Build System Software Expertise Cloud Appliance For Enterprise from III

Be GREEN

Lower Overall Energy Consumption for IT Systems with Cloud Computing Economy of Scale

Data Center energy saving approaches:

- Set data center energy efficiency goals
- Promote data center energy reduction actions
- Launch energy efficiency guidelines for new data centers

Racks

Virtualization

Sharing

- Bureau of Energy established plans for data center measurement and standardization procedures
- Inspect data center efficiencies for government and schools. Government data center purchase and leasing need to confirm with energy saving guidelines
- Expected to save more than \$400 million dollars after adopting data center energy saving guidelines at universities and schools

Lifestyle Management

Manage your sleeping, drinking, smoking and etc.

Inventec Retail Cloud Solution

- Provide Cloud Service Platform to improve retail's total value chain operation efficiency
- Provide SaaS service to customer
- Functional Scope
 - ✓ O2O Integration
 - ✓ SCM
 - ✓ DCM
 - ✓ CRM
 - ✓ BI
- Customer
 - ✓ A China Retail Chain
 - ✓ 500+ stores
 - ✓ 3 warehouses
 - ✓ Suppliers from Taiwan, China, and other countries
 - ✓ Has oversea franchisee
 - ✓ Multiple sale channels

Cloud Computing Association in Taiwan

- Including :Telecom operators, Service providers, H/W manufactures, S/W developers, System Integrators.

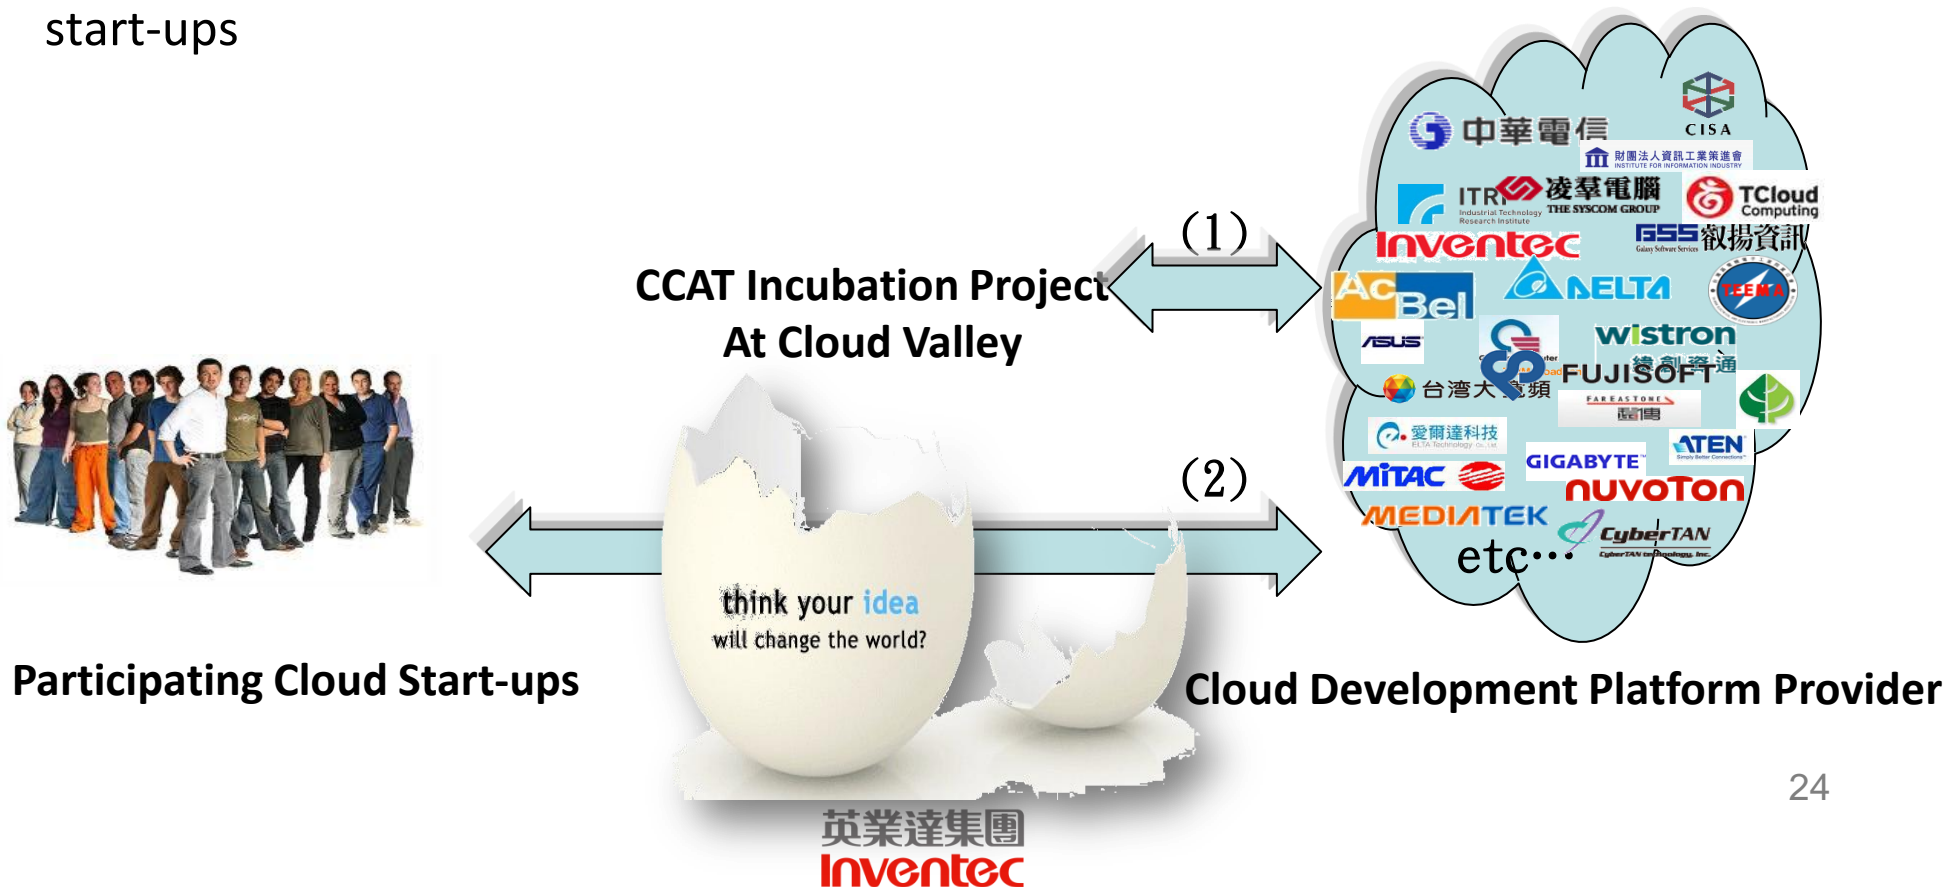

Taiwan Cloud Valley

- Taiwan's Vice President **Wu Den-yih** hoped that "Taiwan Cloud Valley" emerges as a respected counterpart of "Silicon Valley," and significantly boosts Taiwan's international competitiveness.
- Taiwan's Premier **Sean Chen**: May Taiwan Cloud Valley be more diverse than Silicon Valley, and the Government will provide strongest support.
- With concerted support from government and industry, Taiwan Cloud Valley aims to become the epicenter of the development of Taiwan's cloud computing ecosystem.

CCAT Incubation Project

- Promote development of leadership cloud solutions and services
- Award dollars for the winning teams
- Major industry players provide mentoring
- Funding support from mentoring company possible
- Make Cloud Open Lab development and testing platforms available to participating start-ups

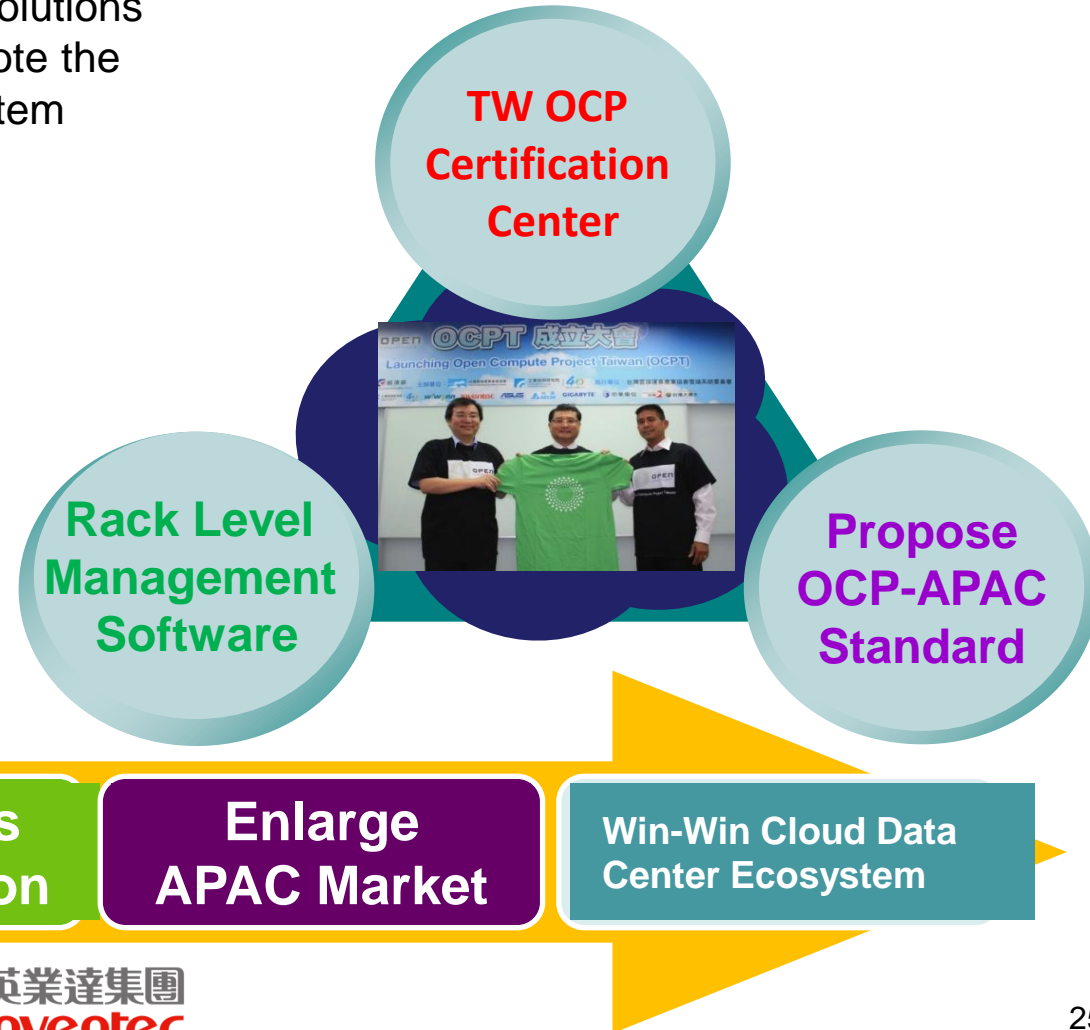

OCP-Taiwan

● Objectives

- Helps Taiwan's data center hardware solution providers to understand and adopt OCP's technical specifications
- Contributes to the technical specifications of the hardware and firmware components in OCP-backed data center solutions
- Works with OCP and OCP-Japan to promote the OCP brand and develop the OCP eco-system

● Formation

- ITRI, Wiwynn, Inventec, Asus, Delta, Gigabyte, CHT, FETnet and TFN initiate the move to form Open Compute Project Taiwan (OCPT) under the guidance of Open Compute Project (OCP) and Cloud Computing Association in Taiwan (CCAT)

Cloud Computing in Taiwan

- **Continuing/expanding ICT economical contribution**
 - **Leading worldwide supplier of Cloud systems and solutions**
- **Develop innovative Cloud Services for better and smarter living**
 - **Instant and timely information**
 - **Enhanced service**
 - **For our daily living**
- **Partnership Welcome**

THANK YOU
