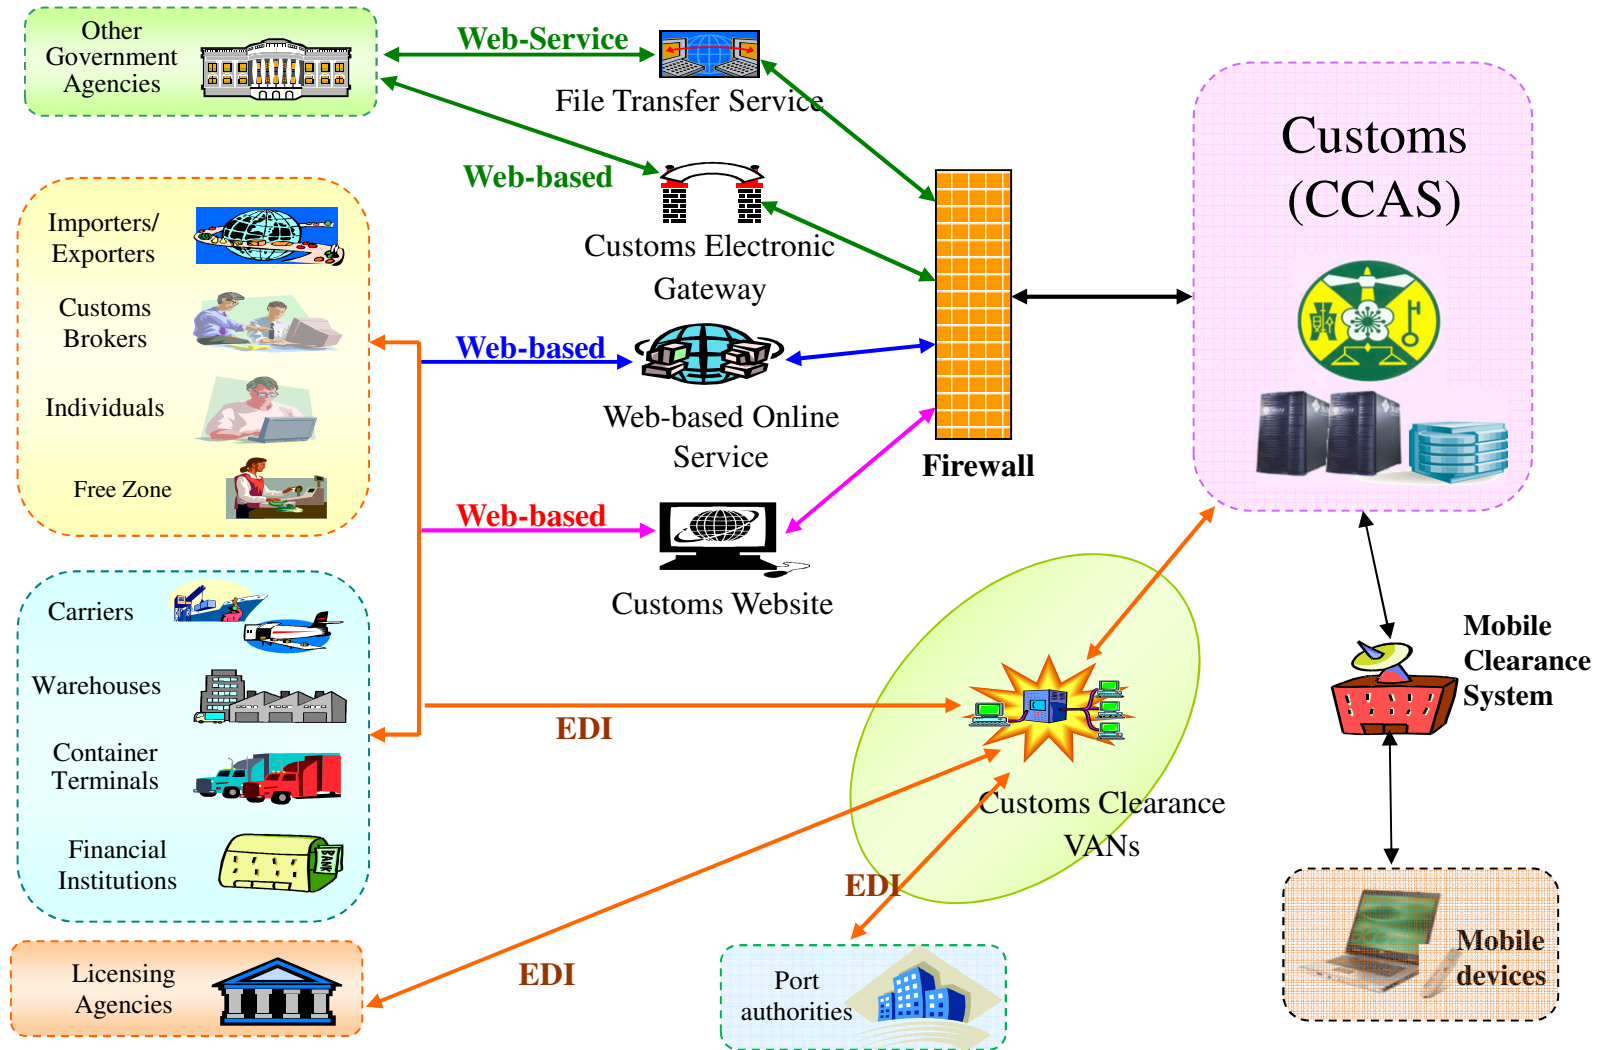

Facilitation & Security

Automation Journey

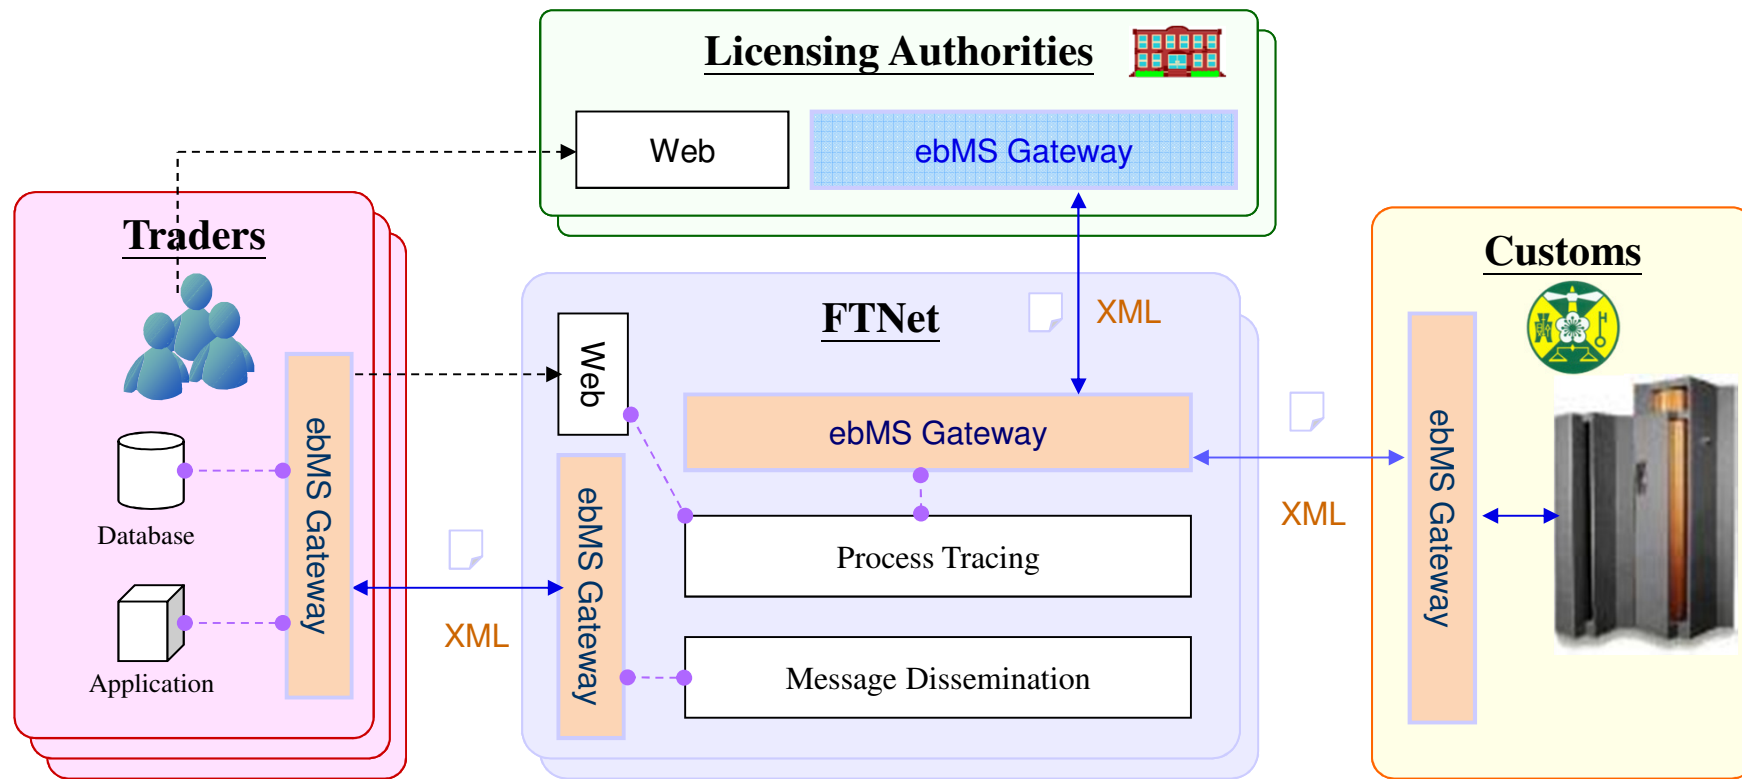

Customs Clearance Automation

Trade Licensing Automation

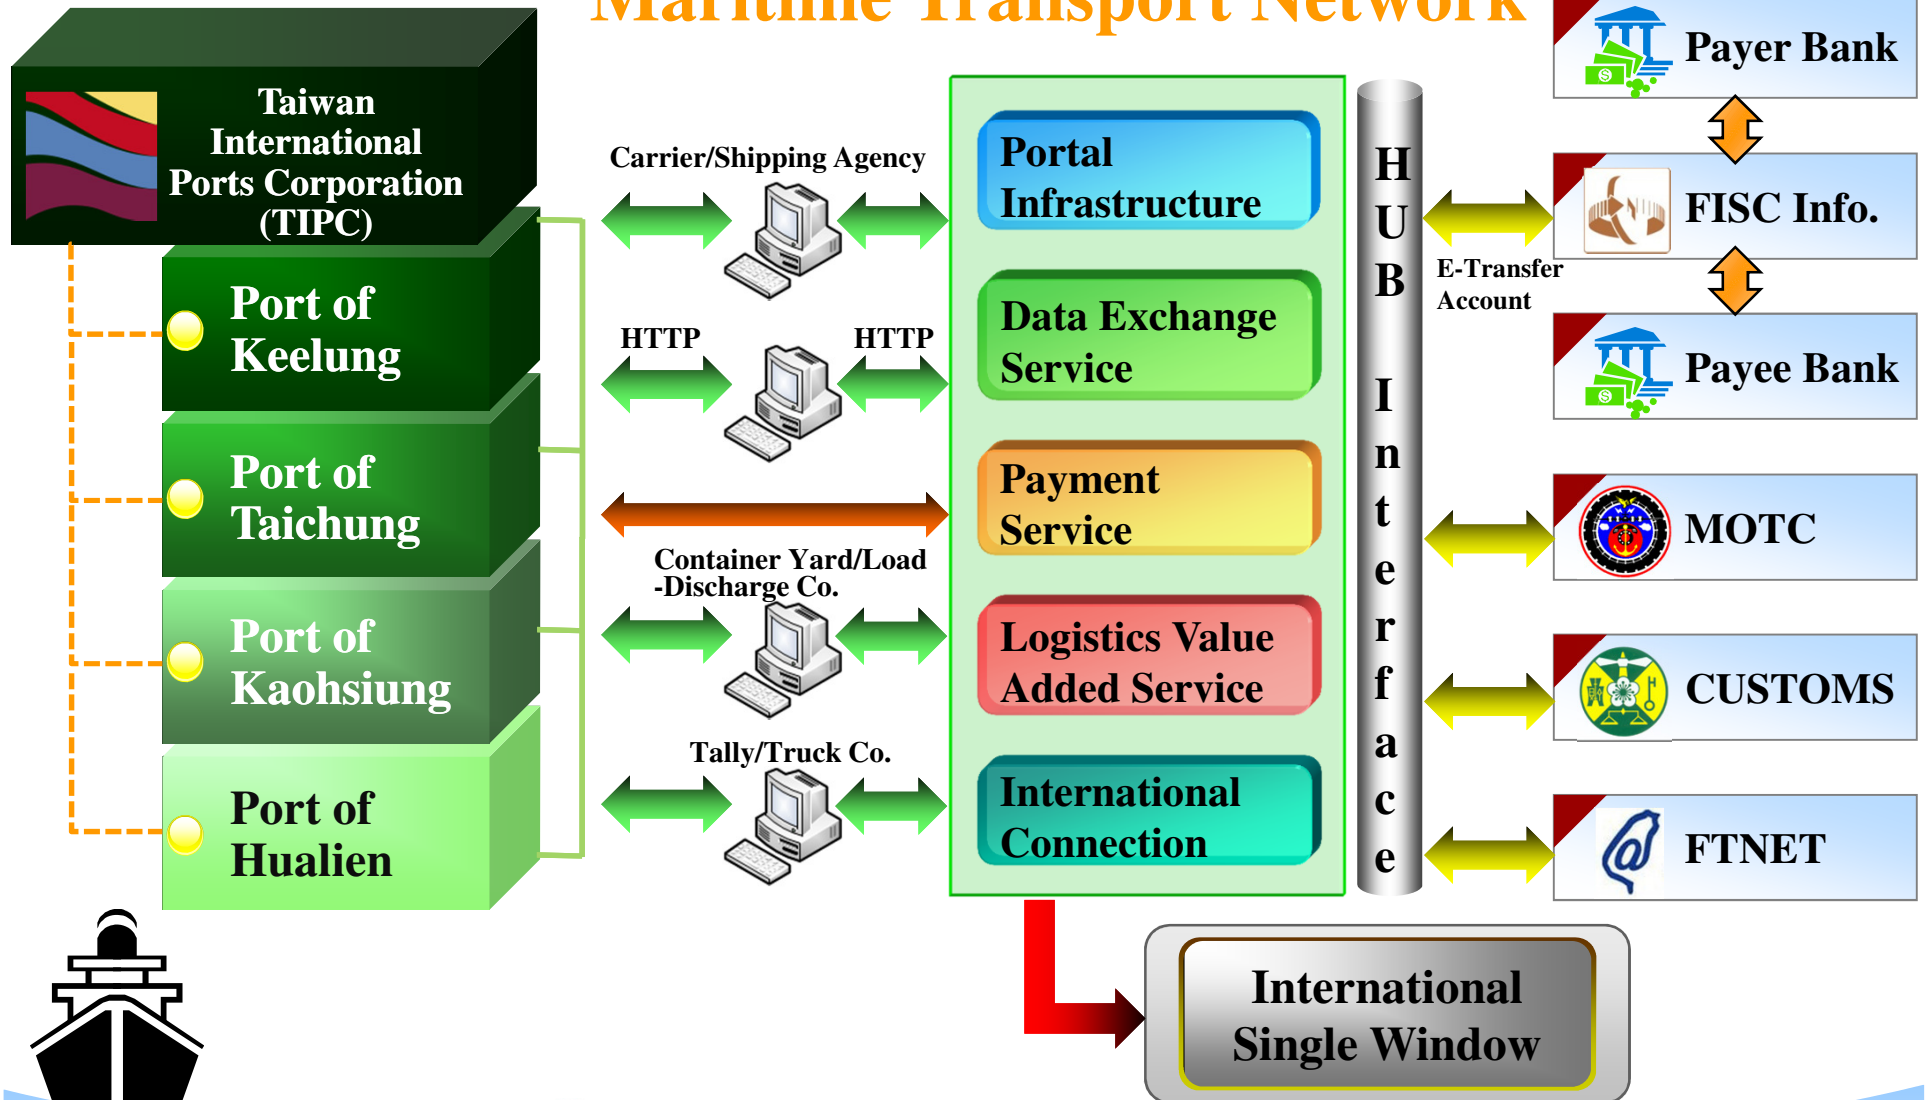

Facile Trade Net

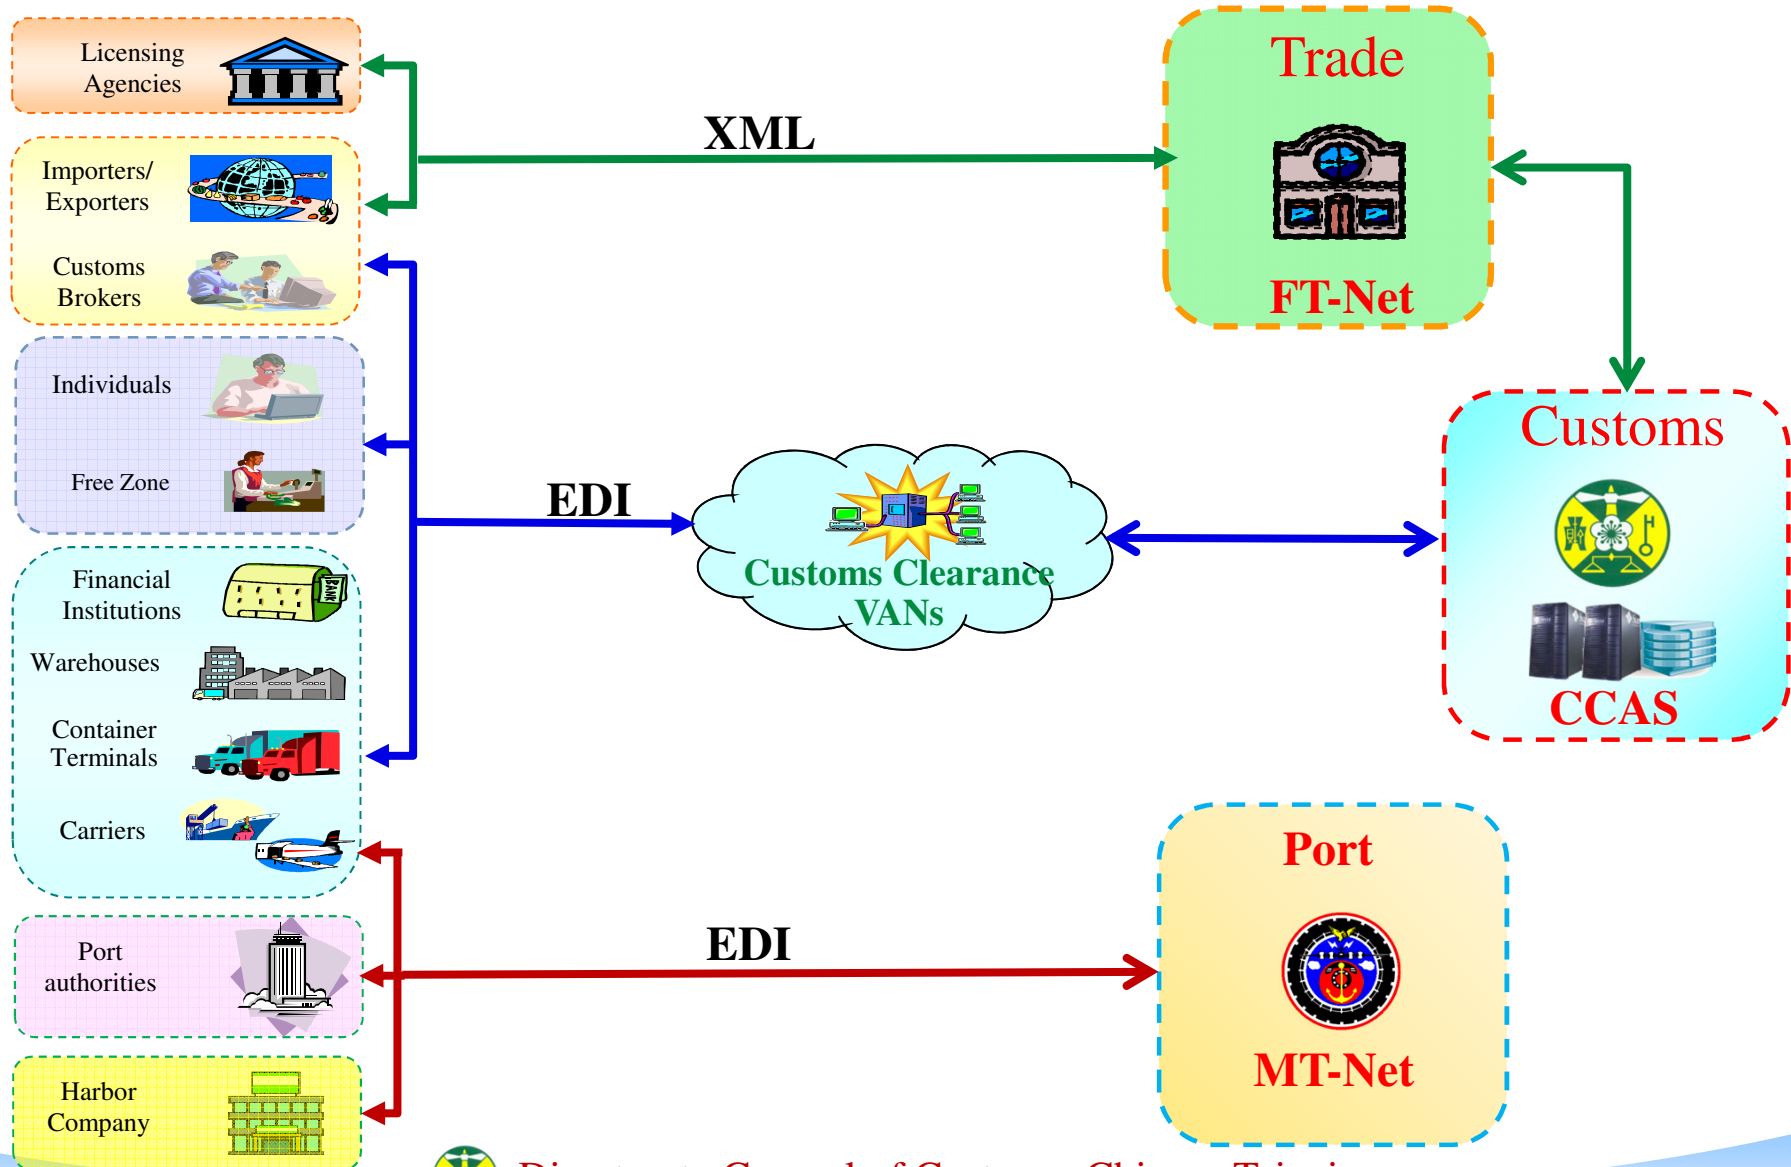

Maritime Transport Automation

Maritime Transport Network

Whole Automation Framework

Facilitation & Security

CPT Single Window Development

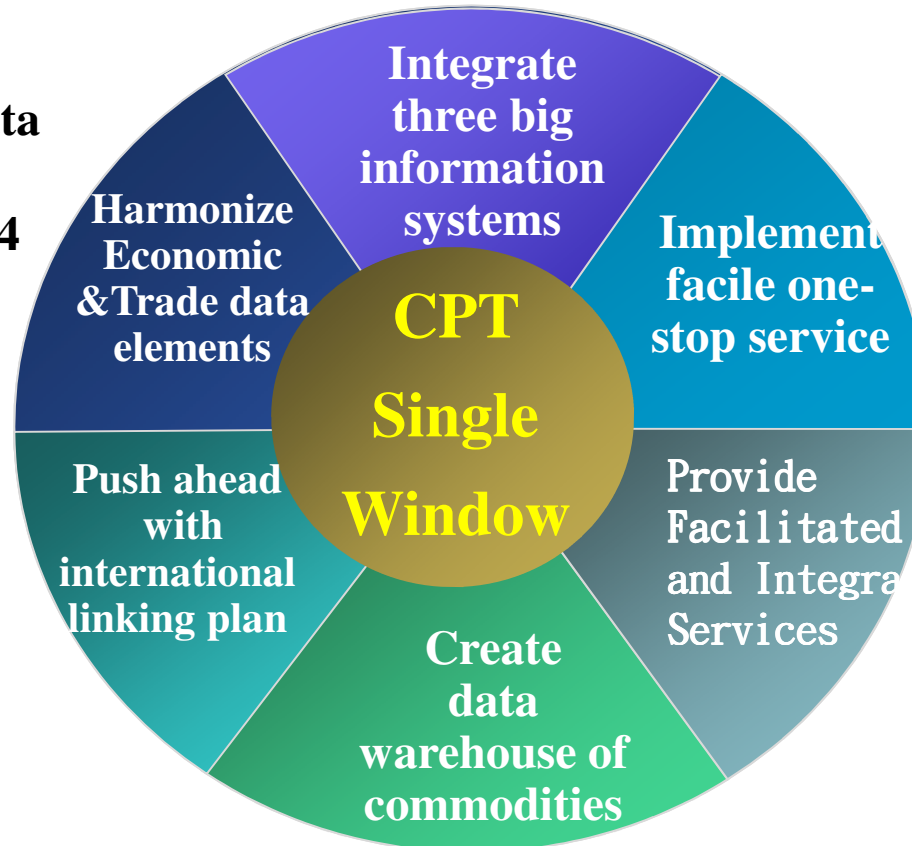

Objectives

- Integrate Customs Clearance System, MT-Net and FT-Net

- Based on WCO Data Model and UN/CEFACT No.34 recommendation

- Create cross-border interoperability environment

- Offer "Submit once, service the whole course" service

- Develop cargo clearance integrated operation environment on cross-agencies

- Offer versatile inquiry services, such as whole course tracking and statistic analysis etc.

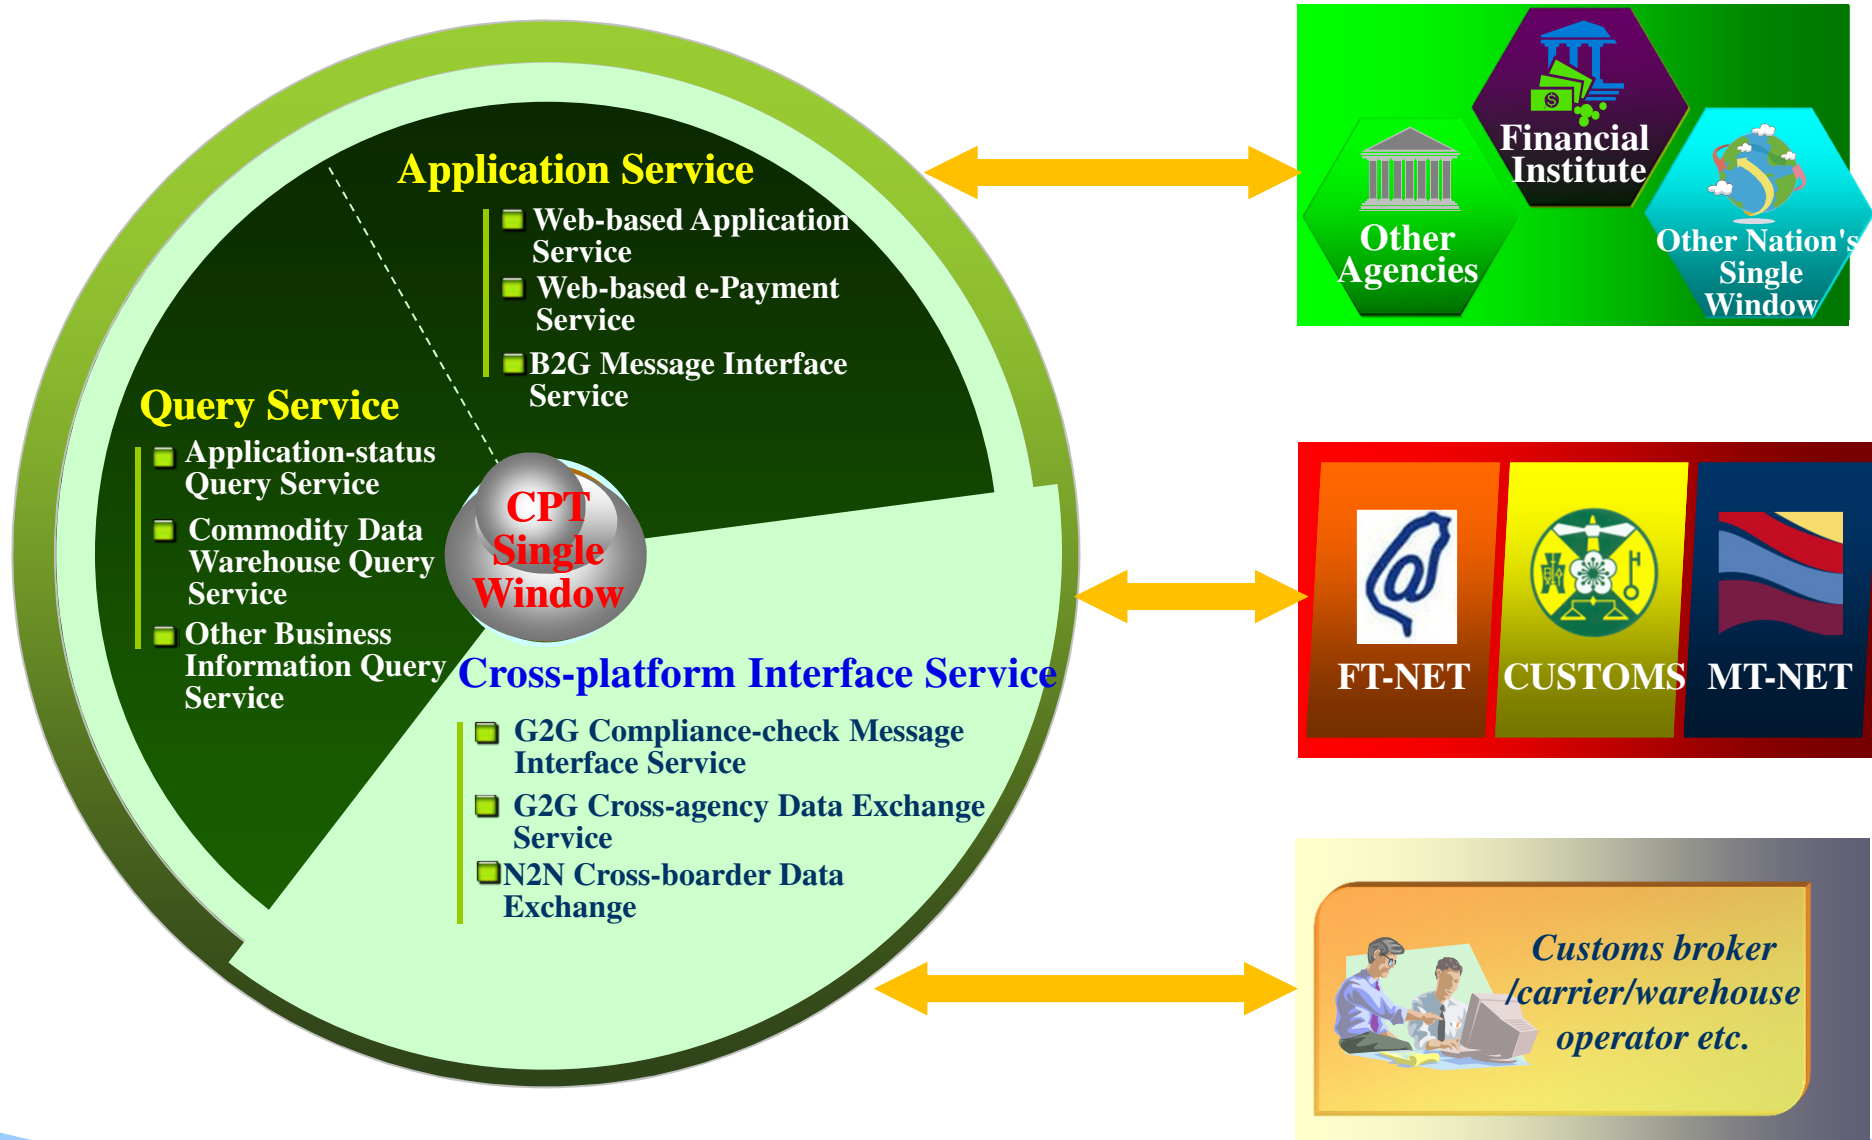

Information Convergent and Interface Platform

Projects for WCO SAFE Framework

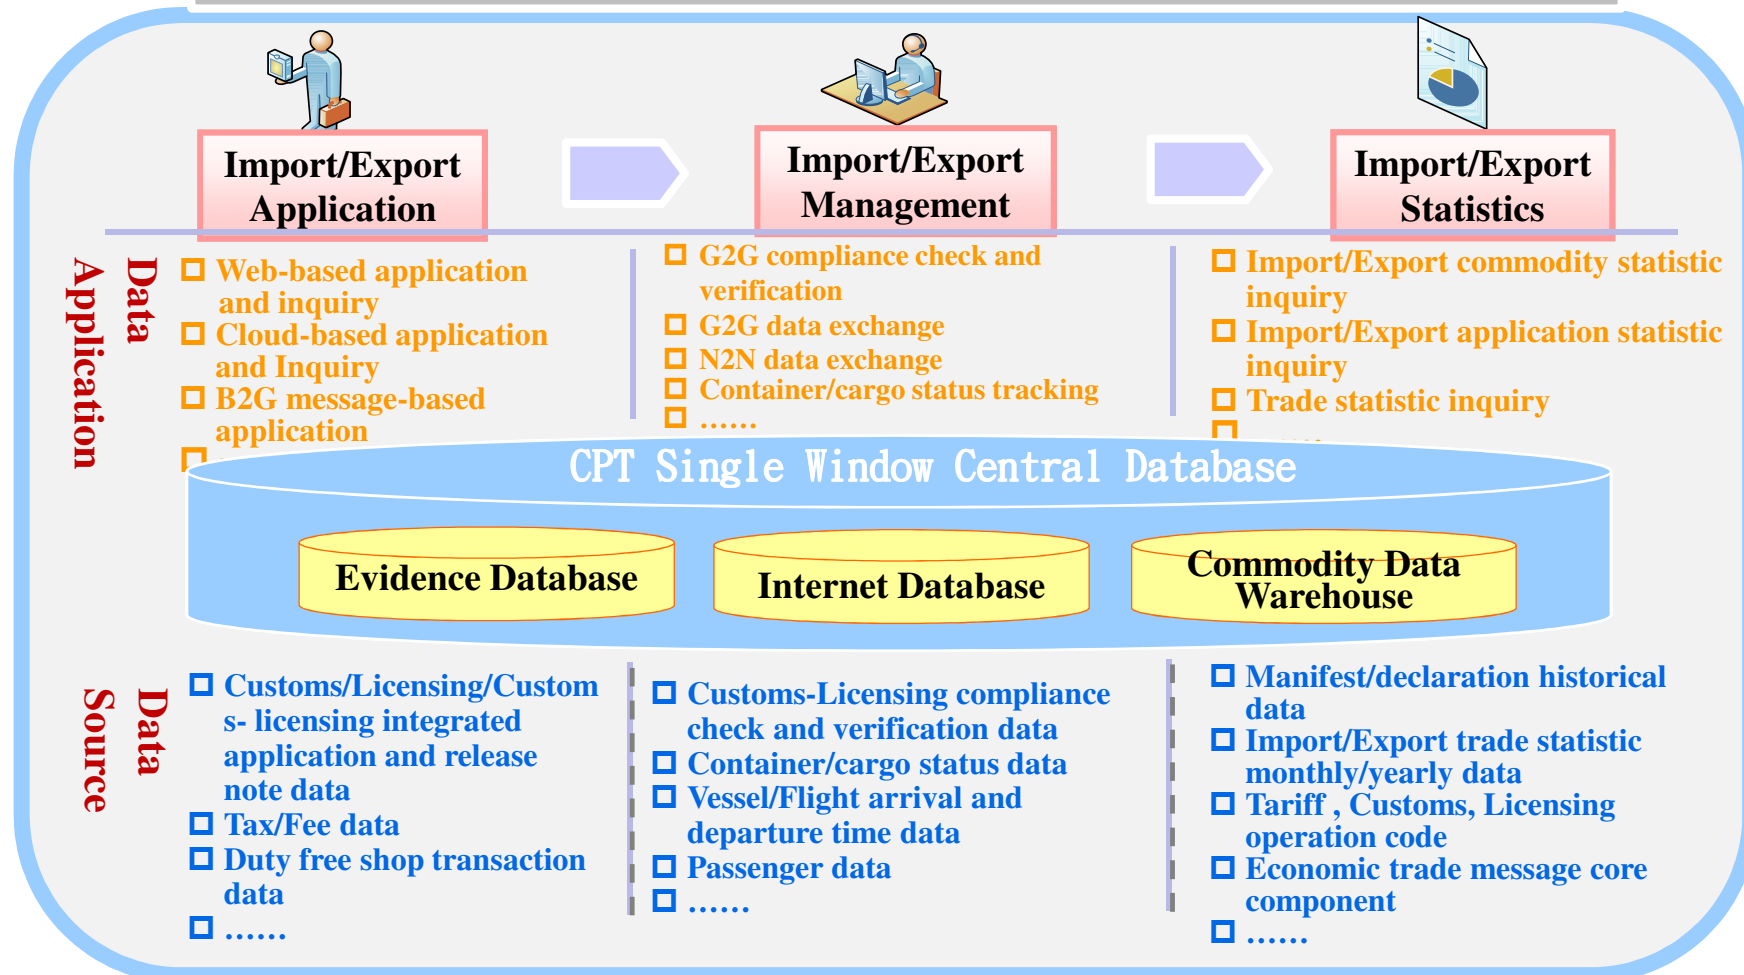

Multiple Services

Central Database

Central Database and Import/Export Operation Relation Diagram

Integrate whole course and historical information on import/export/transit cargo clearance and licensing, and provide versatile and convenient inquiries for various stake holders.

System Framework

Importer/Exporter

Customs Broker, Carrier etc.

Individuals

Single window Portal	Web Application System	Message Exchange Service
	Customs WEB Application etc.	B2G Application Message Interface
	Commodity Data Warehouse Inquiry	G2G Compliance Check and Verification Message Interface
	Cloud Computing Data Management	G2G Data Exchange Interface
	Service Framework	N2N Data Exchange Interface

Port

MT-Net

Customs Clearance VAN

Participating Agencies

FT-Net

International Single Windows

Flow Integration Service			Recording Service	Object Service	Common Service Platform
Single Sign On	Authentication	Authorization			
Directory	Registry	Certificate Management			
Event Notification	Chinese Transcode				

Single Window Interface Gateway	Message Dispatching/Routing Service			Message Queue	Message Exchange Platform
	Message Splitting/Packaging	Message Signature and Verification			
	Timing and Timestamp	Message Test and Verification	Information Transformation		
	Platform Monitoring and Management	Partner File Management	Evidence		
	Message Management Platform				

AEO Certificate management

Cargo Movement Security

Inspection Technology Modernization

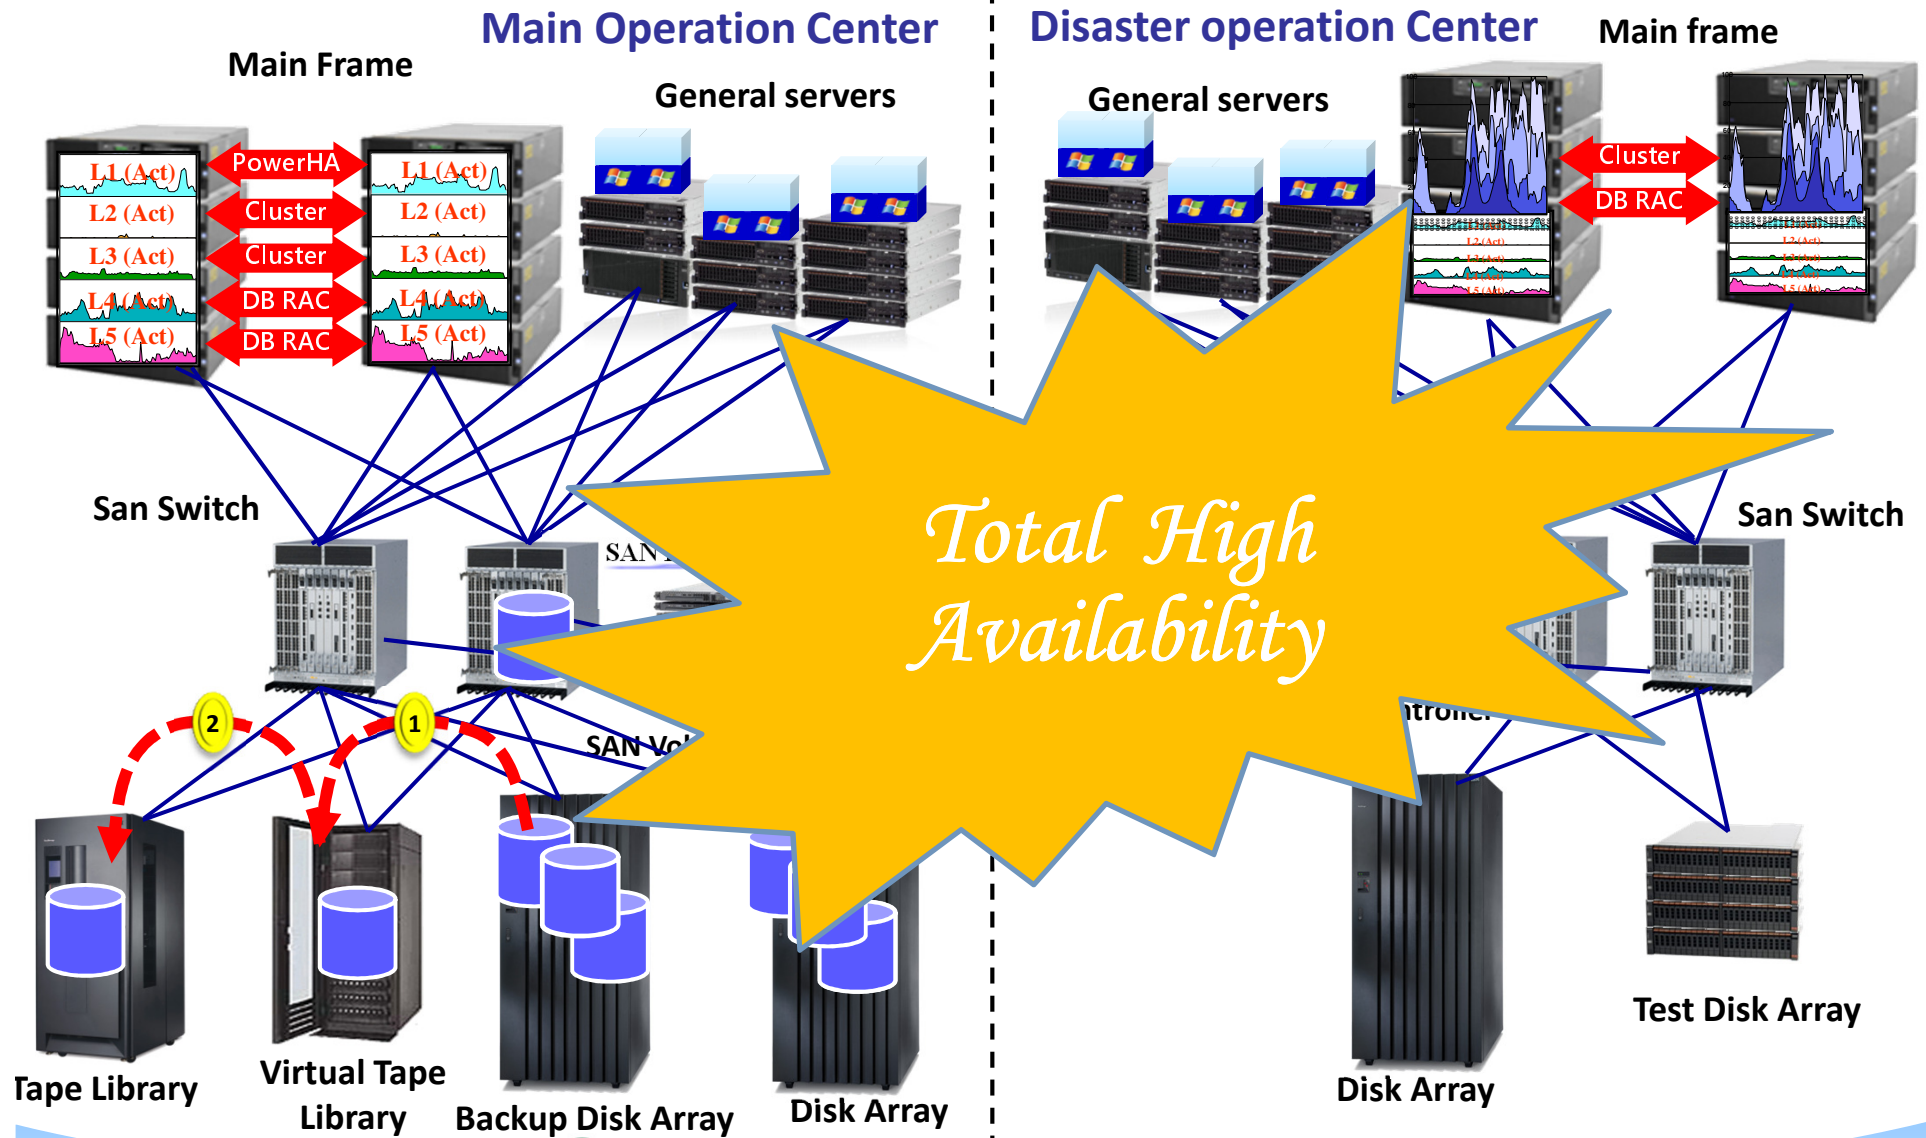

Customs

CCAS

High Availability System

Expected Benefits

Private Sectors

- ▶ Provide single entry point of import/export services to reach “one entry application, the whole course service”.
- ▶ Facilitate related industrials to master commodity status and proceed with logistic management. Expected data inquiries over 10 million times.
- ▶ Provide various B2G application, tracking, tax-paying and management etc. facilitated and integrated services to save application operation cost of related industrials about US\$30 million annually.

Public Sectors

- ▶ Provide cross-agency and cross-border information exchange platform to expedite data sharing and international interoperability.
- ▶ Provide various cross-agency compliance check, verification and data exchange services to achieve common information sharing and use, and to promote business operation efficiency, management effectiveness and policy decision capability.
- ▶ Save government budget about US\$ 25 million annually.

Facilitation & Security

Challenge and Approach

Facilitation & Security

Challenge

Budget constraints

Cope with economic environment, the government budgets have been restricted year after year. The resource of project fund has become uncertainty.

Difficulties in Inter-agency Integration and Coordination

Involving the harmonization and integration of existing data, systems, business flow and law and regulation of participating government agencies.

All messages renewed by new standard

The messages has been transformed from EDI messages into XML messages. Owing to customs and licensing messages change and business flow adjustment, all related industrials should upgrade their turnkey systems and internal ERPs.

Inadequate legal framework

Lack of legal infrastructure for promotion, operation and integration.

From Government Site

Approach

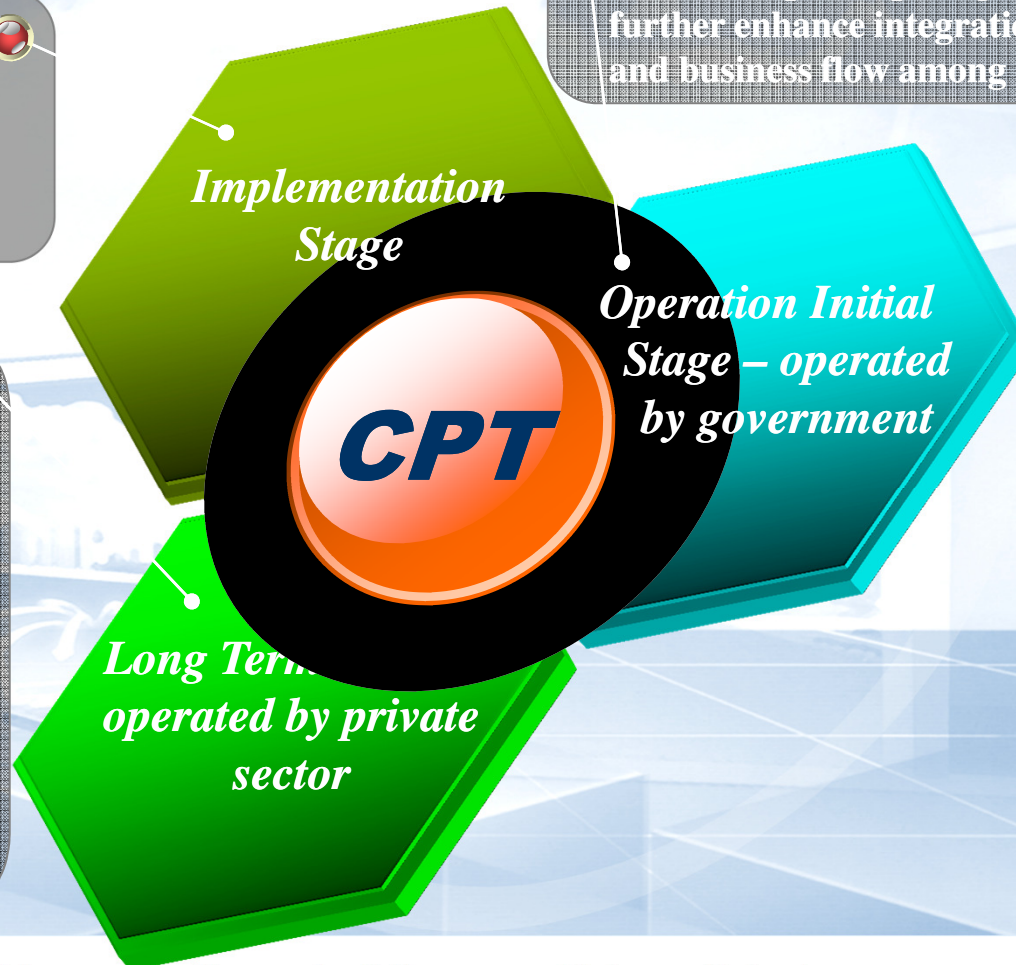

Budget constraints

Meet annual government budget, and make mobile adjustment on the project timeline and yearly planning jobs of following year.

Procure high-grade service provider doing operation services. The government will conduct evaluation of performance effects and the superintendence and management, meanwhile, extend the service fields to B2B, further to integrate trading flow to provide B2B and N2N data exchange services on commercial documents of import/export trade supply chain .

Single window maintenance will still be funded by government budget, but it should increase more services, enlarge the number of participating agencies and further enhance integration of messages and business flow among cross-agencies.

Approach

Inadequate legal framework

From Related industrials Site

Approach

All messages renewed by new standard

Provide public version turnkey system

- Create and release public version turnkey system, and offer any needed related industrials free to use the software to conduct future customs and licensing application.

Implement reward operation measure

- Draw up 「 Directions governing the DGOC reward policy for businesses adopting new turnkey system applicable to CPT Single Window System and Advance Cargo Information System 」 .
- Make related operation procedure and norm.

Renew fee collection measure

- Revise the collection criteria of the message transmission fee.

Conclusion

Conclusion

Finishing establishment is just beginning, the development route is endless.

Integration and streamlining of business and system is necessary, well-coordination and well-cooperation is crucial for single window development.

Developing single window is the corner stone of reaching international interoperability.

Facilitation & Security

Thanks for your attentions!
