(出國類別：會議)

## 參加 2019 年 RSA 資訊安全大會暨展覽會

服務機關：行政院環境環保署

姓名職稱：賴祐淞 設計師、詹効儒 設計師

派赴國家：美國

出國期間：108年3月3日至3月10日

報告日期：108年5月16日

## 摘要

RSA 資訊安全大會暨展覽會（以下簡稱 RSA 會議）於 3 月 4 至 8 日在美國舊金山召開，共舉辦 10 場研討會及 600 多場專題演講，討論主題包括資料分析及事件處理、應用程式安全、區塊鏈及資料加密、雲端及虛擬化、政策與法規、駭客手法與威脅、人工智慧及機器學習、行動設備及 IOT 安全等 19 個領域，會場並有 700 多家公司參與展出。

本次參加 RSA 會議，主要希望能從這些議題中瞭解最新資安趨勢、機器學習及 AI 應用，特別是行動裝置及 IOT 設備之安全議題。並期望除了提升本身對資安議題的認知外，也希望藉由演講中所獲取的新知與技術，增廣資訊安全上見聞，瞭解最新的資安威脅技術，以增進擬定資安政策、規劃防資安防禦策略等業務之能力。

# 壹、 會議目的及背景

## 一、 RSA 資訊安全大會暨展覽會簡介

RSA 資訊安全大會暨展覽會（以下簡稱 RSA 會議）成立於西元 1991 年，係資訊安全產業最重要的會議之一，同時也是受到世界矚目的資安盛會，每年除固定於美國舊金山舉辦外，亦於歐洲及亞太等地區召開，今年舊金山會議吸引世界各地超過 4 萬個資安領域從業人員參加。資訊安全專家可藉此機會交流最新的資安趨勢及看法，或是提出資安防護方面的議題，全球各資安廠商亦可藉此機會，向與會者展示最新資安防禦的解決方案。RSA 會議提供資訊安全專家在攻擊或防禦上不同的思考方向，瞭解目前最新的資安技術，作為攻擊或防禦的重要參考依據。

圖 1、RSA 資訊安全大會暨展覽會會場外觀

圖 2、RSA 資訊安全大會暨展覽會演講會場

## 二、 會議目的

本年度 RSA 會議於 3 月 4 至 8 日假美國舊金山 Moscone Center 及 Marriott Marquis 召開，官方統計超過 4 萬 2,500 位資安專業人員參與，3 月 4 日舉辦 10 場研討會，隨後 4 天除邀請 46 資安專家擔任大會 31 場次專題演講(Keynote)外，還有 740 個講者發表 621 場次之專題演講，討論主題包括資料分析及事件處理、應用程式安全、區塊鏈及資料加密、雲端及虛擬化、政策與法規、駭客手法與威脅、人工智慧及機器學習、行動設備及 IOT 安全等 19 個領域。現場還有資安展覽，會場有 700 多家公司參與展出。

本次參加 RSA 會議，主要希望能從這些議題中瞭解最新資安趨勢、機器學習及 AI 應用，特別是行動裝置及 IOT 設備之安全議題。並期望除了提升本身對資安議題的認知外，也希望藉由演講中所獲取的新知與技術，增廣資訊安全上見聞，瞭解最新的資安威脅技術，以增進擬定資安政策、規劃防資安防禦策略等業務之能力。

## 貳、會議經過

### 一、 本次出國期間（含會議行程）概況紀要：

活動日期	活動內容	活動地點
3月3日	啟程臺灣臺北時間 11:30 抵達美國舊金山時間 06:30 至會場（美國舊金山 Moscone Center）報到	美國舊金山
3月4日	第 1 天參加研討會(Seminar)，研討會主題為： Security, Privacy and Human Behavior。	美國舊金山
3月5日	第 2 天參加 2 場專題演講(Keynote Speech)及 3 場 技術性 Session，內容包含資安威脅與防禦，機器 學習及 AI 應用。	美國舊金山
3月6日	第 3 天參加 1 場專題演講(Keynote Speech)及 4 場 技術性 Session，內容包含 IOT 資安議題、端點防 禦及資安整合平台。	美國舊金山
3月7日	第 4 天參加 2 場專題演講(Keynote Speech)及 3 場 技術性 Session，內容包含資安攻擊模式、進階惡 意程式研究。	美國舊金山
3月8日	第 5 天參加 1 場專題演講(Keynote Speech)，內容 為雲端資料安全。	美國舊金山
3月9日	返程美國舊金山時間 3月9日(六)00:20	美國舊金山
3月10日	抵達臺灣臺北時間 3月10日(日)06:10	臺灣臺北

## 二、 本次會議討論議題與本署資安管理相關綜整如下：

### (一) Security, Privacy and Human Behavior 研討會：

1. 這個研討會主要探討使用者面對資安議題的態度，並討論如何幫助使用者提升資安防禦能力。由研究結果顯示，一般使用者對資訊科技仍以功能面為主要考量，面對資安議題多採被動配合的態度，但仍有方法可提高使用者之資安意識。
  - (1) 重複提醒有幫助更理性面對資安威脅。
  - (2) 警告時機並非在登入時，應在更改設定之時提出警告。
  - (3) 利用群組圈的提醒，讓使用者更容易注意資安威脅。
  - (4) 可考慮提供資源，讓使用者更方便完成設定或利誘使用者強化防禦設定。
2. 另針對使用者最切身之資安議題-密碼管理，參與學者也提出見解。
  - (1) 密碼長度比複雜性重要。
  - (2) 爛密碼要被列為黑名單，提醒使用者不應設定。
  - (3) 教育使用者有幫於提升密碼強度。
  - (4) 不要在不同網站重複使用相同密碼。
3. 針對 IOT 設備之安全設定，參與學者提出 IOT 設備權限設定只分 Administrator 與 Guest 並不符合實際需求，導致 IOT 設備之資安事件。使用者角色區分須更細緻，不同身分須設定不同時機有不同權限，以符合實際需求。
4. 會議中亦針對監控設備或照片分享對個人隱私侵犯之隱憂，並提出影像過濾處理及相關設備設置之注意事項。

## (二) 行動裝置及 BYOD 管制：

1. 展場中有針對現今網路環境中多樣性設備之監管系統展示，系統可識別任何擁有 IP 的設備，無論是透過有線網路、無線網路或是虛擬機連線，同時透過系統的政策設定，偵測到的設備可獲得企業最高標準的安全保護。
2. 監管系統使用網路偵測器可即時監看擁有 IP 的設備，並將這些設備及登入設備的使用者依照組織需求分門別類，同時利用系統智慧可分析這些設備之當前狀態。系統所使用的智慧設備平台(Device Platform Intelligence)，可收集及識別設備下列資訊：
  - (1) 設備識別(含製造商、設備名稱、型號)。
  - (2) 設備實際照片。
  - (3) 設備來源履歷。
  - (4) 連線類別(有線/無線)。
  - (5) 出廠日期。
  - (6) 產品生命週期。
  - (7) 產品支援終止日。
  - (8) 製造商狀態。
  - (9) 製造國家。
  - (10) 製造商網頁。
  - (11) 設備之資安弱點(CVE)。
  - (12) 即時設備暴露之弱點警報。
  - (13) 製造商異動導致設備無法維護警告。
3. 監管系統可進行網路連線控制(Network Access Control)，利用多種以人事時地物的環境參數建立的 IT 安全政策，網路隔離未合規的設備，並使用自動的矯正程序使其合規。網路隔離手段包含下列方式：
  - (1) ARP Poisoning。
  - (2) TCP Reset。
  - (3) 網路閘道 enforcer 阻擋。
  - (4) 網卡關閉連線。

- (5) 內建 RADIUS Server 禁止登入網路。
- (6) 內建 DHCP Server 禁止配發 IP。
- (7) 控制網路設備關閉實體網路插孔。

圖 5、RSA 資訊安全大會暨展覽會專題演講 3

圖 6、RSA 資訊安全大會暨展覽會專題演講 4

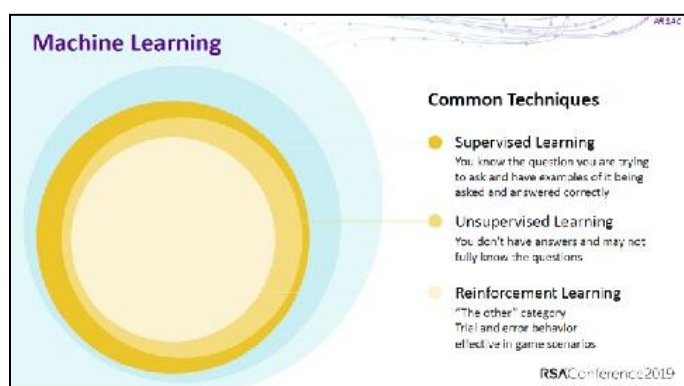

圖 7、機器學習(ML)3 種常見技術

### (三) 機器學習(ML)與人工智慧(AI)應用議題：

1. 由於資料大量的累積與機器運算能力的快速提升，面對攻擊型態快速變化的現代資安環境，應用機器學習與人工智慧技術，可處理靜態分析無法處理變異性大的資料，提升對攻擊的偵測及反應能力。例如利用現有大量攻擊事件的真實資料導入威脅與防禦模式進行監督式學習(Supervised Learning)，利用程式邏輯及分類技術讓機器具有預測特定事項的能力，再利用機器已有的分類能力進行無監督式學習(Unsupervised Learning)，並透過錯誤回饋進行強化學習(Reinforcement Learning)，讓機器針對非特定事項一樣具有精確的預測及反應能力。
2. 在資安應用上，機器學習(ML)與人工智慧(AI)可將細微的攻擊特徵放大，在缺乏重大表徵的資料中發現惡意行為；利用觀察到的攻擊行為及惡意程式行為，由機器自行分析行為特徵並製作偵測器，如此可在無需解密 https 的情形下也能偵測 Web 的攻擊。
3. 面對號稱導入機器學習(ML)與人工智慧(AI)的眾多資安產品，專家也為買家提供具有鑑別度的問題，用以了解供應商是否真具有相關技術能力：
  - (1) 如何將機器學習應用在產品中，為何有此需求。
  - (2) 如何評量機器學習導入成效。
  - (3) 如何利用現有資料進行監督式學習(Supervised Learning)。
  - (4) 產品非機器學習部分為何?為什麼?
  - (5) 機器學習資料分析有沒有學術論文或公開資料發表。
  - (6) 關於機器學習產出的結論，有何條件限制?

#### (四) IOT 設備安全議題：

1. 世界 IOT 連網設備數量呈倍數成長，其中 64% 為一般消費性產品，這類 IOT 設備的數量較企業所使用的數量更多，且因為沒有專業人員管理，這類設備之資安問題相當值得重視。
2. 依據調查，消費性產品歐美以媒體 IOT 設備為多，亞洲則以監控 IOT 設備為多，類似 IOT 設備之資安問題大致有下面幾種。
  - (1) 內嵌元件安全性差（缺乏密碼，任何人可植入惡意程式）。
  - (2) 供應鏈缺乏防護（供應商人員造成資安問題）。
  - (3) 共用元件（相同元件具有相同弱點）。
3. 專家提出之 IOT 設備加強安全作法如下：
  - (1) 設備盤點分類。
  - (2) 網段區隔。
  - (3) 網路流量分析。
  - (4) 程式韌體更新。
  - (5) 落實內部網路安全政策。
4. 另外針對大量 IOT 設備之管理，德國的學者提出前瞻性的管理方案，以建立 IOT 設備之訂閱管理機制及利用特殊認證管理 IOT 群組的規劃，來解決 IOT 設備更新問題，同時可降低 IOT 設備（製造商及使用者）之管理成本。

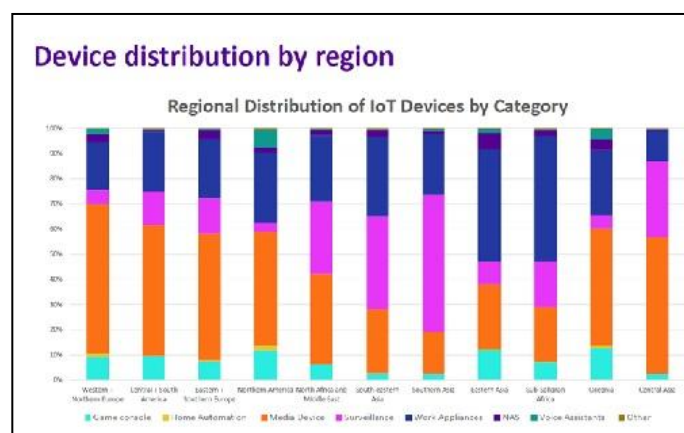

圖 8、IoT 設備類別區域性分布統計圖

## (五) 攻擊與防禦策略之探討：

會議中許多專家及業者都有談到各種攻擊手法及防禦策略，其中一個專題演講(Keynote)中提到 5 種最危險的攻擊，並建議相對的防禦策略。

1. DNS Mischief(DNS 欺騙)，駭客透過更改基礎設施 DNS 設定，將 Web 站台、E-Mail Server 指向惡意主機，並註冊正式憑證。此種攻擊的防禦策略如下：
  - (1) 對所有基礎設施之管理介面使用雙因素認證。
  - (2) DNS 使用 DNSSEC 避免快取中毒。
  - (3) 盡速撤回遭濫用的憑證。
  - (4) 經常性的檢查 DNS 更新公告(Security Trails)及憑證註冊(<https://crt.sh> & <https://www.entrust.com/ct-search>)。
2. Domain Fronting(Domain 隱藏)，一般單位均信任往來雲端供應商的流量，但雲端供應商的客戶的資安問題，可能導致來自雲端的流量不值得信任。此種攻擊的防禦策略如下：
  - (1) 在企業邊界進行 TLS 攔截防護。
  - (2) 不可盲目信任雲端供應商。
  - (3) 使用 RITA 工具偵測 Domain Fronting。
3. 利用弱密碼、公共網路的個資、釣魚、應用系統認證從事針對性此種攻擊的防禦策略如下：
  - (1) 檢視雲端設定(myactivity.google.com)。
  - (2) 遵循雲端供應商的設定指引。
  - (3) 思考公共與私人分野，別認為沒人要你的資料。
  - (4) 使用雙因素認證。
  - (5) 使用可管理的高強度認證。
4. DNS over Hhttps(加密 DNS 查詢)，加密 DNS 查詢連線，無法發現惡意程式活動，也無法對相關行為進行監控。此種攻擊的防禦策略如下：
  - (1) 企業內網不要使用 DoH。
  - (2) 使用真實 VPN 方案代替 DoH。
5. 入侵 BMC(主機板管理控制系統)，使用者可利用 WIFI/Bluetooth 晶片遠端連

入，利用漏洞操縱 BMC 探索內部網路。此種攻擊的防禦策略如下：

- (1) 移除管理工具。
- (2) 對網路進行存取控管。
- (3) 監控網路存取。
- (4) 每個設備設定獨立密碼。

圖 9、RSA 資訊安全大會暨展覽會展場畫面 1

圖 10、RSA 資訊安全大會暨展覽會展場畫面 2

## (六) 資安工具及系統整合：

隨著資安威脅增加，企業採用多種資安工具進行防護，平均每個企業使用的資安工具多達 75 種，其中許多工具具有重複的功能，甚至有些工具採購後並未上線使用。依據資安工具使用調查，20%的工具處理了 80%的防禦工作，不論從增進工作處理效率或是成本角度考量，資安工具均應保持簡單，功能不要重複，並做適當整合，才能展現最佳防護效率。建議整合的步驟如下：

1. 普查現有資安工具
  - (1) 為何而買？供應商是否合格。
  - (2) 確認功能及使用頻率。
  - (3) 結果是否與其他設備整合。
2. 對工具進行功能分類
  - (1) 類別可以 CIS-20,Essential 8 為基準。
  - (2) 檢討各工具在該類別的覆蓋率。
  - (3) 找出重複功能的工具。
3. 對資安事件作解譯及分類，盤點程序
  - (1) 與 SOC 或 IR 人員合作。
  - (2) 建立或使用既有分類(DBIR)，統計個類別數量、百分比、累積百分比。
  - (3) 分析前 20%類別是否佔全數的 80%。
4. 定義人員角色

記錄人員特質：身分、需求。
5. 定義事件處理流程
  - (1) 串聯人員及程序至流程中。
  - (2) 將流程視覺化。

## 參、心得及建議

### 一、 行動裝置及 BYOD 管制部分：

- (一) 展場中有針對現今網路環境中多樣性設備之監管系統展示，可使用無線的網路偵測設備，偵測網路內 SSID，找出非法的無線 AP，還可偵測連線網路之行動裝置、BYOD 並加以管理。系統也可掃描及評估網路中所有取得 IP 的設備 (包括有線及無線方式連線)，識別其名稱、型號等基本資訊，並使用強大的智慧設備平台(Device Platform Intelligence)，精確進行設備識別及分類，並可結合智慧設備平台收集的設備弱點資訊，以利後續風險管理。另針對網路中的主機及 Notebook，可安裝 Agent 即時偵測硬體及軟體的改變，Agent 還可控制主機之設定及無線連線能力。
- (二) 除對設備及主機軟硬體資訊偵測之外，系統可進行網路連線控制(Network Access Control)，使用偵測到的資訊制定政策，違反政策時可透過多種方式(如 TCP Reset、停止配發 IP、停止網卡)阻止主機或行動設備連線網路。
- (三) 未來署內針對手機及 BYOD 連線署內網路，市面上已有設備的可進行多種情境的管制，以確保內網安全。

### 二、 IOT 安全部分：

設備本身設計上防禦能力不足，一直令資安人員相當擔憂，加上更新機制不健全，造成維護成本太高，製造廠商也無法對出售產品進行維護。即便如此，針對署內現有的 IOT 設備，仍可以下列作為進行安全強化，以達到阻擋外部攻擊的目標。

- (一) 設備盤點分類。
- (二) 網段區隔。
- (三) 網路流量分析。
- (四) 程式韌體更新。
- (五) 落實內部網路安全政策。

### 三、 機器學習部分：雖有許多產品嘗試應用，但一般仍在實驗摸索階段，尚無法有具體的成果說明，不過透過相關講座介紹，可了解大致上設計原理，對日後鑑別相關產品在機器學習及人工智慧的應用程度，有一定的幫助。

四、 對於資安管理議題，多人提及工具使用越多不代表越安全，如何整合眾多產品在既有流程之中，對日後選擇資安產品會有更好的認識。

## 肆、 附錄

附錄 1：Genian NAC 設備型錄

附錄 2：RSAC 2019 Program Guide

# Genian NAC

Next-Gen Network Access Control for the IoT era

## ARCHITECTURE

Completely out-of-band, Highly scalable

Genian NAC uses Layer 2 based non-disruptive sensing technology powered by its Device Platform Intelligence.

### Actionable Intelligence For Cybersecurity

Genians has reimagined Network Access Control to maximize network security and IT operational effectiveness by leveraging its distinct Device Platform Intelligence (DPI).

DPI provides extremely accurate IT asset identification/classification based on its robust DPI, which allows for the full interrogation and gathering of all device platform information, combining technology-specific with business-contextual and risk-level data. DPI can enrich the way to manage IT security policies at a granular level.

### Essential Cybersecurity Solutions

Delivers the major solutions that encompass both IT security and operations management very effectively.

- Network Surveillance
- Network Access Control
- Mobile, BYOD, Guest Management
- IP Address Management (IPAM)
- Switch Port Management
- WLAN Security
- Endpoint Security
- IT Security Automation

### Multi-layered Access Control

Delivers the major solutions that encompass both IT security and operations management very effectively.

- Layer 2: ARP Poisoning (using Network Sensor)
- Layer 3: TCP reset (using Mirror Sensor)
- Layer 3: Inline enforcer (Dual-homed Gateway)
- Agent: NIC/Power Control, Alert Popup
- Built-in RADIUS server (802.1x)
- Built-in DHCP server

### Interoperability

Integrates a wide range of IT security and business solutions (Firewall, IDS/IPS, VM, MDM, SIEM, APT, DLP, CMDB etc.) into each enterprise's Policy Server to ensure unified policy enforcement. Genian NAC supports custom integration using SNMP, Webhook, REST API, and Syslog.

### Personalization

Monitors your network through personalized dashboards (Over 100 custom widgets to meet your network management needs).

### Pricing

Simple! Genian NAC license model is based on the number of active devices. Nothing else.

- Validate device platform information via the cloud
- Delivers the most accurate up-to-date device platform information to Policy Servers on a weekly basis

- Establishes security policies based on Node information collected by Network Sensors and Agents
- Distributes established policies to Network Sensors and Agents
- Integrates with user database and third-party security solutions
- Includes Built-in DHCP, RADIUS, Syslog server

\* Can be hosted On-Prem or in the Cloud

- Scans and assesses networks (Wired, Wireless, Virtual)
- Detects all SSIDs by listening wifi signals
- Identifies who is accessing enterprise-owned, neighbor or rogue APs
- Enforces access control policies
- Supports 802.1q Trunk Port

\* Optional

- Manages installed HW/SW information
- Detects state changes in real time
- Performs incremental updates
- Controls all desktop configurations
- Provides Wireless Connection Manager (EAP-GTC)
- Supports Windows/macOS /Linux
- Lightweight Agent

You can install the Policy Server and Network Sensor software in either your Virtual or Physical machines (Intel Xeon or equivalent).

## EDITIONS & VERSIONS

You Choose, We Deliver

Choose the edition that best meets your business requirements. Upgrade between editions as your network evolves without losing your original investment. The editions can be delivered in 3 different ways:

	BASIC Network Surveillance	PROFESSIONAL Network Access Control	ENTERPRISE Automation
On-Premises	Free up to 300 devices*	30 days free trial	Contact a Genians Partner
Cloud-Managed Policy Server in the Cloud	30 days free trial Support up to 3,000 devices*		
MSP-Ready NAC as a service	Contact Genians		

\* Only count the number of active devices

## EDITIONS & FEATURES

CATEGORY	FEATURES	BAS	PRO	ENT
Visibility	Detect/Monitor IP-enabled Device	•	•	•
	Device Platform Intelligence (Name, Type, Picture, EOL, Connection, CVE)	•	•	•
	Switch Port Information	•	•	•
	WLAN Monitoring / Security (Rogue AP)	•	•	•
	Basic Endpoint Information (OS, HW, Software) by Windows/macOS Agent	•	•	•
	Condition based Dynamic Node Group	•	•	•
	Customizable Dashboards (Over 100 Widgets)	•	•	•
	Track Changes / Audit Logs	•	•	•
	Network Anomaly Detection (MAC Spoofing, Rogue Gateway, Ad-hoc)	•	•	•
	Basic Reports (Node, WLAN, Log)	•	•	•
	Custom Reports		•	•
	User Authentication	Captive Portal Login		•
Active Directory SSO			•	•
External User Directory Integration (LDAP/RADIUS/SMTP/POP3/IMAP)			•	•
Multifactor Authentication (For both Admin and User)		•	•	•
Network Access Control	Role based Access Control		•	•
	ARP based Layer 2 Control		•	•
	802.1x based Control (RADIUS Server)		•	•
	Port Mirroring (SPAN) based Control		•	•
	Switch integration (SNMP) based Control		•	•
	DHCP Server		•	•
Desktop Management	Compliance Check (Antivirus, Required SW,HW, Desktop Settings)		•	•
	OS Configuration (Screenlock, Internet Options, DNS)			•
	OS Updates			•
	External Device Control (USB)			•
	802.1x Connection Manager			•
	WLAN Control (SSID Whitelist, SoftAP block)			•
Integration	User Directory Sync (RDBMS, LDAP)			•
	Webhook / Syslog / SNMP trap (Outbound)			•
	REST API (Inbound)			•
	Syslog Listener (Inbound)			•
Business Process	Consent Pages			•
	Request/Approval Process (IP, Device, User, External Device)			•
	Role based Administrator			•
	Customized Fields (Node, Device, User)			•
	Captive Portal Pages for Purposes			•
	Multilingual Support			•
Scalability and Availability	High Availability (Policy Server / Network Sensor)			•
	Interface Channel Bonding			•
	Disastor Recovery (DB Replication, Policy Server Backup)			•

GENERAL INFORMATION

As always, we thank you for being here and contributing to the critical cybersecurity conversations that take place at RSA Conference each and every year. It is our mission to bring cybersecurity professionals together to forward the industry and empower the collective “we.”

This year’s theme is, to put it simply, *Better*. Which means working hard to find better solutions. Making better connections with peers from around the world.

And keeping the digital world safe so everyone can get on with making the real world a better place.

RSA Conference is the time and the place to remind us to make security a top priority—this week, but also every day. A better, safer world is ahead when we have the drive, the strength and the vision to work together to create it. We hope you find inspiration in the brilliantly led sessions and keynotes, the cutting-edge technology in our Expo, and of course, the innovations showcased in RSAC Innovation Sandbox, RSAC Sandbox, RSAC Early Stage Expo and our brand new program, RSAC Launch Pad, taking place on Tuesday afternoon.

Thank you for being a part of this Conference. Enjoy the week of learning and networking ahead—and don’t forget to enjoy social time with your peers at the many special events throughout the week. We’re already looking forward to RSA Conference 2019 Asia Pacific & Japan in Singapore on July 16-18 and encourage you, or your colleagues in that part of the world, to join us there for deep, rich, regional and global cybersecurity conversations.

Until next time, let’s continue the conversations on [RSAConference.com](http://RSAConference.com) and through social media using [#RSAC](https://twitter.com/RSAC).

Sincerely,

Linda Gray Martin  
Director and Chief of Operations  
RSA Conference

## Download our Mobile App

Download the **RSA Conference 2019 Mobile App** to stay up-to-date with all the Conference activities happening throughout the week. Build your own personalized schedule, participate in polls for select sessions, and find your way around the RSAC Campus—which includes the Moscone Center and Marriott Marquis—with our maps. Visit [www.rsaconference.com/app1](http://www.rsaconference.com/app1) or scan this QR code to get started.

### LEVEL 2:

- Meeting Rooms
- Mothers' Room

### GOLDEN GATE LEVEL:

- All Access Seminar (Monday)
- First-Timers Orientation & Networking Reception (Monday)
- RSAC After Hours: Whiskey & Wine Tasting (Wednesday)
- RSAC College Day Exploring Infosec Careers Breakfast & Panel (Thursday)

### YERBA BUENA LEVEL:

- CyBEER Ops Networking Reception & International Meet-Up (Tuesday)
- Cybrew Café (Tuesday – Thursday)
- Law Track Sessions (Tuesday – Wednesday)
- Meeting Rooms
- RSAC College Day Open House & Sponsor Reception (Thursday)
- RSAC Early Stage Expo (Tuesday – Thursday)
- RSAC Innovation Sandbox Contest (Monday)
- RSAC Launch Pad (Tuesday)
- RSAC Sandbox (Tuesday – Thursday)

## MOSCONE NORTH

### STREET LEVEL:

- Mothers' Room
- Prayer Room
- Registration

### LOWER LEVEL:

- ATM
- Concessions
- First Aid
- Info Desk
- Mobile App Help Desk
- North Expo
- North Expo Briefing Center

## Street Eats

At RSA Conference, we always encounter our fair share of VHIPs—you know, *Very Hungry Infosec Professionals*. With options for all tastes, *Street Eats* is the easy way to fuel up between sessions or get energized before your next keynote. Stop by any of our four food trucks on Mission Street or our three food trucks on Howard. Oh, and don't forget to pack your appetite.

**Open Tuesday – Thursday, 11 AM – 2 PM**

*Street Eats is available to all pass types and both cash and credit cards are accepted.*

*More restaurants and food options are located in the Metreon, between Moscone North and the Marriott Marquis.*

# 7 minutes is all it took...

For the NotPetya attack to cripple one of the world's largest shipping companies.

The world needs smarter cybersecurity.

# HOTELS & SHUTTLES

GENERAL INFORMATION

Hotel shuttle pickup and drop off locations are indicated by the large starbursts on the maps below. Guests at nearby hotels should walk to the nearest pickup location for shuttle service to the Moscone Center. Locate the route color and number your hotel is served by, and walk to the pickup location indicated by the starburst listed for that route.

**Wheelchair accessible transportation** is available during hours of shuttle operation. Please call 415-377-3452 to schedule a pickup. Please allow at least 30 minutes for service.

## ON-SITE HOUSING DESK

Have a question about your hotel reservation? Our housing partner, onPeak, is here to assist. Housing Desks are located in Moscone West.

**No Shuttle Service will be provided to the Waterfront Hotel in Oakland.** Attendees booked within RSA Conference 2019 Official Housing Block through onPeak will receive a complimentary Clipper Card, valid for up to five round trips on BART and/or AC Transit to facilitate travel to RSA Conference. For more information visit our Public Transportation page.

## SHUTTLE SCHEDULE

Shuttles to and from San Francisco hotels and the Moscone Center run every 15 minutes during peak service hours and every 30 minutes during midday service hours. All shuttle drop offs and pick-ups at Conference are on Howard Street in front of Moscone South.

	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
<b>AM Peak Service</b> (Every 15 minutes)	7:00 AM – 10:00 AM	6:30 AM – 10:00 AM	6:30 AM – 10:00 AM	6:30 AM – 10:00 AM	8:00 AM – 10:00 AM
<b>Midday Service</b> (Every 30 minutes)	10:00 AM – 4:30 PM	10:00 AM – 4:30 PM	10:00 AM – 4:30 PM	10:00 AM – 4:30 PM	10:00 AM – 12:30 PM

# GENERAL CONFERENCE INFORMATION

## EMERGENCIES

If you require emergency medical attention or need other emergency assistance, please dial:

**Moscone Center:** Extension 511 from any white house telephone

**Marriott Marquis:** Extension 6666 from any house telephone

## SAFETY & SECURITY

For non-emergencies contact the venue's Security Team. **Moscone North/South:** (415) 974-4021, **Moscone West:** (415) 974-4117, **Marriott Marquis:** Extension 6666 or (415) 422-6081

For all other safety and security questions or to report anything suspicious, please contact the on-site RSAC Security team directly at (857) 208-9468.

### ADVANCED SESSIONS

New this year we have included an icon to help you better find the advanced content at the Conference. Look for the  next to session titles to locate advanced sessions.

### BROADCAST ALLEY

Hear that? It's buzz. And it's coming from Broadcast Alley, the unofficial newsroom of RSAC 2019 where top security publications shoot live at the Conference and record exclusive interviews with cybersecurity VIPs.

### BUSINESS CENTER

A Business Center is available for your convenience Tuesday, March 5 through Thursday, March 7, from 11 AM – 6 PM in Moscone South, Lower Level near Hall C. Applicable charges apply.

### CHARGING CUBES

Look for RSA Conference Charging Cubes in numerous seating areas around Moscone West, Moscone North Lower Level and RSAC Sandbox Marriott Yerba Buena 8. The charging cubes provide outlets to supply power to your devices.

### CONTINUING EDUCATION CREDITS\*

RSA Conference has partnered with several organizations to offer continuing education credits to attendees at RSA Conference 2019. Below is a list of accrediting organizations.

**ABA** • The American Bar Association Section of Science & Technology Law sponsors the Law Track at RSA Conference 2019. SciTech has applied for Continuing Legal Education Credits in many mandatory CLE states for all sessions in this track. To sign in for CLE credit, please visit the CLE Information Table during the Law Track Sessions. Contact SciTech at (312) 988-5599 with any questions.

**CompTIA** • RSA Conference 2019 attendees who are a part of CompTIA's Continuing Education (CE) Program can earn 1 CEU for each hour you attend, with a max earning depending on certification. Attendees will need to submit a detailed description of session content and provide their trip report based on scanned sessions during the Conference for support through CertMetrics to receive CEUs for a Conference session.

**GIAC** • Global Information Assurance Certification (GIAC) certification holders may earn up to 18 CPEs for attending applicable keynote and track sessions at RSA Conference 2019. Attendees will need to apply for proper credentials, and provide their trip report based on scanned sessions during the Conference for support.

**IAPP** • IAPP offers 12 CPE credits for RSA Conference 2019 attendees. Members will need to self-report attendance information for credits by completing a CPE application form and providing support documentation. For more information, go to <https://iapp.org/certify/cpe>.

**ISACA** • ISACA members are entitled to CPE credits for attending RSA Conference 2019. Members can qualify for 1 CPE credit for each applicable track and keynote session subject to ISACA approval. Members will need to self-report attendance information with a copy of the post-conference trip report (detailing sessions attended through badge scanning while onsite) as support of their request.

**(ISC)<sup>2</sup>** • (ISC)<sup>2</sup> members can earn up to 35 CPE credits for attending RSA Conference 2019. After the Conference, RSA Conference will provide (ISC)<sup>2</sup> with a list of attending (ISC)<sup>2</sup> member's name, membership number and applicable credits. Please note, we ask for members' (ISC)<sup>2</sup> membership number during the registration process.

### CLASSIFICATIONS

We offer three different session classifications focused on principles and concepts that are aligned with your experience: General Interest (All), Intermediate (5+ years) and Advanced (10+ years).

### COAT & BAG CHECK

Coat and bag check will be open in Moscone South and West Street Levels during registration hours and RSAC After Hours.

# GENERAL CONFERENCE INFORMATION

**CODE OF CONDUCT** To view our code of conduct statement please visit [www.rsaconference.com/about/code-of-conduct](http://www.rsaconference.com/about/code-of-conduct).

**CONFERENCE BOOKSTORE** DigitalGuru brings you the latest information security titles at special discounted rates, plus exclusive speaker Q&A and book signings. Don't miss this opportunity. Just stop by the bookstore located in Moscone South, Esplanade Level, for the latest schedule of signings, and arrive early for the biggest names! Also, all RSAC attendees receive 20 percent off all purchases. **Book signings will be held in the Conference Bookstore, so be sure to look for dates and times on-site or on the Mobile App.**

**CYBREW CAFÉ** The Cybrew Café, our full-service coffee bar, will be serving your favorite beverages in the RSAC Sandbox in the Marriott Marquis. Be sure to stop by daily for your caffeine fix! Open Tuesday through Thursday.

**DATA COLLECTION** RSA Conference does not share your information directly with exhibitors or sponsors unless you have opted to do so. By allowing your badge to be scanned when visiting an exhibitor or sponsor booth, you signify your consent to receive communications directly from that exhibitor. You will be subject to their communications and privacy policy, and must opt out with them individually.

**DIVERSITY & INCLUSION** At RSA Conference, we've always strived to bring people together across the spectrum of genders, ethnicities, backgrounds and experiences. After all, inclusion makes us stronger—both as an industry and as individuals. And now we're deepening our commitment to these values through our diversity and inclusion (D&I) initiative.

**DRONES POLICY** The use of drones/unmanned aircrafts (UAVs) is strictly prohibited at all times throughout the RSAC campus and adjacent outside areas. UAVs are devices intended to be used for flight with no onboard pilot. RSA Conference reserves the right to remove any such UAVs at its sole discretion.

**EVALUATIONS** Your input helps us develop valuable, relevant content for future RSA Conferences. Plus, your feedback is provided to speakers after the Conference. Fill out your evaluations within the mobile app or through the email you receive listing your session attendance. All completed evaluations will be entered into a daily drawing for a pair of Apple® AirPods and a weekly grand prize of a GoPro® HERO7.

Visit Microsoft  
at Booth N 6059  
in the North Expo

Learn how your organization can:

- Secure Identities to reach zero trust
- Help stop damaging attacks with integrated and automated security
- Locate and classify information anywhere it lives
- Strengthen your security posture with insights and guidance

# GENERAL CONFERENCE INFORMATION

<b>FIRST-TIMER PROGRAMS</b>	We've created several programs for First-Timers with Full Conference Passes to help make Conference navigation easier. With events scattered throughout the week, you can take advantage of an orientation, a networking reception, and exclusive meet-ups to help everything go smoothly.
<b>GENDER NEUTRAL RESTROOMS</b>	There are three gender neutral restrooms located in Moscone North & West and the Marriott Marquis which are available to all attendees.
<b>LOST AND FOUND</b>	If you find someone's property, please drop it off at one of the information desks where it will be secured until it is returned to its rightful owner. If you lose property, please go to an information desk and fill out a lost property report.
<b>MEDICS</b>	Medics will be onsite in the following locations during the operating hours of the Conference: Moscone North outside of Hall F, (415) 974-4096; Moscone South outside of Hall C, (415) 974-4090; and Moscone West Street Level, (415) 974-4159.
<b>MOTHERS' ROOM</b>	For nursing mothers, we have provided private spaces in Moscone North 115 and Marriott Foothill I. Mothers' rooms are open during all hours of the Conference. Check at the closest Information Desk for access instructions.
<b>PHOTOGRAPHY AND VIDEO</b>	RSA Conference is held in a public space; therefore we do not prohibit photography of Conference activities. However, videotaping does require advanced approval. Requests to videotape any session must be approved by both RSAC and the speaker. Send requests to videotape to <a href="mailto:rsaconf@shiftcomm.com">rsaconf@shiftcomm.com</a> . Keep in mind that the Moscone Center is a union facility where certain unions have jurisdiction related to video recording and will require you to follow those guidelines. RSA Conference reserves the right to use images or video taken at the Conference with your photograph and/or likeness in future marketing materials.
<b>POLLING</b>	You know what makes RSAC great? You. And by participating in select session polls, you can help make us even better. In select sessions, use the RSAC Mobile App to answer a few quick questions on your experience, and view your and other attendees' responses in real-time.
	
<b>PRAYER ROOM</b>	A prayer room for attendees will be available in Moscone North 114.
<b>PRESS ROOM</b>	The Press Room is located in Moscone South 209 and is open to all registered Press. Hours of operation: Monday, March 4 9:00 AM – 7:00 PM Thursday, March 7 7:00 AM – 6:00 PM Tuesday, March 5 7:00 AM – 7:00 PM Friday, March 8 7:00 AM – 12:00 PM Wednesday, March 6 7:00 AM – 7:00 PM
<b>PRIVACY POLICY</b>	To view our full privacy statement please visit <a href="https://www.rsaconference.com/dellprivacy">https://www.rsaconference.com/dellprivacy</a>
<b>REPLACEMENT BADGES</b>	Attendees and exhibitors are required to wear Conference badges to all Conference functions, including evening events. Badges are not transferable. Please be careful with your badge and badge holder! If you lose your badge and/or badge holder, you will be required to purchase a new one for a <b>fee of \$100</b> . If you find a misplaced badge, please return it to Registration.
<b>RSAC CISO BOOT CAMP</b>	CISOs carry the weight of the world's security on their shoulders. Leading cybersecurity teams. Building effective security strategy. It's all in a day's work. In this inaugural, invite-only program, 100 CISOs will gather, partner and collaborate for 1½ days to learn about new strategies and techniques for securing their organization and will have every opportunity to share their professional insights with equally experienced peers.
<b>RSAC ONDEMAND</b>	RSAC onDemand is a great way to experience highlights of RSA Conference—online. A complimentary feature for all pass holders, RSAC onDemand lets you catch up on some of the most looked-forward-to moments from Conference—or even re-watch your favorites—live or on-demand. To learn more about RSAC onDemand, visit <a href="https://rsaconference.com/ondemand2">rsaconference.com/ondemand2</a> .
<b>RSAC SECURITY OPERATIONS CENTER</b>	Take a tour of a working SOC! Head to the Moscone South Lower Level for the RSA Conference Security Operations Center. See what's really taking place on the Moscone Wireless Network in real time.
	Sponsored by: 
<b>SAFE WALK PROGRAM</b>	Working in conjunction with San Francisco Travel, increased patrols will be in place in and around official RSAC hotels not serviced by RSAC bus routes. Additional information on paths of travel and on-demand services is available at the designated walking-distance hotels.

# GENERAL CONFERENCE INFORMATION

## SESSION PRESENTATIONS

Session presentations are posted online at [www.rsaconference.com/downloads2019](http://www.rsaconference.com/downloads2019). You can download the presentations by searching on the Sessions & Events page.

## SHUTTLE DROP OFF LOCATIONS

Shuttle service is offered from a variety of participating hotels and is available to drop you off at Moscone Center South Driveway. Please refer to pages 12 – 13 for a map and list of hotel pickup and drop-off locations, routes and shuttle hours.

## STREET EATS

Stop by any of our food trucks on Mission Street or Howard Street. Open Tuesday through Thursday from 11 AM to 2 PM. Street Eats is available to all pass types and both cash and credit cards are accepted.

## TOP RATED SPEAKERS

Speakers whose scores are above 4.3 (on a scale of 1 to 5) for two or more conferences for individual or co-speaker sessions only are indicated with a top rated symbol in the session detail pages.

## TRIP REPORT

We're making it easier for you to share your RSA Conference experience with your colleagues. You'll receive a post-Conference email listing the sessions you attended and the exhibiting companies you visited. Session information will include a link to the location on the RSA Conference website where presentation PDFs can be found. Exhibitor information will include links to each of the exhibiting companies you visited. Please note, you'll receive information ONLY for the sessions you attended and the exhibitors you visited, for which your badge was scanned. Trip reports will be available on request 90 days post-Conference at no cost. After 90 days there will be a \$60 charge per request.

## WHEELED TRANSPORT DEVICES POLICY

Wheeled transport devices (with or without motors) are not permitted at any RSA Conference venue. This includes hoverboards, skateboards, uniwheels and all similar products. Wheelchairs and ADA-compliant mobility scooters are permitted.

## WIRELESS INTERNET

Free wireless is available in select Conference areas. Connect to SSID: **.RSACONFERENCE** (subject to terms and conditions). *Important! The wireless network available at the Moscone Center and Marriott Marquis is an open, unsecured 5 GHz network. Also note that this year, RSA and Cisco AMP Threat Grid will be using data from the Moscone Wireless Network for an educational demonstration on a working SOC. We strongly recommend that you use appropriate security measures, such as utilizing a VPN connection, installing a personal firewall and keeping your operating system up-to-date with security patches. We recommend turning off your wireless adapter when not in use and ensuring ad-hoc (peer-to-peer) capabilities are disabled on your device.*

**CYBERSECURITY  
DOESN'T NEED  
MORE TOOLS.  
IT NEEDS  
NEW RULES.**

The new rules are changing the way we see security. Visit Booth N 5759 or [ibm.com/security](http://ibm.com/security) to find out how.

# THE MARRIOTT MARQUIS

GENERAL INFORMATION

You're not going to want to miss all of the action happening on the Yerba Buena Level of the Marriott Marquis.

## RSAC INNOVATION SANDBOX CONTEST

The RSAC Innovation Sandbox Contest has crowned the Most Innovative Startups who create cutting-edge technologies to minimize infosec risk for the past 14 years! Come witness the Top 10 Finalists grab the spotlight for a three-minute pitch while demonstrating groundbreaking security technologies to the broader RSA Conference community.

WSJ **PRO** CYBERSECURITY

### AGENDA – MONDAY, MARCH 4, 2019

1:30 PM	<b>Doors Open</b>
1:45 PM – 2:00 PM	<b>Opening Remarks</b> <i>Hugh Thompson, Program Committee Chairman, RSA Conference</i>
2:00 PM – 3:30 PM	<b>Top 10 Finalists Presentations</b> Three-minute pitches followed by Q&A with judges.
3:30 PM – 4:15 PM	<b>Audience Meet and Greet with Top 10 Finalists</b> While judges debate the winner, the audience has the opportunity to meet with the Top 10 Finalists and learn more about their solutions.
4:15 PM – 4:30 PM	<b>Judges Panel</b> RSAC Innovation Sandbox judges will invite the top contestants on stage to share their impressions of the selected companies, providing advice to guide the companies as they move forward.
4:30 PM	<b>Announcement of Winner</b>

## RSAC SANDBOX

The RSA Conference Sandbox is full of hands-on interactive experiences to test your infosec skills. Demo and discuss how pervasive computing and connectedness will inevitably lead to a broader threat landscape in healthcare and business; expand your thinking about threats to smart cities, electric grids and industrial processing plants; learn more about wireless hacking and vulnerabilities in radio frequency devices, and challenge your infosec skills. See the following pages for times and event descriptions.

<b>HOURS:</b>	Tuesday, March 5	4:45 PM – 6:30 PM*
	Wednesday, March 6	8:00 AM – 4:00 PM
	Thursday, March 7	8:00 AM – 3:30 PM

\* Open to Full Conference Pass holders, Tuesday One-Day Full Conference Pass holders, Press and CyBEER Ops ticket holders only.

Exclusive RSAC Sandbox Media Sponsor:

## RSAC EARLY STAGE EXPO

The RSAC Early Stage Expo is the perfect megaphone for emerging infosec startups. Interested in seeing the new innovations they are bringing to the table? Meet over 50 of the industry's most promising newcomers by visiting their kiosks or sitting in on a short demo at the Early Stage Expo briefing center.

<b>HOURS:</b>	Tuesday, March 5	4:45 PM – 6:30 PM*
	Wednesday, March 6	8:00 AM – 4:00 PM
	Thursday, March 7	8:00 AM – 3:00 PM

\* Open to Full Conference Pass holders, Tuesday One-Day Full Conference Pass holders, Press and CyBEER Ops ticket holders only.

Exclusive RSAC Early Stage Expo Media Sponsor:

## RSAC LAUNCH PAD

Brand-new to RSA Conference, RSAC Launch Pad is a springboard for great solutions to cybersecurity's pressing challenges. Inspired by the RSAC Innovation Sandbox Contest, RSAC Launch Pad is designed to give new talent a platform to share their brilliant industry solutions. Watch three selected participants give a 10-minute pitch on their groundbreaking products to a panel of leading security venture capitalists, including Enrique Salem, Ted Schlien and Theresia Gouw, and see who will walk away with investments that could take their company to the next level.

### AGENDA – TUESDAY, MARCH 5, 2019

3:50 PM	<b>Doors Open</b>
4:00 PM	<b>Welcome by Hugh Thompson and Introduction of Venture Investors</b>
4:05 PM – 4:40 PM	<b>Company Pitches</b> Three companies each have 10 minutes to pitch their companies and answer questions from the Venture Investors.
4:40 PM	<b>Event Close and Networking</b> The first annual RSAC Launch Pad event wraps up and is immediately followed by the CyBEER Ops Networking Reception & International Meet-Up.

*This event is open to Full Conference Pass holders, Tuesday One-Day Full Conference Pass holders, Press and CyBEER Ops ticket holders.*

# ALL THREATS. ONE PLATFORM.

## RSAC SANDBOX HOURS

<b>Tuesday, March 5*</b>	4:45 PM – 6:00 PM
<b>Wednesday, March 6</b>	8:00 AM – 4:00 PM
<b>Thursday, March 7</b>	8:00 AM – 3:30 PM

\* Open to Full Conference Pass holders, Tuesday One-Day Full Conference Pass holders, Press and CyBEER Ops ticket holders only.

## SANS NETWARS IN THE RSAC SANDBOX

SANS Core NetWars Experience is a hands-on information security challenge developed to build and enhance your skills as an infosec professional. Compete with your peers through progressively difficult challenges. Score points on our interactive scoreboard either by yourself or in a team of up to five players. SANS NetWars was designed for novice (hints available) to advanced professionals and covers various aspects of penetration testing, forensics, defense, and your ability to rely on your experiences and problem-solving skills to navigate from Level 1 through Level 5 of gameplay.

SANS NetWars seating is limited to 40 players. Seats will be available on a first-come, first-served basis.

### WEDNESDAY, MARCH 6

8:10 AM – **SANS Core NetWars Experience** SBX2-W1  
10:10 AM **Chris Elgee**, Builder & Breaker, Counter Hack Challenges

10:50 AM – **SANS Core NetWars Experience** SBX2-W2  
12:50 PM **Chris Elgee**, Builder & Breaker, Counter Hack Challenges

1:40 PM – **SANS Core NetWars Experience** SBX2-W3  
3:40 PM **Chris Elgee**, Builder & Breaker, Counter Hack Challenges

### THURSDAY, MARCH 7

8:00 AM – **SANS Core NetWars Experience—Intro to Capture the Flag** SBX2-R1  
9:30 AM **Chris Elgee**, Builder & Breaker, Counter Hack Challenges; Co-hosted by **Women's Society in Cyberjutsu (WSC)**

11:40 AM – **SANS Core NetWars Experience** SBX2-R2  
1:40 PM **Chris Elgee**, Builder & Breaker, Counter Hack Challenges

## WIRELESS VILLAGE SANDBOX

The Wireless Village Sandbox is a group of experts in the areas of information security, WiFi and radio communications with the common purpose to teach the exploration of these technologies. We provide the very best in Wireless Capture the Flag (WCTF) which was designed to allow for active real time and real-world practice with the radio frequency (RF) tools to promote learning on cutting-edge topics as they relate to radio communications. This year for RSA Conference we will have some great mini competitions and Fox and Found events for you to test your skills, whether they were just learned or if you are a seasoned veteran. Come for the talks, stay for the practice and the competition.

### WEDNESDAY, MARCH 6

9:30 AM – **Hunting and Tracking Rogue Radio Frequency Devices** SBX3-W1  
10:30 AM **Eric Escobar**, Principal Security Consultant, SecureWorks

1:50 PM – **First Steps in RF: Lessons Learned** SBX3-W2  
2:50 PM **Dave Weinstein**, Software Engineering Manager, Google

### THURSDAY, MARCH 7

8:00 AM – **Wireless Offense and Defense, Explained and Demonstrated!** SBX3-R1  
9:00 AM **Rick Farina**, Senior Product Manager, WLAN Software Security, Aruba; **Rick Mellendick**, Chief Security Officer, Process Improvement Achievers LLC

11:30 AM – **Bluetooth Reverse Engineering: Tools and Techniques** SBX3-R2  
12:30 PM **Mike Ryan**, Founder, ICE9 Consulting

## INDUSTRIAL CONTROL SYSTEMS SANDBOX

As the backbone of modern society, vulnerabilities in industrial control systems (ICS) has come to the forefront of businesses, governments and organizations. This year, ICS will conduct a deeper dive into the Industrial Internet of Things, simulate an ICS cyberattack and think through implications of smart cities on the grid. Visit the ICS Village Sandbox for demos and talks that will be held throughout each day.

### WEDNESDAY, MARCH 6

- 10:50 AM – **SCADA Attack Detection 101** SBX4-W1  
 11:20 AM **Oleg Kolesnikov**, Vice President of Threat Research / Cybersecurity, SECURONIX; **Harshvardhan Parashar**, Security Researcher, SECURONIX
- 
- 11:20 AM – **Debunking the Hacker Hype: The Reality of Widespread Blackouts** SBX4-W2  
 11:50 AM **Selena Larson**, Intelligence Analyst, Dragos, Inc.
- 
- 3:00 PM – **Cybersecurity and Privacy: The Two Main Tenets in the Smart City Project** SBX4-W3  
 3:30 PM **Panel Discussion**  
 MODERATOR: **Maryam Rahmani**, Global Partnership Officer, Global Cyber Alliance  
 PANELISTS: **Tony Batalla**, Head of IT, San Leandro City; **Lan Jenson**, CEO, Adaptable Security Corp; **Sokwoo Rhee**, Associate Director of Cyber-Physical Systems Innovation, National Institute of Standards and Technology
- 
- 3:30 PM – **Safety Systems Are the New Target: Design Security Using Safety Methods** SBX4-W4  
 4:00 PM **Marty Edwards**, Director of Strategic Initiatives, International Society of Automation (ISA)

### THURSDAY, MARCH 7

- 9:10 AM – **How Long to Boom: Understanding and Measuring ICS Hacker Maturity** SBX4-R1  
 9:40 AM **Sergio Caltagirone**, Director, Threat Intelligence, Dragos
- 
- 9:40 AM – **I Belong Here** SBX4-R2  
 10:10 AM **Michelle Mullinix**, Digital Analysis and Investigations, Executive Office For US Attorneys
- 
- 1:10 PM – **Hunt Advanced Attackers on a Budget Less than the GDP of a Small Country** SBX4-R3  
 1:40 PM **John Strand**, Owner, Black Hills Information Security
- 
- 1:40 PM – **Internal Affairs: Building Incident Command Frameworks through Diplomacy** SBX4-R4  
 2:10 PM **Dana-Megan Rossi**, Assoc. Director, Product Security Policy, Strategy & Incident Response, Becton, Dickinson and Company

## INTERNET OF THINGS SANDBOX

IoT Village™ delivers expertise advocating for security advancements in Internet of Things (IoT) devices. This exhibit highlights vulnerable connected devices and groundbreaking security research found in devices as common as smart cameras to devices as complex as medical devices. Experience thought-provoking talks by expert security researchers who dissect real-world exploits and vulnerabilities and analyze the impact on consumer and business environments.

### WEDNESDAY, MARCH 6

- 8:30 AM – **Internet of Food: How IoT Threatens Fields, Farms and Factories** SBX1-W1  
 9:00 AM **Ryan Flores**, Senior Manager Threat Research, Trend Micro; **Akira Urano**, Senior Threat Researcher, Trend Micro
- 
- 9:00 AM – **Shadow IoT Hacking the Corporate Environment: Office as the New Smart Home** SBX1-W2  
 9:30 AM **Ondrej Vlcek**, Chief Technology Officer, Avast
- 
- 12:40 PM – **Yet Another IoT Hack** SBX1-W3  
 1:10 PM **Joshua Meyer**, Associate Security Analyst, Independent Security Evaluators
- 
- 1:10 PM – **The Emerging Grey App Threat—Mobile Kids Apps are Gateway to Parents** SBX1-W4  
 1:40 PM **Frances Dewing**, CEO, Rubica

### THURSDAY, MARCH 7

- 10:20 AM – **Run for Your Life—No Literally—Do It!** SBX1-R1  
 11:00 AM MODERATOR: **Lisa Green**, Director, People Relations, Independent Security Evaluators  
 PANELISTS: **Katie Curran**, Information Security Engineer, Blackline; **Kat Fitzgerald**, Principal Security Architect, Zebra Technologies; **Xena Olsen**, Cyber Threat Intel Analyst, Discover Financial Services
- 
- 11:00 AM – **Hello? It's Me, Your Not So Smart Device. We Need to Talk.** SBX1-R2  
 11:30 AM **Alex Balan**, Chief Security Researcher, Bitdefender
- 
- 2:20 PM – **Internet of Laws: Navigating the IoT Legal Landscape** SBX1-R3  
 2:50 PM **Amit Elazari**, Director, Global Cybersecurity Policy, Intel Corporation, and Lecturer, UC Berkeley School of Information (MICS)
- 
- 2:50 PM – **U-Boot, I-Hack** SBX1-R4  
 3:20 PM **Andrew Bindner**, Manager, Penetration Testing, Rapid7; **Carlota Bindner**, Security Associate, Rapid7

# RSAC<sup>®</sup> Security Scholar

RSA Conference Security Scholar connects 80 of the brightest up-and-coming cybersecurity students with leading experts, peers and Conference attendees. The goal of the program is to share knowledge, experience and connections to enrich the discourse on how to stay ahead of cyberthreats.

Come by and meet the RSAC Security Scholar Class of 2019 at the Poster Board Exhibition on Wednesday, March 6, from 2 PM to 3 PM in Moscone West, Level 2.

PREMIER RSAC SECURITY SCHOLAR AND RSAC COLLEGE DAY SPONSORS:

# RSAC AdvancedU

RSAC AdvancedU teaches cyber-awareness for children, provides outreach to college students to encourage a career in information security and supports education throughout the various stages of a career within the industry. RSAC AdvancedU includes the following pillars:

## RSAC CYBERSAFETY INITIATIVE

The RSAC CyberSafety Initiative raises awareness of the dangers you face when you are online. In the *RSAC CyberSmart Parents Education Seminar—Keeping Your Family Safe Online* we share the latest research on the online lives and habits of teens and parents.

## RSAC SECURITY SCHOLAR

RSAC Security Scholar program works with participating universities to identify 80 college students to attend RSA Conference to learn about the evolving information security industry, forge lasting connections within the community, engage with renowned industry experts and participate in unique learning and team-building events.

## ASSOCIATION CREDITS

Our Association Credits program partners with leading information security education associations, such as GIAC, (ISC)<sup>2</sup> and ISACA, to give attendees the opportunity to receive Continuing Professional Education credits to maintain critical certifications.

## RSAC COLLEGE DAY

Offered FREE to current students or recent 2018 graduates, the annual RSA Conference College Day program is the place to explore career options, hear from the best in the field, and network with leading companies looking for professionals to join their workforce.

Participants enjoy two days of Full Conference privileges on Thursday, March 7, and Friday, March 8, 2019, which gains them access to over 150 sessions and keynotes, and over 650 exhibitors. Students are also invited to an exclusive networking breakfast with sponsor panel and evening open house to meet some of the industry's top professionals and corporate sponsors.

Check out the agenda at:  
[www.rsaconference.com/collegeday](http://www.rsaconference.com/collegeday)

RSAC SECURITY SCHOLAR AND RSAC COLLEGE DAY PREMIER SPONSORS:

Automate your security.

See your network.

Protect your clouds.

JUNIPER

# DELIVERY FORMATS

Absorb content and hear differing perspectives through a variety of innovative methods during RSA Conference 2019.

## BIRDS OF A FEATHER\*

Come join us for the Birds of a Feather sessions mornings (7 – 7:50 AM) and afternoons (12:40 – 1:30 PM) on Wednesday and Thursday! Grab your breakfast or lunch and bring it to the discussion rooms. Some topics are pre-defined and led by speakers, others will develop organically; by design, this is loosely structured to give you an opportunity to network and set the agenda for discussions of interest to you. Only open to Full Conference Pass holders.

**Note: Press is not permitted in Birds of a Feather sessions.**

## CLASSROOM

Classroom sessions are traditional presentations delivered by one to two presenters, following slide decks that are available from the Conference site. Presentations are concluded with audience Q&A.

## LEARNING LABS\*

Learning Labs provide highly interactive, facilitated learning experiences. All of the content is very hands-on and small group oriented. Seating is limited in Labs, assuring maximum engagement and participation. Labs are open to Full Conference attendees only; utilize Reserve a Seat to schedule your participation. Due to the popularity of the Learning Labs, you can only reserve one Lab on your schedule, so pick carefully from our 20 great offerings.

**Note: Press is not permitted in Lab sessions.**

## NORTH & SOUTH EXPO BRIEFING CENTERS

Get tactical help with the pressing challenges you face each day. Technical experts from our Expo vendors present short demonstrations to help you make strategic plans and purchase decisions for your organization.

# RSAC<sup>®</sup> After Hours

# BETTER.

## More options. More fun. **RSAC After Hours.**

Blow off some steam with **RSAC After Hours**. Previously called the “RSAC Bash,” RSAC After Hours offers Full Conference and Discover Pass holders the chance to hang out with industry peers and colleagues in a setting of their choice. Choose one of our three unique RSAC After Hours events on Tuesday, Wednesday and Thursday nights of Conference.

### RSAC After Hours: Game Night

**Tuesday, March 5, 7:00 – 9:30 PM**  
Moscone West, Level 2

As a cybersecurity all-star, you’ll enter the event with VIP treatment. Then it’s off to the races. In the Full Court, you’ll go head to head with other industry players in our arcade and game hall. Then take a load off in the sports lounge and bar, complete with a live DJ and tailgate-themed refreshments. And at 7:30, the night really gets going as the Celtics face off against the Warriors—live and on the big screen. It’s cybersecurity’s biggest game of the year, and trust us, you don’t want to miss any of the action.

### RSAC After Hours: Whiskey & Wine Tasting

**Wednesday, March 6, 6:30 – 8:00 PM,**  
Marriott Marquis, Golden Gate B

What pairs well with RSAC 2019? A whiskey & wine tasting, of course. Kick off the night with a walk through the “underground cellar.” Then, gather in the lounge to sip on an assortment of wines and whiskeys expertly selected from local vineyards and distilleries while soaking up the jazzy sounds of our live band. And keep the night going in our group tasting area, where you can mingle with other cybersecurity connoisseurs and raise a glass to another great year at RSA Conference.

### RSAC After Hours: Comedy Club

**Thursday, March 7, 6:30 – 8:30 PM,**  
Moscone South, South Stage

You’re good for a network backup. How about a laugh? Get your fill at RSAC After Hours: Comedy Club. Stroll in and strike a pose on the red carpet before taking your seat in the front row of our very own comedy club. Serving up bottomless laughs—plus delicious food and cocktails—some of the funniest comedy acts around will take the stage, adding some good humor to a busy week. Now, who said cybersecurity professionals were all business?

**Flexibility. Fun. What’s not to love?**

Space is limited so be sure to reserve a seat for your RSAC After Hours event today.

# DELIVERY FORMATS

## PANEL DISCUSSIONS

Panel sessions are traditional format, featuring a moderator and several panelists representing different viewpoints. The discussions are concluded with audience Q&A.

## PEER2PEER SESSIONS\*

P2P sessions enable groups of no more than 30 people that share a common interest to come together and productively explore a specific security topic, with discussion facilitated by an experienced practitioner. **Note: Press is not permitted in Peer2Peer sessions.**

## RSAC EARLY STAGE EXPO BRIEFING CENTER

Get tactical help with the pressing challenges you face each day. Technical experts from our Early Stage Expo exhibitors present short demonstrations showcasing new approaches from up and coming vendors.

\* Open to Full Conference Pass holders only.

† Trainings and Tutorials are offered for an additional fee.

## RSAC SANDBOX

RSAC Sandbox 2019 offers hands-on experiences addressing, discussing and simulating threats and vulnerabilities in IoT devices, wireless networks and industrial control systems. It also features the SANS NetWars experience, where you can challenge your infosec skills. The Sandbox is open to all badge types, except on Tuesday when it's open to Full Conference Pass holders, Tuesday One-Day Full Conference Pass holders, Press and CyBEER Ops ticket holders only.

## SEMINARS

Start your Conference week on a high note, meeting other practitioners and engaging in these focused Monday seminars. Our seminar portfolio and topics have expanded this year, so be sure to explore all of the options.

Check the appropriate sessions details pages (pp. 41 – 43) for access information. Some seminars are open to all badge types and some seminars are only open to Full Conference and Discover Pass holders.

## TRAININGS & TUTORIALS<sup>†</sup>

Immerse yourself in intensive, skill-building two-day sessions on Sunday/Monday of Conference week. Trainings & Tutorials are led by respected authorities from the **SANS Institute, CSA, ISACA** and **(ISC)<sup>2</sup>**. Please note, the Trainings & Tutorials are available for purchase.

Instead of just stopping threats, learn why human-centric cybersecurity is not just the fastest way to proactively identify risk and protect your people, critical data, and networks —it's the only path to long-term success.

### Forcepoint Speaking Session

#### Who Watches the Watchers: IP Protection for Privileged Users

- Dr. Richard Ford, Chief Scientist at Forcepoint
- Location: Moscone South Esplanade 151
- Wednesday, March 6 from 2:50 to 3:40 p.m.

It's time for  
**human-centric  
cybersecurity**

Visit us at booth  
**N 5969**

 **FORCEPOINT**

# TRACKS

## ANALYTICS, INTELLIGENCE & RESPONSE

**[AIR]** Analytics, Intelligence & Response covers the application of investigative and analytic techniques that help organizations anticipate, identify, contain, investigate and resolve incidents in the enterprise. It also explores threat intelligence gathering, automating response and sharing across technologies and organizations.

## APPLICATION SECURITY & DEVSECOPS

**[ASEC]** Application Security & DevSecOps focuses on secure software development as well its intersection with security operations. Sessions will focus on sharing real-world, enterprise-level experience, covering topics such as secure application design, secure configurations, containerization and secure development methodologies.

## ASSOCIATION SPECIAL TOPICS

**[AST]** Navigate the association landscape and learn about opportunities in training, best practices, credentialing, special programs, and career development from leaders in the field.

## BLOCKCHAIN & APPLIED CRYPTO

**[BAC]** Explore emerging use cases and practical applications for this rapidly changing, transformative technology. Topics include encryption, distributed ledgers, cryptocurrency, decentralized identity, tokenization, key management, homomorphic encryption and the implications of quantum computing on encryption.

## BRIDGING THE GAP: CYBERSECURITY + PUBLIC INTEREST TECH

**[PITC]** A new field is emerging—a community of people using their skills in technology to change the world for the better: the professional field of public interest technology. There is a need to bridge the gap between what technologists are trying to build and what social scientists are trying to address. Join us for an inspiring track with cybersecurity expert Bruce Schneier and over a dozen leading security, civic and social sector leaders.

*Brought to you by Bruce Schneier and the Ford Foundation*

## C-SUITE VIEW

**[CXO]** This track focuses on the intersection of business and security. It features experiences and opinions of CXOs, communicating cyber-risk to the board, and the latest trends and issues in information security that impact the executive suite.

## CLOUD SECURITY & VIRTUALIZATION

**[CSV]** The Cloud Security & Virtualization track includes sessions on the security aspects of using and leveraging cloud services, virtualization technologies/services, segmentation, deployment models, network function virtualization and hybrid architectures.

## CRYPTOGRAPHY

**[CRYP]** This academically focused and refereed track for mathematicians and computer scientists offers presentations of the very latest papers about the science of cryptography.

## CYBERSECURITY FUTURE PROOF: 2025

**[CSFP]** What does the world look like in 2025? What technology, process and staffing considerations should you be making now to prepare for whatever may lie in the future to put you ahead of the adversary? Cybersecurity Future Proof: 2025 delivers a rare look into the security crystal ball and includes traditional presentations and interactive lab-like sessions, designed for the cross-section of RSA Conference attendees from technology, business, academia, policy and law, to help frame your future thinking.

## GOVERNANCE, RISK & COMPLIANCE

**[GRC]** This track covers the creation and implementation of risk management frameworks, compliance-related sessions on standards, and instituting governance across the extended enterprise. This track also contains sessions on a wide variety of security metrics and measurements.

## HACKERS & THREATS / HACKERS & THREATS ADVANCED (two tracks)

**[HT]** & **[HTA]** Hackers & Threats sessions include discussions around the growing underground economy, advanced threats, ransomware, cyber-weapons, new classes of vulnerabilities, exploitation techniques, reverse engineering, and how to combat these problems. The second track, Hackers & Threats Advanced, is technically advanced and will include live demos and code dissection.

## HUMAN ELEMENT

**[HUM]** This track explores how people make trust choices, innovative ways to secure the human, and how classic attacks and emerging threats now include a human element. Topics include social networking/engineering, insider threats, information operations, and user behavior analytics.

## IDENTITY

**[IDY]** This track covers the processes, technologies and policies for managing and controlling digital identities across the extended enterprise.

## KEYNOTES

**[KEY]** RSAC keynote speakers are inspiring leaders, thinkers, and innovators that will share perspectives and knowledge on the information security industry. Don't miss the action on two stages this year: South and West.

## LAW

**[LAW]** The Law track explores topics ranging from unintended consequences due to legislation, legal rulings, liability, and emerging issues on the legal landscape.

Sponsored by:

## MACHINE LEARNING & ARTIFICIAL INTELLIGENCE

**[MLAI]** Sessions examine the applications and limitations of machine learning and artificial intelligence in cybersecurity, exploring fundamentals, applications, potential to address workforce shortages, automation, and future evolution of capabilities.

**MOBILE & IoT SECURITY**

**[MBS]** This track provides focused discussion on policies, processes and technologies for managing mobile security in the enterprise, including device management and emerging threats to mobile platforms. It will also explore the challenges posed by the Internet of Things and the implications of the interconnectivity of everything.

**POLICY & GOVERNMENT**

**[PNG]** This track features sessions on current and proposed government strategies, policies, legislation, and standards that could shape the direction of cloud computing, cyber-norms, public private-partnerships, big data initiatives, cyberthreat intelligence sharing, industry standards, and security compliance requirements for years to come.

**PRIVACY**

**[PRV]** This dedicated half-track explores the privacy issues related to big data, social media, cloud, legislative changes, IoT, and other emerging technologies and processes in the enterprise.

**PROFESSIONAL DEVELOPMENT**

**[PROF]** Professional Development covers technical and business/management training, professional certifications and career development, diversity as well as staff and personnel management.

**PROTECTING DATA & THE SUPPLY CHAIN ECOSYSTEM**

**[PDAC]** This track explores the cascading security requirements of the extended enterprise and the classification, tracking, and protection of data. It covers data protection regulations, DLP and threats to sensitive data, and emerging trends, as well as vendor and partner SLAs, supply chain mapping, continuous enforcement, and how to future-proof vendor contracts and risk assessments for evolving requirements.

**SECURITY MASHUP**

**[MASH]** This track includes interesting speakers and sessions on a wide range of topics not found anywhere else during the week.

**SECURITY STRATEGY & ARCHITECTURE**

**[STR]** Security Strategy & Architecture covers the policy, planning, and evolving areas of enterprise security architecture and the management issues of implementing successful security programs. Sessions will include the structures and tools needed to build a security program that enables and enhances business processes, cyber-resiliency, and cyber-hygiene.

**SPONSOR SPECIAL TOPICS**

**[SPO]** Listen to a spectrum of experts and security issues delivered and discussed by leading-edge companies.

**TECHNOLOGY INFRASTRUCTURE & OPERATIONS**

**[TECH]** This track focuses on the most interesting and challenging elements of current and emerging security infrastructure, providing a highly technical view on strategic planning, implementation, orchestration, vulnerability assessment, and security monitoring for the defense of networks, endpoints, operational technology, and systems.

# SPECIAL THURSDAY TRACK

GENERAL INFORMATION

## BRIDGING THE GAP: CYBERSECURITY + PUBLIC INTEREST TECH

**Our work in cybersecurity is inexorably intertwined with public policy and—more generally—the public interest.**

It's obvious in the debates on encryption and vulnerability disclosure, but it's also part of the policy discussions about the Internet of Things, cryptocurrencies, artificial intelligence, social media platforms and pretty much everything else related to IT.

This societal dimension to our traditionally technical area is bringing with it a need for public-interest technologists. This is a catch-all category of technologists who are doing public policy work, or technology for public good, or technology within organizations doing broader public good. It's a growing field—one far broader than cybersecurity—and one that I want to focus on here at RSA Conference.

Together with the Ford Foundation, I have put together a mini-track on public-interest tech. Six sessions throughout the day on Thursday will highlight different aspects of this important work. We'll look at public-interest technologists inside governments, as part of civil society, at universities, and in corporate environments.

We all need to help. I don't mean that we all need to quit our jobs and go work on legislative staffs; there's a lot we can do while still maintaining our existing careers. We can advise governments

and other public-interest organizations. We can agitate for the public-interest inside the corporations we work for. We can speak at conferences and write opinion pieces for publication. We can teach part-time at all levels. But some of us will need to do this full-time.

There's an interesting parallel to public-interest law, which covers everything from human-rights lawyers to public defenders. In the 1960s, that field didn't exist. The field was deliberately created, funded by organizations like the Ford Foundation. They created a world where public-interest law is valued. Today, when the ACLU advertises for a staff attorney, paying a third to a tenth of a normal salary, it gets hundreds of applicants. Today, 20% of Harvard Law School grads go into public-interest law, while the percentage of computer science grads doing public-interest work is basically zero. This is what we need to fix.

Please stop in at my mini-track. Come for a panel that interests you, or stay for the whole day. Seek me out to talk about this further. Pretty much all the major policy debates of this century will have a strong technological component—and an important cybersecurity angle—and we all need to get involved.

Best,

Bruce Schneier  
Fellow and Lecturer, Harvard Kennedy School

### THURSDAY, MARCH 7 – Moscone South 301\*

9:20 AM – **Introduction: Public Interest Technologists and Cybersecurity** PITC-R03

**MODERATOR: J. Bob Alotta**, *Astraea Foundation*  
**PANELISTS: Matt Mitchell**, *Tactical Tech*; **Bruce Schneier**, *Fellow and Lecturer, Harvard Kennedy School*

10:40 AM – **Public Interest Tech in Silicon Valley** PITC-R05

11:30 AM **Mitchell Baker**, *Chairwoman, Mozilla Corporation*; **Cindy Cohn**, *EFF*

12:00 PM – **Working in Civil Society** PITC-R07

12:50 PM **Sarah Aoun**, *Digital Security Technologist*; **Peter Eckersley**, *Partnership on AI*; **Harlo Holmes**, *Director of Newsroom Digital Security, Freedom of the Press Foundation*; **John Scott-Railton**, *Senior Researcher, Citizen Lab*

1:30 PM – **Government Needs You** PITC-R09

2:20 PM **Travis Moore**, *TechCongress*; **Hashim Mteuzi**, *Senior Manager, Network Talent Initiative, Code for America*; **Gigi Sohn**, *Distinguished Fellow, Georgetown Law Institute for Technology Law & Policy*; **Ashkan Soltani**, *Independent Consultant, Soltani LLC*

2:50 PM – **Changing Academia** PITC-R11

3:40 PM **Latanya Sweeney**, *Harvard*; **Danny Weitzner**, *MIT CSAIL*

4:10 PM – **The Future of Public Interest Tech** PITC-R14

5:00 PM **MODERATOR: Jenny Toomey**, *Director, Internet Freedom, Ford Foundation*  
**PANELISTS: Bruce Schneier**, *Fellow and Lecturer, Harvard Kennedy School*; **Ben Wizner**, *ACLU*

\* See Session Detail pages for session abstracts. Open to Full Conference Pass holders only.

# SOCIAL ACTIVITIES

Enrich your RSA Conference 2019 experience and take advantage of these networking events and activities to connect with like-minded peers.

**CyBEER OPS NETWORKING RECEPTION & INTERNATIONAL MEET-UP\*** Delight in local California craft beers and non-alcoholic drinks as you mingle with peers and RSAC friends from around the world. This event occurs on Tuesday from 4:45 to 6:30 PM in the RSAC Sandbox and RSAC Early Stage Expo on the Yerba Buena level of the Marriott Marquis. *Event is free for Full Conference attendees and Press. All other badge holders can purchase tickets through registration for a fee of \$25. Event access is restricted to attendees 21 and over and is first come, first served.*

**EXPO PUB CRAWL** Enjoy your choice of complimentary beer, wine and non-alcoholic beverages as you visit sponsoring companies' booths to learn about their latest products, services and innovations. Located at select sponsor booths within the Expo on Wednesday, March 6, from 4:30 – 6 PM.

**FIRST-TIMERS MEET-UP\*** Wednesday, March 6 & Thursday, March 7, 7:00 AM – 8:00AM, Moscone West Level 2 Alcove  
Start the day with a meet-up with other RSAC First-Timers. Grab your complimentary breakfast and enjoy this time to regroup, share takeaways and, of course, caffeinate.

**FIRST-TIMERS ORIENTATION & NETWORKING RECEPTION\*** Join other RSA Conference first-time attendees for an informative session and networking reception on Monday, March 4, from 4 – 5 PM at the Marriott Marquis, Golden Gate A. This event is open to Full Conference Pass holders and features a 30-minute presentation followed by a 30-minute networking reception with light refreshments.

**POWER PAUSE—MINDFULNESS & MOVEMENT** Wednesday, March 6 & Thursday, March 7, 6:00 AM – 7:00AM, Moscone West Level 2 Alcove  
This event is designed for the dreamers, doers, entrepreneurs, go-getters, hustlers and game changers. If you want to discover ways to maximize your performance and achieve greater results, this session is for you. This yoga class and meditation session is designed for all levels from beginners to advanced practitioners. Wear athletic attire and show up as you are.

**RSAC AFTER HOURS\*\*** Blow off some steam with RSAC After Hours. Previously called the “RSAC Bash,” RSAC After Hours offers Full Conference and Discover Pass holders the chance to hang out with industry peers and colleagues in a setting of their choice. Choose one of our three unique RSAC After Hours events on Tuesday, Wednesday or Thursday nights of the Conference.

**RSAC After Hours: Game Night** on Tuesday, March 5, 7:00 – 9:30 PM, Moscone West, Level 2

**RSAC After Hours: Whiskey & Wine Tasting** on Wednesday, March 6, 6:30 – 8:00 PM, Marriott Marquis, Golden Gate B

**RSAC After Hours: Comedy Club** on Thursday, March 7, 6:30 – 8:30 PM, Moscone South, South Stage

Flexibility. Fun. What’s not to love? Space is limited so be sure to reserve a seat for your RSAC After Hours event today.

**RSAC WOMEN’S LEADERSHIP CELEBRATION RECEPTION** On Monday, March 4, 4:30 – 6:00 PM, in Moscone South 303, after our *She Speaks Security* seminar, join us in celebrating the contributions and rich history of women in science and technology. Hosted with our planning partners: Women’s Society of Cyberjutsu, Executive Women’s Forum on Information Security, Risk Management and Privacy (EWF), The Diana Initiative, Women in Security and Privacy (WISP) and Women in CyberSecurity (WiCyS). All RSA Conference attendees are welcome to attend.

**SOCIAL MEDIA & TWITTER CHAT** Socialize with us! Follow @RSACConference on Twitter and the #RSAC hashtag for live updates from the Conference floor. We’ll be live tweeting and posting photos and videos to share all RSAC 2019 happenings with you.

Sponsored by:

@RSACConference will also be hosting a Twitter Chat sponsored by NCSA at 11 AM on Tuesday, March 5. Follow the #RSAC hashtag to participate!

**WELCOME RECEPTION** Join your peers in the Expo while kicking off RSA Conference in style at the Welcome Reception. Enjoy drinks and light fare on Monday, March 4, from 5 – 7 PM. Get exclusive access to the exhibitors you’ve been waiting to meet; network with peers as you preview cutting-edge products from more than 650 leading information security companies.

Sponsored by:

\* Open to Full Conference Registrants only.

\*\* Open to Full Conference, Full Conference One-Day (for day of admittance) and Discover Pass holders.

# KEYNOTES – Tuesday, March 5

GENERAL INFORMATION

8:00 AM WEST STAGE OPENING

8:10 – 8:35 AM WEST STAGE KEY-T01W

## The Trust Landscape

**Rohit Ghai**, President, RSA; **Niloofar Razi Howe**, Cybersecurity Strategist, Entrepreneur

We stand at a remarkable inflection point in our digital evolution, facing an unprecedented assault on trust. In a hyperconnected world, where malicious or manipulative activity can be spread to millions in an instant, information itself is a battlefield with the power to erode trust in society's most sacred institutions. How can we tackle such a consequential challenge? The notion of risk must be properly defined in this modern digital context. Adopting the right understanding of risk not only restores our faith in what matters most but is ultimately the catalyst for human progress.

8:35 – 8:55 AM WEST STAGE KEY-T02W

## Lightning in a Bottle, or Burning Down the House?

**Dr. Celeste Fralick**, Chief Data Scientist, McAfee, LLC; **Steve Grobman**, Senior Vice President and Chief Technology Officer, McAfee, LLC

Fire. In the wild, it's a force for destruction. Controlled, it powers civilization's forward evolution. But containing phenomena—natural or manmade—is a devilish challenge. Innovations that strengthen our defenses can also fuel targeted attacks, so the weaponization of AI to amplify the impact of cyberattacks is enough to give anyone pause. Discussion of its delegation at scale across our organizations is a worthy conversation. What is the path forward to advance and protect human progress? How do we nurture sparks of innovation without burning bridges to the future?

8:55 – 9:15 AM WEST STAGE KEY-T03W

## Rise of the Machines: Staying Ahead of the Next Threat

**Liz Centoni**, Senior Vice President | General Manager Cisco IoT, Cisco; **Matt Watchinski**, Vice President, Global Threat Intelligence Group, Talos, Cisco

The robots are coming, and they are connected to the Internet. Are we prepared to defend this new attack surface, which is exponentially greater than what we protect today? Our primary focus of the last decade was identifying and containing costly data breaches. The new frontier of connected devices represents the next generation of threats. Hear why you need to get in front of this cycle and how leaders can collaborate across security, information technology and operations to translate early lessons into successful defense strategies.

9:20 – 10:05 AM WEST STAGE KEY-T04W

## The Cryptographers' Panel

**Moderator: Zulfikar Ramzan, Ph.D.**, Chief Technology Officer, RSA

**Panelists: Whitfield Diffie**, Cryptographer and Security Expert, Cryptomathic; **Shafi Goldwasser**, Director, Simons Institute for the Theory of Computing; **Ronald Rivest**, Professor, Massachusetts Institute of Technology; **Adi Shamir**, Borman Professor of Computer Science, The Weizmann Institute, Israel

Humans have been using cryptographic techniques since the dawn of time to safeguard their data and achieve confidentiality, integrity, authenticity and privacy of their communications. Cryptography has evolved in the face of the Internet and has enabled advances like e-commerce. Join the founders and leaders of the field as they discuss what the future holds in the face of increased hyperconnectivity and digital transformation.

10:05 – 10:30 AM WEST STAGE KEY-T05W

## The FBI: At the Heart of Combating Cyberthreats

**Susan Hennessey**, Senior Fellow, Governance Studies, The Brookings Institution and Executive Editor, *Lawfare*; **Christopher A. Wray**, Director, Federal Bureau of Investigation

FBI Director Christopher Wray will discuss how the FBI's unique position as the lead domestic US law enforcement and intelligence agency is central to US government efforts to counter criminal and national security cyberthreats to the United States and its citizens. Director Wray will participate in a fireside chat-style interview to discuss the cyberthreats and technological challenges that face America.

# Tuesday, March 5 – KEYNOTES

KEY-T06S

## Top 10 Ways to Make Hackers Excited: About the Shortcuts Not Worth Taking

 **Paula Januszkiewicz**, Chief Executive Officer, CQURE

Designing secure architecture can always be more expensive, time consuming, and complicated. Come to the session and learn what mistakes were eliminated when working with customers.

2:20 – 3:10 PM

SOUTH STAGE

KEY-T08S

## Security at 36,000 Feet!

**Emily Heath**, Vice President and Chief Information Security Officer, United Airlines

Ladies and gentlemen, the fasten seatbelt sign is on! Join us for an engaging discussion on how an evolving and constantly moving security program is run at one of the world's largest airlines.

1:00 – 1:50 PM

SOUTH STAGE

KEY-T07S

## A Cloud Security Architecture Workshop

 **Dave Shackelford**, Senior Instructor, SANS Institute

Core cloud security architecture best practices, based on too many projects and deployments to count. This session will quickly bring you up to speed on cloud security architecture design principles.

3:40 – 4:30 PM

SOUTH STAGE

KEY-T09S

## Lessons Learned from 30+ Years of Security Awareness Efforts

 **Ira Winkler**, President, Secure Mentem

This session will cover 30+ years of experience in examining the science and practice of awareness and defines what works and what doesn't in reducing user-related risk.

# Protect applications with intrinsic security.

When security is built in and aligned to your applications, you have the freedom to innovate.

Use VMware software to:

- Reduce attack surface
- Simplify security operations
- Secure at DevOps speed

Visit us at booth **N 5655** to discover how to protect your apps from the data center to the cloud to the device.

# KEYNOTES – Wednesday, March 6

GENERAL INFORMATION

8:00 – 8:50 AM

SOUTH STAGE

KEY-W02S

## Hacking Exposed: LIVE— Bypassing NextGen

**Stuart McClure**, Chairman and Chief Executive Officer, Cylance Inc.; **Brian Robison**, Chief Evangelist, Cylance Inc.

In typical Hacking Exposed style, this session will deliver the latest and greatest hacks in live demonstrations that will illuminate the tools and techniques of the attacker.

9:20 – 10:10 AM

SOUTH STAGE

KEY-W03S

## The Role of Security Technologists in Public Policy

**Bruce Schneier**, Fellow and Lecturer, Harvard Kennedy School

The defining policy question of the Internet age is this: How much of our lives should be governed by technology, and under what terms? We need to be involved in that discussion.

10:30 – 10:55 AM

WEST STAGE

KEY-W04W

## The Power of People: Amplifying Our Human Capacity through Technology and Community

**Ann Johnson**, Corporate Vice President, Cybersecurity Solutions Group, Microsoft

Cybersecurity is at an inflection point. We are witnessing people being empowered by technology, while large gaps are forming that threaten their ability to amplify human capacity. In order to grow and maximize our potential, we must acknowledge those gaps and close them by bringing diverse sets of people and data together. Machine learning, artificial intelligence and automation hold promise for closing the security gaps, but the battle to solve the critical challenges we face around the world requires much more, including renewed efforts to recruit new cybersecurity professionals outside traditional channels, caring for the mental health of these first-line defenders, while growing and nurturing the power of everyone, everywhere.

10:55 – 11:15 AM

WEST STAGE

KEY-W06W

## Palo Alto Networks and Arista Networks CEOs Reveal Secrets to a Successful Cloud Journey

**Nikesh Arora**, Chief Executive Officer and Chairman, Palo Alto Networks; **Jayshree Ullal**, President and Chief Executive Officer, Arista Networks

Palo Alto Networks CEO Nikesh Arora and Arista Networks CEO Jayshree Ullal offer their unique blend of trend spotting and straight-shooting business observations as they discuss the opportunity and the perils organizations face as they make their journey to the cloud. Both executives have led cloud-based businesses through massive growth and have seen how the pace of innovation can serve as an accelerate on a global scale. Come hear them share their views on how to harness digital transformation in a world that poses ever-present cyberthreats and the importance of diverse perspectives.

11:15 – 11:55 AM

WEST STAGE

KEY-W07W

## Weaponization of the Internet

**MODERATOR: Ted Schlein**, General Partner, Kleiner Perkins

**PANELISTS: Nathaniel Gleicher**, Head of Cyber Security, Facebook; **Del Harvey**, Vice President, Trust and Safety, Twitter; **Robert Joyce**, Senior Advisor, National Security Agency; **Peter Warren Singer**, Strategist, New America

The internet promised all an equal voice in public discourse, but bots and rogue advertising are being used to manipulate public opinion, critically threatening public dialog. Globally, nation states, partisan agencies and political parties have grabbed the internet & social media reins to spread disinformation. This panel explores issues involved in controlling the internet, censorship and the impact on democracy.

# Wednesday, March 6 – KEYNOTES

1:30 – 2:20 PM

SOUTH STAGE

KEY-W10S

## Strategic Competition: The Rise of Persistent Presence and Innovation

**Olivia Gazis**, *Intelligence and National Security Reporter, CBS News*; **General Paul Nakasone**, *United States Army, Commander, United States Cyber Command, Director, National Security Agency, Chief, Central Security Service*

Threats have moved well beyond exploitation and disruption to destruction and corrosion. Hear how NSA and USCYBERCOM use counterthreats to defend our nation.

2:50 – 3:40 PM

SOUTH STAGE

KEY-W12S

## From Dystopia to Opportunity: Stories from the Future of Cybersecurity

**Amit Elazari**, *Director, Global Cybersecurity Policy, Intel Corporation, and Lecturer, UC Berkeley School of Information (MICS)*; **Keren Elazari**, *Analyst & Researcher, K3r3n3.com*

A hacker and a lawyer confront the future of cybersecurity: How are evolving attack trends impacting policy landscapes? Can trust become a feature? What can hackers do for you? Embrace what's next.

4:00 – 4:25 PM

WEST STAGE

KEY-W14W

## A View from the Front Lines of Cybersecurity

**Sandra Joyce**, *Senior Vice President, Global Intelligence, FireEye*; **Kevin Mandia**, *Chief Executive Officer, FireEye*

As one of the foremost experts in cybersecurity, Kevin Mandia will discuss today's threat environment and its impact on enterprises and agencies around the world. He will be joined on stage by Sandra Joyce, FireEye's senior vice president of Global Intelligence, who will share insight into the threat actors, tactics and trends that are likely to play an integral role in the landscape of cybersecurity in the years to come.

4:25 – 4:50 PM

WEST STAGE

KEY-W16W

## A Conversation with Donna Brazile and Mary Matalin

**Donna Brazile**, *Veteran Democratic Political Strategist, Adjunct Professor, Author and Syndicated Columnist*; **Mary Matalin**, *Celebrated Conservative Voice and Former Presidential Advisor*

For over three decades, Matalin and Brazile have maintained an intense philosophical commitment to their respective politics, along with a deep, mutual admiration and respect for each other on both the personal and professional levels. Together, the pair provides insightful, inspiring and informative commentary, as well as a welcome reprieve to the often-overwrought modern political landscape.

4:50 – 5:15 PM

WEST STAGE

KEY-W17W

## How Technology and Innovative Approaches Can Transform Your Organization

**Megan Smith**, *Chief Executive Officer, shift7, Third Chief Technology Officer of the United States (2014-2017)*

As the third chief technology officer of the United States, Megan Smith fundamentally altered the composition of the Federal Government. Her team recruited top talent "rabble-rousers" from Silicon Valley and other tech sectors to address such critical issues as artificial intelligence, education and training, urban and rural poverty, data science, and economic inclusion. Smith will describe how they teamed up with colleagues to employ their talents and adopt new approaches to using data, innovation and rapid iteration in order to create a more open, collaborative and responsive government—and will explain how your company can do the same.

## RSAC<sup>®</sup> LoyaltyPlus

Our RSAC LoyaltyPlus Program is offered to eligible Full Conference Pass holders who have attended a total of five or more RSA Conferences. As an RSAC LoyaltyPlus member, you will enjoy many benefits, including:

- Fastlane access to Tuesday keynotes
- Reserved check-in counter at registration
- Exclusive access to the LoyaltyPlus lounge with snacks and drinks and recharge stations.

### LOYALTYPLUS LOUNGE HOURS:

Monday	8:00 AM – 5:30 PM
Tuesday	6:30 AM – 4:30 PM
Wednesday	7:00 AM – 5:30 PM
Thursday	7:00 AM – 5:30 PM
Friday	8:00 AM – 1:30 PM

RSAC LoyaltyPlus Lounge location: Moscone West Level 2

# KEYNOTES – Thursday, March 7

GENERAL INFORMATION

8:00 – 8:50 AM

SOUTH STAGE

KEY-R02S

## Stress, Burnout and You: Fireside Chat with Dr. Christina Maslach

 **Josh Corman**, Chief Security Officer, PTC; **Christina Maslach**, Professor of Psychology, Emerita, University of California, Berkeley

Become hyperaware of the impact of stress and the fallout that leads to profound industry issues like burnout and toxicity. Help to be a champion of wellness in your organization.

9:20 – 10:10 AM

SOUTH STAGE

KEY-R03S

## Hacking Exposed: Hacking Macs

 **Dmitri Alperovitch**, Co-Founder & Chief Technology Officer, CrowdStrike;  **George Kurtz**, Chief Executive Officer, CrowdStrike

In the typical raw Hacking Exposed style, the session will demonstrate real-world case studies of advanced intrusions on MacOS systems, with detailed breakdown of TTPs and artifacts.

10:30 – 10:55 AM

WEST STAGE

KEY-R04W

## Stop Worrying about the Right Things

**Mary O'Brien**, General Manager, IBM Security; **Caleb Barlow**, Vice President, IBM Security, X-Force Threat Intelligence

What if you think being hacked is an advantage? Or failure is your goal? Where closed means open? Or if you could guard less to secure more? IBM Security's Mary O'Brien, general manager, and Caleb Barlow, vice president of threat intelligence, share the insights that they've learned running a fully immersive cyber-range, using AI to fight attacks and standing with organizations through difficult situations that challenge conventional thinking.

10:55 – 11:40 AM

WEST STAGE

KEY-R06W

## The Five Most Dangerous New Attack Techniques and How to Counter Them

**MODERATOR:** **Alan Paller**, Research Director and Founder, SANS Institute

**PANELISTS:** **Heather Mahalik**, Director of Forensics Engineering, ManTech, and Mobile Forensics Course Director, SANS Institute; **Ed Skoudis**, Instructor, SANS Institute; **Johannes Ullrich**, Dean of Research, SANS Technology Institute

Which are the most dangerous new attack techniques? How do they work? How can you stop them? What's coming next and how can you prepare? This fast-paced briefing features the three people best positioned to provide answers and best able to communicate them: the nation's top expert/teacher on mobile forensics, the director of the Internet Storm Center and the top hacker exploits expert/teacher in the US. They also answer audience questions.

2:50 – 3:40 PM

SOUTH STAGE

KEY-R11S

## The Future of Data Protection: Adapting to the Privacy Imperative

**MODERATOR:**  **J. Trevor Hughes**, President & Chief Executive Officer, IAPP

**PANELISTS:** **Kalinda Raina**, Senior Director, Head of Global Privacy, LinkedIn; **Ruby Zefo**, Chief Privacy Officer, Uber

This session will explore the future of privacy, in which personal data has become a currency impacted by competing regulations, like GDPR and CCPA, and complex ethical and competitive imperatives.

# Thursday, March 7 – KEYNOTES

GENERAL

WEST STAGE

KEY-R13W

## Three Things the Security Industry Isn't Talking About (but Should Be)

**Pat Gelsinger**, Chief Executive Officer, VMware; **Shannon Lietz**, Director, Intuit

The biggest threat to security today is our hyper-focus on threats. Most innovations have centered on finding and dealing with attacks. By contrast, very little has been done in how we shrink the attack surface. That domain needs to be a topic to achieve big gains in security. Join VMware CEO Pat Gelsinger and Intuit DevSecOps Leader Shannon Lietz, as they unveil the three things the industry needs to talk about to reduce the attack surface and shift the advantage to the defenders.

4:25 – 4:45 PM

WEST STAGE

KEY-R15W

## Tales of a Teenage Security Supergirl

**Kyla Guru**, Founder and Chief Executive Officer, Bits N' Bytes Cybersecurity Education

In her keynote at RSA Conference, Kyla Guru will share her story of being a social entrepreneur in the cybersecurity industry, the challenges she has faced and what she believes should be the greater mission of all cybersecurity initiatives. Guru will use her unique perspective of going through the education system to talk about what she sees for the future of the industry, and, of course, how we can make radical change to our current state of cyber-insecurity.

4:45 – 5:30 PM

WEST STAGE

KEY-R16W

## Connecting the Dots for the Future

**John T. Chambers**, Founder and Chief Executive Officer, JC2 Ventures, Former Chairman and Chief Executive Officer, Cisco; **Diane Brady**, Award-Winning Writer, Author and Consultant

Diane Brady and John Chambers will discuss the process of how they co-wrote their new book, *Connecting the Dots: Lessons for Leadership in a Startup World*. They will also cover Chambers's leadership roles serving as CEO and executive chairman at Cisco up through his current position as founder and CEO of JC2 Ventures, where he works with startups from all around the world. Chambers will speak to the importance of diverse teams in the development of a successful business and what he looks for when investing in startups.

# SUNDAY/MONDAY TUTORIALS & TRAININGS†

## SANS TUTORIALS

Immerse yourself in an intensive, skill-building two-day session led by respected authorities from the SANS Institute.

**Dates:** Sunday, March 3 & Monday, March 4  
**Time:** 9:00 AM – 5:00 PM  
**Location:** Moscone West 3003, 3004, 3005, 3006

Each of these SANS Tutorials qualifies you for 12 CPE credits.

### Automating Information Security with Python

**Mark Baggett**

Python is a simple, user-friendly language that is designed to make quickly and easily automate the tasks performed by security professionals. Whether you are new to coding or have been coding for years, this course will have you creating programs that make your job easier and your work more efficient. The self-paced course starts from the very beginning, assuming you have no prior experience or knowledge of programming. It covers all the essentials of the language up front. If you already know the essentials, you will find that the pyWars lab environment allows you to quickly accelerate to more advanced material. You will learn the skills you need to customize or even build tools that empower you to automate the daily routine of today's cybersecurity professional and achieve more value in less time.

### Critical Security Controls: Planning, Implementing and Auditing

**James Tarala**

This course helps you master the specific, proven techniques and tools needed to implement and audit the Critical Security Controls as documented by the Center for Internet Security (CIS). The Critical Security Controls are rapidly becoming accepted as the highest priority list of cybersecurity measures that must be implemented and proven before anything else at nearly all serious and sensitive organizations. The controls were selected and defined as the best way to block known attacks and find and mitigate damage from attacks that get through. For security professionals, this course enables you to see how to put the controls in place in your existing network through effective and widespread use of cost-effective automation. For auditors, CIOs and risk officers, the course is the best way to understand how you will measure whether the controls are effectively implemented.

### Lethal Threat Hunting and Incident Response Techniques

**Eric Zimmerman**

Prevention systems alone are insufficient to counter focused human adversaries who know how to get around most security and monitoring tools. The key is to look constantly for attacks that get past security systems and to catch intrusions in progress rather than after attackers have completed their objectives and done worse damage to the organization. For the incident responder, this process is referred to as "threat hunting," which involves using known adversary behaviors to proactively examine networks and endpoints in order to identify new data breaches. This course provides you with advanced skills that can be used to hunt down, identify, counter and recover from a wide range of threats within enterprise networks, including APT nation-state adversaries, organized crime syndicates and hactivists.

### Security Awareness—How to Build, Maintain and Measure a Mature Awareness Program

**Lance Spitzner**

Organizations have invested a tremendous amount of money and resources into securing technology, but little if anything into securing their employees and staff. As a result, people, not technology, have become their weakest link in cybersecurity. The most effective way to secure the human element is to establish a high-impact security awareness program that goes beyond just compliance and changes behaviors. This intense course will teach you the key concepts and skills needed to build, maintain, and measure just such a program. All course content is based on lessons learned from hundreds of security awareness programs from around the world. You will learn not only from your instructor, but from extensive interaction with your peers, as well. Please bring example materials from your security awareness program that you can show and share with other students during the course.

## ISACA TRAINING

Deepen your knowledge in the field of information security management while preparing for ISACA's exams.

**Dates:** Sunday, March 3 & Monday, March 4  
**Time:** 9:00 AM – 5:00 PM  
**Location:** Moscone West 3002

### CISM Two-Day Cram to the Max Course

**Albert J. Marcella Jr., CISA, CISM**

Planning to take ISACA's Certified Information Security Manager® (CISM®) exam this year? Join your fellow CISM-exam candidates and an expert, CISM-certified instructor to get in some valuable study tips and insight! This CISM Exam Prep Course is an intensive, cram-style course that will cover some of the more challenging topics from the CISM job practice areas. Topics will include information security governance, information risk management, information security program development and information security incident management. Drill through sample exam items, ask your most pressing questions and get the answers to build your confidence and make final preparations for exam day.

This course is specifically designed for those already preparing to sit for the CISM exam. *Continuing Professional Education (CPE) Credit Hours: 14.5*

# SUNDAY/MONDAY TUTORIALS & TRAININGS<sup>†</sup>

## (ISC)<sup>2</sup> TRAININGS

Review and identify the information security areas you need to master for the CISSP and CCSP exams with two-day trainings from the creators of the industry's gold standard certifications.

**Dates:** Sunday, March 3 & Monday, March 4  
**Time:** 9:00 AM – 5:00 PM  
**Location:** Moscone West 3007, 3008, 3009

### (ISC)<sup>2</sup> CCSP® Cloud Security Professional Two-Day Crash Course

**Ben Malisow**

During this fast-paced, two-day session you will cover the six domains covered by the (ISC)<sup>2</sup> the Certified Cloud Security Professional CBK. This fact-filled course will assist in your review of the CBK topics and deepen your knowledge of cloud computing and cloud information security. You will receive and utilize the official (ISC)<sup>2</sup> Certified Cloud Security Professional certification credential study guide and materials published by (ISC)<sup>2</sup>.

### (ISC)<sup>2</sup> CISSP® Certified Information Systems Security Professional Introduction

**Lyron Andrews**

During this fast-paced, two-day session, you will cover the eight domains of the (ISC)<sup>2</sup> CISSP CBK. This fact-filled course will assist in your review of the CBK topics and deepen your knowledge of information security. Each day of the presentation is divided into various domains of the CBK. These domains will cover essential topics such as current security challenges, problem resolution, application security, network security, infrastructure planning, legal considerations, international privacy, investigations and forensics among other topics.

### (ISC)<sup>2</sup> Security Architecture

**Kevin Stoffell**

Security architecture development is designed for information security professionals involved in enterprise-wide security planning or acquisition of systems and software that contain information security components. This course is designed to deliver an understanding of key security architecture concepts and implementation. This course overlaps with the Certified Information Systems Security Professional Information Systems Security Architecture Professional (CISSP-ISSAP®) certification; however, the focus does not fully align with the certification syllabus.

## CSA TRAINING

Expand your understanding of cloud security with Cloud Security Alliance's two-day training.

**Dates:** Sunday, March 3 & Monday, March 4  
**Time:** 9:00 AM – 5:00 PM  
**Location:** Moscone West 3001

### The Certificate of Cloud Security Knowledge (CCSK) Plus Training

**Jon-Michael C. Brook, CISSP, CCSK, Certified AWS Solution Architect**

The Certificate of Cloud Security Knowledge (CCSK) Plus class provides students a comprehensive review of cloud security fundamentals, prepares them to take the Cloud Security Alliance (CSA) CCSK v4 certificate exam and guides them through six hands-on labs that tie cloud security best practices to real-world applications. Starting with a detailed description of cloud computing, the course covers all major domains in the Security Guidance v4 document from the CSA, gives a high-level overview of the CSA Cloud Controls Matrix (CCM) and includes recommendations from the European Network and Information Security Agency (ENISA) Cloud Computing document and the National Institute of Standards and Technology (NIST).

This class is geared towards security professionals, but is also useful for anyone looking to expand their knowledge of cloud security. Having a basic understanding of security fundamentals, such as firewalls, secure development, encryption and identity management is helpful, but not required. Individual laptop and some pre-class setup one week prior is required.

<sup>†</sup> SANS Tutorials and (ISC)<sup>2</sup>, ISACA and CSA Trainings are offered for an additional fee.

Top-rated speaker.

Sessions and speakers are subject to change; please visit [www.rsaconference.com/us2019](http://www.rsaconference.com/us2019) for the most up-to-date information.

# MONDAY EVENTS & ACTIVITIES

MONDAY

8:30 AM – 5:40 PM **SEMINARS – FULL CONFERENCE & DISCOVER PASS HOLDERS ONLY**

See following pages for details and room locations.

8:00 AM – 5:00 PM **SEMINARS – OPEN TO ALL BADGE TYPES**

See following pages for details and room locations.

8:00 AM – 5:00 PM **BROADCAST ALLEY**

West Street Level Watch top security publications shoot live and record exclusive interviews.

11:00 AM – 12:00 PM **TWITTER CHAT**

**Building a Better Today for a More Secure Tomorrow**  
Follow us on Twitter and use #ChatSTC and #RSAC to join!

Sponsored by:

1:30 PM – 4:30 PM **RSAC INNOVATION SANDBOX CONTEST**

Marriott  
Yerba Buena

The RSAC Innovation Sandbox Contest has crowned innovative companies who build cutting-edge technologies to minimize infosec risk for the past 14 years. Witness the 2019 Top 10 Finalists battle it out for the coveted title of "Most Innovative Startup." See page 18 for a detailed agenda.

Exclusive RSAC Innovation  
Sandbox Media Sponsor:

4:00 PM – 5:00 PM **FIRST-TIMERS ORIENTATION & NETWORKING RECEPTION**

Marriott Golden  
Gate A

This event is open to Full Conference Pass holders and features a 30-minute presentation followed by a 30-minute networking reception with light refreshments.

4:30 PM – 6:00 PM **RSAC WOMEN'S LEADERSHIP CELEBRATION RECEPTION**

Moscone South 303

Join us in celebrating the contributions and rich history of women in science and technology. Hosted with our planning partners: Women's Society of Cyberjutsu, Executive Women's Forum on Information Security, Risk Management and Privacy (EWF), The Diana Initiative, Women in Security and Privacy (WISP) and Women in CyberSecurity (WiCyS). All RSA Conference attendees are welcome to attend.

5:00 PM – 7:00 PM **RSAC SECURITY OPERATIONS CENTER**

Moscone South  
Lower Level

Take a tour of a working SOC! Head to the Moscone South Lower Level for the RSA Conference Security Operations Center. See what's really taking place on the Moscone Wireless Network in real time.

Sponsored by:

5:00 PM – 7:00 PM **WELCOME RECEPTION**

Expos

Join your peers in the Expo while kicking off RSA Conference in style at the Welcome Reception. Enjoy drinks and light fare from 5 – 7 PM. Get exclusive access to the exhibitors you've been waiting to meet; network with peers as you preview cutting-edge products from more than 650 leading information security companies.

# MONDAY SEMINARS

## Full Conference & Discover Pass Seminars

9:00 AM – 3:40 PM

Mosccone West 2018

**Security, Privacy and Human Behavior** SEM-M01

**Lujo Bauer**, Carnegie Mellon University; **Laura Brandimarte**, University of Arizona; **Sunny Consolvo**, User Experience Researcher, Google; **Lorrie Cranor, Ph.D.**, Director, CyLab Security and Privacy Institute, Carnegie Mellon University; **Sanchari Das**, Doctoral Researcher, Indiana University; **Jason Hong**, Professor, Human Computer Interaction Institute; **Apu Kapadia**, Associate Director, Security Program, Indiana University Bloomington; **Emilee Rader**, Associate Professor and AT&T Scholar, Department of Media and Information, Michigan State University; **Elissa M. Redmiles**, Ph.D. Candidate, Computer Science, University of Maryland; **Blase Ur**, Neubauer Family Assistant Professor, University of Chicago; **Pamela Wisniewski**, University of Central Florida

What is it about human behavior that makes cybersecurity so inherently difficult? Come join this masterfully curated seminar, led by renowned expert Dr. Lorrie Cranor, professor in the School of Computer Science and the Engineering and Public Policy Department at Carnegie Mellon University and director of the CyLab Usable Privacy and Security Laboratory. Leading researchers will share important findings around security and privacy behaviors and mental models, explore security and privacy tools that humans can actually use, and examine emerging threats and challenges that surface as humans adopt new technology.

8:30 AM – 5:40 PM

Mosccone West 2022

**Emerging Threats** SEM-M03

**Lior Ben-Porat**, Security Researcher, Microsoft; **Olivier Bilodeau**, Cybersecurity Research Director, GoSecure; **Christopher Elisan**, Senior Malware Researcher, Flashpoint; **John Fokker**, Head of Cyber Investigations, McAfee; **James Foster**, CEO, ZeroFOX; **Daniel Frank**, Security Researcher, F5 Networks; **Kenneth Geers**, Chief Research Scientist, Comodo; **Nelly Ghaoui**, Senior Policy Coordinator, Ministry of Economic Affairs and the Climate of the Netherlands; **Ian Gray**, Director of Americas Research and Analysis, Flashpoint; **Tamer Hassan**, CTO & Co-Founder, White Ops; **Reiko Kondo**, Director, Office of the Director-General for Cybersecurity, Ministry of Internal Affairs and Communications; **Carles Lopez-Penalver**, Cybercrime Analyst, Chainalysis; **Renato Marinho**, Chief Research Officer, Morphus Labs; **Austin McBride**, Threat Analytics Researcher, Cisco Systems; **Stuart McClure**, Chairman and CEO, Cylance; **Masarah Paquet-Clouston**, Researcher, GoSecure CounterTack Inc.; **Philip Reitingier**, President & CEO, Global Cyber Alliance; **Evelyn Remaley**, Deputy Associate Administrator for Policy, NTIA / US Department of Commerce; **Brian Robison**, Sr. Director of Security Technology, Cylance; **Raj Samani**, Chief Scientist, McAfee Fellow, McAfee; **Jason Straight**, Chief Privacy Officer / SVP Cyber Risk Solutions, UnitedLex Corporation; **Michael Tiffany**, President & Co-Founder, White Ops; **Candice Wueest**, Threat Researcher, Symantec

This seminar will provide a full day of focus on emerging threats, from cryptojacking and ransomware to social engineering and IoT attacks. Sessions will get inside the minds and motivations of the adversaries, discuss the changing threat landscape, top attack vectors, new and innovative research, and effective response and recovery strategies.

8:30 AM – 5:15 PM

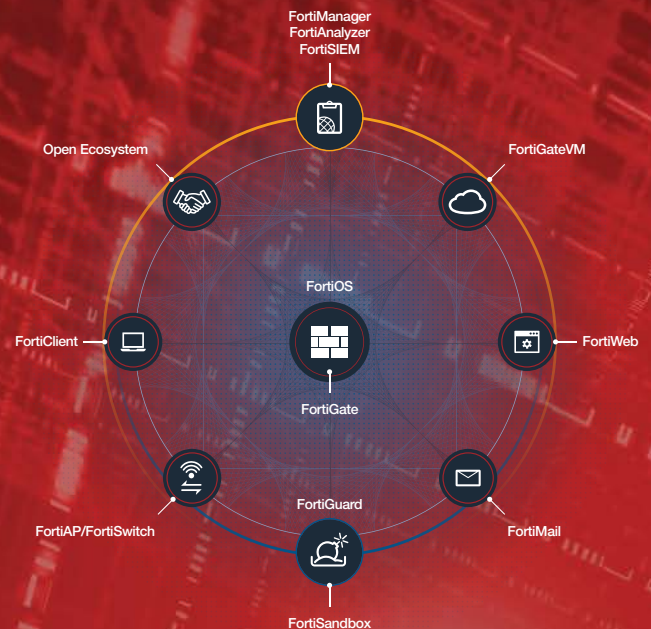

Mosccone West 2014

**Security Foundations** SEM-M04

**Daniel Bailey**, Chief Security Architect, Carbonite; **Sam Bisbee**, CSO, Threatstack; **Julie Fitton**, VP, Digital Product Security, Stanley Black & Decker; **Rob Fry**, VP of Engineering, Jask; **Salah Machani**, Director of Technology, RSA; **Kathleen Moriarty**, Global Lead Security Architect, Dell Technologies; **Hugh Thompson**, RSA Conference

This seminar will explain some of the most important security principles and will provide practitioners with an overview of essential concepts to enhance understanding of current advanced security issues, offering up-to-date perspectives. While designed for practitioners of five or less years of direct security experience, this seminar will be of value to the full spectrum of RSA Conference attendees.

8:30 AM – 4:30 PM

Moscone South 207

### CSA Summit: CSA 10 CSA-M01

**Jerry Archer**, Senior Vice President and Chief Security Officer, Salliemae; **Jon Callas**, Technology Fellow, ACLU; **David Cass**, Chief Information Security Officer Cloud and SaaS Operations & Global Partner Cloud Security Services, IBM; **Rich Campagna**, Chief Marketing Officer, Bitglass; **Jay Chaudhry**, CEO, Chairman and Founder, Zscaler, Inc.; **Pete Chronis**, CISO, Turner; **Jason Clark**, Chief Strategy Officer, Netskope; **Dave Estlick**, Chief Information Security Officer, Starbucks Technology; **Eran Feigenbaum**, Chief Security Officer, Oracle Cloud; **Nicole Forbes**, Global Vice President of IT and CISO, Baxter International; **Jason Garbis**, Vice President of Cybersecurity Products, Cyxtera; **Rajiv Gupta**, Senior Vice President, Cloud Security Business Unit, McAfee; **Kurt Hagerman**, CxO Advisor, Cyber Strategy, Coalfire; **Mike Hanley**, Director of Security, Duo; **Scott Howitt**, Senior Vice President & Chief Information Security Officer, MGM Resorts International; **Kevin Kiley**, Vice President of Sales & Business Development, OneTrust; **Setu Kulkarni**, Vice President, Strategy & Business Development, WhiteHat; **Eric Olden**, Senior Vice President, Oracle Security and Identity, Oracle; **Vinay Patel**, Managing Director, Global Head of Information Security, Citigroup Enterprise Operations & Technology; **Juan Pablo Perez-Etchegoyen**, Chief Technology Officer, Onapsis; **Nico Popp**, Senior Vice President Information Protection, Symantec; **Jim Reavis**, CEO, Cloud Security Alliance; **Marc Rogers**, Executive Director, Cybersecurity Strategy, Okta; **Stephen Scharf**, Managing Director and Global Chief Security Officer, Depository Trust & Clearing Corporation; **Bob Schuetter**, Chief Information Security Officer, Valvoline; **Andy Smith**, Vice President of Product Marketing, Centrifry; **Jennifer Steffens**, Chief Executive Officer, IOActive, Inc; **Becky Swain**, GRC & Cloud Security Assurance Consultant

The year 2019 marks the 10-year anniversary of Cloud Security Alliance (CSA). From inception, the CSA has been dedicated to defining and raising awareness of best practices to help ensure a secure cloud computing environment throughout the world. In its 10<sup>th</sup> year at RSA Conference, the CSA Summit will reflect on the lessons learned by enterprises and providers as cloud has become the dominant IT system in the market. We will also explore new frontiers that are accelerating change in information security, such as artificial intelligence, blockchain and IoT.

\* This content is brought to you by CSA. Attendees selecting this seminar will have their contact details shared with CSA.

8:30 AM – 5:00 PM

Moscone South 201

### IAPP: Understanding the CCPA IAPP-M01

**Patricia Bailin**, CIPP/US, CIPM, CIPT, Head of Privacy & Data Ethics, Datavant; **Helen Beckschi**, CIPP/US, US Privacy, Wells Fargo Bank; **Andrea D'Ambra**, CIPP/E, Partner, Norton Rose Fulbright; **Lothar Determann**, Partner, Baker McKenzie; **D. Reed Freeman**, CIPP/US, Co-Chair, Cybersecurity and Privacy Practice Group, WilmerHale; **Travis LeBlanc**, Partner, Cooley LLP; **Dominique Shelton Leipzig**, CIPP/US, Partner, Perkins Coie; **Stacey Schesser**, CIPP/US, Deputy Attorney General, California Department of Justice; **Ari Schwartz**, Managing Director, Cybersecurity Services, Venable; **Andrew Serwin**, CIPP/C, CIPP/E, CIPP/G, CIPP/US, CIPM, Partner, Morrison & Foerster; **Jacob Snow**, Technology and Civil Liberties Attorney, ACLU of Northern California

Passed seemingly overnight just before the July 4 holiday, the California Consumer Privacy Act 2018 stands to radically change the way that organizations throughout the United States, and even the world, handle personal data. It's fair to say it could impact organizations in ways that are similar to the EU's General Data Protection Regulation, and the time horizon for compliance is even shorter: CCPA comes into force on January 1, 2020. In this full-day workshop, some of the leading thinkers in California privacy gather to help you understand what the law says and how it will change the way you do business.

\* This content is brought to you by IAPP. Attendees selecting this seminar will have their contact details shared with IAPP.

9:00 AM – 5:00 PM

Moscone South 204

### DevOps Connect: DevSecOps Day @ RSAC DOC-M01

**Jennifer Czaplewski**, Director, Security Analytics, Security Ninjas and Risk Management, Target; **Kevin Hanaford**, Head of Information Security, Infrastructure & IT, Remitly; **Jodie Kautt**, Vice President of Cyber Security, Target; **Omar Khawaja**, CISO, Information Security & Risk Mgmt, MBA, CISSP, CPHIMS, CCSK, Highmark Health; **Courtney Kissler**, Vice President, Nike Digital Platform Engineering; **Oleg Krebs**, Chief Architect, Visa; **Shannon Lietz**, Leader and Director, DevSecOps, Intuit; **Larry Maccherone**, DevOps and DevSecOps Transformation, Comcast; **Mark Miller**, Co-Founder, All Day DevOps, Senior Storyteller, Sonatype; **Rich Mogull**, Analyst & CEO, Securosis; **Ernest Mueller**, Director of Engineering Operations, AT&T Cybersecurity; **Chris Roberts**, Advisor with Attivo Networks, R&D with HHS, etc.; **DJ Schleen**, DevSecOps Evangelist and Security Architect, Aetna/CVS; **Alan Shimel**, Founder, DevOps.com, Co-Founder DevOps Institute; **Alexandra Shulman-Peleg**, SVP, Cloud Platforms Security Engineering and Cloud GIS Program Lead, Citi; **Poornaprajna Udupi**, CISO, Lyra Health; **Navin Vembar**, Former CTO, GSA; **Chenxi Wang**, Managing General Partner, Rain Capital; **Derek Weeks**, Vice President, Sonatype; **James Wickett**, Head of Research, Signal Sciences; **Caroline Wong**, Vice President, Cobalt.io; **John Willis**, VP of DevOps and Digital Practices, SJ Technologies; **Hasan Yasar**, DevSecOps Evangelist, Technical Manager, Adjunct Faculty Member at SEI, Head of Research, Carnegie Mellon University; **Anne Marie Zettlemoyer**, Cyber Strategist, Board Member, Researcher, Vice President, Security Engineering, Mastercard

In the past few years, security integration within the DevOps pipeline has given rise to the idea of DevSecOps. Once seen as the bottleneck and inhibitor of the development and deployment process, security has become an integral part of the movement towards automation and the removal of manual oversight enforcement. As stated in the DevSecOps Manifesto, "We must adapt our ways to ensure data security and privacy issues are not left behind because we were too slow to change." There are practitioners in the field who are pushing forward with the idea of creating a secure application development pipeline, with security integrated from conception to deployment.

In this year's DevOps Connect: DevSecOps Day at RSA Conference 2019, you'll hear stories from those practitioners, explaining how they made the cultural transformation from legacy development and deployment processes to integrated systems that include security as a part of the process, not as an overseer or bottleneck to secure application development. This series of first-person talks will give you a perspective on how you and your team can enable faster application development with more rapid deployment to production, while integrating security into your DevOps initiatives.

\* This content is brought to you by DevOps.com. Attendees selecting this seminar will have their contact details shared with DevOps Connect.

# MONDAY SEMINARS

MONDAY

9:00 AM – 11:30 AM & 1:30 PM – 4:00 PM | Moscone South 304

## CyberSmart Parents Education Seminar—Keeping Your Family Safe Online SEM-M02

**Jace Brooklyn**, Hacker High; **Pete Herzog**, Managing Director, ISECOM; **Aidan Jake**, Hacker High; **Gloria Moskowitz-Sweet**, LCSW, PPSC, Co-Founder, My Digital TAT2; **Erica Pelavin**, Co-Founder, My Digital TAT2

This seminar will arm you with the knowledge and tools to help teach children how to better recognize and resist online challenges.

9:00 AM – 12:20 PM

Marriott Golden Gate A

## How-to for Innovators and Entrepreneurs SEM-M05

**Geoff Belknap**, CISO, Slack; **Kristina Bergman**, CEO, Integris Software; **Dave DeWalt**, Founder & CEO, NightDragon Investments; **Sarah Guo**, Partner, Greylock; **Choo Kim-Isgitt**, Head of Marketing, TruSTAR; **Mark Kraynak**, Partner, Aspect Ventures; **Tim McKnight**, CISO, Thompson Reuters; **CP Morey**, Head of Phantom Marketing, Splunk; **Rob Sloan**, WSJ Pro Cybersecurity, Research Director, Wall Street Journal Pro; **Gene Teare**, Head of Content, Crunchbase; **Ariel Tseitlin**, Partner, Scale Venture Partners; **Chris Wysopal**, CTO, Veracode

This half-day info-rich seminar will explore how to start a company from stealth to exit, find funding and financing in today's competitive marketplace, provide an inside view of what makes a CISO take a shot on a startup, give tips and insights from brand makers and marketing gurus on how to rise above the noise. Each segment includes an opportunity for audience members to ask questions of the panelists and a networking break to meet with fellow entrepreneurs and speakers.

8:00 AM – 12:00 PM

Moscone South 301

## Solving Our Cybersecurity Talent Shortage SEM-M06

**Jim Gordon**, GM Security Ecosystem Strategy & Development, Intel Corporation; **Emily Heath**, VP & CISO, United Airlines; **Alicia Jessip**, Regional Inclusion & Diversity Manager – West and Northwest, TEKsystems; **Elaine Marino**, Founder and CEO, Equili; **Carmen Marsh**, CEO, Inteligenca; **Vanessa Pegueros**, Vice President and CISO, DocuSign; **Claudia Schabel**, President, Schabel Solutions; **Jennifer Steffens**, CEO, IOActive, Inc.; **Selena Templeton**, Executive Editor & Podcast Host, ITSPmagazine; **Caroline Wong**, Chief Security Strategist, Cobalt.io; **Karen Worstell**, CEO, W Risk Group LLC

In this seminar, you will hear from leaders driving innovation with culture, inclusion, equity and diversity, and from change agents on how you can make shift happen.

1:00 PM – 4:30 PM

Moscone South 301

## She Speaks Security: Gaining Confidence Speaking and Submitting to Speak SEM-M07

**Joyce Brocaglia**, CEO and Founder, Alta Associates & The Executive Women's Forum; **Elena Elkina**, Co-Founder, Women in Security and Privacy (WISP); **Jessica Gulick**, CEO, Katzcy; **Andrea Little Limbago**, Chief Social Scientist, Virtru; **Cameron Over**, Director, Cybersecurity, CrossCountry Consulting; **Roberta Stempfle**, Director, CMU – SEI – CERT

This robust half-day forum, developed with community groups, will offer a mentor-focused opportunity to inspire, prepare and equip women for submitting and presenting to large groups.

## Meet German Experts in IT Security at RSA® Conference 2019

Presented by:

In cooperation with:

Supported by:

### Welcome to the German Pavilion at RSA® Conference 2019!

German Evening Reception

March 6th, 7:00 pm, German Consulate General, 1960 Jackson Street, San Francisco

Get your personal invitation at the German Pavilion

### German Panel Session 2019

Innovative Answers to the IoT Security Challenges

Panel discussion about innovative ways for identity management, securely enabling connectivity of IoT devices and security for legacy systems while keeping the usability at a high level.

Moderator: Prof. Dr. Norbert Pohlmann, Director of if (is), Chairman of TeleTrust - IT Security Association

The Panelists:

- Dr. Kim Nguyen, Managing Director of D-Trust, the Trust Center of Bundesdruckerei
- Heinfried Cznotka, Director Business Development, achelos GmbH
- Jean-Paul Verheyewegen, Global Sales Manager, MB Connect Line GmbH

March 6th, 1:30 pm – 2:20 pm, Moscone South Esplanade 154

# TUESDAY EVENTS & ACTIVITIES

6:30 AM – 8:00 AM **CONTINENTAL BREAKFAST\***  
 Moscone West Level 2 Full Conference Pass holders, grab breakfast and then head directly to your chosen keynote viewing location.

## KEYNOTES\*\*

Keynote abstracts can be found on pages 30 – 31.

8:00 AM **Opening**  
 West Stage Keynotes

8:10 AM **The Trust Landscape**  
 West Stage Keynotes **👤 Rohit Ghai**, *President, RSA*; **Niloofar Razi Howe**, *Cybersecurity Strategist and Entrepreneur*

8:35 AM **Lightning in a Bottle, or Burning Down the House?**  
 West Stage Keynotes **Dr. Celeste Fralick**, *Chief Data Scientist, McAfee, LLC*; **Steve Grobman**, *Senior Vice President and Chief Technology Officer, McAfee, LLC*

8:55 AM **Rise of the Machines: Staying Ahead of the Next Threat**  
 West Street Level **Liz Centoni**, *Senior Vice President | General Manager Cisco IoT, Cisco*; **Matt Watchinski**, *Vice President, Global Threat Intelligence Group, Talos, Cisco*

9:20 AM **The Cryptographers' Panel**  
 West Street Level **MODERATOR: Zulfikar Ramzan, Ph.D.**, *Chief Technology Officer, RSA*  
**PANELISTS: Whitfield Diffie**, *Cryptographer and Security Expert, Cryptomathic*; **Shafi Goldwasser**, *Director, Simons Institute for the Theory of Computing*; **Ronald Rivest**, *Professor, Massachusetts Institute of Technology*; **Adi Shamir**, *Borman Professor of Computer Science, The Weizmann Institute, Israel*

10:05 AM **The FBI: At the Heart of Combating Cyberthreats**  
 West Street Level **Susan Hennessey**, *Senior Fellow, Governance Studies, The Brookings Institution and Executive Editor, Lawfare*; **Christopher A. Wray**, *Director, Federal Bureau of Investigation*

11:00 AM **Top 10 Ways to Make Hackers Excited: About the Shortcuts Not Worth Taking**  
 South Esplanade **👤 Paula Januszkiewicz**, *Chief Executive Officer, CQURE*

1:00 PM **A Cloud Security Architecture Workshop**  
 South Esplanade **👤 Dave Shackelford**, *Sr. Instructor, SANS Institute*

2:20 PM **Security at 36,000 Feet!**  
 South Esplanade **Emily Heath**, *Vice President and Chief Information Officer, United Airlines*

3:40 PM **Lessons Learned from 30+ Years of Security Awareness Efforts**  
 South Esplanade **👤 Ira Winkler**, *President, Secure Mentem*

9:00 AM – 5:00 PM **BROADCAST ALLEY**  
 Moscone West Street Level Watch top security publications shoot live and record exclusive interviews.

10:00 AM – 6:00 PM **RSAC SECURITY OPERATIONS CENTER**  
 Moscone South Lower Level Take a tour of a working SOC! Head to the Moscone South Lower Level for the RSA Conference Security Operations Center. See what's really taking place on the Moscone Wireless Network in real time.

Sponsored by:

10:00 AM – 6:00 PM **EXPO**  
 Moscone North & South Lower Level The RSA Conference Expo will give you the opportunity to interact with an impressive breadth of information security exhibitors and sponsors.

10:20 AM – 5:30 PM **EXPO BRIEFING CENTER**  
 Moscone North & South Lower Level See following pages for abstracts and a complete schedule on pages 115 – 118.

11:00 AM – 2:00 PM **STREET EATS**  
 Howard Street, Mission Street With options for all tastes, stop by any of our food trucks on Mission Street or Howard Street. Available to all pass types and both cash and credit cards are accepted.

11:00 AM – 4:30 PM **TRACK SESSIONS**  
 Locations Vary See detailed information on following pages for descriptions and badge access.

# TUESDAY EVENTS & ACTIVITIES

Hours Vary by Location **LAW TRACK SESSIONS\***  
 Marriott Nob Hill A, 11:00 AM – 4:30 PM; Moscone South 201, 5:00 PM – 5:50 PM  
 See detailed information on following pages for descriptions.

2:20 PM – 4:20 PM **LEARNING LABS\***  
 Moscone West Level 3 Learning Labs provide highly interactive, facilitated learning experiences and are very hands-on and small group oriented. Seating is limited; use Reserve a Seat to schedule your participation. You can only reserve one Lab on your schedule, so pick carefully from our 20 great offerings. **Note: Press is not permitted in Lab sessions.**

4:00 PM – 6:30 PM **RSAC CYBREW CAFÉ**  
 Marriott RSAC Sandbox The RSAC Cybrew Café, our full-service coffee bar, will be serving your favorite beverages.

4:00 PM – 4:45 PM **RSAC LAUNCH PAD\*\*\***  
 Marriott Yerba Buena 8 RSAC Launch Pad is designed to give new talent a platform to share their brilliant industry solutions. Watch three selected participants give a 10-minute pitch on their groundbreaking products to a panel of leading security venture capitalists. And see who walks away with investments that could take their company to the next level.

4:45 PM – 6:30 PM **RSAC SANDBOX\*\*\***  
 Marriott Yerba Buena 8 The RSA Conference Sandbox is full of hands-on interactive experiences to test your infosec skills.

Exclusive RSAC Sandbox Media Sponsor:

4:45 PM – 6:30 PM **RSAC EARLY STAGE EXPO\*\*\***  
 Marriott Yerba Buena 9 The RSAC Early Stage Expo is the perfect megaphone for emerging infosec startups. Located in the Marriott Marquis, meet over 50 of the industry's most promising newcomers and learn about their innovative products and solutions.

Exclusive RSAC Early Stage Expo Media Sponsor:

**crunchbase**

4:45 PM – 6:30 PM **CYBEER OPS NETWORKING RECEPTION & INTERNATIONAL MEET-UP \*\*\***   
 Marriott RSAC Sandbox & RSAC Early Stage Expo Delight in local California craft beers and non-alcoholic drinks as you mingle with peers and RSAC friends from around the world. CyBEER Ops opens RSAC Sandbox, where you can check out up and coming startups and the RSAC IoT Village, ICS Village and Wireless Village Sandboxes.  
*\* Event is free for Full Conference and Tuesday Full Conference One-Day Pass holders age 21 and over as well as Press. All other badge holders can purchase tickets through registration for a fee of \$25. Event access is limited and is on a first come, first served basis.*

6:00 PM – 9:00 PM **NON-PROFITS ON THE LOOSE**   
 Marriott SoMa Meet and mingle with industry and government leaders while enjoying food and drink at the Marriott Marquis, just blocks from the Moscone Center. The Anti-Phishing Working Group (APWG), the Internet Society/Online Trust Alliance and the Cyber Threat Alliance (CTA) invite you to join us for the ninth Annual Non-Profits on the Loose for great food, fun and networking. Thank you for supporting our passions, stop by and discuss how we can improve cybersecurity together.  
*Attendees must have an RSA Conference badge.*

7:00 PM – 9:30 PM **RSAC AFTER HOURS: GAME NIGHT\*\***   
 Moscone West Level 2 As a cybersecurity all-star, you'll enter RSAC After Hours: Game Night with VIP treatment. Then it's off to the races. In the Full Court, you'll go head to head with other industry players in our arcade and game hall. Then take a load off in the sports lounge and bar, complete with a live DJ and tailgate-themed refreshments. And at 7:30 PM, the night really gets going as the Celtics face off against the Warriors—live and on the big screen.  
**Open to Full Conference and Discover Pass holders. Choose one of the RSAC After Hours events on Tuesday, Wednesday or Thursday nights of Conference. Space is limited so make sure to reserve a seat.**

= Networking event.

\* Open to Full Conference Pass holders only.

\*\* Open to Full Conference and Discover Pass holders only.

\*\*\* Open to Full Conference Pass holders, Press and CyBEER Ops ticket holders only.

# TUESDAY SESSION DETAILS

## 10:20 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center North</b>	30 min	ALL

### Kubernetes Deployments: How Not to Get Hacked BC-T1N

**Sol Cates**, VP of Technology Strategy, CTO, Thales eSecurity Inc.

Kubernetes adoption continues to skyrocket as the standard container orchestration framework. However, security and regulatory issues exist in this new frontier; fortunately there are best practices.

## 10:40 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center South</b>	20 min	ALL

### An Intelligent Approach to Beating Global Cybersecurity Threats BC-T1S

**Laurent Gil**, Security Evangelist, Oracle Cloud Infrastructure (OCI), Oracle

This session will be designed to help organizations develop a real-life approach to implementing AI algorithms and machine learning enabled security in their own environments.

## 11:00 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Analytics, Intelligence &amp; Response</b>	50 min	FC

### Advancing Incident Response in the Age of New Compliance Requirements AIR-T06

**Steven Chabinsky**, Global Chair of Data, Privacy & Cybersecurity, White and Case, LLC; **Shawn Henry**, CSO and President of Services, CrowdStrike

The growing frequency of cyberattacks coincides with new regulatory compliance requirements. This session will cover critical areas of operational, security, legal and business response readiness.

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Application Security &amp; DevSecOps</b>	50 min	FC

### Security Automation at Scale ASD-T06

**Gary Ramah**, Security, Disney

DevOps has helped with everything from more frequent feature releases to increased application stability. What can DevSecOps help with?

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Blockchain &amp; Applied Crypto 2x</b>	50 min	FC

### From Ephemeral Infrastructure to Ephemeral Communications BAC-T06

**Paul Kocher**, Founder & Researcher, Cryptography Research Inc.; **Joel Wallenstrom**, CEO, Wickr

Why the combination of end-to-end encryption and ephemerality is the most powerful security enforcer and antidote to mainstream data-obsessed and security-poor business models.

## 11:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>C-Suite View</b>	50 min	FC

### Expense in Depth: Managing Your Total Cost of Controls CXO-T06

**Malcolm Harkins**, Chief Security & Trust Officer, Cylance

Malcolm Harkins will show why a total cost of controls model for measuring information security costs is required to manage digital risks, maximize business efficiency and minimize risk exposure.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>C-Suite View 2x</b>	50 min	FC

### Defining a Cyber-Risk Appetite That Works CXO-W10R

**Jack Jones**, Chairman, FAIR Institute

A clearly defined risk appetite can be transformative to a cyber-risk management program. In this session you'll learn how to define an unambiguous risk appetite that drives better decision-making.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cloud Security &amp; Virtualization Δ</b>	50 min	FC

### Building a Leading Cloud Security Program CSV-T06

MODERATOR: **Michael Johnson**, CISO, Capital One

PANELISTS: **Jerry Archer**, Chief Security Officer, Sallie Mae; **Devon Bryan**, EVP and CISO, Federal Reserve; **Doug Greene**, VP and CISO, Guardian Life Insurance; **Christopher Porter**, SVP and Chief Information Security Officer, Fannie Mae; **Alice Rison**, Senior Director, Software Engineering, Capital One

A moderated panel featuring C-suite executives discussing the key aspects of a mature and effective cloud security program in financial services, insurance, and government. *No press allowed.*

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cryptography</b>	50 min	FC

### Public Key Encryption CRYP-T06 ⚙️

**Suvradip Chakraborty**, IIT Madras; **Sherman S. M. Chow**, Chinese University of Hong Kong

Theory and application of public key encryption will be discussed.

**TOPIC 1:** Structure-Preserving Certificateless Encryption and Its Application

Authors: **Tao Zhang**; **Huangting Wu**; **Sherman S. M. Chow**

**TOPIC 2:** Public Key Encryption Resilient to Post-Challenge Leakage and Tampering Attacks

Authors: **Suvradip Chakraborty** and **C. Pandu Rangan**

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center North</b>	30 min	ALL

### Context-Wrapped Security: Driving Down Business Risk BC-T2N

**Colin McKinty**, Cyber Strategy – Americas, BAE Systems

Humans unconsciously gather information to aid decision-making. Too often in security we make important decisions without the context. Learn why actionable context is key to reducing business risk.

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Governance, Risk &amp; Compliance</b>	50 min	FC

### Superforecasting II: Risk Assessment Prognostication in the 21st Century GRC-T06 ⚙️

**Richard Howard**, CSO, Palo Alto Networks

Qualitative risk matrices and heat maps are just bad science. The "new" math consists of latency curves, Bayes algorithm and Monte Carlo simulations. Come see how to do them.

# TUESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 11:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Hackers &amp; Threats</b>	50 min	FC

### Hacking the Human: Special Edition HT-T06

**MODERATOR:** **Lorrie Cranor, Ph.D.**, Director, CyLab Security and Privacy Institute, Carnegie Mellon University

**PANELISTS:** **Lujo Bauer**, Carnegie Mellon University; **Apu Kapadia**, Assoc. Professor of Computer Science and Assoc. Director, Security Program, Indiana University Bloomington; **Emilee Rader**, Associate Professor and AT&T Scholar, Department of Media and Information, Michigan State University

What is it about human behavior that makes cybersecurity so inherently difficult? Hear the latest research on behaviors and mental models and explore tools that humans can actually use.

<b>Hackers &amp; Threats Advanced</b>	50 min	FC
---------------------------------------	--------	----

### Live Adversary Simulation: Red and Blue Team Tactics HTA-T06

**James Lyne**, Director of Research, SANS Institute; **Stephen Sims**, Security Researcher, SANS Institute

We all have penetration testers, but are they working effectively with the defense in our organizations? We need ongoing communication and adversary simulation. Let's look at some real-world usage!

## 11:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Human Element</b>	50 min	FC

### Humans Are Awesome at Risk Management HUM-T06

**Andy Ellis**, CSO, Akamai Technologies

Humans are awesome at risk management. Learn some mental models for understanding how that decision you think is foolish is likely driven by all the tools made us the dominant species on the planet.

<b>Identity</b>	50 min	FC
-----------------	--------	----

### Building Identity for an Open Perimeter IDY-T06

**Tejas Dharamshi**, Senior Security Software Engineer, Netflix, Inc.

Come and learn how Netflix has made identity the new security perimeter by leveraging identity, single sign-on, multifactor and adaptive authentication, device health and authorization.

<b>Law</b>	50 min	FC
------------	--------	----

### Hot Topics in Cyber-Law 2019 LAW-T06

**MODERATOR:** **Michael Aisenberg**, Principle Cyber Policy Counsel, The MITRE Corporation

**PANELISTS:** **Kimberly Peretti**, Partner, Lead Cybersecurity Practice, Alston & Bird, LLP; **Lucy Thomson**, Attorney, Livingston PLC; **Stephen Wu**, Shareholder, Silicon Valley Law Group

Theme-setting expert panel on critical emerging legal issues. Objective will be a practical, useable snapshot of recent developments in cyber-law and -litigation, policy, and industry frameworks.

TUESDAY

# THE ART OF CYBERSECURITY

Cyber threats are malicious, dark, and intrusive, and attacks have never been more complex. At Trend Micro, we're turning ugliness into something beautiful, helping you prepare for, withstand, and rapidly recover from threats—so you can focus on your business.

See how we're making cybersecurity beautiful at booth **S 627**.

# TUESDAY SESSION DETAILS

## 11:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Machine Learning &amp; Artificial Intelligence</b> <span style="float: right;">▲</span>	50 min	FC

**Lessons Learned in Automating Decision-Making: Pitfalls and Opportunities** MLAI-T06

**Sounil Yu**, Chief Security Scientist, Bank of America

There's a strong desire to automate all aspects of security. However, organizations need to take certain precautions before enabling automation across all components of the security stack. *No press allowed.*

<b>Mobile &amp; IoT Security</b>	50 min	FC
----------------------------------	--------	----

**Hindsight and 2020: A Clear-Eyed Look at Shared Responsibility-I-o-T** MBS-T06

**Josh Corman**, CSO, PTC; **Julie Fitton**, Vice President, Digital Product Security

Spanning gadgets and Industrial IoT, in Congress and CA Law, for Mirai and WannaCry... Volatil-I-o-T. This session will crystalize 2018 game changers, warn what's coming, and outline shared Responsibility-I-o-Ts.

<b>Policy &amp; Government</b>	50 min	FC
--------------------------------	--------	----

**Risks and Results: Counter-Risks to the Nation's Critical Infrastructure** PNG-T06

**Christopher Krebs**, Director, Cybersecurity and Infrastructure Security Agency (CISA)

Examine how the newly established National Risk Management Center advances the ongoing work of DHS and its partners.

<b>Privacy</b>	50 min	FC
----------------	--------	----

**Privacy Essentials for Security Professionals** PRV-T06

**Todd Fitzgerald**, Managing Director/CISO, CISO SPOTLIGHT, LLC

Security officers and practitioners need to be versed in the privacy language. Session will explore US, Canadian and EU law, GDPR challenges, Privacy Shield, and today's fundamental privacy concepts.

<b>Protecting Data &amp; the Supply Chain Ecosystem</b>	50 min	FC
---	--------	----

**Rethinking Efficient Third-Party Risk Management** PDAC-T06

**Todd Inskip**, Principal, Cyber Security Strategy, Booz Allen Hamilton

Third-party risk programs can take a lot of resources. Build an efficient and cost-effective program for your company by thinking differently about third-party risk.

<b>Security Strategy &amp; Architecture</b>	50 min	FC
---	--------	----

**Future-Proof Cybersecurity Strategy** STR-T06

**Timothy Lee**, CISO, City of Los Angeles/ITA

This presentation will focus on three must-haves for CISOs to future-proof their cybersecurity strategy.

## 11:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Sponsor Special Topics</b>	50 min	ALL

**Cybersecurity Silo-Busters 1, Cyberthreat Actors 0 (Game in Progress)** SPO1-T06

**Koos Lodewijx**, VP & CTO, IBM Security; **Sridhar Muppidi**, VP & CTO, IBM Security

Learn how to empower critical information-sharing about potential threats across multiple data sources to improve organizational productivity.

<b>Sponsor Special Topics</b>	50 min	ALL
-------------------------------	--------	-----

**Using Machine Learning to Improve Security Predictions** SPO2-T06

**Grant Bourzikas**, Chief Information Security Officer (CISO) & Vice President of McAfee Labs Operations, McAfee

In this session, McAfee's CISO will provide a "how to" for organizations to improve their security by predicting attacks through insights gleaned from data science and machine learning.

<b>Sponsor Special Topics</b>	50 min	ALL
-------------------------------	--------	-----

**Harnessing the Law of Data Gravity – Cyber Defense and the Hybrid Cloud** SPO3-T06

**Sian John**, Chief Security Advisor, Microsoft; **Diana Kelley**, Cybersecurity Field CTO, Microsoft

The law of data gravity guides your SOC teams to focus on intelligent automation and security decision making where context and integration is most abundant.

<b>Technology Infrastructure &amp; Operations</b> <span style="float: right;">2x</span>	50 min	FC
---	--------	----

**Cybersecurity Tips, Tools and Techniques for Your Professional Toolbox** TECH-T06 ⚙️

**Ron Woerner**, President / Chief Trusted Advisor, RWX Security Solutions, LLC

This rapid-fire session provides a vast array of security apps for any situation. You will see security tools such as Nmap, Kali Linux, SysInternals Suite, Wireshark and many more in action.

## 11:10 AM

<b>Expo Briefing Center South</b>	20 min	ALL
-----------------------------------	--------	-----

**Identity = Security** BC-T25

**Michael Kaczmarek**, VP, Product and Solutions Marketing, Neustar

Identity is an actionable understanding of who or what is on the other end of any connection. Leveraging identity to tailor protection is the future of online security.

TUESDAY

# TUESDAY SESSION DETAILS

BADGE ACCESS: FC = Open to Full Conference Registrants only • ALL = Open to all attendees

## 11:40 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center North</b>	30 min	<b>ALL</b>

### Leverage the Latest Threat Intelligence to Stay Ahead of Cyberthreats BC-T3N

*Dmitriy Ayrapetov, Executive Director, Product Management, SonicWall*

Take an in-depth look at data and trends from the SonicWall Capture Threat NetworkSecurity Center. Then see how SonicWall can help personalize threat data to your environment, so you can take informed, decisive actions.

<b>Expo Briefing Center South</b>	20 min	<b>ALL</b>
-----------------------------------	--------	------------

### Get Your Head Out of the Cloud. Zero-Trust Access for Hybrid IT. BC-T3S

*Bryan Embrey, Sr. Product Marketing Manager, Pulse Secure*

Multicloud is the new IT normal, but is there a simple and secure way to give appropriate app connectivity to the cloud and data center? Find out how with a zero-trust framework for hybrid IT.

## 12:10 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center South</b>	20 min	<b>ALL</b>

### In Nine Months, You Could Be Fined for a CCPA Violation. Want to Know Why? BC-T4S

*Nick Cavalancia, Founder and Chief Techvangelist, Netwrix*

Join this session to learn about the looming CCPA, the challenges it presents to your organization, how it will impact your IT team and key grey areas to look into.

## 12:20 PM

<b>Expo Briefing Center North</b>	30 min	<b>ALL</b>
-----------------------------------	--------	------------

### Zero-Trust Privilege for the Modern Threatscape BC-T4N

*David McNeely, Chief Strategy Officer, Centrify*

This session will explore the zero-trust approach to privileged access management, which mandates a "never trust, always verify, enforce least privilege" approach.

TUESDAY

Threats can  
come from  
anywhere,  
so we  
protect you  
everywhere.

Intelligent Security Starts at the Edge

To drive innovation, your security architecture needs to transform from the data center, beyond the cloud, to the Edge. Akamai is the Edge.

Visit Akamai today at **Booth N 6153** to learn how we help:

- Protect Internet-facing apps and APIs
- Secure customer experiences to stop fraud and credential abuse
- Keep users safe from targeted threats in the move to Zero Trust
- Secure corporate application access

Take part in our **#AkamaiCrackTheCode** challenge by visiting Akamai at **Booth N 6153**.

# TUESDAY SESSION DETAILS

## 12:40 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center South</b>	20 min	ALL

### Detect and Block Web App Attacks— Before They Strike Your Business BC-T55

**Rusty Carter**, VP, Product Management, Arxan Technologies

Bad actors are evading traditional security measures. Learn how to extend protection to the web app endpoint, to provide greater visibility and response capabilities before attacks hit infrastructure.

## 1:00 PM

Analytics, Intelligence & Response	50 min	FC
------------------------------------	--------	----

### ATT&CK in Practice: A Primer to Improve Your Cyber-Defense AIR-T07

**Freddy Dezeure**, CEO, Freddy Dezeure BVBA; **Richard Struse**, Chief Strategist, Cyber Threat Intelligence, MITRE Corporation

A primer into the ATT&CK Framework, starting from describing adversary behavior to practical operational use cases in prevention, detection and response and highlighting relevant supporting tools.

Application Security & DevSecOps	50 min	FC
----------------------------------	--------	----

### DevOps' Seven Deadly Diseases ASD-T07

**John Willis**, Founder, Botchagalupe Technologies

In this presentation, we will look at the "Seven Deadly Diseases" of IT organization work and show examples of how to uncover these diseases through a process of organizational forensics.

Blockchain & Applied Crypto	50 min	FC
-----------------------------	--------	----

### Blockchainification of Cyber-Supply Chain Risk: Hype vs. Hope BAC-T07

**Celia Paulsen**, Cybersecurity Researcher, National Institute of Standards and Technology

Get to the bottom of fact and fiction as an NIST researcher discusses how various blockchain technologies are or could be used, focusing on cyber-supply chain risk management.

C-Suite View	50 min	FC
--------------	--------	----

### Building Security In—DevSecOps CXO-T07

**Noopur Davis**, SVP, Chief Product and Information Security Officer, Comcast Business

Comcast uses a DevSecOps approach to security, focusing on automation, speed and development team empowerment. It's agile and effective. It's about building security in rather than bolting it on.

## 1:00 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cryptography</b>	50 min	FC

### ID-Based and Predicate Encryption CRYP-T07

**Olivier Blazy**, Associate Professor, Xlim, Université de Limoges; **Sayantana Mukherjee**, IISc, Bangalore

Techniques for enhancing identity-based encryption and predicate encryption will be discussed.

**TOPIC 1:** Downgradable Identity-Based Encryption and Applications  
Authors: *Olivier Blazy; Paul Germouty; Duong Hieu Phan*

**TOPIC 2:** Large Universe Subset Predicate Encryption Based on Static Assumption (without Random Oracle)  
Authors: *Sanjit Chatterjee; Sayantan Mukherjee*

Expo Briefing Center North	30 min	ALL
----------------------------	--------	-----

### Hunting the Hunters: Going Behind Enemy Lines BC-T5N

**Brian Hussey**, VP, Cyber Threat Detection and Response, Trustwave

Learn about top government sponsored threat actors targeting the US. Trustwave will demonstrate attacks and how to defend against them via threat-hunting, endpoint and network-security services.

Governance, Risk & Compliance	50 min	FC
-------------------------------	--------	----

### The Metrics Manifesto GRC-T07

**Richard Seiersen**, President, M-Cubed

Learn to make metrics like a pro using predictive analytics. Walk away inspired to apply these approaches to security operations as well as board presentations.

Hackers & Threats	50 min	FC
-------------------	--------	----

### Secure the Pod Bay Doors, HAL: Cybersecurity Risks of IoT Automation HT-T07

**Stephen Hilt**, Senior Threat Researcher, Trend Micro; **Numaan Huq**, Senior Threat Researcher, Trend Micro

Find out how two researchers built and hacked into home automation systems and, based on their findings, discuss how to lower the risks that these complex IoT environments are creating.

Human Element	50 min	FC
---------------	--------	----

### The Art of the Nudge, Cheap Ways to Steer User Behavior HUM-T07

**Branden Williams**, Director, Cyber Security, Union Bank

Manipulating human behavior is one of the oldest learned crafts of any civilization. This session will teach attendees how to nudge employees to choose a secure pathway when presented with a choice.

Identity	50 min	FC
----------	--------	----

### Studies of 2FA, Why Johnny Can't Use 2FA and How We Can Change That IDY-T07

**L Jean Camp**, Professor, Indiana University; **Sanchari Das**, Doctoral Researcher, Indiana University

Knowing why people do not adopt 2FA and the work-arounds undermining 2FA enables strategies and interactions to increase acceptability. The science, the tools and the techniques for 2FA usability.

# TUESDAY SESSION DETAILS

BADGE ACCESS: FC = Open to Full Conference Registrants only • ALL = Open to all attendees

## 1:00 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Law	50 min	FC

### Elections at Risk: Global Threats / Local Impact LAW-T07

**MODERATOR:** *Michael Aisenberg*, Principle Cyber Policy Counsel, The MITRE Corporation

**PANELISTS:** *Serge Jorgensen*, Founding Partner/CTO, Sylint Group; *Robert Martin*, Senior Principal Engineer, MITRE Corporation; *Kay Stimson*, VP, Government Affairs, Dominion Voting Systems; *Lucy Thomson*, Attorney, Livingston PLC

Combatting cyberattacks and social media manipulation to interfere with elections is critical. Learn about vulnerabilities, attacks and consensus proposals for strong, resilient election systems.

Machine Learning & Artificial Intelligence	50 min	FC
--	--------	----

### The Rise of the Machines, AI- and ML-Based Attacks Demonstrated MLAI-T07

**Etienne Greeff**, CTO, SecureData Europe; **Wicus Ross**, Lead Researcher, SecureData Labs

Until now there has been little practical examples of the offensive use of AI and ML. This talk will introduce and demonstrate two novel attacks using topic modelling together with some defensive strategies.

## 1:00 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Mobile & IoT Security	50 min	FC

### Evolution of AI-Bot Swarming Intelligence with Robots MBS-T07

**Thomas Caldwell**, President, CTO, League of AI

Botnets, chatbots, social media bots exist in society. AI-Bots use cognitive swarming intelligence to form security teams with robots and humans, enabling a new layer of cyber- and physical security.

Policy & Government	50 min	FC
---------------------	--------	----

### Cybersecurity Rubicon: Is US Domestic and Foreign Cyber-Policy on Track PNG-T07

**MODERATOR:** *Sam Curry*, Chief Security Officer, Cybereason

**PANELISTS:** *Mieke Eoyang*, Vice President for the National Security Program, Third Way; *Chris Painter*, Commissioner, Global Commission on the Stability of Cyberspace; *Eric Rosenbach*, Co-Director, Belfer Center for Science and International Affairs; *Ari Schwartz*, Managing Director, Venable; *Kiersten Todt*, President and Managing Partner, Liberty Group Ventures; Managing Director, The Cyber Readiness Institute

American cyber-policy has undergone massive shifts over the last three years. Is the country gaining or losing ground relative to its nearest competitors?

TUESDAY

# CODE

BOLDLY

Whether you are finding new ways to treat disease, improve education, combat climate change, or streamline banking, your company is changing the world and using software to do it. But if the software you are developing or buying is insecure, you can't achieve your vision – no matter how important or innovative it is. That's where Veracode comes in. We help you secure the software you build, buy, and download so that you can boldly focus on your mission.

**YOU CHANGE THE WORLD, WE'LL SECURE IT.**

VERACODE | CHECK US OUT AT **BOOTH N 6161**

# TUESDAY SESSION DETAILS

## 1:00 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Privacy <span>2x</span>	50 min	FC

### Connected Cars: A Security and Privacy by Design Study 10 Years in the Making PRV-W03R

**Ed Adams**, CEO, Security Innovation, Inc.; **Larry Ponemon**, Founder, The Ponemon Institute

Connected cars—what could go wrong? Learn about the safety, security and privacy trade-offs, and the Privacy by Design system used for “Talking Cars,” a program to save 10,000 lives per year.

TRACK	SESSION LENGTH	BADGE ACCESS
Privacy	50 min	FC

### New Rules: Comparing the CA Consumer Privacy Act and EU GDPR—What Every Security Professional Needs to Know PRV-T07

**MODERATOR:** **John Carlin**, Partner, Morrison & Foerster LLP  
**PANELISTS:** **Lisa Monaco**, Former White House Homeland Security, and Counterterrorism Advisor; **Snir Ben Shimol**, Director of Cybersecurity, Varonis

Current and former US and EU government insiders discuss recent regulatory developments regarding data protection, trends and practical takeaways for avoiding government scrutiny or litigation.

TRACK	SESSION LENGTH	BADGE ACCESS
Professional Development	50 min	FC

### Roadmap to Entrepreneurial Success: Lessons Learned Along The Way PROF-T07

**Paul Burmester**, Head of Innovation & Partnerships, Singtel Innov8; **Gene Teare**, Head of Content, Crunchbase

You’ve got a brilliant idea; how do you see it through in the crowded startup world? Join this fireside chat for valuable lessons learned, mistakes to avoid and what it takes to thrive as an entrepreneur.

TRACK	SESSION LENGTH	BADGE ACCESS
Protecting Data & the Supply Chain Ecosystem	50 min	FC

### When the One You Trust Hurts You Most: Real-World Attack, Real-Time Response PDAC-T07

**Bret Hartman**, VP and CTO, Security Business Group, Cisco Systems; **Jyoti Verma**, Technical Leader, Cisco Systems

Experience a real-time, real-world supply chain attack fueled by rapid internal lateral movement. Watch as split-second, critical decisions are made to stop one of today’s most challenging attacks.

TRACK	SESSION LENGTH	BADGE ACCESS
Security Strategy & Architecture	50 min	FC

### The Digital Risk Dilemma: How to Protect What You Don’t Control STR-T07

**Nick Hayes**, VP of Strategy, InSights

More of your attack surface resides on web infrastructure you don’t own or control. This session will outline the tools, tactics and best practices to protect your entire digital footprint.

## 1:00 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 min	ALL

### Accelerate and Simplify Incident Response with Security Automation SPO1-T07

**Nick Bilogorskiy**, Cybersecurity Strategist, Juniper Networks

Explore how to effectively leverage machine learning and automation to accelerate and simplify incident response.

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 min	ALL

### 99 Security Products and You Still Got Breached? SPO2-T07

**Matthew Chiodi**, Chief Security Officer, Public Cloud, Palo Alto Networks; **Sandra Wenzel**, Sr. Systems Engineer, Palo Alto Networks

The cybersecurity industry has misled us. Buying the sexiest point products has not delivered better security. Understand why and learn how simplicity in security platforms must prevail moving forward.

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 min	ALL

### Playing with Fire: How Cyber-Physical Attacks Threaten Our Connected World SPO3-T07

**Sandra Joyce**, Vice President and Head of Global Intelligence Operations, FireEye

The scale and impact of malicious nation-state cyber-activity is striking. Future attacks could have more significant real-world consequences to the health, safety and security of civilians worldwide.

TRACK	SESSION LENGTH	BADGE ACCESS
Technology Infrastructure & Operations	50 min	FC

### 2028 Future State: Long Live the Firewall? TECH-T07

**MODERATOR:** **Harry Sverdlow**, CTO and Founder, Edgewise Networks  
**PANELISTS:** **Jennifer Minella**, VP of Engineering & Security, Carolina Advanced Digital, Inc.; **Marcus Ranum**, Consultant, Independent; **Adam Shostack**, President, Shostack & Associates

Using threat modeling and best practices to understand how firewalls must evolve to tackle the current and future challenges of network security.

## 1:10 PM

TRACK	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center South	20 min	ALL

### The Scarlet Email: A Look at the Financial Underbelly of BEC Criminal Groups BC-T6S

**Josh Wilson**, Field CTO, Agari

This presentation will discuss the tactics used by a BEC group called Scarlet Widow to recruit money mules using romance schemes and how the group uses online services to launder stolen gift cards.

TUESDAY

# TUESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 1:40 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center North</b>	30 min	<b>ALL</b>
<b>Highlighting Security Blind Spots in the DevOps Butler</b> BC-T6N		

**Nimrod Stoler**, Security Researcher, CyberArk

Is your DevOps infrastructure secure? We'll explore in-depth research on the Jenkins automation server, tactics to identify security weaknesses and best practices to mitigate risk and protect secrets.

<b>Expo Briefing Center South</b>	20 min	<b>ALL</b>
<b>Is DNS Part of Your Cybersecurity Strategy?</b> BC-T75		

**Craig Sanderson**, VP Product Management – Security, Infoblox

DNS is critical to the fabric of the Internet. Attackers often exploit DNS to steal data and as a malware control point. Learn how organizations can use DNS as a pervasive asset for threat defense.

## 2:10 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center South</b>	20 min	<b>ALL</b>
<b>Cloud Revolution—Digital Transformation and Disruption of Data Protection</b> BC-T8S		

**Gary Marsden**, Senior Director, Encryption Products and Cloud Solutions, Gemalto

Tech and commercial advances underpinning cloud introduce irreversible changes, compliance needs, threats, but significant opportunities. This session will discuss challenges and how we overcome the disruption.

## 2:20 PM

<b>Analytics, Intelligence &amp; Response</b>	50 min	<b>FC</b>
<b>Flash War: Tapering an Accelerating Attack Chain</b> AIR-T08		

**Derek Manky**, Chief of Security Insights, Global Threat Alliances, Fortinet, Inc.

Breach latency is decreasing, attacks now swiftly penetrate networks using automation/swarm technology. Dwell time is long. Kill chain defense needs to step up to taper this accelerating attack chain.

TUESDAY

*Cybersecurity is  
a numbers game.*

*It's time to  
embrace **zero.***

**Nothing is worth more than your peace of mind.**

Zero anxiety about cyber threats is achieved through deploying a proactive strategy of defense. Our AI-driven security solutions help you prevent attacks before they can damage your devices, your data, or your reputation.

**Learn more at [Cylance.com/zero](https://Cylance.com/zero) or visit us at booth N 6145.**

# TUESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

2:20 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Application Security & DevSecOps	50 min	FC

## Building Security Processes for Developers and DevOps Teams

ASD-T08

*Ainsley Braun, CEO, Tinfoil Security, Inc.*

With code being pushed as quickly as every hour, adjustments have to be made to the way security works. Train your developers to take on security concerns and work with your team.

TRACK	SESSION LENGTH	BADGE ACCESS
Blockchain & Applied Crypto <span>2x</span>	50 min	FC

## Mechanical Backdoors in Cold War Encryption Machines

BAC-T08

*Marcus Sachs, Chief Security Officer, Pattern Computer*

Many stories have been told about breaking the Enigma. This talk will cover mechanical Hagelin cipher devices that were sold “pre-broken” during the Cold War, and used by some countries into the 1990s.

TRACK	SESSION LENGTH	BADGE ACCESS
C-Suite View	50 min	FC

## How to Make Sense of Cybersecurity Frameworks

CXO-T08

*Frank Kim, Senior Instructor, SANS Institute*

Learn how to make sense of the veritable alphabet soup of cybersecurity frameworks to simplify the complex world of security and structure your program to meet both business and technology goals.

TRACK	SESSION LENGTH	BADGE ACCESS
Cloud Security & Virtualization	50 min	FC

## Using Automation to Help Achieve Security in a Multicloud Environment

CSV-T08

*Brad Arkin, VP, Chief Security Officer, Adobe*

Security in a multicloud environment requires investment in automated tools to help ensure consistency with security policies and compliance. This session will discuss some of the components needed for an automated security stack.

TRACK	SESSION LENGTH	BADGE ACCESS
Cloud Security & Virtualization <span>2x</span>	50 min	FC

## A Cloud Security Architecture Workshop

CSV-T07R

*📍 Dave Shackelford, Sr. Instructor, SANS Institute*

Core cloud security architecture best practices, based on too many projects and deployments to count. This session will quickly bring you up to speed on cloud security architecture design principles.

TRACK	SESSION LENGTH	BADGE ACCESS
Cryptography	50 min	FC

## Homomorphic Encryption

CRYP-T08 🔧

*Malika Izabachène, Research Engineer – Cryptography Expert, CEA LIST; Yuriy Polyakov, Associate Research Professor, New Jersey Institute of Technology*

Theory and implementation of homomorphic encryption will be discussed.

**TOPIC 1:** An Improved RNS Variant of the BFV Homomorphic Encryption Scheme

*Authors: Shai Halevi; Yuriy Polyakov; Victor Shoup*

**TOPIC 2:** New Techniques for Multivalued Input Homomorphic Evaluation and Applications

*Authors: Sergiu Carpov; Malika Izabachène; Victor Mollimard*

2:20 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center North	30 min	ALL

## Next-Gen Cloud Security Architectures for the Cloud-First Future

BC-T7N

*Christopher Park, Chief Technical Implementation Officer, iboss*

This session will discuss available cloud-based security options and the advantages of next-gen containerized cloud gateway architecture for achieving scalable, hardware-free compliance and security.

TRACK	SESSION LENGTH	BADGE ACCESS
Governance, Risk & Compliance	50 min	FC

## Finding the Right Answers—Facilitating Insider Threat Analysis Using OCTAVE

GRC-T08

*Randy Trzeciak, Technical Manager, Software Engineering Institute; Brett Tucker, Technical Manager, Cyber Risk, Carnegie Mellon University, Software Engineering Institute*

This session will provide a scripted risk facilitation discussion with one of the industry’s leading experts in insider threat programs, Randy Trzeciak, using the OCTAVE FORTE process.

TRACK	SESSION LENGTH	BADGE ACCESS
Hackers & Threats	50 min	FC

## Mirai Nikki: The Future of DDoS

HT-T08

*Elliott Peterson, Special Agent, FBI*

This is the untold story of the international investigation team racing to stop Mirai Botnet DDoS attacks, what they learned, and what the future of DDoS botnets will look like.

TRACK	SESSION LENGTH	BADGE ACCESS
Hackers & Threats Advanced <span>2x</span>	50 min	FC

## What’s Your Game Plan? Leveraging Apple’s Game Engine to Detect Threats

HTA-T08 🔧

*Patrick Wardle, Co-Founder, Digita Security*

To detect new Mac malware, a behavior-based approach is needed. Our open-source monitoring framework provides input to a rule-based system that leverages Apple’s game engine to detect threats.

TRACK	SESSION LENGTH	BADGE ACCESS
Human Element	50 min	FC

## Cyber-Influence: Cyberwar and Psychological Operations

HUM-T08

*Lawrence Dietz, General Counsel, TAL Global Corporation*

The real cyberwar is one of influence. We have seen that the Russians and ISIS are very good at it, while the US and allies lag. This session will explore why this is the case.

TRACK	SESSION LENGTH	BADGE ACCESS
Identity	50 min	FC

## More than Vaulting: Adapting to New Privileged Access Threats

IDY-T08

*Lance Peterman, Security Architect, Merck*

Today’s threats are changing rapidly, is your privileged access management (PAM) program keeping up? We’ll update PAM’s evolution, look at new threats and discuss new approaches to reducing risk.

TUESDAY

2:20 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Law	50 min	FC

#### DHS Hackers and the Lawyers Who Advise Them LAW-T08

**MODERATOR:** *Gabriel Taran, Assistant General Counsel for Cybersecurity, Department of Homeland Security*  
**PANELISTS:** *Jason Hill, Deputy Chief, NCATS, CS&C, Department of Homeland Security; Rob Karas, Director, Cybersecurity & Infrastructure Security Agency's (NCATS) Program; Matthew Slowik, Attorney, DHS OGC, Department of Homeland Security; Kelly Thiele, Cybersecurity Analyst, Cybersecurity and Infrastructure Security Agency's (NCATS) Program*

Government hackers open their toolboxes while their lawyers discuss the complex legal issues that can result. The team will share examples of mitigating legal pitfalls to provide actionable services and results.

Learning Labs 	2 HRS	FC
---	-------	----

#### How to Run a Cyber-Incident Response Exercise Using an Open-Source Scenario LAB1-T08

 *John Elliott, Data Protection Specialist; Tim Wiseman, Author*

The more times an organization practices managing a security incident, the better it gets at responding to a real one. You'll learn the skills to facilitate an exercise and take away a scenario to use.

Learning Labs 	2 HRS	FC
---	-------	----

#### Bad Intelligence: Or How I Learned to Stop Buying and Love the Basics LAB2-T08

*Heather Gantt-Evans, Senior Manager, EY; Larry Lipsey, Senior Consultant, EY; Brett Rogers, Manager, Cybersecurity, EY*

Following the intelligence "gold rush," buying every feed and tool available, organizations were left with a hefty bill for "bad intel." This talk will share a basic framework to produce and target intelligence.

Learning Labs 	2 HRS	FC
---	-------	----

#### Crypto Hero (Hands-On) LAB3-T08

*Elizabeth Biddelcome, Instructor, CCSF; Sam Bowne, Instructor, CCSF; Kaitlyn Handelman, Instructor, CCSF; Travis Knapp-Prasek, Student, CCSF*

Will cover encryption systems and blockchains, including AES, RSA, Bitcoin, Ethereum, Stellar and quantum computation. Participants must bring a laptop capable of running VMware virtual machines.

Learning Labs 	2 HRS	FC
---	-------	----

#### Cloud CTF: Identifying and Resolving Attacks in Azure LAB4-T08

*Lesley Kipling, Lead investigator / Chief Security Advisor, Microsoft; Ola Peters, Cybersecurity Incident Response and Recovery Architect, Microsoft; Anthony Petito, Incident Response Team Lead, Microsoft; Jonathan Trull, Senior Director, Cyber, Microsoft*

Get your hands dirty as a member of Contoso's blue team investigating and resolving a series of attacks against cloud workloads hosted in Azure.

Machine Learning & Artificial Intelligence	50 min	FC
--	--------	----

#### AI: Hacking without Humans How Can Human Brains Be Hacked? MLAI-T08

*Anthony J. Ferrante, Global Head of Cybersecurity and Senior Managing Director, FTI Consulting, Inc.*

AI models are built with a type of machine learning called deep neural networks (DNNs). This presentation will discuss the security, ethical and privacy concerns surrounding this technology.

# THIS IS SECURITY ENGINEERED FOR THE DATA ERA ON INTEL

Intel is committed to working together  
with our partners and customers to  
build a trusted computing foundation  
for our data-centric world.

Explore security solutions at booth N 6173.

[intel.com/security](https://intel.com/security)

# TUESDAY SESSION DETAILS

2:20 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Mobile & IoT Security	50 min	FC

## Mobile Security and the Post-Perimeter World: 10 Years of Mobile Threats

MBS-T08

**Michael Murray**, Chief Security Officer, Lookout; **Apurva Kumar**, Security Intelligence Engineer, Lookout

The first decade of widespread use of mobile technologies saw a constant evolution of the attack landscape. The coming decade will see them continue to evolve and adapt to a post-perimeter world.

TRACK	SESSION LENGTH	BADGE ACCESS
Policy & Government	50 min	FC

## The Women Driving Innovation in State Cybersecurity

PNG-T08

**MODERATOR:** **Maggie Brunner**, Program Director, Cybersecurity, Emergency Communications & Technology, National Governors Association  
**PANELISTS:** **Deborah Blyth**, CISO, State of Colorado; **Chetrice Mosley**, Cybersecurity Program Director, Indiana Department of Homeland Security Office of Technology; **Maria Thompson**, State Chief Information Risk Officer, North Carolina Department of Information Technology

Panelists will explore how women are leading innovation in state cybersecurity policy and training the next generation.

TRACK	SESSION LENGTH	BADGE ACCESS
Privacy	50 min	FC

## Use of Facial Recognition to Combat Terrorism

PRV-T08

**MODERATOR:** **Sam Kaplan**, Chief Privacy Officer, Department of Homeland Security  
**PANELISTS:** **Debra Danisek**, Privacy Officer, US Customs and Border Protection; **Michael Hardin**, Director of Planning, Program Analysis and Evaluation, Office of Field Operations, US Customs and Border Protection; **Christopher Pierson**, Founder & CEO, BLACKCLOAK; **C.M. Toke Vandervoort**, VP, Deputy General Counsel, Under Armour, & DHS Data Privacy & Integrity Advisory Committee Member

Learn about the government's use of facial recognition technology to facilitate a large-scale transformation of international travel to and from the United States.

TRACK	SESSION LENGTH	BADGE ACCESS
Protecting Data & the Supply Chain Ecosystem	50 min	FC

## Your Data's Integrity: Protect and Respond to Ransomware and Critical Events

PDAC-T08

**Anne Townsend**, Lead Cybersecurity Engineer, NIST/NCCoE – MITRE

Dive deep into NIST's newest Data Integrity publications and learn how to identify, protect, detect, respond to, and recover from ransomware, malware, or honest human mistakes.

TRACK	SESSION LENGTH	BADGE ACCESS
Security Strategy & Architecture	50 min	FC

## Lift and Shift, Don't Lift and Pray: Pragmatic Cloud Migration Strategies

STR-T08

**Rich Mogull**, Analyst & CEO, Securosis

Learn the latest best practices for migrating even the oldest organizational resources into the cloud.

2:20 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Security Strategy & Architecture	210 min	FC

## A General Introduction to Modern Cryptography

STR1-T08

**Josh Benaloh**, Senior Cryptographer, Microsoft

This session will offer a beginner's tour through the basics of modern cryptography and a few topical applications.

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 min	ALL

## Machine Learning: The What and Why of AI

SPO1-T08

**Timothy Keanini**, Distinguished Engineer, Advanced Threat Solutions, Cisco

Learn what machine learning is and examine different techniques and when to use them. You'll become more informed and gain six questions to ask vendors.

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 min	ALL

## Using the Cloud to Secure vs. Securing the Cloud

SPO2-T08

**Tom Corn**, GM, SVP of Security Products, VMware, Inc.

We've harnessed the unique properties of private/public clouds to revolutionize how we architect and run applications. Can we harness these properties to revolutionize how we secure them? Come see how.

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 min	ALL

## How to Apply a Zero-Trust Model to Cloud, Data and Identity

SPO3-T08

**Nicolas Popp**, SVP Info Protection, Symantec

A safe migration to Office 365, AWS, Azure, etc. requires tenants such as visibility, protection and control. This session will discuss best practices on how to accomplish zero trust in the cloud.

TRACK	SESSION LENGTH	BADGE ACCESS
Technology Infrastructure & Operations	50 min	FC

## Back to the Basics: How to Create Effective Information Security Policies

TECH-T08

**Chuck Kesler**, Chief Information Security Officer, Pendo.io

This case study from Duke Health and Duke University will share an approach for using virtualized secure enclaves for addressing security and compliance challenges in healthcare and academic research.

TRACK	SESSION LENGTH	BADGE ACCESS
Technology Infrastructure & Operations <sup>2x</sup>	50 min	FC

## Cybersecurity Tips, Tools and Techniques for Your Professional Toolbag

TECH-T06R 

**Ron Woerner**, President / Chief Trusted Advisor, RWX Security Solutions

This rapid-fire session provides a vast array of security apps for any situation. You will see security tools such as Nmap, Kali Linux, SysInternals Suite, Wireshark and many more in action.

TUESDAY

# TUESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 2:40 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center South</b>	20 min	<b>ALL</b>

### Edge Computing: New Hope against Insider Threat? BC-T9S

**Hoke Smith**, Director, Security and Analytics, Nuix

Insider attacks can be some of the most damaging. Learn about a new approach that makes use of real-time analytics at the edge to detect and even prevent attacks.

## 3:00 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center North</b>	30 min	<b>ALL</b>

### The Five Stages of Security Change in the World of Converged IT/IoT/OT BC-T8N

**Ellen Sundra**, VP, Systems Engineering, ForeScout

Changing from siloed security to the converged world of all-connected networks and devices? Learn best practices to effectively address this challenge from someone who's been through it before.

## 3:10 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center South</b>	20 min	<b>ALL</b>

### Spartacus as a Service: Privacy, Obfuscation and the Right to Be Forgotten BC-T10S

**Mike Kiser**, Strategist and Evangelist, Office of the CTO, SailPoint

This session will examine the current state of the right to be forgotten and then proposes an alternative solution suggested by the life of Spartacus: privacy through obfuscation.

## 3:40 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Analytics, Intelligence &amp; Response</b>	50 min	<b>FC</b>

### Unraveling Detection Methodologies: Indicators vs. Anomalies vs. Behaviors AIR-T09

**Joe Slowik**, Adversary Hunter, Dragos

IOCs, anomalies and behaviors are used without examining just what these terms mean for defense. This presentation will explore these terms in depth to see just what each means and its benefits.

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Application Security &amp; DevSecOps</b>	50 min	<b>FC</b>

### Release Your Inner DevSecOp ASD-T09

**Shannon Lietz**, Director, Intuit; **James Wickett**, Head of Research, Signal Sciences

DevSecOps brings security to the DevOps party, completely changing the security playbook. This talk will cover 10 practices and patterns we've implemented, bringing DevSecOps value to everyone involved.

## 3:40 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Blockchain &amp; Applied Crypto</b>	50 min	<b>FC</b>

### Cryptojacking: What's in Your Environment? BAC-T09

**Ayse Kaya Firat**, Head of Analytics and Customer Insights, Cisco Systems; **Austin McBride**, Threat Analytics Researcher, Cisco

Cryptojacking, cloud miners, crypto phishing and the criminal enterprises behind them. What are malicious actors doing with crypto and how they are profiting from your environment at your expense.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Blockchain &amp; Applied Crypto 2x</b>	50 min	<b>FC</b>

### From Ephemeral Infrastructure to Ephemeral Communications BAC-T06R

**Paul Kocher**, Founder & Researcher, Cryptography Research Inc.; **Joel Wallenstrom**, CEO, Wickr

Why the combination of end-to-end encryption and ephemerality is the most powerful security enforcer and antidote to mainstream data-obsessed and security-poor business models.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>C-Suite View</b>	50 min	<b>FC</b>

### CISO: How to Understand and Manage Your Human Risk CXO-T09

**Lance Spitzner**, Director, SANS Institute

Key to managing human risk is a mature awareness program. This talk will provide CISOs a roadmap and proven examples of what success looks like, the models to leverage and the path to get there.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cloud Security &amp; Virtualization</b>	50 min	<b>FC</b>

### Security at the Speed of DevOps: A Reality Check CSV-T09

**Steve Martino**, SVP, Chief Information Security Officer, Cisco Systems; **Sujata Ramamoorthy**, Sr. Director, Information Security, Cisco Systems

Speed is at the core of today's digital business. Join this session to hear how security meets the speed of business at Cisco using DevSecOps practices.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cryptography</b>	50 min	<b>FC</b>

### Functional Encryption CRYP-T09

**Răzvan Roşie**, Ph.D. Student, ENS Paris, CNRS, INRIA, PSL Research University and University of Luxembourg

Methodologies for enhancing functional encryption will be discussed. Topic 1: Efficient Function-Hiding Functional Encryption: From Inner-Products to Orthogonality  
Authors: Manuel Barbosa; Dario Catalano; Azam Soleimani; Bogdan Warinschi

Topic 2: Robust Encryption, Extended  
Authors: Rémi Géraud; David Naccache; Răzvan Roşie

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center South</b>	20 min	<b>ALL</b>

### Attack Simulation: Exfiltrating Data from an Organization without Hacking It BC-T11S

**Clifford Vazquez**, Director Enterprise Architect Capgemini's Cybersecurity Global Service Line, Capgemini

Learn about the latest attack methods that avoid detection and define how your organization should react to today's cyberattacks.

# TUESDAY SESSION DETAILS

3:40 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center North	30 min	ALL

## Protecting Your Organizations' Very Attacked People BC-T9N

*Jennifer Cheng, Director, Product Marketing, Proofpoint*

Attackers are targeting organizations in new ways, through their people. These targets are called VAPs (very attacked people). This session will focus on how to identify them and how to protect them.

Governance, Risk & Compliance 2x	50 min	FC
----------------------------------	--------	----

## We're Not in Kansas Anymore: Measuring the Impact of a Data Breach GRC-T09

*Suzanne Widup, Senior Analyst, Verizon Enterprise Solutions*

This session will propose a new way to measure data-breach impact for future risk calculations after studying over 4,000 incidents. Characteristics that intensify a breach's effect are discussed.

Hackers & Threats	50 min	FC
-------------------	--------	----

## Practical Malware Analysis Essentials for Incident Responders HT-T09

*Lenny Zeltser, Instructor, SANS Institute; VP of Products, Minerva Labs*

Learn key malware analysis tactics using free tools at this fast-paced, practical session from an industry pioneer. Go beyond automated sandboxes to boost incident response and threat hunting skills.

Hackers & Threats Advanced	50 min	FC
----------------------------	--------	----

## The Foreshadow Attack: From a Simple Oversight to a Technological Nightmare HTA-T09

*Raoul Strackx, Postdoctoral Researcher, Imec-DistriNet, KU Leuven*

2018 was the year speculative execution vulnerabilities caused havoc. This session will discuss the Foreshadow/L1TF vulnerability, how it got introduced, what its impact was and how it got mitigated.

Human Element	50 min	FC
---------------	--------	----

## Cyber-Hustle: Security Lessons from Hollywood HUM-T09

*Sam Curry, Chief Security Officer, Cybereason; Scott Howitt, SVP, CISO, MGM Resorts International*

Security remains a form of human-to-human conflict in spite of the weapons and terrain, and understanding the "old school" hustles and cons from classic and new movies helps our current mission.

Identity	50 min	FC
----------	--------	----

## Delivering Automated, Modern Enterprise App Auth in Old Orgs, Quickly IDY-T09

*Jon Lehtinen, Lead Identity Engineer, Thomson Reuters*

Jon Lehtinen's organizations dropped WAM and converted to OIDC/OAuth/SAML, all delivered through self-service. This saves millions and positions them for the future of federated auth profiles. Come learn how.

3:40 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Law	50 min	FC

## Blockchain Anchored Swap Meet: A Mock Trial LAW-T09

*MODERATOR: Hoyt Kesterson, Senior Security Architect, Avertium*

*PANELISTS: April Doss, Partner, Saul Ewing Arnstein & Lehr; Serge Jorgensen, Founding Partner/CTO, Sylint Group; Steven Tepler, Partner, Chair Privacy and Security Practice, Mandelbaum Salsburg P.C.; Brian Tsuchida, Chief United States Magistrate Judge, United States District Court, Western District of Washington*

Is it possible to create contracts that will stand up in court using a computer-transcribed recording for the agreement, a voice print as an electronic signature, and blockchain for a timestamp?

Machine Learning & Artificial Intelligence	50 min	FC
--	--------	----

## Ethical Bias in AI-Based Security Systems: The Big Data Disconnect MLAI-T09

*Clarence Chio, Co-Founder, CTO, Unit21; Winn Schwartau, Founder, Winn Schwartau, LLC*

We don't know how AI makes decisions; bias in big data is the root of error in security systems. We focus on biases in AI systems, and propose a framework to eliminate bias in data and algorithms.

Mobile & IoT Security	50 min	FC
-----------------------	--------	----

## Achieving Operational Security Excellence in Connected IoT Solutions MBS-T09

*Michele Guel, Distinguished Engineer/IoT Security Strategist, Cisco Systems*

This session will summarize key attack vectors against connected IoT systems and explain how specific security concepts and requirements may be combined to mitigate the risk of attacks using those vectors.

Policy & Government	50 min	FC
---------------------	--------	----

## Come Get Your Free NSA Reverse Engineering Tool! PNG-T09

*Robert Joyce, Senior Advisor, National Security Agency*

Overview of NSA's GHIDRA software reverse engineering tool, running on Windows, Mac and LINUX. Supporting a variety of processor instruction sets with expanded functionality uniquely developed at NSA.

Privacy	50 min	FC
---------	--------	----

## What Should a US Federal Privacy Law Look Like? PRV-T09

*MODERATOR: Angeliq Carson, IAPP*

*PANELISTS: Julie Brill, Corporate Vice President and Deputy General Counsel, Microsoft; Keith Enright, Chief Privacy Officer, Google; Nithan Sannappa, Associate Legal Director, Product, Twitter*

A federal US privacy law seems inevitable. What should it look like? How should industry and advocates work together to strike the right balance between consumer concerns and allowing companies to thrive?

Protecting Data & the Supply Chain Ecosystem	50 min	FC
--	--------	----

## Due Diligence Meets Small Business: Nightmares from the Other Side PDAC-T09

*Lawrence Cruciana, Chief Systems Engineer, Corporate Information Technologies, Corp*

This session will present effective techniques that can help to achieve transparency and improvement of third parties that are smaller businesses.

# TUESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 3:40 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Security Strategy & Architecture	50 min	FC

### Cyber-Defense Matrix Reloaded STR-T09

 **Sounil Yu**, Chief Security Scientist, Bank of America

This session will show new use cases of the Cyber-Defense Matrix, including how to measure controls, align them against emerging threats, and manage your security program through design patterns.

Sponsor Special Topics	50 min	ALL
------------------------	--------	-----

### HTTPS: Is Privacy Making Us Less Secure? SPO1-T09

**Hal Lonas**, CTO, Webroot

HTTPS promised many security benefits. But what if this tech is actually opening us up to new vulnerabilities? This presentation will examine why the benefits of HTTPS might not outweigh the risks.

Sponsor Special Topics	50 min	ALL
------------------------	--------	-----

### Making Security a Competitive Advantage SPO2-T09

**Sam King**, CEO, Veracode; **Chris Wysopal**, CTO, Veracode

Companies that treat security as a strategic revenue driver by creating secure software and ensuring the software they are using is secure are establishing a competitive advantage over their peers.

Sponsor Special Topics	50 min	ALL
------------------------	--------	-----

### You Just Got Breached! Is There Any Security Solution That Really Works? SPO3-T09

MODERATOR: **Marie Hattar**, CMO, Keysight Technologies

PANELISTS: **Sean Cordero**, VP of Cloud Strategy, Neskope; **Lance Dubsky**, VP, IT Security Technology, Iron Mountain; **Justin Harvey**, Global Incident Response Leader, Accenture; **Steve McGregory**, Director of ATI Research Center, Ixia

Join us for a panel discussion with industry veterans who have learned the hard way that when it comes to network security, everyone can be the best because everyone has their own metrics.

Technology Infrastructure & Operations	50 min	FC
--	--------	----

### Update on Confidential Computing TECH-T09

**Olya Ohrimenko**, Researcher, Microsoft Research

This session will highlight hardware security advances for confidential computing, featuring research on designing confidential services that leverage TEEs to support consortium blockchains and secure multiparty AI scenarios.

## 4:10 PM

Expo Briefing Center South	20 min	ALL
----------------------------	--------	-----

### Three Things Every Boardroom Wants to Know BC-T125

**Jonathan Goldberger**, VP and General Manager, Security Solutions, Unisys

The C-suite is more involved in security—compliance, liability and revenue are all affected by (in)security. This session will discuss what every security program must incorporate into their ballroom reporting.

## 4:20 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center North	30 min	ALL

### Mind the Gap: Four Key Areas Where Infosec Expectations Fall Short of Reality BC-T10N

**Raymond Pompon**, Principal Threat Research Evangelist, F5 Networks

This session will examine surveys and field data to identify four key gaps between what security professionals want to get done and what they're actually able to do—and suggest ways to close the gap.

## 4:40 PM

Expo Briefing Center South	20 min	ALL
----------------------------	--------	-----

### The Nightmare on Cyber-Hygiene Street BC-T135

**Nicola Whiting**, Chief Strategy Officer, Titania

Examines the technology ecosystem needed to be able to trust AI to unlock a future where robust, resilient systems defend themselves—so we can put to bed our Nightmare on Cyber-Hygiene Street.

## 5:00 PM

Expo Briefing Center North	30 min	ALL
----------------------------	--------	-----

### Authentication and Security at the Speed of Conversation BC-T11N

**Vijay Balasubramanian**, CEO and Co-Founder, Pindrop

Pindrop will detail the three pillars of their voice identity platform—speed, accuracy and security. The session will show how voice shapes customer experiences and the environmental impact on sounds.

Law	50 min	FC
-----	--------	----

### Navigating Today's Data Privacy Regulation Labyrinth LAW-T10

MODERATOR: **Greg Silberman**, Chief Privacy Officer, Cylance Inc.

PANELISTS: **Malcolm Harkins**, Chief Security & Trust Officer, Cylance Inc.; **Theresa Payton**, CEO and Founder, Fortalice Solutions; **Ruby Zefo**, Chief Privacy Officer, Uber

Our panel will assess the policy implications of regulatory changes in the US and abroad and their effects on cyberthreat management, data collection and use, and technology innovation.

## 5:10 PM

Expo Briefing Center South	20 min	ALL
----------------------------	--------	-----

### Dissecting ERP Breaches: They're More Common Than You Know BC-T145

**Juan Pablo Perez-Etchegoyen**, CTO, Onapsis

It seems like everyday there is another high profile breach in the news that details customer records lost, compliance failures and bad cybersecurity hygiene. Do you ever wonder where these records are maintained in the organization or what applications were exposed?

 = Top-rated speaker.

 = Session given twice.

 Space is limited; no press allowed.

 Advanced session.

Sessions and speakers are subject to change; visit [www.rsaconference.com](http://www.rsaconference.com) or check the pocket guide or mobile app for room locations and up-to-date information.

# WEDNESDAY EVENTS & ACTIVITIES

6:00 AM – 7:00 AM **POWER PAUSE—MINDFULNESS & MOVEMENT\***  
Moscone West Level 2 Alcove  
This yoga class and meditation session is designed for all levels from beginners to advanced practitioners.

7:00 AM – 8:00 AM **CONTINENTAL BREAKFAST\***  
Various Locations  
Full Conference Pass holders, breakfast is available in Moscone West Levels 2 & 3 and Moscone South Levels 2 & 3.

7:00 AM – 7:50 AM & 12:40 PM – 1:30 PM **BIRDS OF A FEATHER\***  
Moscone West Level 3  
Grab your breakfast or lunch and bring it to the discussion rooms. Some topics are pre-defined and led by speakers, others will develop organically; by design, this is loosely structured to give you an opportunity to network and set the agenda for discussions of interest to you. **Note: Press is not permitted in Birds of a Feather sessions.**

7:00 AM – 8:00 AM **FIRST-TIMERS MEET-UP\***  
Moscone West Level 2 Alcove  
Enjoy this time to regroup, share takeaways and, of course, caffeinate.

## KEYNOTES

Keynote abstracts can be found on pages 32 – 33.

- 8:00 AM – 8:50 AM **Hacking Exposed: LIVE—Bypassing NextGen**  
South Esplanade  
👤 **Stuart McClure**, Chairman and Chief Executive Officer, Cylance Inc.; **Brian Robison**, Chief Evangelist, Cylance Inc.
- 9:20 AM – 10:10 AM **The Role of Security Technologists in Public Policy**  
South Esplanade  
👤 **Bruce Schneier**, Fellow and Lecturer, Harvard Kennedy School
- 10:30 AM – 10:55 AM **The Power of People: Amplifying Our Human Capacity through Technology and Community**  
West Street Level  
**Ann Johnson**, Corporate Vice President, Cybersecurity Solutions Group, Microsoft
- 10:55 AM – 11:15 AM **Palo Alto Networks and Arista Networks CEOs Reveal Secrets to a Successful Cloud Journey**  
West Street Level  
**Nikesh Arora**, Chief Executive Officer and Chairman, Palo Alto Networks; **Jayshree Ullal**, President and Chief Executive Officer, Arista Networks
- 11:15 AM – 11:55 AM **Weaponization of the Internet**  
West Street Level  
MODERATOR: **Ted Schlein**, General Partner, Kleiner Perkins  
PANELISTS: **Nathaniel Gleicher**, Head of Cyber Security, Facebook; **Del Harvey**, Vice President, Trust and Safety, Twitter; **Robert Joyce**, Senior Advisor, National Security Agency; **Peter Warren Singer**, Strategist, New America
- 1:30 PM – 2:20 PM **Strategic Competition—The Rise of Persistent Presence and Innovation**  
South Esplanade  
**Olivia Gazis**, Intelligence and National Security Reporter, CBS News; **General Paul Nakasone**, United States Army, Commander, United States Cyber Command, Director, National Security Agency, Chief, Central Security Service
- 2:50 PM – 3:40 PM **From Dystopia to Opportunity: Stories from the Future of Cybersecurity**  
South Esplanade  
**Dr. Amit Elazari Bar On**, Director, Global Cybersecurity Policy, Intel Corporation, and Lecturer, UC Berkeley School of Information (MICS); 👤 **Keren Elazari**, Analyst & Researcher, K3r3n3.com
- 4:00 PM – 4:25 PM **A View from the Front Lines of Cybersecurity**  
West Street Level  
**Sandra Joyce**, Senior Vice President, Global Intelligence, FireEye; 👤 **Kevin Mandia**, Chief Executive Officer, FireEye
- 4:25 PM – 4:50 PM **A Conversation with Donna Brazile and Mary Matalin**  
West Street Level  
**Donna Brazile**, Veteran Democratic Political Strategist, Adjunct Professor, Author and Syndicated Columnist; **Mary Matalin**, Celebrated Conservative Voice and Former Presidential Advisor
- 4:50 PM – 5:15 PM **How Technology and Innovative Approaches Can Transform Your Organization**  
West Street Level  
**Megan Smith**, Chief Executive Officer, shift7, Third Chief Technology Officer of the United States (2014 – 2017)

8:00 AM – 10:10 AM & 1:30 PM – 3:40 PM **TRACK SESSIONS**  
Locations Vary  
See detailed information on following pages for descriptions and badge access.

8:00 AM – 12:50 PM & 1:30 PM – 5:00 PM **LAW TRACK SESSIONS\***  
Marriott Nob Hill A  
See detailed information on following pages for descriptions.

8:00 AM – 11:20 AM & 1:30 PM – 4:30 PM **LEARNING LABS\***  
Moscone West Level 3  
Learning Labs provide highly interactive, facilitated learning experiences and are very hands-on and small group oriented. Seating is limited; use Reserve a Seat to schedule your participation. You can only reserve one Lab on your schedule, so pick carefully from our 20 great offerings. **Note: Press is not permitted in Lab sessions.**

# WEDNESDAY EVENTS & ACTIVITIES

8:00 AM – 4:00 PM Marriott Yerba Buena 8	<b>RSAC SANDBOX</b> The RSA Conference Sandbox is full of hands-on interactive experiences to test your infosec skills.	Exclusive RSAC Sandbox Media Sponsor: 
8:00 AM – 4:00 PM Marriott, RSAC Sandbox	<b>RSAC CYBREW CAFÉ</b> A full-service coffee bar.	
8:00 AM – 4:00 PM Marriott Yerba Buena 9	<b>RSAC EARLY STAGE EXPO</b> The RSAC Early Stage Expo is the perfect megaphone for emerging infosec startups. Meet over 50 of the industry's most promising newcomers and learn about their innovative products and solutions, and check out the RSAC Early Stage Expo Briefing Center (details on pages 180 – 185).	Exclusive RSAC Early Stage Expo Media Sponsor: 
8:00 AM – 5:00 PM Moscone West Street Level	<b>BROADCAST ALLEY</b> Watch top security publications shoot live and record exclusive interviews.	
9:20 AM – 12:50 PM & 1:30 PM – 5:00 PM Moscone South Level 3	<b>PEER2PEER SESSIONS*</b> P2P sessions enable groups of no more than 30 people that share a common interest to come together and productively explore a specific security topic, facilitated by an experienced practitioner. <b>Note: Press is not allowed in Peer2Peer sessions.</b>	
10:00 AM – 6:00 PM Moscone South Lower Level	<b>RSAC SECURITY OPERATIONS CENTER</b> Take a tour of a working SOC! Head to the Moscone South Lower Level for the RSA Conference Security Operations Center. See what's really taking place on the Moscone Wireless Network in real time.	Sponsored by: 
10:00 AM – 6:00 PM Moscone North & South Lower Levels	<b>EXPO</b> Come see how RSA Conference 2019 exhibitors offer you the latest technological solutions, provide hands-on learning opportunities and demonstrate how they can help you better secure your organization.	
10:30 AM – 4:10 PM Moscone North & South Lower Levels	<b>EXPO BRIEFING CENTER</b> See following pages for abstracts and a complete schedule on pages 115–118.	
11:00 AM – 2:00 PM Howard Street, Mission Street	<b>STREET EATS</b> With options for all tastes, Street Eats is the easy way to fuel up between sessions or get energized before your next keynote. Stop by any of our food trucks on Mission Street or Howard Street.	
11:30 AM – 1:00 PM Marriott Golden Gate B	<b>EXECUTIVE WOMEN'S FORUM MEET &amp; GREET AT RSA CONFERENCE 2019</b>  The Executive Women's Forum and Accenture are hosting a Meet & Greet for all the amazing women attending RSA Conference 2019. Enjoy the company of your peers—some of the brightest minds at the event—for a fun, relaxed, professional get together. Engage and connect with the most dynamic personalities; the women in Information Security who make it happen. Join in interactive discussions and get to know each other. We look forward to meeting you! <b>* All attendees will need an RSA Conference badge to access the Golden Gate level at the Marriott Marquis.</b>	
2:00 PM – 3:00 PM Moscone West Level 2	<b>RSAC SECURITY SCHOLAR POSTER BOARD EXHIBITION</b> RSA Conference Security Scholar connects the brightest up-and-coming cybersecurity students to leading experts, peers and conference attendees. We are offering the RSAC Security Scholars the opportunity to demonstrate their work at a poster board exhibition. Drop by, provide feedback and meet the RSAC Security Scholar Class of 2019!	
4:30 PM – 6:00 PM Moscone North & South Lower Levels	<b>EXPO PUB CRAWL</b>  Enjoy your choice of complimentary beer, wine and non-alcoholic beverages as you visit sponsoring companies' booths to learn about their latest products, services and innovations. Located at select sponsor booths within both halls.	
6:30 PM – 8:00 PM Marriott Golden Gate B	<b>RSAC AFTER HOURS: WHISKEY &amp; WINE TASTING**</b>  Kick off the night with a walk through the "underground cellar." Then, gather in the lounge to sip on an assortment of wines and whiskeys expertly selected from local vineyards and distilleries while soaking up the jazzy sounds of our live band. And keep the night going in our group tasting area, where you can mingle with other cybersecurity connoisseurs and raise a glass to another great year at RSA Conference. <b>Open to Full Conference and Discover Pass holders. Choose one of the RSAC After Hours events on Tuesday, Wednesday or Thursday nights of Conference. Space is limited so make sure to reserve a seat.</b>	

# WEDNESDAY SESSION DETAILS

## 8:00 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Analytics Intelligence &amp; Response</b>	50 MIN	FC

### The State of the Union on Cyber-Intelligence AIR-W02

**Jared Ettinger**, Cyber Intelligence Researcher, Carnegie Mellon University, Software Engineering Institute

Be among the first to hear the results of a study on cyber-intelligence best practices, key challenges and technologies across the US, and learn from the practices of high-performing organizations.

<b>Application Security &amp; DevSecOps</b>	50 MIN	FC
---	--------	----

### Will Your Application Be Secure Enough When Robots Produce Code for You? ASD-W02

**Hasan Yasar**, Technical Manager, Faculty Member, Carnegie Mellon University, Software Engineering Institute

We are inches away from automating code generation. As things are changing, threats are also evolving on attacking SDLC. We need to understand software factory principles to be ready for the future.

<b>Association Special Topics</b>	50 MIN	ALL
-----------------------------------	--------	-----

### Results of the (ISC)<sup>2</sup> Workforce Survey AST1-W02

**John McCumber**, Director, (ISC)<sup>2</sup>

Awareness of the cybersecurity skills shortage has been growing worldwide. Nevertheless, that workforce gap continues to grow, putting organizations at risk despite increases in tech spending.

<b>Association Special Topics</b>	50 MIN	ALL
-----------------------------------	--------	-----

### Hearing Voices: The Cybersecurity Pro's View of the Profession AST2-W02

**Candy Alexander**, President, ISSA International; **Jon Oltsik**, Senior Principal Analyst & ESG Fellow, Enterprise Strategy Group

ISSA/ESG will review the results of the 2018 research on topics such as cybersecurity careers, skills development, organizational considerations and you—the cybersecurity professional.

<b>Association Special Topics</b>	50 MIN	ALL
-----------------------------------	--------	-----

### Building—and Keeping—Your Cybersecurity Team with Nontraditional Staff AST3-W02

**MODERATOR:** **Rob Clyde**, Chair, Board of Directors, ISACA  
**PANELISTS:** **Tracey Dedrick**, Board Director, ISACA; **Theresa Grafenstine**, Managing Director, Deloitte & Touche LLP; **Tammy Moskites**, Managing Director, Accenture; **Gregory Touhill**, President, Cyxtera Federal Group, Cyxtera Technologies, Inc.

The people are as important as the processes and technology. This ISACA panel will discuss hiring strategies and the training that will engage and retain amid the persistent cybersecurity skills gap.

<b>Blockchain &amp; Applied Crypto</b>	50 MIN	FC
--	--------	----

### Automated Fault Analysis of Block Cipher Implementations BAC-W02

**Jakub Breier**, Senior Cryptography Security Analyst, Underwriters Laboratories

This talk will present a fully automated way to carry out differential fault analysis on assembly implementations of symmetric block ciphers.

## 8:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>C-Suite View</b>	50	FC

### Doing Security Orchestration, Automation and Response Before It Was Born CXO-W02

**Tim Callahan**, SVP of Global Security and Chief Security Officer, Aflac Inc.

SOAR technology and techniques ingest info/data, analyze it to understand threats, and auto-block or impede exploitation. Learn how SOAR efficiently blocks millions of avenues of possible compromise.

<b>Cloud Security &amp; Virtualization</b> 2x	50 MIN	FC
---	--------	----

### Protecting the Cloud with the Power of Cloud CSV-W02 ⚙️

**Jay Kelath**, Head of Product Security, Dow Jones & Company; **Pranavkumar Patel**, Senior Security Engineer, Dow Jones & Company

This talk will walk you through Dow Jones Hammer, a self-healing cloud security tool designed to protect hundreds of AWS accounts against misconfiguration with auto-remediation.

<b>Cryptography</b>	50 MIN	FC
---------------------	--------	----

### Security Model and White-Box Crypto CRYP-W02 ⚙️

**Estuardo Alpirez Bock**, Aalto University; **Atsushi Takayasu**, The University of Tokyo

Theoretical aspects of security model and white-box cryptography will be discussed.

**TOPIC 1:** Tight Reductions for Diffie-Hellman Variants in the Algebraic Group Model

*Authors:* Taiga Mizuide; Atsushi Takayasu; Tsuyoshi Takagi

**TOPIC 2:** Doubly Half-Injective PRGs for Incompressible White-Box Cryptography

*Authors:* Estuardo Alpirez Bock; Alessandro Amadori; Joppe W. Bos; Chris Brzuska; Wil Michiels

<b>Governance, Risk &amp; Compliance</b> 2x	50 MIN	FC
---	--------	----

### We're Not in Kansas Anymore: Measuring the Impact of a Data Breach GRC-T09R

**Suzanne Widup**, Senior Analyst, Verizon Enterprise Solutions

This session will propose a new way to measure data-breach impact for future risk calculations after studying over 4,000 incidents. Characteristics that intensify a breach's effect are discussed.

<b>Governance, Risk &amp; Compliance</b>	50 MIN	FC
--	--------	----

### Data Breach or Disclosure: A Quantitative Risk Analysis GRC-W02 ⚙️

**Evan Wheeler**, CISO, Financial Engines

This session will tackle the supposed limitations of quantitative analysis head on by comparing two data-confidentiality scenarios that appear similar, but analysis reveals meaningful differences.

# WEDNESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 8:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Hackers & Threats	50 MIN	FC

### Hacking and Hardening Kubernetes HT-W02

**Jay Beale**, CTO, COO, InGuardians; **Adam Crompton**, Senior Security Analyst, InGuardians

Learn to attack and defend Kubernetes! This talk will demonstrate attacks on a Kubernetes cluster, then defenses that break the attacks. Attendees can download the cluster, as well as the defense YAML files.

Hackers & Threats Advanced	50 MIN	FC
----------------------------	--------	----

### RF Exploitation: IoT and OT Hacking with Software-Defined Radio HTA-W02

**Harshit Agrawal**, Security Researcher, MIT Academy of Engineering, SPPU; **Himanshu Mehta**, Team Lead (Senior Threat Analysis Engineer), Symantec

Exploration and use of SDR to exploit the world we live in, full of interconnected devices. The session will discuss planning/phases of attacking RF, illustrating Internet of Radio Vulnerabilities.

Human Element	50 MIN	FC
---------------	--------	----

### The Rise of the Cyber-Culture Hacker HUM-W02

**Christine Izuakor**, Senior Manager – Global Security Strategy and Awareness, United Airlines

There's a new and critical role brewing in the cybersecurity industry—the cyber-culture hacker. Learn more about what cyber-culture hackers do and why you need one immediately!

## 8:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Identity	50	FC

### Zero-Knowledge (ZK) Proofs—Privacy-Preserving Authentication IDY-W02

**Rajan Behal**, Managing Director, KPMG; **Karla Clarke**, Manager, KPMG

Come and learn how “zero-knowledge (ZK) proofs” breakthrough in cryptography is enabling privacy-preserving authentication. Yes it's possible to give back consumers the control of their personal data.

Law	50 MIN	FC
-----	--------	----

### AI and Machine Learning: Managing the Risks of Major Lawsuits LAW-W02

**MODERATOR: Stephen Wu**, Shareholder, Silicon Valley Law Group

**PANELISTS: Ted Claypoole**, Partner, Womble Bond Dickinson; **Abraham Kang**, Senior Director Software, Samsung; **Natalie Pierce**, Shareholder, Littler Mendelson P.C.; **Stephen Wu**, Shareholder, Silicon Valley Law Group

How can companies minimize the risk of lawsuits for AI/machine learning accidents, data breaches and other systemic events? Learn action steps to mitigate legal risks for selling and operating AI systems and robots through examples of AI used in financial services, transportation and HR management.

WEDNESDAY

# Carbon Black.

# CB Predictive Security Cloud™

# WEDNESDAY SESSION DETAILS

## 8:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Learning Labs <span>△</span>	3 HRS	FC

### Are You a Secure Coding Champion? LAB3-W02 ⚙️

**Pieter Danhieux**, Founder & CEO, Secure Code Warrior; **Matias Madou**, CTO & Founder, Secure Code Warrior

These two-hour sessions will be hands-on, guided learning for students. The goal is to teach students new skills by allowing them to work through real-life defensive simulations in secure coding.

Machine Learning & Artificial Intelligence	50 MIN	FC
--	--------	----

### Automating Security Controls Using Models and Security Orchestration MLAI-W02

**Kurt Lieber**, VP, CISO IT Infrastructure, Aetna

To combat new types of malware, organizations need to look at model-driven security orchestration where security responses to emerging threats and attacks are automated and driven at machine speed.

Mobile & IoT Security	50 MIN	FC
-----------------------	--------	----

### Japan's New Cybersecurity Strategy to Close an IoT Gap MBS-W02

**Mihoko Matsubara**, Chief Cybersecurity Strategist, NTT Corporation

Japan adopted a new Cybersecurity Strategy and a tax incentive for IoT investments in 2018. This session will analyze current cybersecurity and policy challenges and opportunities in Japan.

Policy & Government	50 MIN	FC
---------------------	--------	----

### Nation-States Behaving Badly: The Evolving Rules of the Game in Cyberspace PNG-W02

**MODERATOR: Catherine Lotrionte**, Brent Scowcroft Scholar, Atlantic Council  
**PANELISTS: Tom Corcoran**, Head of Cyber Security, Farmers Insurance Group; **James Lewis**, Senior Vice President, Center for Strategic International Studies (CSIS); **Paul Rosenzweig**, Senior Fellow, R Street Institute; **Rob Strayer**, Deputy Assistant Secretary for Cyber and International Communications and Information Policy, US Department of State

Cyberspace is regularly described as a lawless domain. This panel will examine recent events to explore whether standards of conduct are evolving that constructively shape behavior.

Privacy	50 MIN	FC
---------	--------	----

### Lesson Learned: What I Have Experienced While Implementing GDPR PRV-W02

**Michael Mrak**, Head of Department Compliance, Casinos Austria AG

The GDPR is a big challenge but also opportunity not only for European countries. This presentation will show how an international gaming operator implemented the GDPR.

## 8:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Protecting Data & the Supply Chain Ecosystem	50 MIN	FC

### Supply Chain Security for Critical Energy Infrastructure PDAC-W02

**MODERATOR: Sharla Artz**, Vice President, Government Affairs, Policy & Cybersecurity, UTC

**PANELISTS: Tom Alrich**, Principal Consultant, Tom Alrich LLC; **Art Conklin**, Associate Professor, University of Houston; **Marcus Sachs**, Chief Security Officer, Pattern Computer

The bad guys have figured out that the best way to attack critical energy infrastructure is through the supply chain. What can energy companies do to protect themselves?

Security Strategy & Architecture	50 MIN	FC
----------------------------------	--------	----

### How to Detect and Stop Attacks as They Occur with a Limited Budget STR-W02 ⚙️

**John Allred**, Senior Manager, EY

What capabilities and tools do you need to detect, remediate and smother attacks in real time?

Technology Infrastructure & Operations	50 MIN	FC
--	--------	----

### Getting Practical with Addressing Risks in OT Networks: Where to Start? TECH-W02

**Galina Antova**, Co-Founder, Claroty

Case studies and best practices from dozens of large organizations— from understanding the true extent of the exposure to prioritizing the concrete measures, as well as addressing governance and IR.

## 8:10 AM

RSAC Sandbox	2 HRS	ALL
--------------	-------	-----

### SANS Core NetWars Experience SBX2-W1

**Chris Elgee**, Builder & Breaker, Counter Hack Challenges

SANS NetWars Experience develops and tests your information security skills in a safe, interactive environment, while having a little fun with your fellow IT security professionals.

## 8:30 AM

RSAC Sandbox	30 MIN	ALL
--------------	--------	-----

### Internet of Food: How IoT Threatens Fields, Farms and Factories SBX1-W1

**Ryan Flores**, Senior Manager Threat Research, Trend Micro; **Akira Urano**, Senior Threat Researcher, Trend Micro

Get a taste of the security weaknesses challenging the food production industry as it takes advantage of the efficiencies offered by IoT.

WEDNESDAY

# WEDNESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 9:00 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>RSAC Sandbox</b>	30 MIN	<b>ALL</b>

### Shadow IoT Hacking the Corporate Environment: Office as the New Smart Home SBX1-W2

*Ondrej Vlcek, Chief Technology Officer, Avast*

Many security teams underestimate the impact of shadow IoT as devices are popping up on corporate networks in the thousands. Live demos of attack on consumer IoT in a "secure" office environment.

<b>RSAC Early Stage Expo Briefing Center</b>	20 MIN	<b>ALL</b>
--	--------	------------

### Internal Combustion: The Insider Threat to Industrial Control Systems BC-W1ESE

*David Formby, Co-Founder, CEO/CTO, Fortiphyd Logic, Inc.*

Insiders are the most likely threats to ICS networks, yet current security solutions do little to stop them. Come see demos on a 3D ICS simulation to learn how to protect your ICS.

## 9:20 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Analytics Intelligence &amp; Response</b>	50 MIN	<b>FC</b>

### Tales from the Front Lines AIR-W03

*MODERATOR: Rob Sloan, Research Director, WSJ Pro Cybersecurity*

*PANELISTS: Tom Etheridge, VP of Services, CrowdStrike; Stuart McKenzie, VP Mandiant EMEA, FireEye; Wendi Whitmore, Global Lead of IBM X-Force Incident Response and Intelligence Services, IBM Security*

This session will educate and entertain attendees with tales from the front lines of incident response. Find out the who, what, where, when, why and how of cyberattacks and what you need to do.

<b>Application Security &amp; DevSecOps</b>	50 MIN	<b>FC</b>
---	--------	-----------

### Security Precognition: Chaos Engineering in Incident Response ASD-W03

*Kyle Erickson, Director of IT Security, Optum; Aaron Rinehart, Chief Enterprise Security Architect, Optum*

Large distributed systems have unpredictable outcomes that are costly when they occur. IR is a reactive exercise. Chaos engineering allows for IR teams to proactively predict incident patterns.

# WEDNESDAY SESSION DETAILS

9:20 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Blockchain &amp; Applied Crypto</b>	50 MIN	FC

## Demystifying Quantum Computers BAC-W03

**Charlie Kaufman**, Security Architect, Dell Technologies; **Radia Perlman**, Fellow, Dell Technologies

This talk will explain what a program on a quantum computer would look like, including how one could break RSA.

<b>C-Suite View</b> 2x	50 MIN	FC
------------------------	--------	----

## Building Security In—DevSecOps CXO-T07R

**Noopur Davis**, SVP, Chief Product and Information Security Officer, Comcast Business

Comcast uses a DevSecOps approach to security, focusing on automation, speed and development team empowerment. It's agile and effective. It's about building security in rather than bolting it on.

<b>C-Suite View</b>	50 MIN	FC
---------------------	--------	----

## Inside the Timehop Breach Response CXO-W03

**Nick Selby**, Director of Cyber Intelligence & Investigations, New York Police Department

With four million European users, Timehop was one of the first to breach personal data under the new GDPR regime. The Timehop disclosure was stunning in its openness and detail. This is how it happened.

<b>Cloud Security &amp; Virtualization</b>	50 MIN	FC
--	--------	----

## Securing Cloud-Native Applications at Scale CSV-W03

**Ashwin Ambekar**, Principal Architect (Security), eBay Inc.

This session will walk through capabilities, security challenges, threat analysis, security strategy and recommendations on best practices for a cloud-native architecture.

<b>Cryptography</b>	50 MIN	FC
---------------------	--------	----

## Foundation CRYP-W03 ⚙️

**Benedikt Auerbach**, Research assistant, Ruhr-University Bochum; **Tim Wood**, University of Bristol/KU Leuven

Topics on cryptographic foundation will be discussed.

**TOPIC 1:** Error Detection in Monotone Span Programs with Application to Communication-Efficient Multiparty Computation  
Authors: Nigel P. Smart and Tim Wood

**TOPIC 2:** Lossy Trapdoor Permutations with Improved Lossiness  
Authors: Benedikt Auerbach; Eike Kiltz; Bertram Poettering; Stefan Schoenen

<b>Cybersecurity Future Proof: 2025</b>	50 MIN	FC
---	--------	----

## Building a Defensible Cyberspace: 2025 CSFP-W03

**MODERATOR:** **Jason Healey**, Senior Research Scholar, Columbia University, School of Public and International Affairs

**PANELISTS:** **Melody Hildebrandt**, EVP, Fox; **Angela McKay**, Director, Cybersecurity Policy, Microsoft; **Greg Rattray**, Managing Director, JP Morgan Chase; **Phil Venables**, Partner and Chief Operational Risk Officer, Goldman Sachs

A more defensible cyberspace is possible with technology, operation, and policy innovations to give defenders the most advantage at greatest scale at least cost. Learn from five decades of success and failure.

9:20 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Governance, Risk &amp; Compliance</b> 2x	50 MIN	FC

## GDPR: How to Work Out If Your Security Is "Appropriate" GRC-W03

**John Elliott**, Data Protection Specialist

GDPR requires organizations to implement "appropriate technical and organizational measures" to protect personal data. This session will help you to determine what's appropriate for your organization.

<b>Hackers &amp; Threats</b>	50 MIN	FC
------------------------------	--------	----

## How Vault 7 Leaks Helped Develop My Own Cyber Espionage Weapon HT-W03

**Wayne Ronaldson**, Red Team Lead, Loop Secure

The presenter sought to develop an attack capability based on information available via the Vault 7 leaks to see whether an individual could glean enough information to build their own cyberespionage tool.

<b>Hackers &amp; Threats Advanced</b>	50 MIN	FC
---------------------------------------	--------	----

## Guardians of the Port: Infinity War HTA-W03 ⚙️

**Zheng Min**, Security Expert, Alibaba

This talk will demonstrate that most of Apple system defenses can be bypassed through (Mach) port object-oriented programming (POP) and propose XNU Kernel Object Protector to protect defenseless kernel objects.

<b>Human Element</b>	50 MIN	FC
----------------------	--------	----

## Democratizing Security: A Story of Security Decentralization HUM-W03

**Harshil Parikh**, Director of Security, Medallia, Inc.

A call for democratizing security, this talk will discuss initiatives to decentralize security. Results: better vulnerability remediation and culture of security ownership across the company.

<b>Identity</b>	50 MIN	FC
-----------------	--------	----

## Important Things You Need to Know about Storing Your Identity IDY-W03 ⚙️

**Paula Januszkiwicz**, CEO, CQURE

You will learn how the password attacks are performed, the typical paths where credentials can be leaked and how to prevent these by implementing various solutions.

<b>Law</b>	50 MIN	FC
------------	--------	----

## The EU's General Data Protection Regulation: One Year Later LAW-W03

**MODERATOR:** **Paul Rosenzweig**, Senior Fellow, R Street Institute

**PANELISTS:** **Francoise Gilbert**, Shareholder, GreenburgTraurig; **Harvey Jang**, Global Data Protection and Privacy Counsel, Cisco Systems Inc.; **Ariel Silverstone**, External Data Protection Officer, Data Protectors; **Mark Weatherford**, Global Information Security Strategist, Booking Holding

The EU's GDPR is a legal disruption. It challenges existing trans-Atlantic data sharing and may give rise to copycat legislation in Asia, the US, and the States. Come hear how the first year has gone.

## 9:20 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Learning Labs	2 HRS	FC

### Holistically Mitigating Human Vulnerabilities and Attacks LAB1-W03

**Tracy Celaya**, Consultant, Systems Evolution, Inc.; **Alexandra Panaretos**, National Practice Lead for Security Awareness and Training, EY; **Ira Winkler**, President, Secure Mentem

In this lab, attendees will work through common attacks targeting people, and identify an appropriate holistic combination of technology, process, and awareness to mitigate human vulnerabilities.

Learning Labs	2 HRS	FC
---------------	-------	----

### Defending Digital Democracy: How Security Professionals Can Help LAB2-W03

**Mari Dugas**, Project Coordinator, Cyber Security Project and D3P; **Jordan D'Amato**, Executive Director, Defending Digital Democracy Project (D3P), Belfer Center, Harvard

Digital threats to democracy are multiplying. Take a crash course on how officials are securing elections by joining a simulation of 2020 under attack. Work together to defeat cyber- and info ops.

Learning Labs	2 HRS	FC
---------------	-------	----

### Verizon Incident Preparedness Report—Taming the Data Beast LAB4-W03

**Eric Gentry**, Managing Principal, Rapid Response Retainer, Verizon; **John Grim**, Senior Manager | Investigative Response, Verizon; **Chris Novak**, Director | Investigative Response, Verizon; **Ashish Thapar**, Managing Principal, APJ, Verizon Threat Research Advisory Center (VTRAC)

The “Verizon Incident Preparedness Report—Taming the Data Beast” tackles data breach preparation for that inevitable spar with the daemon of death in the age of digital heroes.

Machine Learning & Artificial Intelligence	50 MIN	FC
--	--------	----

### Attacking Machine Learning: On the Security and Privacy of Neural Networks MLAI-W03

**Nicholas Carlini**, Research Scientist, Google

This talk will examine security and privacy problems with neural networks. Included will be how to attack classifiers make them misclassify inputs, and extract sensitive training data out of a pretrained network.

Mobile & IoT Security	50 MIN	FC
-----------------------	--------	----

### Attack Vectors in Orbit: The Need for IoT and Satellite Security MBS-W03

**Bill Malik**, VP Infrastructure Strategies, Trend Micro

Hear attack scenarios posed by satellites and other devices with primitive security connected to the growing IoT ecosystem. Will blockchain, AI or ML be the key to lowering the risk of attack?

Peer2Peer	50 MIN	FC
-----------	--------	----

### What Tools and Techniques Work in Malware Analysis? P2P1-W03

**Lenny Zeltser**, Instructor, SANS Institute; VP of Products, Minerva Labs

How to analyze malware discovered as part of incident response or breach investigations? Learn what the role of automated tools and manual techniques for deriving threat intelligence in such efforts.

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer <span>△</span>	50 MIN	FC

### To Pay or Not to Pay: A Ransom Discussion P2P2-W03

**Lee Parrish**, Vice President, Chief Information Security Officer, Blucora

Assemble with your peers to discuss the pros and cons of paying a ransom to recover your data. Do we do it on a case-by-case basis or never pay? What are the ramifications of not paying?

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer <span>△</span>	50 MIN	FC

### Reorganize DevSecOps or Continue to Fail at Agile P2P3-W03

**Marina Kernes**, Director of PMO for Data, Platform and Security, Entertainment Partners

Inspection at the end forces a choice between an unmitigated risk or a late delivery. Engaging DevSecOps resources from the start ensures that expert feedback is incorporated without causing delays.

TRACK	SESSION LENGTH	BADGE ACCESS
Policy & Government	50 MIN	FC

### Engaging Internationally in Support of Cybersecurity for Critical Functions PNG-W03

**MODERATOR: Catherine Lotrionte**, Brent Scowcroft Scholar, Atlantic Council  
**PANELISTS: Jeanette Manfra**, Assistant Secretary, Office of Cybersecurity and Communications (CS&C), Department of Homeland Security; **Ciaran Martin**, CEO of the National Cyber Security Centre, UK Government; **Cheri McGuire**, CISO, Standard Chartered Bank; **Leo Simonovich**, VP and Global Head, Industrial Cyber & Digital Security, Siemens Energy

This panel will examine how governments and the private sector can manage global cyber-risks in national critical functions through robust international cooperation.

TRACK	SESSION LENGTH	BADGE ACCESS
Privacy <span>2x</span>	50 MIN	FC

### Connected Cars: A Security and Privacy by Design Study 10 Years in the Making PRV-W03

**Ed Adams**, CEO, Security Innovation, Inc.; **Larry Ponemon**, Founder, The Ponemon Institute

Connected cars—what could go wrong? Learn about the safety, security and privacy trade-offs, and the Privacy by Design system used for “Talking Cars,” a program to save 10,000 lives per year.

TRACK	SESSION LENGTH	BADGE ACCESS
Protecting Data & the Supply Chain Ecosystem	50 MIN	FC

### Multiparty Vulnerability Disclosure: From Here to Where? PDAC-W03

**MODERATOR: John Banghart**, Senior Director, Venable  
**PANELISTS: Kent Landfield**, Chief Standards and Technology Policy Strategist, McAfee; **Art Manion**, Vulnerability Analysis Technical Manager, CERT Coordination Center; **Audrey Plonk**, Director, Global Security Policy, Intel Corporation

Multiparty vulnerability disclosure: What works, what doesn't, and where do we go from here? Hear the views of experts from different perspectives.

## 9:20 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Security Strategy & Architecture	50 MIN	FC

### Access Control for Multi-Vendor Big Data and BI Environments STR-W03

**Anmol Singh**, Lead Analyst, KuppingerCole

Do you have control about who can see which data returned from your BI tools? While there is not the perfect out-of-the-box solutions, there are some ways to tackle this challenge.

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 MIN	ALL

### Honeypot Predators: Hunter vs. Prey SPO1-W03

**Aamir Lakhani**, Senior Researcher, Fortinet, Inc.

This talk will examine how threat hunting organizations can setup honeypots to gather threat intelligence, harvest new malware, and gain an insight inside the world scams, hacks, and cybercrime.

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 MIN	ALL

### What Happens to Your Threat Model When Hardware Isn't Really Hardware? SPO2-W03

**Window Snyder**, Chief Software Security Officer, Intel Corporation

Join Intel's Chief Software Security Officer, Window Snyder, for a discussion about hardware and software update cycles and the importance of rethinking the way we think about hardware security.

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 MIN	ALL

### How to Evolve Threat Hunting by Using the MITRE ATT&CK Framework SPO3-W03

**Jared Myers**, Sr. Threat Researcher, Carbon Black

The ATT&CK matrix is a vital tool for evaluating your threat hunting capabilities. From a tool-agnostic view, learn how to leverage this approach to improve the efficiency of your threat hunting.

TRACK	SESSION LENGTH	BADGE ACCESS
Technology Infrastructure & Operations	50 MIN	FC

### Building High Performance and Innovative Security Programs that Embrace Cyber/Physical Convergence TECH-W03

**Eman Al Awadhi**, Director of Cyber Security & Resilience, Expo 2020 Dubai; **Eddie Schwartz**, Chief Information Security Officer, Block.One

This session will offer practitioner perspectives on third-party risk considerations, testing approaches and agile practices implemented to deal with the increasing cyber/physical threats and vulnerabilities.

## 9:30 AM

TRACK	SESSION LENGTH	BADGE ACCESS
RSAC Early Stage Expo Briefing Center	20 MIN	ALL

### Automate Software Vulnerability Management with an AppSec System of Record BC-W2ESE

**Anita D'Amico**, CEO, Code Dx, Inc.

Code Dx automates the configuration of AppSec tests, correlation and prioritization of results, and tracking of remediation from a centralized platform that fits right into a DevSecOps environment.

## 10:40 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Cybersecurity Future Proof: 2025	1.5 HRS	FC

### How to Eliminate a Major Vulnerability in the Cybersecurity Workforce CSFP-W05

*Laura Bate*, Policy Analyst, New America; *Danielle Santos*, Program Manager, NIST

This session will move beyond talking about getting more women into cybersecurity and focus on action. We road test cutting-edge strategies to solve the problem and learn to use them across industries.

Expo Briefing Center South	20 min	ALL
----------------------------	--------	-----

### The Art of Remediation BC-W15

*Austin Murphy*, Vice President, Managed Services, CrowdStrike

Join CrowdStrike to explore strategies for performing effective remote remediation of compromised systems, instead of disrupting business operations by taking systems offline and reimaging them.

Law	50 MIN	FC
-----	--------	----

### What You Need to Know about the Cybersecurity Landscape and Cyber-Cases LAW-W05

**MODERATOR:** *Julia Bowen*, Senior VP/General Counsel, The MITRE Corp.  
**PANELISTS:** *Richard Aldrich*, Cyber Security Policy and Compliance Analyst, Booz, Allen, Hamilton/DOD OSD; *Adriana Sanford*, International TV Commentator / Professor – Cyber Security Law, Pepperdine University

Interactive presentation on the most significant recent cases in cyber-law, and consequences for noncompliance. Companies also struggle to adhere to multiple regulators and conflicting foreign laws.

Peer2Peer 	50 MIN	FC
---	--------	----

### Vetting Vendor Artificial Intelligence Claims: Separating Fact from Fiction P2P1-W05

*John Dickson*, Principal, Denim Group, Ltd.

Learn how peers are vetting vendor claims involving AI embedded in security products and putting AI and machine learning to work as part of a broader security strategy.

Peer2Peer 	50 MIN	FC
---	--------	----

### Threat Hunting: Best Practices, Current Challenges and Lessons Learned P2P2-W05

*Roger O'Farrell*, Information Security Team Lead, Federal Reserve Bank

This discussion will look to bring forward what other professionals are doing in the threat-hunting space. Best practices, lessons learned and challenges will be discussed.

Peer2Peer 	50 MIN	FC
---	--------	----

### Overcoming the PaaS Dilemma: What You Do Not See? P2P3-W05

*Wayne Anderson*, Enterprise Security Architect, McAfee

Platform as a Service introduces new architectural patterns to manage data and application access. Share implementation experience, and explore protective patterns for your next PaaS application.

## 10:50 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
RSAC Sandbox	2 HRS	ALL

### SANS Core NetWars Experience SBX2-W2

*Chris Elgee*, Builder & Breaker, Counter Hack Challenges

SANS NetWars Experience develops and tests your information security skills in a safe, interactive environment, while having a little fun with your fellow IT security professionals.

RSAC Sandbox	30 MIN	ALL
--------------	--------	-----

### SCADA Attack Detection 101 SBX4-W1

*Oleg Kolesnikov*, Vice President of Threat Research / Cybersecurity, SECURONIX; *Harshvardhan Parashar*, Security Researcher, SECURONIX

In this talk, you will learn about the fundamentals of ICS/SCADA attack detection. You will see a demo and learn about some practical detection techniques, including ML-based anomaly detection.

## 11:00 AM

RSAC Early Stage Expo Briefing Center	20 MIN	ALL
---------------------------------------	--------	-----

### World's First Endpoint-Based Real-Time Phishing Prevention Using Computer Vision BC-W5E5E

*Arun K. Buduri*, Co-Founder & President, PIXM, INC.

Why do phishing attacks continue to rise? How are today's solutions blindsided in detecting them? Come and learn why real-time phishing detection on the endpoint will change the game in anti-phishing.

## 11:10 AM

Expo Briefing Center South	20 min	ALL
----------------------------	--------	-----

### There's No Intelligence in AI without Security Data Management BC-W25

*Scott Mongeau*, Cybersecurity Data Scientist, SAS Institute, Inc.

A defined security data management plan can reduce data headaches and increase the time for analysis and investigations. Join this session for practical data management best practices you can apply.

## 11:20 AM

RSAC Sandbox	30 MIN	ALL
--------------	--------	-----

### Debunking the Hacker Hype: The Reality of Widespread Blackouts SBX4-W2

*Selena Larson*, Intelligence Analyst, Dragos, Inc.

Attendees will leave with a better understanding of electric grid cyberattacks, the adversaries targeting critical infrastructure, and what is really required for disruptive attacks.

# WEDNESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 11:30 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
RSAC Early Stage Expo Briefing Center	20 MIN	ALL

### Malicious Bot Attacks—Why They're Increasing, and How to Stop Them BC-W6ESE

*Shreyans Mehta, CTO, Co-Founder, Cequence Security*

Discover how malicious bots are targeting your organization, why traditional security tools can't detect and stop them, and how Cequence Security can with its innovative application security platform.

## 11:40 AM

Expo Briefing Center South	20 min	ALL
----------------------------	--------	-----

### Security for a Zero-Trust World BC-W3S

*Jay Bhansali, Product Marketing Engineer (Director), MobileIron*

Enterprise security models fail as perimeters dissolve and data travels across devices apps, and networks. MobileIron will outline an architecture that brings true trust to a zero-trust world.

## 12:00 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center North	30 min	ALL

### Continuous Endpoint Monitoring at Scale for the Global Enterprise BC-W3N

*Anthony Di Bello, VP, Strategic Development, OpenText*

Common approaches to continuous monitoring do not scale and may introduce risk of privacy violations. This talk will present a realistic approach to continuous endpoint monitoring to address these challenges.

Law	50 MIN	FC
-----	--------	----

### Cybersecurity: Federalism as Defense-in-Depth LAW-W08

*MODERATOR: Gregory von Lehmen, Special Assistant to the President, Cybersecurity, University of Maryland University College*

*PANELISTS: Frank Grimmelmann, President & CEO/Intelligence Liaison Office, Arizona Cyber Threat Response Alliance (ACTRA); Chetrice Mosley, Cybersecurity Program Director, Indiana Department of Homeland Security Office of Technology; Brian Ray, Professor of Law and Co-director, Center for Cybersecurity and Privacy Protection, Cleveland Marshall School of Law, Cleveland State University*

This panel will underscore the importance of state-level initiatives as a complement to federal efforts across a wide range of cybersecurity issues.

# WEDNESDAY SESSION DETAILS

## 12:00 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer <span>△</span>	50 MIN	FC

**Defining Your Organization's Compliance and Certification Strategy** P2P1-W08

*David Graves, Security Architect, Hewlett Packard Enterprise*

Compliance with security standards and legislation is challenging. Join a discussion on how to drive compliance and certification by mapping overlapping security controls to define a custom strategy.

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer <span>△</span>	50 MIN	FC

**Strength in Community: Sharing Experiences with the Cybersecurity Framework** P2P2-W08

*Thomas Conkle, Cybersecurity Engineer, G2, Inc.*

Come discuss how your organization and others have developed risk-informed cybersecurity strategies for mitigating and addressing threats and vulnerabilities in their organization.

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer <span>△</span>	50 MIN	FC

**The Kubes: Practical Container Orchestration Security** P2P3-W08

*Diana Kelley, Cybersecurity Field CTO, Microsoft*

Come share and learn methods for securing Kubernetes and orchestration: how to track, technical strategies, and processes to ensure orchestration stays robust over time.

## 12:10 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center South	20 min	ALL

**Hybrid Security for Your Hybrid Enterprise** BC-W4S

*Todd Peterson, IAM Evangelist, One Identity*

We will discuss ways to ensure that as you secure your cloud you don't leave legacy environments unprotected. We'll talk about access and identity lifecycle management for today's hybrid enterprise.

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
RSAC Sandbox	20 min	ALL

**Engaging the Media 101** SBX5-W1

*Rob Sloan, WSJ Pro Cybersecurity, Research Director, Wall Street Journal Pro*

This session will explore how startups can engage with the media. Rob Sloan will give tips on presenting story ideas, share insight on how newsrooms work and talk about how to become an expert source.

## 12:30 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
RSAC Early Stage Expo Briefing Center	20 MIN	ALL

**SDP vs. VPN: Five Reasons to Make the Switch** BC-W7ESE

*Micha Rave, VP of Product, Meta Networks*

Learn why enterprises are switching from VPN to Software-Defined Perimeter (SDP): Zero-Trust Security. Simpler Management. Seamless User Experience, Cloud Scale.

## 12:40 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center North	30 min	ALL

**Creating a Modern AppSec Toolchain to Quantify Service Risks** BC-W4N

*Tim Mackey, Senior Technology Evangelist, Synopsys*

When regulations collide with the security threat landscape, continuous monitoring for risk changes is required. This session will cover how AppSec toolchains increase security awareness.

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center South	20 min	ALL

**Simplicity: Access Management and the Future of Dynamic Authorization** BC-W5S

*Eve Maler, VP of Innovation and Emerging Technology, ForgeRock*

Scale authorization to new needs for distributed data, central policy, relationships beyond roles and consumer privacy! The session will demo User-Managed Access (UMA) and Identity Relationship Management (IRM).

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
RSAC Sandbox	30 MIN	ALL

**Yet Another IoT Hack** SBX1-W3

*Joshua Meyer, Associate Security Analyst, Independent Security Evaluators*

A presentation on how to find vulnerabilities in embedded devices, including a demo of exploits discovered through new research and how analysts can find similar vulnerabilities in other devices.

## 1:00 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
RSAC Early Stage Expo Briefing Center	20 MIN	ALL

**A New Assurance Paradigm** BC-W8ESE

*Mark Strutner, Senior Cybersecurity Expert, ToucanX*

ToucanX introduces an architecture that, by design, segregates assets that are considered sensitive and/or classified and makes them virtually inaccessible to a malicious actor, regardless of the level of penetration or type of attack.

## 1:10 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center South	20 min	ALL

**Secure Your Digital Crown Jewels with Micro-Segmentation** BC-W6S

*Faraz Aladin, Head of Technical Product Marketing, Illumio*

Illumio's Adaptive Security Platform® protects mission-critical crown jewels with micro-segmentation—preventing unauthorized lateral traffic in data centers and clouds in the event of a breach.

## 1:10 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
RSAC Sandbox	30 MIN	ALL

### The Emerging Grey App Threat: Mobile Kids Apps Are Gateway to Parents SBX1-W4

Frances Dewing, CEO, Rubica

Mobile gaming applications aimed specifically at children are creating a back-door way to gain access to a variety of devices.

## 1:20 PM

Expo Briefing Center North	30 min	ALL
----------------------------	--------	-----

### One Person Can Change the World: The Story behind GDPR BC-W5N

Helge Husemann, Global Technical Evangelist, Malwarebytes

Learn more about Maximilian Schrems, an activist who became known for campaigns against Facebook for privacy violation and who brought GDPR to life. Learn how one person helped change the world.

## 1:30 PM

Analytics, Intelligence & Response	50 MIN	FC
------------------------------------	--------	----

### Coordinated Vulnerability Disclosure: Debate from the Trenches AIR-W10

**MODERATOR:** **Paul Kocher**, Founder & Researcher, Cryptography Research Inc.  
**PANELISTS:** **Alex Gantman**, VP Product Security, Qualcomm; **Art Manion**, Vulnerability Analysis Technical Manager, CERT Coordination Center; **Alex Rice**, Co-Founder and CTO, HackerOne

Modern complexity increases the likelihood of intrusion and malfunction due to flaws in the software. The panel of practitioners will debate the issues as they recreate the good and the bad from 2018.

Application Security & DevSecOps	50 MIN	FC
----------------------------------	--------	----

### Practical Approaches to Cloud Native Security ASD-W10

Karthik Gaekwad, Principal Engineer, Oracle Cloud

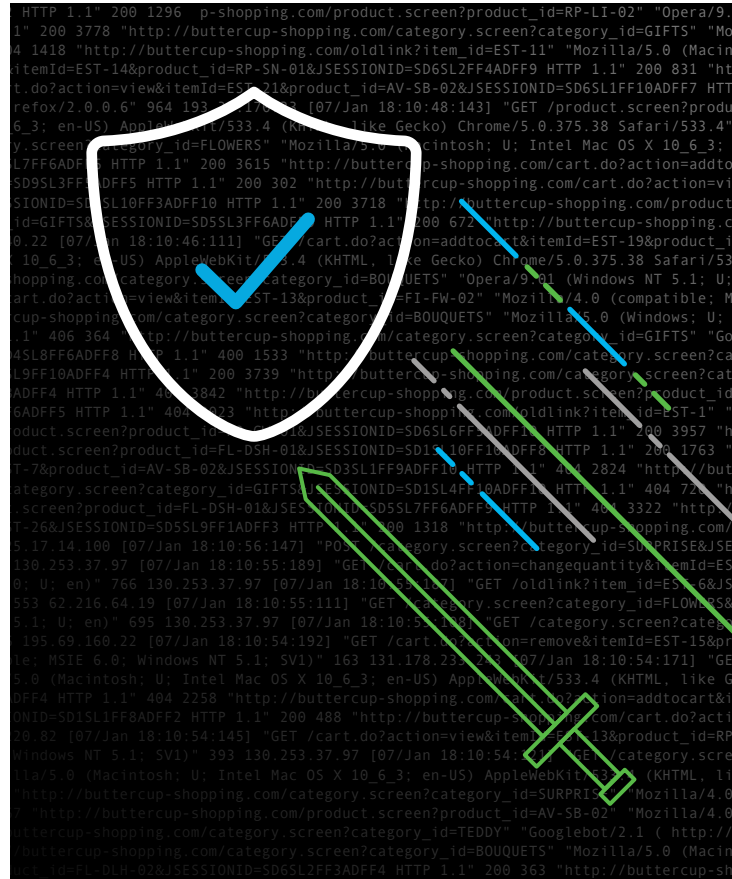

K8s is the go-to platform for large organizations moving their applications to cloud native infrastructure. The presenter will discuss the basics of building secure clusters and opensource tooling that helps.

Blockchain & Applied Crypto	50 MIN	FC
-----------------------------	--------	----

### Hacked by Crypto BAC-W10

Bret Jordan, Director, Office of the CTO, Symantec; Brian Witten, VP & Chief Product Security Officer (CPSO), Symantec

This talk will cover new security standards including TLS 1.3, Encrypted SNI, DNS SEC and DNS over HTTPS, including both advantages and surprising, counterintuitive new risks.

# WEAPON OF A SECURITY WARRIOR.

Machine data is the key to having happy customers and avoiding costly cybersecurity incidents. By unifying security analytics, machine learning and automation technologies, Splunk can streamline your security operations to turn your data into real-time insights and actions.

→ Visit Booth N 6169 to learn more

# WEDNESDAY SESSION DETAILS

1:30 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
C-Suite View <span>2x</span>	50 MIN	FC

## How to Make Sense of Cybersecurity Frameworks CXO-T08R

**Frank Kim**, Senior Instructor, SANS Institute

Learn how to make sense of the veritable alphabet soup of cybersecurity frameworks to simplify the complex world of security and structure your program to meet both business and technology goals.

C-Suite View	50 MIN	FC
--------------	--------	----

## Defining a Cyber-Risk Appetite That Works CXO-W10

**Jack Jones**, Chairman, FAIR Institute

A clearly defined risk appetite can be transformative to a cyber-risk management program. In this session you'll learn how to define an unambiguous risk appetite that drives better decision-making.

Cloud Security & Virtualization	50 MIN	FC
---------------------------------	--------	----

## Treating Cloud-Specific Threats with Automatic Remediation CSV-W10 ⚙️

CSV-W10 ⚙️

**Jay Ball**, Head of Application Security, Zocdoc; **Josh Barons**, Head of Information Security, Zocdoc

Identifying and managing new cloud threats in a fast-paced technology- and development-focused healthcare company.

Cryptography	50 MIN	FC
--------------	--------	----

## Cryptographers' Panel CRYP-W10

MODERATOR: 👤 **Bart Preneel**, Full Professor, KU Leuven

PANELISTS: **Dan Boneh**, Professor, Stanford University; **Mariana Raykova**, Research Scientist, Google; **Adi Shamir**, Borman Professor of Computer Science, The Weizmann Institute, Israel; **Reza Shokri**, Computer Science Assistant Professor, National University of Singapore

A lively debate is guaranteed in the regular Cryptography Track panel session.

Cybersecurity Future Proof: 2025	50 MIN	FC
----------------------------------	--------	----

## Cybersecurity Futures 2025 CSFP-W10

**Dawn Thomas**, Associate Director, CNA's Institute for Public Research; **Steve Weber**, Professor, University of California Berkeley

This session will explore, via four alternate scenarios, the future of cybersecurity (2025) and the new problem sets that cybersecurity professionals will encounter in a changing strategic environment.

Governance, Risk & Compliance	50 MIN	FC
-------------------------------	--------	----

## Barney Fife Metrics: The Bullet That We Have but Don't Use, and Why GRC-W10

**Jon Boyens**, Manager, Security Engineering & Risk Management Group, National Institute of Standards and Technology; **Celia Paulsen**, Cybersecurity Researcher, National Institute of Standards and Technology

New research from NIST explores what differentiates successful information security metrics programs, why the field is stagnating and what is needed to move forward.

1:30 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Hackers & Threats	50 MIN	FC

## Digital Surveillance and Cyberespionage at Scale HT-W10

**Steven Adair**, President, Volexity

Learn how OceanLotus, one of the most advanced and pervasive threat groups that is active today, manages its tracking, exploitation, and command and control operations around the world.

Hackers & Threats Advanced	50 MIN	FC
----------------------------	--------	----

## Hopping into Enterprise Networks from Thin Air with BLEEDINGBIT HTA-W10

HTA-W10

**Nadir Izrael**, CTO and Co-Founder, Armis; **Ben Seri**, VP of Research, Armis

Join Armis researchers for a live demo of a wireless access point takeover using the BLEEDINGBIT vulnerabilities found in BLE chips which are used in the majority of wireless APs sold to enterprises.

Human Element	50 MIN	FC
---------------	--------	----

## Your Ideal Victim Is My Hero HUM-W10

👤 **Shannon Lietz**, Director, Intuit; **Myoki Spencer**, Manager, Security Automation, Intuit

Knowing an adversary's ideal victim can change the game. Adversaries have ideal victims that help increase their ROI on the attacks they create. Deception and honeypots can prevent an attack.

Identity	50 MIN	FC
----------	--------	----

## No More Firewalls! How Zero-Trust Networks Are Reshaping Cybersecurity IDY-W10

IDY-W10

**Matt Soseman**, Security Architect, Microsoft

Through live demos, understand how identities and devices are changing your approach to providing access to corporate resources, in cloud and on-premises—no PowerPoint allowed!

Law	50 MIN	FC
-----	--------	----

## Ransom: A Real-World Case Study in Data Theft, Forensics and the Law LAW-W10

LAW-W10

**Randy Sabett**, Special Council, Cooley; **Jason Straight**, Chief Privacy Officer / SVP Cyber Risk Solutions, UnitedLex Corporation

Noted security/privacy pro Jason Straight will illuminate one of the most intriguing cases in his 15-year career involving data theft, ransom, digital forensics, hacker negotiations and more.

Learning Labs <span>△</span>	3 HRS	FC
------------------------------	-------	----

## How to Design and Operate a DDOS Testing Program LAB3-W10

**Murray Goldschmidt**, Chief Operating Officer, Sense of Security Pty Ltd.; **Sharjil Khan**, Principal Consultant, Redwolf Security Inc; **James Mal**, Director, Sales Global, Redwolf Security Inc

Learn to design, implement and operate a DDoS testing program to simulate attacks, measure response and determine if practices are working. Build resilience with no- or low-cost measures for on-prem and cloud.

# WEDNESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 1:30 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Machine Learning &amp; Artificial Intelligence</b>	50 MIN	FC

### Machine Learning Toolbox for Cybersecurity Risk Management MLAI-W10

**Bugra Karabey**, Senior Risk Manager, Microsoft

Machine learning models/techniques (LSTM RNN deep neural nets, word embeddings, topic modelling), and use case scenarios utilized within the semi-annual Information Security Risk Reviews at Microsoft.

<b>Mobile &amp; IoT Security</b>	50 MIN	FC
----------------------------------	--------	----

### Anatomy of an Enterprise Mobile Security Incident MBS-W10

**Aaron Turner**, CEO, Hotshot Technologies

Based on a real-world situation, learn how mobile vulnerabilities have been used by attackers to gain access to sensitive enterprise information and credentials, including defeating soft tokens.

<b>Peer2Peer</b> $\Delta$	50 MIN	FC
---------------------------	--------	----

### Speed Dating for Security: 200 Creative Engagement Ideas in 50 Minutes P2P1-W10

**Bianca Wirth**, Manager – Corporate Security Education & Awareness, Insurance Australia Group

Have you ever wished for 29 more brains you can use to generate new ideas on how to change user security behavior? Join this speed ideation session to create 200 security awareness ideas in 50 minutes!

## 1:30 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Peer2Peer</b> $\Delta$	50 MIN	FC

### Leveraging Tactical Threat Intelligence for Strategic Decision-Making P2P2-W10

**Xena Olsen**, Cyber Threat Intel Analyst, Fortune 500 Financial Services

Enterprises underutilize threat intelligence data. The session will discuss how companies can use threat intelligence data beyond network defense to aid strategic decision-making.

<b>Peer2Peer</b> $\Delta$	50 MIN	FC
---------------------------	--------	----

### Quantum Computing and Preparing Cyber-Systems for the Post-Quantum Era P2P3-W10

**Michele Mosca**, Professor, University of Waterloo

Has meaningful progress been made in quantum computation? More stakeholders are starting to prepare for the transition to post-quantum algorithms. What is being done already and what else is needed?

# tenable<sup>®</sup>

The Cyber Exposure Company

Visit us in the **North Expo, Booth N 5445**

# WEDNESDAY SESSION DETAILS

1:30 PM, CONTINUED

Privacy	50 MIN	FC

## The NIST Privacy Framework: What It Is And What It Means for You PRV-W10

**Naomi Lefkowitz**, Senior Privacy Policy Advisor, National Institute of Standards and Technology; **Kevin Stine**, Chief, Applied Cybersecurity Division, NIST

The National Institute of Standards and Technology is developing a voluntary Privacy Framework for enterprise risk management. Learn what to expect and how you can contribute!

RSAC Early Stage Expo Briefing Center	20 MIN	ALL
---------------------------------------	--------	-----

## Cloud Workload Security Platform with Real-Time, Zero-Day Attack Prevention BC-W9ESE

**Jayant Shukla**, CTO & Co-Founder, K2 Cyber Security, Inc.

K2 protects cloud workloads and applications against zero-day attacks with no false positives and offers a new approach for enforcing microsegmentation based on cryptographic identity for workloads.

Security Strategy & Architecture	50 MIN	FC
----------------------------------	--------	----

## Deep Modernization of a Corporate IT Infrastructure STR-W10

**John Tolbert**, Managing Director, KuppingerCole

Lessons learned on the long road towards a zero-trust cloud-native digital enterprise IT architecture for a highly regulated European company.

Sponsor Special Topics	50 MIN	ALL
------------------------	--------	-----

## Ransomware Attack Protection and Recovery: Lessons from the Front Lines SPO1-W10

**MODERATOR: Peter Beardmore**, Dir. of Marketing for Digital Risk Management Solutions, RSA

**PANELISTS: Bob Bender**, Chief Technology Officer, Founders Federal Credit Union; **Amy Blackshaw**, Director, RSA; **Stafan Voss**, Senior Director, Product Management, Dell Technologies

This session will feature modern requirements to detect and respond to advanced cyberattacks such as ransomware and feature firsthand experiences from a security executive who's been targeted by attacks.

Sponsor Special Topics	50 MIN	ALL
------------------------	--------	-----

## Simplicity from Complexity: Cybersecurity Insights that Matter Most SPO2-W10

**Leah MacMillan**, Sr. Vice President, Global Marketing, Trend Micro

We are short 2.9 million security professionals, making the ability to correlate threats and gain insights essential. Learn about the value of data complexity on the journey to threat response simplicity.

1:30 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 MIN	ALL

## Innovative Answers to the IoT Security Challenges SPO3-W10

**MODERATOR: Norbert Pohlmann**, Professor / Director, Institute for Internet Security

**PANELISTS: Heinfried Cznotka**, Director Business Development, achelos GmbH; **Kim Nguyen**, Fellow, Bundesdruckerei GmbH; **Jean-Paul Verheylewegen**, Global Sales Manager, MB connect line GmbH

Panel discussion about innovative ways for identity management, securely enabling connectivity of IoT devices and security for legacy systems while keeping the usability at a high level.

Technology Infrastructure & Operations	50 MIN	FC
--	--------	----

## Lost Boys: How Linux and Mac Intersect in a Windows-Centric Security World TECH-W10

**Alexander Benoit**, Lead Security Analyst, sepago GmbH; **Josh Harriman**, VP of Cyber Security Intelligence, Ziften

Windows has such a large business market share, it can render Linux and Mac the Lost Boys of security. Neglecting Linux and Mac in your environment can affect your overall security posture.

1:40 PM

Expo Briefing Center South	20 min	ALL
----------------------------	--------	-----

## Applied Prediction: Using Forecasts to Get Proactive about Security BC-W7S

**Ed Bellis**, Chief Technology Officer, Kenna Security

We can predict the weather but still don't have foresight into attacks heading our way. This talk will discuss new predictive models and how to incorporate them into security workflows.

RSAC Sandbox	2 HRS	ALL
--------------	-------	-----

## SANS Core NetWars Experience SBX2-W3

**Chris Elgee**, Builder & Breaker, Counter Hack Challenges

SANS NetWars Experience develops and tests your information security skills in a safe, interactive environment, while having a little fun with your fellow IT security professionals.

1:50 PM

RSAC Sandbox	1 HR	ALL
--------------	------	-----

## First Steps in RF: Lessons Learned SBX3-W2

**Dave Weinstein**, Software Engineering Manager, Google

It can be daunting for senior staff to enter a new problem domain. This talk will be a discussion of lessons learned in starting from the basics in RF, and how to apply that more broadly.

# WEDNESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 2:00 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center North</b>	30 min	<b>ALL</b>

### A New Paradigm for Security BC-W6N

*Jason Garbis, VP, Products, Cyxtera*

This session will dissect the concept of software-defined perimeter and explore how this architecture enables a creatively disruptive approach to security, while avoiding any actual IT disruption.

<b>Learning Labs</b> $\Delta$	2 HRS	<b>FC</b>
-------------------------------	-------	-----------

### Creating/Building a Phishing Training Program LAB1-W11

*Cheryl Conley, Cyber Governance Risk & Compliance Senior Staff, Lockheed Martin; Tonia Dudley, Security Solutions Advisor, Cofense*

Learn how to establish a cutting-edge phishing simulation program, including management and stakeholder buy in, simulating attacks, training tactics, handling repeat clickers, key metrics and privacy.

<b>Learning Labs</b> $\Delta$	2 HRS	<b>FC</b>
-------------------------------	-------	-----------

### Breaking Out of the Security Metrics Matrix: Steps in the Right Direction LAB2-W11

*Tim Crothers, Vice President of Security, Target; James Stanger, Chief Technology Evangelist, CompTIA*

Learn from authorities in the field about how to create and customize meaningful metrics that allow you to reduce exposure time and manage risk.

## 2:00 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Learning Labs</b> $\Delta$	2 HRS	<b>FC</b>

### Evasion Tactics in Malware from the Inside Out LAB4-W11

*Erez Breiman, CTO, Minerva Labs; Omri Segev Moyal, Co-Founder & VP of Research, Minerva Labs; Lenny Zeltser, Instructor, SANS Institute; VP of Products, Minerva Labs*

Malware authors use clever tactics to evade detection. Learn how evasion works and how you can start analyzing malware using a debugger in this hands-on session. Come with a lab VM, per instructions.

## 2:10 PM

<b>Expo Briefing Center South</b>	20 min	<b>ALL</b>
-----------------------------------	--------	------------

### Seven Hells! We Need One Language to Communicate about IT Assets BC-W85

*Alejandro Lavie, Director, Strategy, Flexera*

It's not High Valyrian or Dothraki, but companies struggle with vast inventory definitions and classifications of IT assets which inhibit their ability to make decisions and secure their environment.

# WEDNESDAY SESSION DETAILS

## 2:40 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center North</b>	30 min	ALL
<b>Got Breached? Determining the Extent of Your Intrusion</b> BC-W7N		
<i>Tim Bandos, Vice President, Cybersecurity, Digital Guardian</i>		
To determine the true extent of a breach, the newest forensic techniques will be demonstrated in a walk-through of a real Fortune 100 company scenario.		

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Expo Briefing Center South</b>	20 min	ALL
<b>Unhackable: Why Businesses Are Turning to Hardware-Enforced Cybersecurity</b> BC-W9S		
<i>Dennis Lanahan, Director of Sales, Owl Cyber Defense</i>		
This session will explain what a data diode is, how it works, the benefits of hardware-enforced tools and the basics of how they can be used to help secure networks, devices and data.		

## 2:50 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Analytics Intelligence &amp; Response</b>	50 MIN	FC
<b>Prosilience: Moving beyond Operational Resilience</b> AIR-W12		
<i>Summer Fowler, Chief Security Officer, Argo AI; Roberta Stempfley, Director, CMU – SEI – CERT</i>		
Moving beyond resilience to prosilience: how to apply leading-edge technical concepts to anticipate and adapt your organization's capabilities before a disruptive event occurs.		

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Application Security &amp; DevSecOps</b>	50 MIN	FC
<b>How I Learned Docker Security the Hard Way (So You Don't Have To)</b> ASD-W12		
<i>Paul Asadoorian, Founder &amp; CEO, Security Weekly</i>		
Security professionals today struggle securing container environments. You will learn the different container security models and detailed incident response examples from an actual attack.		

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Blockchain &amp; Applied Crypto</b>	50 MIN	FC
<b>Breaking the Blockchain: Real-World Use Cases, Opportunities and Challenges</b> BAC-W12		
<i>Michael Mylrea, Senior Advisor   Cyber Security   Blockchain Lead (PI)   Pacific Northwest National Laboratory</i>		
The presentation will share lessons learned from developing and implementing one of the first and largest blockchain cybersecurity R&D projects in partnership with US industry and government.		

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>C-Suite View</b>	50 MIN	FC
<b>Cybersecurity Head On: How Successful Organizations Win</b> CXO-W12		
<i>Michelle Beistle, Counsel and Chief Compliance Officer, Privacy and Ethics, Unisys; Mat Newfield, CISO, Unisys</i>		
Explore how legal counsel and cybersecurity teams must come together and become bilingual in order to meet today's complex challenges and build more effective cybersecurity programs in the process.		

## 2:50 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cloud Security &amp; Virtualization</b>	50 MIN	FC
<b>Red Team View: Gaps in the Serverless Application Attack Surface</b> CSV-W12		
<i>Michael Cotton, SVP Research &amp; Development, Digital Defense, Inc.</i>		
This talk will discuss new and previously unknown methods of targeting an application's serverless component services and leveraging them to gain privileged access.		

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cloud Security &amp; Virtualization</b>	50 MIN	FC
<b>Protecting the Cloud with the Power of Cloud</b> CSV-W02R		
<i>Jay Kelath, Head of Product Security, Dow Jones &amp; Company; Pranavkumar Patel, Senior Security Engineer, Dow Jones</i>		
This talk will walk you through Dow Jones Hammer, a self-healing cloud security tool designed to protect hundreds of AWS accounts against misconfiguration with auto-remediation.		

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cryptography</b>	50 MIN	FC
<b>Post-Quantum Cryptography</b> CRYP-W12		
<i>Saba Eskandarian, Stanford University; Mélissa Rossi, Thales &amp; ENS Paris</i>		
Design and analysis of post-quantum cryptographic algorithms will be discussed.		
<b>TOPIC 1: Post-Quantum EPID Signatures from Symmetric Primitives</b> <i>Authors: Dan Boneh, Saba Eskandarian, Ben Fisch</i>		
<b>TOPIC 2: Assessment of the Key-Reuse Resilience of NewHope</b> <i>Authors: Aurélie Bauer, Henri Gilbert, Guénaél Renault, Mélissa Rossi</i>		

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cybersecurity Future Proof: 2025</b>	50 MIN	FC
<b>You've Predicted the Future, Now What? Pulling the Right Security Levers</b> CSFP-W12		
<i>John Pescatore, Director, SANS Institute</i>		
This session will detail a methodology for developing realistic action plans and achievable milestones to minimize business impact by evolving and enhancing limited people, processes and technology resources.		

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Governance, Risk &amp; Compliance</b>	50 MIN	FC
<b>Virtual Pen Testing Using Risk Models</b> GRC-W12		
<i>Joel Amick, Director, Cyber Analytics and Data Science, TIAA; Jack Freund, Director, Cyber Risk, TIAA</i>		
Attendees will be shown how to leverage risk assessment data to identify likely paths of system compromise using attacker, control and loss simulations to help prioritize remediation efforts.		

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Hackers &amp; Threats</b>	50 MIN	FC
<b>An Overview of AI and Machine Learning Attacks and Vulnerabilities 2019</b> HT-W12		
<i>Abraham Kang, Senior Director Software, Samsung</i>		
Attend this talk if you want a better understanding of security issues faced by developers creating solutions on top of AI and machine learning.		

# WEDNESDAY SESSION DETAILS

BADGE ACCESS: FC = Open to Full Conference Registrants only • ALL = Open to all attendees

## 2:50 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Hackers & Threats Advanced	50 MIN	FC

### Function Fuzzer HTA-W12

**Jason Raber**, Principle Engineer, Malwarebytes

A technique for finding software vulnerabilities. A key feature is the ability to hook internal functions of a binary (without source code) to fuzz parameters.

TRACK	SESSION LENGTH	BADGE ACCESS
Human Element	50 MIN	FC

### Beyond Hybrid War: How China Utilizes Social Media to Influence the West HUM-W12

**Priscilla Moriuchi**, Director of Strategic Threat Development, Recorded Future

This session will cover China's domestic and foreign use of digital information operations, and will present the first research on China's Internet-based influence operations targeting the West.

TRACK	SESSION LENGTH	BADGE ACCESS
Identity	50 MIN	FC

### How the H@ck R U? A Modern Identity Assurance Approach in a Hacked World IDY-W12

**Angel Grant**, Director Identity, Fraud & Risk Intelligence, RSA

A tour of the dark web, methods and tools cybercriminals use to obtain identity information, and tips to embrace our interconnected world for stronger identity assurance.

TRACK	SESSION LENGTH	BADGE ACCESS
Law	50 MIN	FC

### Cryptocurrency Hacking and the Legal Climate for Blockchain Technology LAW-W12

**MODERATOR: Julie Lewis**, President, CEO and Founder, Digital Mountain, Inc.  
**PANELISTS: Hoyt Kesterson**, Senior Security Architect, Avertium; **Aleks Kobzanets**, Special Agent, Federal Bureau of Investigation; **Christopher Ott**, Partner, Davis Wright Tremaine

Join DOJ, FBI, data security and forensics veterans to discuss how blockchain technologies and cryptocurrency are impacting cyber-investigations, as well as legal and regulatory considerations.

TRACK	SESSION LENGTH	BADGE ACCESS
Machine Learning & Artificial Intelligence	50 MIN	FC

### Build Intelligent Vulnerability Scoring to Optimize Security Residual Risks MLAI-W12

**Bill Chen**, Chief Security Architect, Visa Inc.; **Gyan Prakash**, Sr. Director, Visa Inc.

The ability to effectively prioritize critical findings is a key success factor for every CISO. This talk will answer the question which vulnerabilities to be resolved first, and why with intelligent tool.

TRACK	SESSION LENGTH	BADGE ACCESS
Mobile & IoT Security	50 MIN	FC

### Hacking Healthcare Live: Digital Disease, Clinical Crisis MBS-W12

**MODERATOR: Christian Dameff**, Emergency Physician and Clinical Informatics Fellow, University of California San Diego  
**PANELISTS: Suzanne Schwartz**, Associate Director for Science & Strategic Partnerships, Center for Devices & Radiological Health – US Food & Drug Administration; **Jeff Tully**, Resident Anesthesiologist, UC Davis Medical Center; **Beau Woods**, Cyber Safety Advocate, I Am the Cavalry

Healthcare cybersecurity is in critical condition, and unsuspecting doctors face the reality of practice in a brave new world of insecure technologies and vulnerable patients in a live simulation.

## 2:50 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer 	50 MIN	FC

### Trapping Bears with Honey: Sharing Tricks and Techniques to Lure Bad Guys P2P1-W12

**Olivier Bilodeau**, Cybersecurity Research Director, GoSecure

Honeypots are effective to lure attackers into delivering malware and showing tactics, techniques and procedures. Let's discuss the next steps to take with these, share experience and collaborate.

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer 	50 MIN	FC

### Meeting Cybersecurity Regulatory Requirements with Cloud Delivery Models P2P2-W12

**Jeffrey King**, Principal, Promontory

Most cybersecurity regulations are written with a bias toward on-premise service delivery models, with little consideration to cloud delivery models. This results in compliance challenges.

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer 	50 MIN	FC

### Increasing Usage of a Secure Development Lifecycle P2P3-W12

**Cassie Crossley**, Director, Product Security Office, Schneider Electric

Discuss techniques and best practices for embedding a secure development lifecycle into your organization.

TRACK	SESSION LENGTH	BADGE ACCESS
Policy & Government	50 MIN	FC

### Bridging the Divide—Cybersecurity Priorities in 116<sup>th</sup> Congress PNG-W12

**MODERATOR: Jamil Jaffer**, Adjunct Professor & Director, National Security Law & Policy Program and Founder & Executive Director, National Security Institute, George Mason University Law School  
**PANELISTS: Hope E. Goins**, Staff Director, House Committee on Homeland Security; **Mike Flynn**, Senior Counsel, Committee on Homeland Security and Government Affairs

With new leadership in Congress and divided government, this esteemed panel will discuss issues like supply chain, destructive cyberattacks, protection of key networks and social media weaponization.

TRACK	SESSION LENGTH	BADGE ACCESS
Privacy	50 MIN	FC

### Global Legislative Trends in Data Privacy and Security Regulation for 2019 PRV-W12

**April Doss**, Partner, Saul Ewing Arnstein & Lehr; **Natasha Kohne**, Partner, Akin Gump; **William Rogers**, Partner, Prince Lobel Tye LLC

With a year of GDPR experience, its influence is ripe for commentary. We will focus on global themes and emerging trends reflected in recent legislative activity concerning data privacy and security.

TRACK	SESSION LENGTH	BADGE ACCESS
Protecting Data & the Supply Chain Ecosystem	50 min	FC

### What Lurks within Your IT: Spotlight on the Dark Side of the Supply Chain PDAC-W12

**Dawn Cappelli**, VP Global Security and CISO, Rockwell Automation; **Edna Conway**, Chief Security Officer, Global Value Chain, Cisco Systems Inc.

Altered components, tainted software and shipments diverted to allow unauthorized "modifications!" IT/OT security experts will explore this third-party risk and what to do about it.

# WEDNESDAY SESSION DETAILS

## 2:50 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Security Strategy & Architecture	50 MIN	FC

### The Fallacy of the "Zero-Trust Network" STR-W12

**Paul Simmonds**, CISO / CEO, Global Identity Foundation

Zero-trust networks? Separating the marketing BS and hype from the architectural imperative we all face.

Sponsor Special Topics	50 MIN	ALL
------------------------	--------	-----

### Who Watches the Watchers: IP Protection for Privileged Users SPO1-W12

SPO1-W12

**Richard Ford**, Chief Scientist, Forcepoint

Often developers of IP represent the greatest risk to its theft. Learn how behavioral analytics can protect IP from legitimate users using the FBI's affidavit on the GE IP theft as case study.

Sponsor Special Topics	50 MIN	ALL
------------------------	--------	-----

### Designing for Doomsday: Effective API Security Approaches from the Edge SPO2-W12

SPO2-W12

**Josh Shaul**, Vice President, Web Security, Akamai Technologies

API security has emerged as the single biggest challenge organizations face to securing their threat surface. Learn to detect, defend and design security in from the beginning. Are you prepared?

Sponsor Special Topics	50 MIN	ALL
------------------------	--------	-----

### Unmasking Operation Shaheen SPO3-W12

**Kevin Livelli**, Director of Threat Intelligence, Cylance, Inc.; **Tom Pace**, Sr. Director, Worldwide Consulting, Cylance, Inc.

Cylance shows how a threat actor evaded eight antivirus products before deliberately surrendering to distract, delay and divert target resources.

Technology Infrastructure & Operations	50 MIN	FC
--	--------	----

### Making Security Automation Real TECH-W12

**Jessica Fitzgerald-McKay**, Security Automation Lead, National Security Agency; **David Waltermire**, Security Automation Architect, National Institute of Standards and Technology

Only through standardized posture information will defenders be able to automate security and harden the network to attack.

## 3:00 PM

RSAC Sandbox	30 MIN	ALL
--------------	--------	-----

### Cybersecurity and Privacy: The Two Main Tenets in the Smart City Project SBX4-W3

**MODERATOR: Maryam Rahmani**, Global Partnership Officer, Global Cyber Alliance

**PANELISTS: Tony Batalla**, Head of IT, San Leandro City; **Lan Jenson**, CEO, Adaptable Security Corp; **Sokwoo Rhee**, Associate Director of Cyber-Physical Systems Innovation, National Institute of Standards and Technology

The smart city projects bring many benefits to the community when done right. The panelists will discuss the importance of security by design in support of cybersecurity, privacy and public safety.

## 3:10 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center South	20 min	ALL

### TLS Redirection: How to Make MitM on HTTPS Possible BC-W10S

**Aleksei Tiurin**, Senior Security Researcher, Acutenix

Fresh view on HTTPS. How web vulnerabilities and modern technologies can "bring down" HTTPS protection.

## 3:20 PM

Expo Briefing Center North	30 min	ALL
----------------------------	--------	-----

### What a Cyberattack Looks Like When You're Watching Your Data BC-W8N

**Brian Vecci**, Technical Evangelist, Varonis

Watch a live cyberattack! From popping a shell with Metasploit to data exfiltration via DNS tunneling, this session will demo how analysts use Varonis to detect, investigate and stop advanced attacks.

## 3:30 PM

RSAC Sandbox	30 MIN	ALL
--------------	--------	-----

### Safety Systems Are the New Target: Design Security Using Safety Methods SBX4-W4

**Marty Edwards**, Director of Strategic Initiatives, International Society of Automation (ISA)

Triton/Trisis/Hatman shows that industrial control safety systems are the new target. To maintain the safety of these systems you must design your cybersecurity protections with the same safety rigor.

## 3:40 PM

Expo Briefing Center South	20 min	ALL
----------------------------	--------	-----

### GDPR Security Postmortems: Lessons Learned from Facebook, Uber and Others BC-W11S

**Scott M. Giordano, Esq.**, VP, Data Protection, Spirion

This session will review security postmortems of Facebook, Uber and others, determine what went wrong, and discuss the implications for complying with the security requirements of the GDPR going forward.

## 4:00 PM

Expo Briefing Center North	30 min	ALL
----------------------------	--------	-----

### Red vs. Blue? Why Not Purple? Doing Good While Knowing Evil. BC-W9N

**David DeSanto**, Director, Products and Threat Research, Spirent

Learn how emulating actual data breach assessments in production networks can help you know your organization's security posture regularly—and rigorously—and keep your defenses ready.

# WEDNESDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 4:10 PM

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer $\Delta$	50 MIN	FC

### Zero Trust, the Goose and the Golden Ticket P2P1-W15

*Karen Reinhardt, Director, Security Tools, Entrust Datacard*

In the evolving world of cloud and IoT, where zero trust is the rule of Internet, how can practical trust be established? Join us to discuss trust and identity in a zero-trust world.

Peer2Peer $\Delta$	50 MIN	FC
--------------------	--------	----

### Best Practices for Securing Enterprise IoT P2P2-W15

*John Johnson, CTO & Professor, RIG & Excelsior College*

Participants will share best practices for securing and managing IoT, BYOD and other nontraditional systems being connected to their enterprise TCP/IP networks.

Peer2Peer $\Delta$	50 MIN	FC
--------------------	--------	----

### What's Your Externally Facing API and Service Attack Surface? P2P3-W15

*Mark Willis, Director, Software Security, Aetna*

How well do you know your externally facing API and services and whether they are adequately secured? Let's all get together to share ideas and help remove this long overlooked blind spot.

WEDNESDAY

**eset** Cybersecurity experts on your side

# Complete protection for enterprise via a single pane of glass

## Explore ESET @Booth N 5345

# THURSDAY EVENTS & ACTIVITIES

6:00 AM – 7:00 AM **POWER PAUSE—MINDFULNESS & MOVEMENT\***  
Moscone West Level 2 Alcove This yoga class and meditation session is designed for all levels from beginners to advanced practitioners.

7:00 AM – 8:00 AM **CONTINENTAL BREAKFAST\***  
Various Locations Full Conference Pass holders, head directly to your chosen morning session. Breakfast is available in Moscone West Levels 2 & 3 and Moscone South Levels 2 & 3.

7:00 AM – 7:50 AM & 12:40 PM – 1:30 PM **BIRDS OF A FEATHER\***  
Moscone West Level 3 Grab your breakfast or lunch and bring it to the discussion rooms. Some topics are pre-defined and led by speakers, others will develop organically; by design, this is loosely structured to give you an opportunity to network and set the agenda for discussions of interest to you. **Note: Press is not permitted in Birds of a Feather sessions.**

7:00 AM – 8:00 AM **FIRST-TIMERS MEET-UP\***  
Moscone West Level 2 Alcove Start the day with a meet-up with other RSAC First-Timers. Grab your complimentary breakfast and enjoy this time to regroup, share takeaways and, of course, caffeinate.

## KEYNOTES

Keynote abstracts can be found on pages 34 – 35.

8:00 AM – 8:50 AM **Stress, Burnout and You: Fireside Chat with Dr. Christina Maslach**  
South Esplanade 🗣️ **Josh Corman**, Chief Security Officer, PTC; **Christina Maslach**, Professor of Psychology, Emerita, University of California, Berkeley

9:20 AM – 10:10 AM **Hacking Exposed: Hacking Macs**  
South Esplanade 🗣️ **Dmitri Alperovitch**, Co-Founder & Chief Technology Officer, CrowdStrike; 🗣️ **George Kurtz**, Chief Executive Officer, CrowdStrike

10:30 AM – 10:55 AM **Stop Worrying about the Right Things**  
West Street Level **Mary O'Brien**, General Manager, IBM Security; **Caleb Barlow**, Vice President, IBM Security, X-Force Threat Intelligence

10:55 AM – 11:40 AM **The Five Most Dangerous New Attack Techniques and How to Counter Them**  
West Street Level **MODERATOR:** **Alan Paller**, Research Director and Founder, SANS Institute  
**PANELISTS:** **Heather Mahalik**, Director of Forensics Engineering, ManTech, and Mobile Forensics Course Director, SANS Institute; **Ed Skoudis**, Instructor, SANS Institute; **Johannes Ullrich**, Dean of Research, SANS Technology Institute

2:50 PM – 3:40 PM **The Future of Data Protection: Adapting to the Privacy Imperative**  
South Esplanade **MODERATOR:** 🗣️ **J. Trevor Hughes**, President & Chief Executive Officer, IAPP  
**PANELISTS:** **Kalinda Raina**, Senior Director, Head of Global Privacy, LinkedIn; **Ruby Zefo**, Chief Privacy Officer, Uber

4:00 PM – 4:25 PM **Three Things the Security Industry Isn't Talking About (but Should Be)**  
West Street Level **Pat Gelsinger**, Chief Executive Officer, VMware; 🗣️ **Shannon Lietz**, Director, Intuit

4:25 PM – 4:45 PM **Tales of a Teenage Security Supergirl**  
West Street Level **Kyla Guru**, Founder and Chief Executive Officer, Bits N' Bytes Cybersecurity Education

4:45 PM – 5:30 PM **Connecting the Dots for the Future**  
West Street Level **John T. Chambers**, Founder and Chief Executive Officer, Jc2 Ventures, Former Chairman and Chief Executive Officer, Cisco; **Diane Brady**, Award-Winning Writer, Author and Consultant

8:00 AM – 10:10 AM & 1:30 PM – 3:40 PM **TRACK SESSIONS**  
Various Locations See detailed information on following pages for descriptions and badge access.

8:00 AM – 11:20 AM & 1:30 PM – 4:30 PM **LEARNING LABS\***  
Moscone West Level 3 Learning Labs provide highly interactive, facilitated learning experiences and are very hands-on and small group oriented. Seating is limited; use Reserve a Seat to schedule your participation. You can only reserve one Lab on your schedule, so pick carefully from our 20 great offerings. **Note: Press is not permitted in Lab sessions.**

# THURSDAY EVENTS & ACTIVITIES

- 
- 8:00 AM – 3:30 PM **RSAC SANDBOX**  
 Marriott Yerba Buena 8 The RSA Conference Sandbox is full of hands-on interactive experiences to test your infosec skills.  
*RSAC Early Stage Expo Exclusive Media Sponsor:*  

- 
- 8:00 AM – 3:00 PM **RSAC CYBREW CAFÉ**  
 Marriott, RSAC Sandbox A full-service coffee bar.
- 
- 8:00 AM – 3:00 PM **RSAC EARLY STAGE EXPO**  
 Marriott Yerba Buena 9 The RSAC Early Stage Expo is the perfect megaphone for emerging infosec startups. Meet over 50 of the industry's most promising newcomers and learn about their innovative products and solutions, and check out the RSAC Early Stage Expo Briefing Center (details on pages 180 – 185).  
*RSAC Early Stage Expo Exclusive Media Sponsor:*  

- 
- 8:00 AM – 5:00 PM **BROADCAST ALLEY**  
 Moscone West Street Level Watch top security publications shoot live and record exclusive interviews.
- 
- 9:20 AM – 5:00 PM **BRIDGING THE GAP: CYBERSECURITY + PUBLIC INTEREST TECH\***  
 South 301 See following pages for descriptions.
- 
- 9:20 AM – 12:50 PM & 1:30 PM – 5:00 PM **PEER2PEER SESSIONS\***  
 Moscone South Level 3 P2P sessions enable groups of no more than 30 people that share a common interest to come together and productively explore a specific security topic, facilitated by an experienced practitioner. **Note: Press is not allowed in Peer2Peer sessions.**
- 
- 10:00 AM – 3:00 PM **RSAC SECURITY OPERATIONS CENTER**  
 Moscone South Lower Level Take a tour of a working SOC! Head to the Moscone South Lower Level for the RSA Conference Security Operations Center. See what's really taking place on the Moscone Wireless Network in real time.  
*Sponsored by:*  

- 
- 10:00 AM – 3:00 PM **EXPO**  
 Moscone North & South Lower Levels Come see how RSA Conference 2019 exhibitors offer you the latest technological solutions, provide hands-on learning opportunities and demonstrate how they can help you better secure your organization.
- 
- 10:30 AM – 12:00 PM **EXPO BRIEFING CENTER**  
 Moscone North & South Lower Levels See following pages for abstracts and a complete schedule on pages 115–118.
- 
- 11:00 AM – 2:00 PM **STREET EATS**  
 Howard Street, Mission Street With options for all tastes, Street Eats is the easy way to fuel up between sessions or get energized before your next keynote. Stop by any of our food trucks on Mission Street or Howard Street.
- 
- 6:30 PM – 8:30 PM **RSAC AFTER HOURS: COMEDY NIGHT**   
 Moscone South Esplanade, South Stage You're good for a network backup. How about a laugh? Get your fill at RSAC After Hours: Comedy Club. Stroll in and strike a pose on the red carpet before taking your seat in the front row of our very own comedy club. Serving up bottomless laughs—plus delicious food and cocktails—some of the funniest comedy acts around will take the stage, adding some good humor to a busy week. Now, who said cybersecurity professionals were all business?  
**Open to Full Conference and Discover Pass holders. Choose one of the RSAC After Hours events on Tuesday, Wednesday or Thursday nights of Conference. Space is limited so make sure to reserve a seat.**

# THURSDAY SESSION DETAILS

## 8:00 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Analytics Intelligence &amp; Response</b>	50 MIN	FC

### How CTI Can Play a Key Role to Get Security on Board AIR-R02

*Jean-Yves Riverin, Cyber Threat Intelligence Senior Advisor, Desjardins*

Walk-through of the creation of Desjardins' SOC eight years ago and all the ensuing steps accomplished over the years to improve its maturity and get the ongoing support of upper management.

<b>Application Security &amp; DevSecOps</b>	50 MIN	FC
---	--------	----

### Container Security at the Speed of CI/CD ASD-R02

*Tim Chase, Director of Security, HealthStream*

Containers are everywhere! But how do you deal with the security challenges of using containers? This session will discuss why containers are complex to secure and a solution on securing them.

<b>Association Special Topics</b>	50 MIN	ALL
-----------------------------------	--------	-----

### The NIST Cybersecurity Framework: Building on Success AST1-R02

**MODERATOR:** *Kelly Hood, Cybersecurity Engineer, G2 Inc.*

**PANELISTS:** *Matthew P Barrett, Program Manager, National Institute of Standards and Technology; Gary Coverdale, Chief Information Security Officer, Mono County, CA; Plamen Martinov, Chief Information Security Officer, University of Chicago*

The Cybersecurity Framework PM from NIST and industry practitioners will discuss the adoption, near-term goals, experiences and lessons learned from implementing the Cybersecurity Framework.

<b>Association Special Topics</b>	50 MIN	ALL
-----------------------------------	--------	-----

### Responding to and Recovering from Cybersecurity Incidents AST2-R02

**MODERATOR:** *Kelvin Coleman, Executive Director, National Cyber Security Alliance*

**PANELISTS:** *Bob Kolasky, Director, National Risk Management Center, National Protection and Programs Directorate, U.S. Department of Homeland Security; Daniel Medina, Director, Strategic and Technical Engagements, Glasswall Solutions Inc.; Bridgette Walsh, Chief, Partnerships and Engagement, Office of Cybersecurity and Communications, National Protection and Programs Directorate, U.S. Department of Homeland Security*

After a cybersecurity incident is detected, every passing moment is critical. Experts will outline what you need to know in order to mitigate the effects of a breach and recover.

<b>Association Special Topics</b>	50 MIN	ALL
-----------------------------------	--------	-----

Please see addendum for session details.

<b>Blockchain &amp; Applied Crypto</b>	50 MIN	FC
--	--------	----

### The Detrimental Nature of Proofs of Work, and Risks to Cryptocurrencies BAC-R02

*Guy Stewart, Co-Founder and CTO, Egni Inc.*

This session will analyze destabilizing aspects of cryptocurrencies and how a departure from the PoW paradigm can mitigate the problem, and will also discuss beneficial side effects of increased robustness.

## 8:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>C-Suite View</b>	50 MIN	FC

### What Sennacherib Taught Me about Security: How to Translate Cyber-Speak CXO-R02

*Mary Ann Davidson, Chief Security Officer, Oracle*

If you work for Sennacherib, King of Assyria, you need to speak Akkadian. If you work in cybersecurity, you need to speak many languages beside Geek to be understood by those who need to get it.

<b>Cloud Security &amp; Virtualization</b>	50 MIN	FC
--	--------	----

### Kubernetes Runtime Security: What Happens if a Container Goes Bad? CSV-R02

*Jen Tong, Security Advocate, Google*

Kubernetes security discussions often focus on safe configurations and deployments. This talk will focus on a different aspect: runtime security. Runtime security mitigates damage done by a compromise.

<b>Cryptography</b>	50 MIN	FC
---------------------	--------	----

### MAC and Authenticated Encryption CRYP-R02

**Bart Mennink, Radboud University, Nijmegen; Yu Sasaki, NTT Secure Platform Laboratories**

Techniques on message authentication code (MAC) and authenticated encryption (AE) will be discussed.

**TOPIC 1:** Universal Forgery and Multiple Forgeries of MergeMAC and Generalized Constructions

*Authors: Tetsu Iwata; Virginie Lallemand; Gregor Leander; Yu Sasaki*

**TOPIC 2:** Linking Stam's Bounds with Generalized Truncation

*Authors: Bart Mennink*

<b>Governance, Risk &amp; Compliance</b>	50 MIN	FC
--	--------	----

### What Makes a Good KRI? Using FAIR to Discover Meaningful Metrics GRC-R02

**Marta Palanques, Director, Enterprise Risk Management, ADP; Steve Reznik, Director, Operational Risk Management, ADP**

This session will review characteristics of good and bad risk metrics, and introduce a method using sensitivity analysis to identify key risk indicators.

<b>Hackers &amp; Threats</b>	50 MIN	FC
------------------------------	--------	----

### Business Email Compromise: Operation Wire Wire and New Attack Vectors HT-R02

*Anne Connell, Cybersecurity Engineer, CMU – SEI – CERT*

This talk will analyze "Operation Wire Wire" to detail how BEC attacks chose targets, methods of obtaining information, the new attack vectors, how the money travels, and offers new defense techniques.

# THURSDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 8:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Hackers &amp; Threats Advanced</b>	50 MIN	FC

### Cryptojacking Meets IoT HTA-R02

*Sherrri Davidoff, CEO, LMG Security; Matt Durrin, Security Consultant, LMG Security*

Hackers have a new way to profit off your security cameras, smart lighting, and even your fancy coffeepot: cryptojacking. Watch an infection of an IoT device with the Mirai botnet and mine Monero.

<b>Hackers &amp; Threats Advanced</b> 2x	50 MIN	FC
--	--------	----

### What's Your Game Plan? Leveraging Apple's Game Engine to Detect Threats HTA-T08R

*Patrick Wardle, Co-Founder, Digita Security*

To detect new Mac malware, a behavior-based approach is needed. Our open-source monitoring framework provides input to a rule-based system that leverages Apple's game engine to detect threats.

<b>Human Element</b>	50 MIN	FC
----------------------	--------	----

### Cheaper by the Dozen: Application Security on a Limited Budget HUM-R02

*Christopher Romeo, CEO, Security Journey*

Do you have one million dollars to spend on application security? If not, learn which projects fit together to solve AppSec problems. Explore OWASP projects: purpose, usage, risk, HR and advice on starting.

## 8:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Identity</b>	50 MIN	FC

### Securing Intel PC for FIDO Support: Industry Standard to Remove Passwords IDY-R02

*Nitin Sarangdhar, Senior Principal Engineer, Intel Corporation*

This session will cover how password removal is accomplished by FIDO industry standard and best practices to implement FIDO Authenticators on Intel trusted execution environment-based PCs.

<b>Learning Labs</b> △	3 HRS	FC
------------------------	-------	----

### Threat Hunting across Thousands of Multicloud Workloads LAB3-R02 ⚙️

*Matthew Chiodi, Chief Security Officer, Public Cloud, Palo Alto Networks; Gaurav Kumar, CTO, RedLock*

Are you sure your cloud environments are really safe? Get your hands dirty threat hunting across multiple public cloud environments utilizing a combination of open source and commercial tools.

# THURSDAY SESSION DETAILS

## 8:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Mobile & IoT Security	50 MIN	FC

### Manufacturers Approach towards Cybersecurity Threats Targeting Healthcare

**MODERATOR:** **Jonathan Bagnall**, Sr. Security Manager, Product Security & Services Office (PSSO), Royal Philips

**PANELISTS:** **Phil Englert**, System Director, Technology Operations, Retired – Catholic Health Initiatives; **Roberta Hansen**, Director, Product Cybersecurity, Abbott; **Michael McNeil**, Global Product Security & Services Officer, Royal Philips; **David Nathans**, Product Security Office, Siemens Healthcare

Improving medical device and services cybersecurity. What do manufacturers, medical device owners and regulators need to consider?

Professional Development	50 MIN	FC
--------------------------	--------	----

### Mushrooming Economic Inequality Menaces Security: Here's How to Fix It PROF-R02

 **Laura Koetzle**, Vice President, Group Director, Forrester Research

Today's consumer data monopolies, automation and economic concentration combine to fuel economic inequality. In this session, learn how we got here, why this is our problem and how to fix it.

Protecting Data & the Supply Chain Ecosystem	50 MIN	FC
--	--------	----

### Software Bill of Materials: Progress toward Transparency of Third-Party Code PDAC-R02

**Allan Friedman**, Director of Cybersecurity, NTIA / US Department of Commerce

How to assemble, share and use third-party component data? An update and initial outcomes from an NTIA-convened process on SBOMs, with input from different sectors.

RSAC Sandbox	1.5 HRS	ALL
--------------	---------	-----

### SANS Core NetWars Experience—Intro to Capture the Flag SBX2-R1

**Chris Elgee**, Builder & Breaker, Counter Hack Challenges; Co-hosted by **Women's Society in Cyberjutsu (WSC)**

SANS NetWars Experience develops and tests your information security skills in a safe, interactive environment, while having a little fun with your fellow IT security professionals.

RSAC Sandbox	1 HR	ALL
--------------	------	-----

### Wireless Offense and Defense, Explained and Demonstrated! SBX3-R1

**Rick Farina**, Senior Product Manager, WLAN Software Security, Aruba; **Rick Mellendick**, Chief Security Officer, Process Improvement Achievers LLC

This session will discuss the use of radio frequency that is often overlooked for network enumeration and attack. Without understanding the offensive attacks an organization can't perform effective defense.

## 8:00 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Security Mashup	50 MIN	FC

### Threat Hunting Using 16th-Century Math and Sesame Street MASH-R02

**Vernon Habersetzer**, Sr. Enterprise Technical Expert, Walmart

Uncover unique and unusual behaviors in any sized network through the simple, yet effective hunting methods covered in this session. These methods can be applied to any network or endpoint data.

Security Strategy & Architecture	50 MIN	FC
----------------------------------	--------	----

### Future Forests: Realistic Strategies for AD Security & "Red Forest" Architecture STR-R02

**Katie Knowles**, Security Consultant, MWR InfoSecurity

This session will investigate a realistic process to implement Microsoft's Red Forest for Active Directory. This recommended journey integrates lessons learned from both attackers and defenders.

Technology Infrastructure & Operations 	50 MIN	FC
--	--------	----

### Election Hacking is No Longer Theoretical: Russians Are Pwning Our Votes TECH-R02

**James Foster**, CEO, ZeroFOX; **Avi Rubin**, Professor, Johns Hopkins University

Election hacking is real. The vulnerability of modern elections has never been greater and the advanced challengers to the systems, processes and infrastructure are quickly gaining more ground.

## 9:10 AM

RSAC Sandbox	30 MIN	ALL
--------------	--------	-----

### How Long to Boom: Understanding and Measuring ICS Hacker Maturity SBX4-R1

**Sergio Caltagirone**, Director, Threat Intelligence, Dragos

ICS hackers don't start by disrupting electric grids but mature over time. Using threat intelligence we model ICS threat maturity to determine individual threat risk and predict threat timelines.

## 9:20 AM

Analytics Intelligence & Response	50 MIN	FC
-----------------------------------	--------	----

### Joining Forces: Transforming Cybersecurity through Diversity and Data AIR-R03

**MODERATOR:** **Heather King**, Chief Operating Officer, Cyber Threat Alliance

**PANELISTS:** **Jeannette Jarvis**, Director Product Marketing, Fortinet, Inc.; **Michelle Martinez**, Senior Threat Intelligence Analyst, Rapid 7; **Kathleen Whitbey**, Program Manager, CTI Information Sharing, Palo Alto Networks

Stakeholders are joining forces to share threat intelligence for the good of all and the internet as a whole, and women bring diverse perspectives offering solutions to problems facing the industry.

# THURSDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 9:20 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Application Security &amp; DevSecOps</b>	50 MIN	FC

**Stop That Release, There's a Vulnerability!** ASD-R03

*Christine Gadsby, Head of Product Security Operations, BlackBerry*

Join us to explore the security development life cycle and how to prioritize software security fixes.

<b>Blockchain &amp; Applied Crypto</b>	50 MIN	FC
--	--------	----

**Raiding Lost BTC and Other Cryptocurrencies** BAC-R03

*Konstantinos Karagiannis, CTO, Security Consulting, BT Americas*

Ways to recover lost BTC and other cryptocurrencies. The techniques you'll learn come not only from ongoing crypto lab research and experimentation but real-world lessons learned.

<b>Blockchain &amp; Applied Crypto</b> 2x	50 MIN	FC
---	--------	----

**Mechanical Backdoors in Cold War Encryption Machines**

BAC-T08R

*Marcus Sachs, Chief Security Officer, Pattern Computer*

Many stories have been told about breaking the Enigma. This talk will cover mechanical Hagelin cipher devices that were sold "pre-broken" during the Cold War, and used by some countries into the 1990s.

## 9:20 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Bridging the Gap: Cybersecurity + Public Interest Tech</b>	50 MIN	FC

**Introduction: Public Interest Technologists and Cybersecurity** PITC-R03

*MODERATOR: J. Bob Alotta, Astraea Foundation*

*PANELISTS: Matt Mitchell, Tactical Tech; Bruce Schneier, Fellow and Lecturer, Harvard Kennedy School*

Public interest technologists apply technological expertise to further the public interest. In this session, we'll talk about who and how—and what needs to be done in the future.

<b>C-Suite View</b>	50 MIN	FC
---------------------	--------	----

**Diversity and Inclusion: Impacting Culture to Create a More Creative Environment** CXO-R03

*MODERATOR: Michael Palmer, VP and CISO, National Football League*

*PANELISTS: Alissa Abdullah, Ph.D., VP, Chief Information Security Officer, Xerox Corporation; Roland Cloutier, Staff VP, Global Chief Security Officer, ADP; Emily Heath, VP & CISO, United Airlines; Jason Witty, CISO, JP Morgan*

Diversity and inclusion positively impact security organizations, but there's still work to do. CISOs will share their experiences in their drive to change cultures within and outside of their organizations.

# Introducing cyber\_reveal

A seamless extension  
of your security capability

- Reduce business risk
- Minimize threat detection and response times
- Visualize, validate and improve your security program with business relevant reporting
- Receive the latest, most relevant threat intelligence – mapped to your business
- Access security experts 24 x 7 / 365

# THURSDAY SESSION DETAILS

## 9:20 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cryptography</b>	50 MIN	FC

### Side Channel and Leakage Resilience CRYPT-R03

**Liron David**, Tel-Aviv University; **Antonio Faonio**, IMDEA Software Institute

Topics on side channel attacks and leakage resilience cryptography will be discussed.

**TOPIC 1:** Poly-Logarithmic Side Channel Rank Estimation via Exponential Sampling

Authors: **Liron David**; **Avishai Wool**

**TOPIC 2:** Efficient Fully-Leakage Resilient One-More Signature Schemes

Authors: **Antonio Faonio**

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Governance, Risk &amp; Compliance</b>	50 MIN	FC

### NIST Cybersecurity Framework and PCI DSS GRC-R03

**Troy Leach**, Chief Technology Officer, PCI Security Standards; **Emma Sutcliffe**, Senior Director, Data Security Standards, PCI Security Standards Council

This session will cover PCI SSC's current efforts to map controls between the NIST Cybersecurity Framework and PCI DSS.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Hackers &amp; Threats</b>	50 MIN	FC

### Anatomy of Phishing Campaigns: A Gmail Perspective HT-R03

**Nicolas Lidzorski**, Security Lead – Senior Staff Software Engineer, Google; **Ali Zand**, Software Engineer, Google

This talk will summarize the insights from the latest evolution of phishing attacks as seen by Gmail.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Hackers &amp; Threats Advanced</b>	50 MIN	FC

### Malicious, Misbehaving or Misunderstood? Making Bad USBs Good Again HTA-R03

**Eric Knapp**, Chief Engineer, Director of Innovation, Honeywell; **Peter Viscarola**, Consulting Partner, OSR Open Systems Resources, Inc.

Deep dive into the USB protocol, to understand how USB can be as difficult and dangerous as it is useful. A hacked e-cigarette will illustrate how a USB attack works, and how to defend against it.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Human Element</b>	50 MIN	FC

### Don't Hand Me That! The Art of Incident Analysis HUM-R03

**Kristy Westphal**, VP, CSIRT, Union Bank

This talk will explore various cases where gut feeling wasn't the best way to analyze a security event and the consequences that came from an improper analysis.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Identity</b>	50 MIN	FC

### Decentralized Identity: No Promises Edition IDY-R03

 **Pamela Dingle**, Director of Identity Standards, Microsoft; **Preeti Rastogi**, Principal Software Engineer, Microsoft

Decentralized identity promises amazing benefits. Join us for an overview of how public keys stored on a ledger might act as an anchor for digital trust and architectures evolving to leverage that trust.

## 9:20 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Learning Labs</b> 	2 HRS	FC

### Mental Health in Cybersecurity: Preventing Burnout, Building Resilience LAB1-R03

**Ryan Louie**, Psychiatrist, Foundation Physicians Medical Group, Inc.

Mental health directly impacts the daily work and lives of cybersecurity professionals. This session will discuss the stressors unique to cybersecurity, burnout and how to build mental resilience.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Learning Labs</b> 	2 HRS	FC

### Cybersecurity Leadership Effectiveness Using the 7-S Framework LAB2-R03

 **Todd Fitzgerald**, Managing Director/CISO, CISO SPOTLIGHT, LLC

How do we know if the CISO's security program has accounted for all the components to be effective? This session will examine cybersecurity strategy, structure, staff, skills, style and shared values.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Learning Labs</b> 	2 HRS	FC

### Cyber Defense Matrix Reloaded LAB4-R03

 **Sounil Yu**, Chief Security Scientist, Bank of America

This session will show new use cases of the Cyber Defense Matrix, including how to measure controls; align them against emerging threats; and manage your security program through design patterns.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Mobile &amp; IoT Security</b>	50 MIN	FC

### Fixing the Mess of IoT Security MBS-R03

**Ken Munro**, Partner, Pen Test Partners

With a live demo this talk will show how an IoT device can be hacked and explore why authorities still fail to deal with this growing issue. We'll also give advice for parents/kids/friends about IoT security.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Peer2Peer</b> 	50 MIN	FC

### "Next-Next-Gen Security 3.0": Truth and Lies P2P1-R03

**Pete Lindstrom**, Vice President for Security Strategies, IDC

This P2P will address the latest and greatest security tools and methods to help determine which ones are unlikely to succeed and which have real merit to contribute to a strong security program.

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Peer2Peer</b> 	50 MIN	FC

### Making MITRE ATT&CK™ Work for You: Sharing Best Practices for Success P2P2-R03

**Katie Nickels**, ATT&CK Threat Intelligence Lead, MITRE

This session will bring together ATT&CK users to share best practices and lessons learned, allowing participants to leave with actionable insights to improve their defenses.

9:20 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer	50 MIN	FC

**De-Bugging Legal Issues in Bug Bounty Programs and VDP**  
P2P3-R03

*Peter Fisk, Attorney, Lane Powell PC*

VDP is a legal device as much as it is technical. Some of the basic issues are known—safe harbor, scope, disclosure—but on the whole there is no standard legal playbook yet. Let's change that.

Policy & Government	50 MIN	FC
---------------------	--------	----

**Investigating IoT Crime: The Value of IoT Crime Classification**  
PNG-R03

*MODERATOR: Evan Perez, Senior Justice Correspondent, CNN*

*PANELISTS: Anthony J. Ferrante, Global Head of Cybersecurity and Senior Managing Director, FTI Consulting, Inc.; Jordan Kelly, Senior Managing Director, FTI Consulting; Aristedes Mahairas, Special Agent in Charge, Federal Bureau of Investigation (FBI)*

Our presentation proposes a comprehensive approach towards cybercrime interpretation through a framework of three separate and complementary views to achieve actionable recommendations.

Professional Development	50 MIN	FC
--------------------------	--------	----

**Women in Cybersecurity: Finding, Attracting and Cultivating Talent**  
PROF-R03

*Mandy Galante, Director of the Information Technology Institute, Mater Dei Prep High School, The SANS Institute; Michele Guel, Distinguished Engineer/ IoT Security Strategist, Cisco Systems*

From cyber-competitions to camps, internships and careers, this session will summarize what works and what doesn't in increasing the participation of young women in cybersecurity.

Protecting Data & the Supply Chain Ecosystem	50 MIN	FC
--	--------	----

**Context-Based Data Sensitivity Classification** PDAC-R03

*Anchit Arora, Program Manager, Cisco Systems; John Cashman, Information Security Architect, Cisco Systems*

Importance of context-based models for enterprises as the foundation of data identity preserving capabilities such as data tagging and lead to effective data protection.

Security Mashup	50 MIN	FC
-----------------	--------	----

**NONE of Us Are as Smart as ALL of Us** MASH-R03

*Wade Baker, Partner, Cyentia Institute; Jay Jacobs, Data Scientist, Cyentia Institute*

We analyze 1,000+ recent security industry reports using various machine learning and meta-analysis techniques to share consensus lessons found deep within our corpus of published research.

Security Strategy & Architecture	50 MIN	FC
----------------------------------	--------	----

**Security Learns to Sprint: DevSecOps** STR-R03

*Tanya Janca, Senior Cloud Developer Advocate, Microsoft*

This talk will explain what security teams need to adjust in order to turn DevOps into DevSecOps, by weaving security into each of the "Three Ways," with steps audience members can start immediately.

# Malwarebytes

## What do Businesses want when they get Impacted by Cyberthreats?

## MALWAREBYTES ENDPOINT PROTECTION & RESPONSE

WE DON'T JUST DETECT  
CYBERTHREATS, WE FIX THEM

Come to a live demo @ Malwarebytes

# Booth S 1035 South Expo

# THURSDAY SESSION DETAILS

## 9:20 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 MIN	ALL

### The Upside Down—The Roles & Responsibilities of Cybercrime Syndicates SPO1-R03

**Maya Horowitz**, Director, Threat Intelligence & Research, Check Point Software Technologies Ltd.; **Oded Vanunu**, Head of Products Vulnerability Research, Check Point Software Technologies Ltd.

Cybercrime has shifted from the “the lone wolf” operator to a well-organized and structured money-making machine. Take a deep dive into the underground roles and structures.

Sponsor Special Topics	50 MIN	ALL
------------------------	--------	-----

Please see Addendum for session details.

Sponsor Special Topics	50 MIN	ALL
------------------------	--------	-----

### Effectiveness vs. Efficiency: 10 Capabilities of the Modern SOC SPO3-R03

**Oliver Friedrichs**, VP, Security Automation and Orchestration, Splunk

In this session, Splunk will share the 10 must-have capabilities of the modern SOC that focus on bringing efficiency to security teams and optimizing their security workflows.

Technology Infrastructure & Operations	50 MIN	FC
--	--------	----

### Protecting Your Achilles Heel: Managing Security Risk in Your Legacy Product Portfolio TECH-R03

**Kyle Brunell**, Connected Product Security Leader, EY

Legacy products were not developed with today's threats in mind yet are expected to operate long into the future. Security is a pervasive challenge that cannot be addressed by security teams alone.

## 9:30 AM

RSAC Early Stage Expo Briefing Center	20 MIN	ALL
---------------------------------------	--------	-----

### IoT WiFi is the Hacker's Greenfield, It Cannot Wait to WAP3 BC-R1ESE

**Shlomo Touboul**, Founder & CEO, WifiWall

The ultrafast IoT network deployments require better WiFi security. Those 2.4GHz WiFi networks, cannot wait for an upgrade and need to secure the existing implementations.

## 9:40 AM

RSAC Sandbox	30 MIN	ALL
--------------	--------	-----

### I Belong Here SBX4-R2

**Michelle Mullinix**, Digital Analysis and Investigations, Executive Office For US Attorneys

I had no mentors, no guidance beyond my DD 214. I made a path in cybersecurity. Then I started sharing what I did with coworkers and students and other veterans. Before I knew it, I was the mentor.

## 10:00 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
RSAC Early Stage Expo Briefing Center	20 MIN	ALL

### Privileged Access Management: Making it Affordable and Easy BC-R2ESE

**Peter Senescu**, Founder, Xton Technologies LLC

Are you tired of enterprise grade PAM tools that are so expensive and hard to manage that they are never fully implemented or worse put off to next year's budget?

## 10:20 AM

RSAC Sandbox	40 MIN	ALL
--------------	--------	-----

### Run for Your Life—No Literally—Do It! SBX1-R1

**MODERATOR: Lisa Green**, Director, People Relations, Independent Security Evaluators

**PANELISTS: Katie Curran**, Information Security Engineer, Blackline; **Kat Fitzgerald**, Principal Security Architect, Zebra Technologies; **Xena Olsen**, Cyber Threat Intel Analyst, Discover Financial Services

Despite their benefits, smart devices open people up to new attacks that they may have not considered, such as an aid to attackers in domestic abuse and harassment.

## 10:30 AM

Expo Briefing Center North	30 MIN	ALL
----------------------------	--------	-----

### Don't Let the Lights Go Out: Inside the Mind of a Power Hacker BC-R1N

**Joseph Carson**, Chief Security Scientist and Advisory CISO, Thycotic

This session will explore a real-world hack into a power station to explain the planning, perimeter security, engines and SCADA controls. Learn the challenges of reporting to the board and lessons learned.

Expo Briefing Center South	20 MIN	ALL
----------------------------	--------	-----

### Resolve and Evolve: Machine Learning for Email Threat Protection BC-R1S

**Dena Bauckman**, CISSP, VP, Product Management, Zix

As email threats become more advanced, machine learning is a technique being used to detect these attacks. Learn the latest about machine learning and how it is changing the threat landscape.

RSAC Early Stage Expo Briefing Center	20 MIN	ALL
---------------------------------------	--------	-----

### DevOps, Cloud Sprawl and Security: A Complicated Relationship BC-R3ESE

**Paul McCarty**, Founder & Engineer, SecureStack

DevOps inspired automation gone wild + the clouds endless capacity increases risk and costs. Paul McCarty talks about how to tame the Cloud Sprawl beast by implementing real DevSecOps principles.

# THURSDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 10:40 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Bridging the Gap: Cybersecurity + Public Interest Tech</b>	50 MIN	FC

**Public Interest Tech in Silicon Valley** PITC-R05

*Mitchell Baker, Chairwoman, Mozilla Corporation; Cindy Cohn, EFF*

Silicon Valley is at the epicenter of the ongoing technological transformation of human society. How can technologists become forces for the public interest within their own organizations?

<b>Peer2Peer</b> △	50 MIN	FC
--------------------	--------	----

**Getting Started with a Quantitative Cyber-Risk Program**

P2P1-R05

*Anthony Martin-Vegue, Director, Information Security Risk, Informatica*

Join a discussion on implementing a quantitative cyber-risk program, such as Factor Analysis of Information Risk (FAIR), at your company.

## 10:40 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Peer2Peer</b> △	50 MIN	FC

**Internet Data Privacy Regulation: Not If, but How and by Whom**  
P2P2-R05

*Andrea Little Limbago, Chief Social Scientist, Virtru*

The battle is on to define the future of the Internet. This session will discuss global laws and policies reshaping the Internet, moves to protect data privacy, and the impact on global business and democracy.

<b>Peer2Peer</b> △	50 MIN	FC
--------------------	--------	----

**Can Cybersecurity Awareness Be Trained?** P2P3-R05

*Gopal Padinjaruveetil, CISO, Auto Club Group*

Awareness is not a behavior. Behavior is not just an action. Behavior is the visible byproduct of complex internal processes. Changing how people think and behave is complicated and nonlinear.

# #1 IN PRIVILEGED ACCESS SECURITY

Unsecured privileged accounts add risk to your business anywhere they exist—100% of advanced cyber attacks involve them. Seamlessly protect privileged accounts across the enterprise—on premises, in the cloud and on your endpoints with CyberArk. **Visit our Booth N 6253** to learn why the world's leading organizations prioritize privileged account security with CyberArk to detect and mitigate threats.

# THURSDAY SESSION DETAILS

## 11:00 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
RSAC Early Stage Expo Briefing Center	20 MIN	ALL

### Medical Workflows Are the Key to Healthcare Cybersecurity

BC-R4ESE

**Leon Lerman**, CEO, Cynerio

In this session we will demonstrate a different way of looking at medical device communications that not only addresses zero-day threats but also allows healthcare security teams to enforce protection in a way that has no risk of interfering with clinical operations.

RSAC Sandbox	30 MIN	ALL
--------------	--------	-----

### Hello? It's Me, Your Not So Smart Device. We Need to Talk.

SBX1-R2

**Alex Balan**, Chief Security Researcher, Bitdefender

A quick crash course into hardware hacking, chasing IoT botnets, remotely mass hacking IoTs and live demos at each step.

## 11:10 AM

Expo Briefing Center North	30 MIN	ALL
----------------------------	--------	-----

### Identity Iceberg Ahead: Machine Identities and Their Need for Protection

BC-R2N

**Michael Thelander**, Director, Product Marketing Venafi

Machine identities and their authentication—using certificates, digital keys and code signing—are the safety net under our information economy. Learn how to protect them with three key concepts.

## 11:30 AM

RSAC Early Stage Expo Briefing Center	20 MIN	ALL
---------------------------------------	--------	-----

### ArecaBay Force Field: Continuous API Security Powered by a Network Engine

BC-R5ESE

**Lebin Cheng**, CEO, ArecaBay Inc.; **Ravi Balupari**, Head of Engineering and Security, ArecaBay Inc.

API data breach is on the rise thanks to advanced threats at payload object level. ArecaBay continuously discover/monitor/secure all API flows (north-south and east-west), with zero Dev/DevOps impact.

RSAC Sandbox	1 HR	ALL
--------------	------	-----

### Bluetooth Reverse Engineering: Tools and Techniques

SBX3-R2

**Mike Ryan**, Founder, ICE9 Consulting

Learn how to reverse engineer and hack Bluetooth devices using the tools and techniques discussed in this talk. Whether you're a Bluetooth newbie or a pro, you'll learn something.

## 11:40 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
RSAC Sandbox	2 HRS	ALL

### SANS Core NetWars Experience

SBX2-R2

**Chris Elgee**, Builder & Breaker, Counter Hack Challenges

SANS NetWars Experience develops and tests your information security skills in a safe, interactive environment, while having a little fun with your fellow IT security professionals.

## 12:00 PM

Bridging the Gap: Cybersecurity + Public Interest Tech	50 MIN	FC
--	--------	----

### Working in Civil Society

PITC-R07

**Sarah Aoun**, Digital Security Technologist; **Peter Eckersley**, Partnership on AI; **Harlo Holmes**, Director of Newsroom Digital Security, Freedom of the Press Foundation; **John Scott-Railton**, Senior Researcher, Citizen Lab

Bringing a technological perspective into civil society can transform how organizations do their work. This session will examine how this transformation can happen from a variety of perspectives.

Expo Briefing Center North	30 MIN	ALL
----------------------------	--------	-----

### Managing Effective Security Policies in a Hybrid Enterprise Network

BC-R3N

**Reuven Harrison**, Chief Technology Officer, Tufin

This session explores some of the new elements of the modern hybrid enterprise including cloud, micro-services and DevOps. The session will offer an approach to managing a hybrid security policy.

Peer2Peer 	50 MIN	FC
---	--------	----

### Data Travel Hygiene: Security Vulnerability at Border Crossings

P2P1-R07

**Brian Warshawsky**, Systemwide Export Control Office, Insider Threat Program Senior Officer, and ITAR Empowered Official, University of California Office of the President

Failure to protect mobile device contents at border crossings exposes organizations and individual travelers to legal action, prosecution and viral scorn. Discussion of the new best practices.

Peer2Peer 	50 MIN	FC
---	--------	----

### Where Does Your Budget Go?

P2P2-R07

**Todd Inskeep**, Principal, Cyber Security Strategy, Booz Allen Hamilton

If companies spend 10 percent of the IT budget on security, where should that budget go? How do you optimize spend against the identify/protect/detect/respond/recover framework?

# THURSDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 12:00 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer 	50 MIN	FC

### Vehicle-to-Infrastructure Cybersecurity: Securing Transportation's Future P2P3-R07

*Christopher Waters, Cyber Solutions Technical Leader, GDIT*

Join this P2P session about current and emerging security mechanisms in transportation infrastructure and connected/autonomous vehicle communications. Help build security the right way!

## 12:30 PM

RSAC Early Stage Expo Briefing Center	20 MIN	ALL
---------------------------------------	--------	-----

### A Modern Approach to CSIRT Using Osquery BC-R6ESE

*Milan Shah, Co-Founder & CTO, Uptycs, Inc*

Learn how to implement comprehensive IR capability and maximize ROI on open source tooling with a SaaS model that is powered by Uptycs and osquery; the universal endpoint agent released by Facebook.

## 12:40 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Expo Briefing Center North	30 MIN	ALL

### From Endpoint to Any Point: Defending the New Perimeter with Cloud Security BC-R4N

*Gill Langston, Senior Product Manager, Avast*

Both point products and on-prem appliances have limitations. Learn why SMBs need to break free from costly appliances and develop a cloud security stack that protects users in the office or on the go.

## 1:00 PM

RSAC Early Stage Expo Briefing Center	20 MIN	ALL
---------------------------------------	--------	-----

### Defense by Reason of Economics BC-R7ESE

*Ben Schmidt, CSO, PolySwarm*

A lot of cybersecurity solutions focus on driving up the cost for the attacker. We are flipping the equation by making economic incentives constant, accessible, and attractive for good defenders.

Secure Cloud Gateway

## Secure user internet access on any device, from any location, in the cloud

Shift the focus from defending perimeters to following users for consistent cloud security in the office, at home, and on the road—no appliances required.

Learn More at Booth N 5553

# THURSDAY SESSION DETAILS

## 1:10 PM

TRACK / TOPIC

SESSION LENGTH BADGE ACCESS

RSAC Sandbox

30 MIN ALL

**Hunt Advanced Attackers on a Budget Less than the GDP of a Small Country** SBX4-R3

*John Strand, Owner, Black Hills Information Security*

Don't have a budget of a Fortune 5 company? This talk is for you. The talk will cover new attack tools and free techniques to detect them. Come for the new "hacks." Stay for the detection techniques!

## 1:30 PM

Analytics Intelligence & Response

50 MIN FC

**Purple Team at Scale** AIR-R09

*Jason O'Dell, Director of Incident Response and Hunt, Walmart*

This session will provide examples, lessons learned and practical advice for implementing continuous purple teaming at scale based on experiences at the world's largest retailer.

Application Security & DevSecOps

50 MIN FC

**Cover Your aaS with DevSecOps** ASD-R09

*Cindi Carter, Vice President, Chief Security Officer, Mede/Analytic; Yaron Levi, CISO, Blue Cross and Blue Shield of Kansas City*

Presenters will share their story about making security part of the culture for an organization with 3,500 developers who didn't want to have anything to do with security.

Blockchain & Applied Crypto

50 MIN FC

**Using High-Entropy Encryption for Enterprise Collaboration**

BAC-R09 

*Aaron Turner, CEO, Hotshot Technologies; Jonathan Warren, CTO, HighSide*

An in-depth discussion of how to use high-entropy elliptic curve cryptography. From how the keys can be created in a distributed way to avoid security problems, revoked to restrict data access.

Bridging the Gap: Cybersecurity + Public Interest Tech

50 MIN FC

**Government Needs You** PITC-R09

*Travis Moore, TechCongress; Hashim Mteuzi, Senior Manager, Network Talent Initiative, Code for America; Giji Sohn, Distinguished Fellow, Georgetown Law Institute for Technology Law & Policy; Ashkan Soltani, Independent Consultant, Soltani LLC*

Government needs technologists at all levels. In this session, you'll hear how public interest technologists are having an impact on government.

C-Suite View

50 MIN FC

**Communicating with the Board** CXO-R09

*Tim Callahan, SVP of Global Security and Chief Security Officer, Aflac Inc.; Richard Clarke, CEO, Good Harbor Security Risk Management*

This fireside chat will dig into essential elements (regulatory and best practice) of cyber-program communication, including strong two-way communication between the CISO and the board, and building trust.

## 1:30 PM, CONTINUED

TRACK

SESSION LENGTH BADGE ACCESS

Cloud Security & Virtualization

50 MIN FC

**Zero-Trust Networking Is Facilitating Cloud Transformation** CSV-R09

*Richard Stiennon, Chief Research Analyst, IT-Harvest*

The CIO's journey to a cloud-first strategy. The endgame is one where applications are hosted in the cloud and visible only to authorized users. Real-world examples of success provided.

Cryptography

50 MIN FC

**Block Cipher: Cryptanalysis** CRYP-R09 

*Gembu Ito, Nagoya University; Baoyu Zhu, Department of Computer Science and Technology, Tsinghua University*

Cryptanalytic attacks on block cipher algorithms will be discussed.

**TOPIC 1: MILP-Based Differential Attack on Round-Reduced GIFT**

*Authors: Baoyu Zhu; Xiaoyang Dong; Hongbo Yu*

**TOPIC 2: Quantum Chosen-Ciphertext Attacks against Feistel Ciphers**

*Authors: Gembu Ito; Akinori Hosoyamada; Ryutaroh Matsumoto; Yu Sasaki; Tetsu Iwata*

Governance, Risk & Compliance

50 MIN FC

**How to Measure Ecosystem Impacts** GRC-R09

*Jay Jacobs, Data Scientist, Cyentia Institute; Adam Shostack, President & Consultant, Shostack & Associates*

The deployment of DMARC for email security is a case study of how to measure security. This talk will cover measuring DMARC adoption, what could be measured and couldn't, and lessons for your projects.

Hackers & Threats Advanced

50 MIN FC

**Reverse Engineering Attribution: The Man Behind the Man Behind the Curtain** HTA-R09

*John Miller, Deputy Director, Threat Intelligence, FireEye; Jayce Nichols, Senior Director of Collection & Research, FireEye*

Threat actors can manipulate attribution analysis techniques; this session will talk about the implications.

Human Element

50 MIN FC

**Awareness at Scale: Creating Risk-Aware Cultures in Big Companies** HUM-R09

*MODERATOR: Tom Pendergast, Chief Learning Officer, MediaPro, Inc.*

*PANELISTS: Kemi Okutubo, Senior Information Security Manager,*

*International Monetary Fund; Ellen Powers, Information Security*

*Communication Strategist, Intel Corporation; Deborah Walter, Manager,*

*Information Security Training and Awareness, AmerisourceBergen*

Scaling a security awareness program to a global employee population in multiple languages requires planning, focus and lots of support. Come learn how it's done.

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer <span style="color: #000080;">△</span>	50 MIN	FC

### High Speed, Low Drag: How Intelligence Teams Leverage Deep/Dark Web Data P2P3-R09

**Lance Cottrell**, Chief Scientist, Ntrepid Corporation

If you find yourself in a fair fight, you didn't plan your mission properly. How can law organizations execute meaningful OSINT to combat real-world challenges? Join the conversation.

Professional Development	50 MIN	FC
--------------------------	--------	----

### How to Create a Truly Diverse Cyber-Workforce PROF-R09

**MODERATOR: Shelley Westman**, Principal, EY

**PANELISTS: Jordan Jacobson**, Student, Cal Poly Pomona; **Dan Manson**, Professor of Computer Information Systems, California State Polytechnic University; **Mat Newfield**, CISO, Unisys

A varied and unique panel consisting of a CISO, legal expert, educator and student will focus on how to build a diverse and varied workforce in cybersecurity and why this matters in the real world.

Protecting Data & the Supply Chain Ecosystem	50 MIN	FC
--	--------	----

### The Power of Ecosystems: A Look under the Supply-Chain Covers PDAC-R09

**Jennifer Bisceglie**, CEO, Interos Solutions, Inc.; **Mark Weatherford**, Global Information Security Strategist, Booking Holdings

This session will visually explore the ecosystems of three nation-state supply chains from the headlines to demonstrate why end-to-end transparency of business ecosystems is critical.

Protecting Data & the Supply Chain Ecosystem <span style="color: #000080;">2x</span>	50 MIN	FC
--	--------	----

### When the One You Trust Hurts You Most: Real-World Attack, Real-Time Response PDAC-T07R

**Bret Hartman**, VP and CTO, Security Business Group, Cisco Systems; **Jyoti Verma**, Technical Leader, Cisco Systems

Experience a real-time, real-world supply chain attack fueled by rapid internal lateral movement. Watch as split-second, critical decisions are made to stop one of today's most challenging attacks.

RSAC Early Stage Expo Briefing Center	20 MIN	ALL
---------------------------------------	--------	-----

### Proactively Managing OSS Security Risks in Corporate IT Environment BC-R8ESE

**Tae-Jin (TJ) Kang**, Co-Founder & CEO, Insignary

In this session, we discuss the challenges related to securing the corporate IT environment in constant flux and a way to proactively manage open source software (OSS) security risks.

## 1:30 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Security Mashup	50 MIN	FC

### Investigative Journalists Speak Out Year V MASH-R09

**MODERATOR: Dan Hubbard**, Chief Product Officer, Lacework Inc.

**PANELISTS: Joseph Menn**, Investigative Journalist, Reuters; **Nicole Perloth**, Cybersecurity Journalist, New York Times; **Kevin Poulsen**, Contributing Editor, Wired Magazine and Daily Beast

One would think that after five consecutive years we would have nothing left to discuss, but that can't be further from the truth.

Security Strategy & Architecture	50 MIN	FC
----------------------------------	--------	----

### Getting Product Cybersecurity Right in a Large Mature Corporation STR-R09

**Matthew Bohne**, Vice President, Chief Product Security Officer, Honeywell

Lessons learned on what it takes to secure consumer and B2B products in a large multinational corporation. This talk will give practical techniques on how to evolve the company and gain support.

Security Strategy & Architecture	50 MIN	FC
----------------------------------	--------	----

### Making Security a Best Practice in Every Aspect of Open Source STR1-R09

**Valecia Maclin**, General Manager, Customer Security & Trust Engineering, Microsoft

Microsoft has grown its use of open source significantly over the past decade. This session will share lessons learned and ways the community is collaborating to help improve security practices.

Sponsor Special Topics	50 MIN	ALL
------------------------	--------	-----

### Cyber-Risk Management: New Approaches for Reducing Your Cyber-Exposure SPO2-R09

**Kevin Flynn**, Sr. Product Marketing Mgr., Tenable

This session will describe new ways to objectively measure cyber-risk to help guide strategic decision-making, thus allowing organizations to effectively prioritize and benchmark risk management efforts.

Sponsor Special Topics	50 MIN	ALL
------------------------	--------	-----

### The Future Is Hybrid: Key Considerations for Cloud and DevOps SPO3-R09

**Lamar Bailey**, Director, Security Research and Development, Tripwire

This session will explore the key considerations for expanding security operations to the cloud—from managing risk, to building trust across hybrid, physical, virtual, public/private cloud environments.

Technology Infrastructure & Operations	50 MIN	FC
--	--------	----

### Schrodinger's Pentest: Scoping Entanglement TECH-R09

**Laurent Desaulniers**, Intrusion Testing Detector, GoSecure

Obtain better value in pentesting, by asking the hard questions and by learning to differentiate between buzzword-compliance and actual security testing.

# THURSDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 1:40 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>RSAC Sandbox</b>	30 MIN	<b>ALL</b>

### Internal Affairs: Building Incident Command Frameworks through Diplomacy SBX4-R4

*Dana-Megan Rossi, Assoc. Director, Product Security Policy, Strategy & Incident Response, Becton, Dickinson and Company*

This discussion will identify key strategies and techniques for building a command structure that facilitates decision making and tactical execution.

## 2:00 PM

<b>Learning Labs</b> △	2 HRS	<b>FC</b>
------------------------	-------	-----------

### Fine-Tuning Your Cyber-Defense Technologies with the ATT&CK Framework LAB1-R10

*Lane Thames, Senior Security Researcher, Tripwire*

Learn how to fine-tune your cybersecurity technology stacks such as deception and preemptive controls using MITRE's Adversarial Tactics, Techniques and Common Knowledge (ATT&CK) Framework.

## 2:00 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Learning Labs</b> △	2 HRS	<b>FC</b>

### Let's Make Risk a Game! 4,000 Cyber-Risks in Your Hand LAB2-R10

*Joel Benge, Strategist, ADG Creative; Earl Crane, Founder and Chairman, Emergynt*

Join us as we unleash a terrible "what-if?" machine and explore 4,000 potential cyber-loss scenarios—in the form of a physical model. Come early and to get a free deck to model your own cyber-risks.

<b>Learning Labs</b> △	2 HRS	<b>FC</b>
------------------------	-------	-----------

### Everything You Need to Know about Cybersecurity and Privacy Law in Two Hours! LAB4-R10

*Christopher Pierson, Founder & CEO, BLACKCLOAK; James Shreve, Partner and Chair of the Cybersecurity Practice, Thompson Coburn LLP*

Understanding the most important cybersecurity and privacy laws is key to your job and success. Join us for a tour of these laws, some issue-spotting exercises and lots of fun in this learning lab.

## STOP ATTACKS WHERE OTHERS CAN'T.

SonicWall captures the never-before-seen cyberattacks lurking in deeper, darker places.

With SonicWall Real-Time Deep Memory Inspection™, you can stop attacks being missed by traditional network defenses. RTDMI™ even blocks malicious PDFs and office files, and dangerous side-channel threats like Meltdown, Spectre, Foreshadow, Foreshadow NG and PortSmash.

Visit SonicWall at RSA® Conference to learn how RTDMI works to help deliver automated, real-time breach detection and prevention for enterprises and SMBs.

Visit Us at RSA® Conference

**SONICWALL®**

# THURSDAY SESSION DETAILS

## 2:20 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
RSAC Sandbox	30 MIN	ALL

### Internet of Laws: Navigating the IoT Legal Landscape SBX1-R3

**Dr. Amit Elazari Bar On**, Director, Global Cybersecurity Policy, Intel Corporation, and Lecturer, UC Berkeley School of Information (MICS)

This talk will give IoT practitioners and security researchers a quick intro to the variety of legal and regulatory concepts that govern IoT landscape focusing on recent trends and potential pitfalls.

## 2:50 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Analytics Intelligence & Response	50 MIN	FC

### Incident Response beyond Enterprise IT AIR-R11 ⚙️

**Jason Escaravage**, Senior Vice President, Booz Allen Hamilton; **Phillip Hamill**, Principal – OT Delivery Lead, Booz Allen Hamilton

Enterprises need to be ready to handle incidents in new domain areas—cloud, OT, mobile, etc. This session will speak to the challenges of building out effective IR readiness across evolving domains.

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Application Security & DevSecOps	50 MIN	FC

### API Security—Assume Possible Interference AST-R11

**Julie Tsai**, Infosec Leader

What happens when the unexpected happens? Design for security and be able to diagnose and pivot quickly to adjust to real threats.

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Blockchain & Applied Crypto	50 MIN	FC

### How Bad Incentives Led to Crypto-Mining Malware, and What to Do about It BAC-R11

**Sandy Carielli**, Director of Security Technologies, Entrust Datacard

Consider systems principles about incentives, trace the rise of crypto-mining malware to early incentive design for public blockchain and consider the pros and cons of alternative incentive models.

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
Bridging the Gap: Cybersecurity + Public Interest Tech	50 MIN	FC

### Changing Academia PITC-R11

**Latanya Sweeney**, Harvard; **Danny Weitzner**, MIT CSAIL

Higher education needs to incorporate a public interest perspective in technology departments. This session will look at some efforts to build these sorts of interdisciplinary classes, programs and institutes.

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
C-Suite View	50 MIN	FC

### The Fine Art of Creating a Transformational Cybersecurity Strategy CXO-R11 ⚙️

**Jinan Budge**, Principal Analyst, Forrester Research; **Andrew Rose**, Chief Security Officer, Vocalink, a Mastercard Company

It's time to rise and transform your security capability. Join this session to learn how to successfully kick off, create, build and deliver a strong security transformation and strategy.

## 2:50 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Cloud Security & Virtualization	50 MIN	FC

### The Advantage of Ignoring the Long Tail of Security: A Product View CSV-R11 ⚙️

**James DeLuccia**, Cybersecurity Cloud B2C & B2B, New Products, Honeywell

Practical product engineering cybersecurity focus that tackles the most critical to ensure a delightful customer experience, based on hundreds of deployed cloud products in B2B and B2C environment.

TRACK	SESSION LENGTH	BADGE ACCESS
Cryptography	50 MIN	FC

### Block Cipher: Design and Evaluation CRYP-R11 ⚙️

**Si Gao**, University of Bristol; **Kai Hu**, Key Lab of Cryptologic Technology & Information Security, Ministry of Education, Shandong University

Design and evaluation of block cipher algorithms will be discussed.

**TOPIC 1:** Automatic Search for a Variant of Division Property Using Three Subsets

Authors: Kai Hu; Meiqin Wang

**TOPIC 2:** Constructing TI-friendly Substitution Boxes Using Shift-Invariant Permutations

Authors: Si Gao; Arnab Roy; Elisabeth Oswald

TRACK	SESSION LENGTH	BADGE ACCESS
Governance, Risk & Compliance	50 MIN	FC

### Math Is Hard: Compliance to Continuous Risk Management GRC-R11

**Max Blumenthal**, Senior Cyber Assurance Architect, Sandia National Laboratories; **Christie Gross**, Cybersecurity Solutions Engineer Lead, Delta Dental of California

Participants will learn how to transition from a compliance mindset to a holistic and quantitative risk management approach that integrates assessment, monitoring and risk-analysis activities.

TRACK	SESSION LENGTH	BADGE ACCESS
Governance, Risk & Compliance 2x	50 MIN	FC

### GDPR: How to Work Out If Your Security Is "Appropriate" GRC-W03R

**John Elliott**, Data Protection Specialist

**John Elliott**, Data Protection Specialist

GDPR requires organizations to implement "appropriate technical and organizational measures" to protect personal data. This session will help you to determine what's appropriate for your organization.

TRACK	SESSION LENGTH	BADGE ACCESS
Hackers & Threats	50 MIN	FC

### Hunt Advanced Attackers on a Budget Less than the GDP of a Small Country HT-R11

**John Strand**, Owner, Black Hills Information Security

Don't have a budget of a Fortune 5 company? This talk is for you. The session will cover new attack tools and free techniques to detect them. Come for the new "hacks." Stay for the detection techniques!

# THURSDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 2:50 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Hackers &amp; Threats Advanced</b>	50 MIN	FC

### Outsmarting Smart Contracts HTA-R11

**Adi Ashkenazy**, VP Product, XM Cyber; **Shahar Zini**, System Architect, XM Cyber

Smart contracts are essentially immutable, open-source blocks of code with the innate capability to transfer value. Presenters will examine past failures and the likely future of smart-contract security.

<b>Human Element</b>	50 MIN	FC
----------------------	--------	----

### Automation vs. Human Eyes: Optimizing Human Intuition for Success HUM-R11

**Tonia Dudley**, Security Solutions Advisor, Cofense

Your highly-skilled SOC analysts need to know what to do—not them burn out quickly spending most of their day with eyes on glass. In this session, we'll look at how to balance human skill & automation.

<b>Identity</b>	50 MIN	FC
-----------------	--------	----

### Adversarial Machine Learning against Modern Behavioral Biometrics Systems IDY-R11

**Ajit Gaddam**, Senior Director, Security Architecture Engineering, Visa Inc.; **Heng Tang**, Staff Software Security Engineer, Visa Inc.

As behavioral biometrics-based authentication gains wide adoption, attackers are utilizing adversarial machine learning to subvert them. This talk will showcase novel attacks and defensive countermeasures.

## 2:50 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Mobile &amp; IoT Security</b>	50 MIN	FC

### Why Industrial IoT Security Is Really about Saving Lives MBS-R11

**MODERATOR: Emily Miller**, Director, National Security & Critical Infrastructure Programs, Mocana

**PANELISTS: Galina Antova**, Co-Founder, Claroty; **John Felker**, Director, National Cybersecurity & Communications Integration Center (NCCIC), CS&C, Department of Homeland Security; **Lorie Wigle**, Vice President, Software & Services Group, Intel Corporation

Industrial control systems cannot tolerate downtime, or risk human safety in any way. A compromised system can result in millions of dollars lost—but even more devastatingly—the loss of life.

<b>Peer2Peer </b>	50 MIN	FC
---	--------	----

### 24 hours, 240 Million Threat Events P2P1-R11

**Timothy Brown**, Vice President, Security, SolarWinds

This discussion will draw on insourced and outsourced IT experience to understand how to break down barriers, bridge gaps, overcome objections and leverage the right strategies for SOC success.

**EMPOWERED**

**PRIVILEGED**

**ACCESS**

**Booth N 6265**  
North Expo

BeyondTrust was recently recognized as a leader in the first-ever Gartner PAM Magic Quadrant.

- Manage and monitor privileged accounts
- Remote help desk support for internal users
- Provide secure remote access for third-party vendors
- Manage least privilege on all endpoints
- Manage vulnerabilities
- Bridge Unix and Linux into Active Directory
- Audit changes in Active Directory

# THURSDAY SESSION DETAILS

## 2:50 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer <span>△</span>	50 MIN	FC

**Cyber-Innovation: How Do We Stimulate Innovation in the US, Europe and Asia** P2P2-R11

*Grace Cassy, Co-Founder, CyLon*

An in-depth look at early-stage cyber-markets. Compare and contrast developments, challenges and investment landscapes in US, Europe and Asia, and discuss how to stimulate cyber-innovation globally.

TRACK	SESSION LENGTH	BADGE ACCESS
Peer2Peer <span>△</span>	50 MIN	FC

**Best Practices for Youth Outreach and Education in Cybersecurity** P2P3-R11

*Heather Ricciuto, Global Leader – Academic Outreach Programs, IBM Security*

This session will share industry best practices for youth outreach and education in cybersecurity. The discussion may expand to broader community outreach on cybersecurity.

TRACK	SESSION LENGTH	BADGE ACCESS
Policy & Government	50 MIN	FC

**Measuring Cybersecurity Effectiveness in a Threat-Based World** PNG-R11

*MODERATOR: Jeanette Manfra, Assistant Secretary, Office of Cybersecurity and Communications (CS&C), Department of Homeland Security*  
*PANELISTS: Marianne Bailey, Deputy National Manager (DNM) for National Security Systems (NSS) and Senior Cybersecurity Executive, National Security Agency; Kevin Cox, Program Manager, Cybersecurity and Infrastructure Security Agency; Matthew Scholl, Chief, Computer Security Division, NIST*

The panel will explore using threat data to help agencies protect information and detect and respond quickly to adversarial actions. They will also examine federal efforts to create better threat models.

TRACK	SESSION LENGTH	BADGE ACCESS
Professional Development <span>2x</span>	50 MIN	FC

**Empowering International Security Teams** PROF-R11

*Caroline Wong, Chief Security Strategist, Cobalt.io*

Language barriers, cultural differences and inconvenient time zones can interfere with even the most capable of security teams. Learn how to effectively empower international teams.

TRACK	SESSION LENGTH	BADGE ACCESS
Protecting Data & the Supply Chain Ecosystem	50 MIN	FC

**How Understanding Risk Is Changing for Open Source Components** PDAC-R11

*Chris Wysopal, CTO, Veracode*

The presenter will discuss solutions for how to keep up with open source vulnerabilities.

TRACK	SESSION LENGTH	BADGE ACCESS
RSAC Sandbox	30 MIN	ALL

**U-Boot, I-Hack** SBX1-R4

*Andrew Bindner, Manager, Penetration Testing, Rapid7; Carlota Bindner, Security Associate, Rapid7*

Identify potential vulnerabilities and intellectual property loss when U-Boot is incorrectly configured on embedded devices. Live demos of attacker techniques for bypassing U-Boot security.

## 2:50 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Security Mashup	50 MIN	FC

**Election Hacking: Trading Malware for Votes** MASH-R11

*📍 Kenneth Geers, Chief Research Scientist, Comodo*

Politicians and hackers use malware to steal votes and influence elections. This research correlates two years of national elections and in-country malware detections.

TRACK	SESSION LENGTH	BADGE ACCESS
Security Strategy & Architecture	50 MIN	FC

**Lessons from Applying MITRE ATT&CK in the Wild** STR-R11

*MODERATOR: Richard Struse, Chief Strategist, Cyber Threat Intelligence, MITRE Corporation*  
*PANELISTS: Jessica Payne, Security Person, Microsoft; Rachael Schweizer, Cybersecurity Analytics Lead, Pfizer; David Westgard, Lead Engineer, Cyber Security, Target*

Hear from experts that use MITRE's ATT&CK knowledge base discussing what works, what doesn't and how to achieve measurable improvements in your security posture through the use of adversary knowledge.

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 MIN	ALL

**Cybersecurity Is All About Protecting the "Seams"** SPO1-R11

*MODERATOR: Javvad Malik, Security Evangelist, AT&T Business*  
*PANELISTS: Jaime Blasco, VP & Chief Scientist, Alien Labs, AT&T Business; Frederick Lee, Former CISO, Square; Russell Spittler, AVP, Product, AT&T Cybersecurity; Bindu Sundaresan, Principal Architect, AT&T Business*

Cybercrime is all about exploiting the "seams" in organizations' networks. Fighting this requires a collaborative and coordinated approach with people, process and technology working together.

TRACK	SESSION LENGTH	BADGE ACCESS
Sponsor Special Topics	50 MIN	ALL

**Protecting You Better with Advanced Malware Research** SPO3-R11

*Juraj Janosik, Senior Software Engineer, ESET; Robert Lipovsky, Senior Malware Researcher, ESET*

Advanced, award-winning malware research directly translates into better detection and protection technology.

TRACK	SESSION LENGTH	BADGE ACCESS
Technology Infrastructure & Operations	50 MIN	FC

**What Every Security Professional Needs to Know About WiFi 6** TECH-R11

*📍 Avril Salter, Wireless Strategic Technologist and Architect, Salter & Associates*

The next generation of WiFi products (WiFi 6) are here. This session will describe the key technical differences between Wi-Fi 6 and existing WiFi networks, and discuss the implication to network security.

THURSDAY

# THURSDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 4:10 PM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Bridging the Gap: Cybersecurity + Public Interest Tech</b>	50 MIN	FC

**The Future of Public Interest Tech** PITC-R14

**MODERATOR:** *Jenny Toomey, Director, Internet Freedom, Ford Foundation*  
**PANELISTS:** *Bruce Schneier, Fellow and Lecturer, Harvard Kennedy School; Ben Wizner, ACLU*

This closing session will sum up the day and discuss future directions for growing the field, funding trajectories, outstanding needs and gaps, and how you can get involved.

<b>Peer2Peer</b>	50 MIN	FC
------------------	--------	----

**How Are You Monitoring SCADA?** P2P1-R14

**Gib Sorebo, Security Consulting Senior Manager, Accenture**

This session will draw on the experience of participants to understand what ICS detection technologies they're exploring, what works, and what technologies and techniques need more improvement.

## 4:10 PM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Peer2Peer</b>	50 MIN	FC

**What Will It Take to Eliminate Passwords for Authentication?**  
P2P2-R14

**Kim Wagner, Senior Director, Identity and Risk Products, Visa**

Passwords are insecure—often too simple, forgotten or easily stolen. Biometrics offers stronger authentication but will it ever replace passwords to become the de facto approach? What would it take?

<b>Peer2Peer</b>	50 MIN	FC
------------------	--------	----

**Cloud Access Security Broker Best Practices** P2P3-R14

**Joshua Atencio, Senior Information Security Engineer, Aetna**

This session will spark a discussion around best practices and methodology when deploying and fully utilizing the investment of a CASB to reduce the risk within a company's environment.

**ARE YOUR APPS SECURE  
AGAINST TODAY'S MOST CRITICAL THREATS?**

**Visit F5 at Booth S 643**

Learn about emerging app threats with the latest intel from F5 Labs

Talk to F5 experts about filling the gaps in your app security strategy

Get the 2019 cipher t-shirt and test your skills with our annual challenge

Get the latest at [www.f5.com/rsac](http://www.f5.com/rsac)

**THINK APP SECURITY FIRST**

# FRIDAY EVENTS & ACTIVITIES

## 7:30 AM – 8:30 AM CONTINENTAL BREAKFAST\*

Various Locations Full Conference Pass holders, head directly to your chosen morning session. Breakfast is available in Moscone West Levels 2 & 3 and Moscone South Levels 2 & 3.

## 8:00 AM – 1:00 PM BROADCAST ALLEY

Moscone West Street Level Watch top security publications shoot live and record exclusive interviews.

### KEYNOTES

Keynote abstracts can be found on page 36.

## 8:30 AM – 9:20 AM In the Wake of an Attack: Thoughts from a Seasoned CISO

South Esplanade

**Bob Lord**, Chief Security Officer, DNC;  **Dr. Hugh Thompson**, RSA Conference Program Chair, RSA Conference

## 9:50 AM – 10:40 AM (Girl) Scouting for Talent: The Solution in the Next Generation

South Esplanade

**Sylvia Acevedo**, Chief Executive Officer, Girl Scouts of the USA

## 11:10 AM – 12:00 PM Engineering Trust and Security in the Cloud Era, Based on Early Lessons

South Esplanade

**Quentin Hardy**, Head of Editorial, Google Cloud; **Suzanne Frey**, Vice President, Engineering, Google Cloud; **Amin Vadhat**, Google Fellow and Networking Technical Lead, Google

## 8:30 AM – 12:00 PM TRACK SESSIONS\*

Locations Vary See detailed information on following pages for descriptions.

## 9:30 AM – 11:30 AM JOB SEARCH 2019: INTERVIEW SKILLS & RESUME REVIEW WORKSHOP\*

Moscone West 3022

This workshop has two components—the first explores how to best present your skills and self to potential companies and the second is a resume review workshop.

## 12:30 PM – 1:15 PM CONFERENCE CLOSING

Moscone West Street Level

**Tina Fey**, Writer, Actress, and Producer;  **Dr. Hugh Thompson**, RSA Conference Program Chair, RSA Conference

 = Top-rated speaker.

\* Open to Full Conference Registrants only.

## Discovering Threats. Defending Networks.

Trustwave's full range of service offerings, including flexible managed security, industry-leading technologies and tailored consulting engagements, help businesses like yours solve threat challenges and close data protection gaps.

Visit [www.trustwave.com/rsac-2019](http://www.trustwave.com/rsac-2019) to view our full schedule of events happening throughout the show.

Trustwave Booth N 5565 in the North Expo

 Trustwave®

# FRIDAY SESSION DETAILS

BADGE ACCESS: FC = Open to Full Conference Registrants only • ALL = Open to all attendees

## 8:30 AM

TRACK / TOPIC	SESSION LENGTH	BADGE ACCESS
<b>Analytics Intelligence &amp; Response</b>	50 MIN	FC

### Use Model to Deconstruct Threats: Detect Intrusion by Statistical Learning AIR-F01

*Tao Zhou, Senior Staff Algorithm Engineer, Alibaba*

This talk will describe how to identify unknown threats using statistical learning in large scale enterprise networks, and some tricks in performing pre-filter data and conducting post-correlate alarms.

<b>Application Security &amp; DevSecOps</b>	50 MIN	FC
---	--------	----

### Threat Modeling in 2019 ASD-F01

*Adam Shostack, President & Consultant, Shostack & Associates*

Attacks always get better, so your threat modeling needs to evolve. Learn what's new and important in threat modeling in 2019. Take home ways to ensure your security engineering is up to date.

<b>Blockchain &amp; Applied Crypto</b>	50 MIN	FC
--	--------	----

### Key Management and Protection: Evaluation of Hardware, Tokens, TEEs and MPC BAC-F01

*Nigel Smart, Professor, KU Leuven*

A review of the varied cryptographic key management and protection technologies available today, including emerging solutions designed to enhance security and usability in a dispersed environment.

<b>C-Suite View</b>	50 MIN	FC
---------------------	--------	----

### A New Employer-Driven Model of Cyber-Workforce Development For Dell CXO-F01

*Simone Petrella, Chief Cyberstrategy Officer, CyberVista; John Scimone, Chief Security Officer, Dell Technologies*

Review a case study where job role and skills assessments were applied to Dell's core cyber-staff resulting in a more usable version of the NCWF along with a more effective workforce development path.

<b>Cloud Security &amp; Virtualization</b>	50 MIN	FC
--	--------	----

### Securely Deploying Micro Services, Containers & Serverless PaaS Web Apps CSV-F01

*Murray Goldschmidt, Chief Operating Officer, Sense of Security Pty Ltd*

This presentation will address all the relevant information about the default security postures achieved by using public cloud and also the gotchas! Avoiding vendor defaults will render better outcomes.

<b>Cryptography</b>	50 MIN	FC
---------------------	--------	----

### Multiparty Computation and Application CRYP-F01

*Niek J. Bouman, Technische Universiteit Eindhoven, the Netherlands; Eleftheria Makri, imec-COSIC, KU Leuven, Belgium*

Multiparty computation and its real-world applications will be discussed.

**TOPIC 1:** Fast Secure Comparison for Medium-Sized Integers and Its Application in Binarized Neural Networks

*Authors: Mark Abspoel; Niek J. Bouman; Berry Schoenmakers; Niels de Vreede*

**TOPIC 2:** EPIC: Efficient Private Image Classification (or: Learning from the Masters)

*Authors: Eleftheria Makri; Dragos Rotaru; Nigel P. Smart; Frederik Vercauteren*

## 8:30 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Governance, Risk &amp; Compliance</b>	50 MIN	FC

### Do You Know Your Organization's Top 10 Security Risks? GRC-F01

*Min-Hwei Liu, Director, Information Security, Aetna*

Maintaining focus in a changing threat landscape—Top 10 Security Risks: steps to top 10 security risks; key success factors and metrics; steps to kick off this program in your organization.

<b>Hackers &amp; Threats</b>	50 MIN	FC
------------------------------	--------	----

### Phantom Menace, Episode I? The Attack that Undressed the Mexican Banks in '18 HT-F01

*Josu Iza, Information Security Advisor, Scotiabank*

An inside look into the 2018 SPEI (Interbanking Payment System in Mexico) attack, to not repeat history again.

<b>Hackers &amp; Threats Advanced</b>	50 MIN	FC
---------------------------------------	--------	----

### The New Gold Rush: How to Hack Your Own Best Mining Rig HTA-F01

*Roy Katmor, CEO and Co-Founder, enSilo; Udi Yavo, CTO and Co-Founder, enSilo*

This talk will explain building a stealthy, decentralized platform mining rig with publicly available tools, and how techniques used by ransomware are now used for crypto-mining and how to protect against them.

<b>Human Element</b>	50 MIN	FC
----------------------	--------	----

### Designing Effective Security UX: If It's Not Usable, It's Not Secure HUM-F01

*Ranjeet Kumar Tayi, User Experience Design Leader (Data Security Group), Informatica*

UX design plays a critical role in empowering people to protect their privacy by controlling their data. A human-centered design thinking approach to security can make products usable and secured.

<b>Identity</b>	50 MIN	FC
-----------------	--------	----

### 4G to 5G Evolution: In-Depth Security Perspective IDY-F01

*Anand Prasad, Chief Security Architect, Rakuten Mobile Networks*

We will present 4G security and issues followed by 5G security and security challenges from virtualization in 5G networks. We will conclude with a summary of 5G security enhancements expected in near future.

<b>Mobile &amp; IoT Security</b>	50 MIN	FC
----------------------------------	--------	----

### Procuring IoT: Purchasing Guidance for Government Officials MBS-F01

*Daniel Kroese, Associate Director, National Risk Management Center Cybersecurity and Infrastructure Security Agency, Department of Homeland Security*

Join the Department of Homeland Security for a briefing on IoT purchasing guidance, co-created by the tech industry to help the government make risk-informed decisions and drive demand for secure IoT.

# FRIDAY SESSION DETAILS

## 8:30 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Mobile & IoT Security <span>2x</span>	50 MIN	FC

### Anatomy of an Enterprise Mobile Security Incident MBS-W10R

**Aaron Turner**, CEO, Hotshot Technologies

Based on a real-world situation, learn how mobile vulnerabilities have been used by attackers to gain access to sensitive enterprise information and credentials, including defeating soft tokens.

TRACK	SESSION LENGTH	BADGE ACCESS
Policy & Government	50 MIN	FC

### A Separate Network for Critical Infrastructure: Is It a Good Idea? PNG-F01

**MODERATOR:** Robert Knake, Senior Research Scientist, Northeastern University  
**PANELISTS:** Sharla Artz, Vice President, Government Affairs, Policy & Cybersecurity, UTC; Peter Fuhr, Distinguished Scientist, Director, Grid Security, Tech Director UAS Research Center, Oak Ridge National Laboratory; Samara Moore, Director, Cybersecurity, Exelon

Do utilities need a separate Internet? The National Infrastructure Advisory Council thinks so but is it practical? Come hear three practitioners debate the outcome of a yearlong study on the concept.

TRACK	SESSION LENGTH	BADGE ACCESS
Professional Development	50 MIN	FC

### Five Secrets to Attract and Retain Top Tech Talent in Your Future Workplace PROF-F01

**Laurie Battaglia**, CEO & Workplace Strategist, Aligned at Work

Are your top people leaving you and your organization? You the leader make the difference. Learn proven ways to attract and retain your top talent and keep them engaged at work.

TRACK	SESSION LENGTH	BADGE ACCESS
Protecting Data & the Supply Chain Ecosystem	50 MIN	FC

### Infesting the Embedded Supply Chain PDAC-F01

**Zach Miller**, Software Engineer, in8 Solutions

IoT devices are becoming more common and with that comes a litany of new development tools needed for these devices. Learn how these development tools can compromise your network.

TRACK	SESSION LENGTH	BADGE ACCESS
Security Mashup	50 MIN	FC

### Saving Lives Using Social Networks MASH-F01

**Maria Namestnikova**, Web Analyst, Internet Child Safety Expert, Kaspersky Lab

What does your child do on social networks? Do they hide or block their account from you? Does your child interact with strangers and share personal information with them but not with you?

TRACK	SESSION LENGTH	BADGE ACCESS
Security Strategy & Architecture	50 MIN	FC

### STIR SHAKE'N SIP to Stop Robocalling STR-F01

**Daksha Bhasker**, Senior Security Architect, Comcast

Thwart phone scam robocalls with secure architecture implementation of the STIR/Shaken (Secure Telephony Identity Revisited/Signature-based handling of Asserted Information using tokens) framework.

## 8:30 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Technology Infrastructure & Operations	50 MIN	FC

### SOC Automation, Enterprise Blueprinting and Hunting Using Open-Source Tools TECH-F01

**Brian Baskin**, Senior Threat Researcher, Carbon Black; **John Holowczak**, Senior Threat Analyst, Carbon Black

With SOC visibility, moving beyond the interface and delving into the unknown aspects of a network is important. Discover ways to blueprint your network using readily available and native tools.

## 9:50 AM

TRACK	SESSION LENGTH	BADGE ACCESS
Analytics Intelligence & Response	50 MIN	FC

### Vulnerabilities: What Is the Future AIR-F02

**Roberta Stempfley**, Director, CMU – SEI – CERT

Artificial intelligence is creating a world with new threats and new attack surfaces. These issues will be explored in a lively back-and-forth between two experts.

TRACK	SESSION LENGTH	BADGE ACCESS
Application Security & DevSecOps	50 MIN	FC

### DevSecOps for the Rest of Us! ASD-F02

**Sara Perrott**, Sr. Information Security Technology Engineer, BECU

Traditional DevSecOps is very developer centric, but it doesn't have to be. Take your security ninja skills to the next level with automation!

TRACK	SESSION LENGTH	BADGE ACCESS
Blockchain & Applied Crypto	50 MIN	FC

### Nation-State Exploitation of Cryptocurrencies BAC-F02

**Yaya Fanusie**, Senior Fellow, Foundation for Defense of Democracies; **Tom Robinson**, Chief Data Officer & Co-Founder, Elliptic

Learn how cryptocurrencies are enabling nation-states to conduct espionage, evade sanctions, raise funds and engage in cyberwarfare.

TRACK	SESSION LENGTH	BADGE ACCESS
C-Suite View	50 MIN	FC

### Developing Key Performance Indicators for Security CXO-F02

**James Tarala**, Principal Consultant, Enclave Security, LLC

Learn practical steps to creating meaningful key performance indicators that can be easily communicated to leadership.

TRACK	SESSION LENGTH	BADGE ACCESS
Cloud Security & Virtualization	50 MIN	FC

### Democratizing Cloud Security: Journey to Secure the Public Cloud CSV-F02 ⚙️

**Yunchao Liu**, Sr Software Engineer, Symantec; **Hardeep Singh**, Senior Principal Security Engineer, Symantec

This session will take you through the presenters' journey of securing their AWS cloud environment and the workloads being migrated there.

# FRIDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 9:50 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Cryptography</b>	50 MIN	FC

### Secure Computation CRYP-F02

**Lucas Schabhüser**, Researcher, Technische Universität Darmstadt; **Liang Zhao**, Sichuan University, China

Topics on secure computation will be discussed.

**TOPIC 1:** Context Hiding Multikey Linearly Homomorphic Authenticators  
Authors: Lucas Schabhüser; Denis Butin; Johannes Buchmann

**TOPIC 2:** Revisiting the Secret Hiding Assumption Used in Verifiable (Outsourced) Computation  
Authors: Liang Zhao

<b>Governance, Risk &amp; Compliance</b>	50 MIN	FC
--	--------	----

### What Does Cyber-Insurance Really Bring to the Table and...Are You Covered? GRC-F02

**MODERATOR:** Kara Owens, Managing Director, Markel Corporation  
**PANELISTS:** Sarah Knight, Senior Counsel, Privacy, Cybersecurity, and Information Governance, Gilead Sciences; Stuart Panensky, Partner, FisherBroyles, LLP

Attendees of this session will gain a clear perspective of what benefits cyber-insurance can provide to their existing cybersecurity program.

<b>Hackers &amp; Threats</b>	50 MIN	FC
------------------------------	--------	----

### Advanced Smart Contract Hacking HT-F02

**Konstantinos Karagiannis**, CTO, Security Consulting, BT Americas

If hacking Ethereum blockchain code is your passion, it's time to take your skills to the next level. Learn bleeding-edge exploits, and the killer skill of writing contracts to hack contracts.

<b>Hackers &amp; Threats Advanced</b>	50 MIN	FC
---------------------------------------	--------	----

### Blackbox Interpretability: Next Frontier in Adversarial ML Evasion HTA-F02

**Greg Ellison**, Data Scientist, Microsoft; **Holly Stewart**, Principal Research Manager, Microsoft

The emerging field of blackbox interpretability promises deeper understanding of machine learning decisions, but it can also help hackers defeat your defenses. Learn how to use it for your benefit.

<b>Human Element</b>	50 MIN	FC
----------------------	--------	----

### Why Data-Driven Personalized Journeys Are the Future of Security Training HUM-F02

**Aika Sengirbay**, Sr. Information Security Program Lead, Autodesk; **Masha Sedova**, Co-Founder, Elevate Security

Learn how Autodesk rethought security awareness training and leveraged behavioral data to create personal security journeys for each employee and unlocked behavior change companywide.

<b>Identity</b>	50 MIN	FC
-----------------	--------	----

### 12 Ways to Hack 2FA IDY-F02

**Roger Grimes**, Data-Driven Defense Evangelist, KnowBe4

All auth solutions can be hacked. Come learn at least 12 ways 2FA can be hacked, how 2FA works behind the scenes, what the holes are, how to hack it and how you can defend against those attacks.

## 9:50 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
<b>Mobile &amp; IoT Security</b>	50 MIN	FC

### Aviation Cybersecurity: Keeping the Wings On MBS-F02

**Peter Cooper**, Director, Pavisade; **Nathalie Feyt**, Chief Product Security Officer, Thales Avionics – AVS France

Digitization in the aviation industry has produced a critical attack surface. This presentation will explore the global efforts to tackle the cybersecurity/safety challenge faced by the aviation industry.

<b>Policy &amp; Government</b>	50 MIN	FC
--------------------------------	--------	----

### Behind the Headlines: A Public-Private Discourse on Cyber-Defense PNG-F02

**MODERATOR:** Theresa Payton, CEO and Founder, Fortalice Solutions  
**PANELISTS:** Curtis Dukes, Executive Vice President & General Manager, Security Best Practices and Automation Group, Center for Internet Security; John Felker, Director, National Cybersecurity & Communications Integration Center (NCCIC), CS&C, Department of Homeland Security; Neal Ziring, Technical Director for the National Security Agency's Capabilities Directorate, National Security Agency (NSA)

This panel will offer unpublished, coveted cyber-trends intelligence from key cyber-thinkers to help practitioners navigate crowded cyber-defense data points and take more proactive defensive action.

<b>Professional Development</b>	50 MIN	FC
---------------------------------	--------	----

### Why the Role of CISO Sucks and What We Should Do to Fix It! PROF-F02

**Gary Hayslip**, Vice President, CISO, WEBROOT; **Rick McElroy**, Head of Security Strategy, Carbon Black

The role of CISO is an ever-slogging fight that grinds security executives with high stress and career risk. Let's talk about some ideas on how to help our peers thrive in this role.

<b>Professional Development</b> 	50 MIN	FC
---	--------	----

### Empowering International Security Teams PROF-R11R

**Caroline Wong**, Chief Security Strategist, Cobalt.io

Language barriers, cultural differences and inconvenient time zones can interfere with even the most capable of security teams. Learn how to effectively empower international teams.

<b>Protecting Data &amp; the Supply Chain Ecosystem</b>	50 MIN	FC
---	--------	----

### Blockchain Augmentation of the Trusted Supply Chain PDAC-F02

**Eduardo Cabre**, Product Development Engineering Manager, Intel Corporation; **Tom Dodson**, Supply Chain Security Architect, Intel Corporation

Last year, we presented a Trusted Supply Chain to assure end users of the provenance and integrity of a platform. We return with an alternative blockchain implementation of the Trusted Supply Chain.

<b>Security Mashup</b>	50 MIN	FC
------------------------	--------	----

### Top 10 Security Disasters in ML: How Laurel and Yanny Replaced Alice and Bob MASH-F02

**Davi Ottenheimer**, Product Security, MongoDB

If you thought confidentiality breaches were a crisis, are you ready to detect and prevent integrity failures at machine speed?

# FRIDAY SESSION DETAILS

## 9:50 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Security Strategy & Architecture	50 MIN	FC

### Introduction to Defending the Enterprise Using Automated SecOps STR-F02

**Tomasz Bania**, *Cyber Defense Manager, Dolby*

This session will provide real-world insight on implementing automated security operations, for choosing a strategy, establishing a scope, planning the rollout and real-world examples.

TRACK	SESSION LENGTH	BADGE ACCESS
Technology Infrastructure & Operations	50 MIN	FC

### Intelligence-Driven Industrial Security with Case Studies in ICS Attacks TECH-F02

**Robert Lee**, *CEO, Dragos, Inc.*

This talk will explore first-hand knowledge into industrial control system (ICS) cyberattacks and the lessons learned to drive the industry forward in the coming years.

## 11:10 AM

TRACK	SESSION LENGTH	BADGE ACCESS
Analytics Intelligence & Response	50 MIN	FC

### Law Enforcement: The Secret Weapon in the CISO's Toolkit AIR-F03

**John Fokker**, *Head of Cyber Investigations, McAfee*

Enrich your expanding toolbox of security measures by working with law enforcement agencies (LEA) before, during or after a security breach.

TRACK	SESSION LENGTH	BADGE ACCESS
Blockchain & Applied Crypto	50 MIN	FC

### Key Management Architectures for Multinational Compliance BAC-F03

**Sundaram Lakshmanan**, *Chief Technology Officer, CipherCloud*

Understand strategies for key management architectures that meet the needs of multinational corporations for data privacy, data protection, data sovereignty, data residency and compliance.

TRACK	SESSION LENGTH	BADGE ACCESS
Cloud Security & Virtualization	50 MIN	FC

### Secure Innovation in Public Cloud, Myth or Reality? CSV-F03

**Rehman Khan**, *Director Cloud And Data Security, TD Ameritrade*; **Brajesh Moni**, *Cloud Security Consultant, TD Ameritrade*

Frictionless cloud security. Learn TD Ameritrade's journey to public cloud for innovation and enterprise initiatives.

TRACK	SESSION LENGTH	BADGE ACCESS
Cryptography	50 MIN	FC

### Privacy and Anonymity CRYP-F03

**Elizabeth Crites**, *Brown University*; **Yanhong Xu**, *Nanyang Technological University, Singapore*

Cryptographic techniques on privacy and anonymity will be discussed.

**TOPIC 1:** Delegatable Anonymous Credentials from Mercurial Signatures  
*Authors: Elizabeth C. Crites; Anna Lysyanskaya*

**TOPIC 2:** Accountable Tracing Signatures from Lattices  
*Authors: San Ling; Khoa Nguyen; Huaxiong Wang; Yanhong Xu*

## 11:10 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Governance, Risk & Compliance	50 MIN	FC

### IMF Case Study: Metrics That Matter—Help Management with Decision-Making and Improve Security Posture of the Organization GRC-F03

**Sanaz Sadoughi**, *Information Security Officer, International Monetary Fund*

Information security metrics presents a holistic view of the information security posture of the organization and helps management with decision-making to prioritize the investment to mitigate risk.

TRACK	SESSION LENGTH	BADGE ACCESS
Hackers & Threats	50 MIN	FC

### The Etiology of Vulnerability Exploitation HT-F03

**Jay Jacobs**, *Data Scientist, Cyentia Institute*; **Michael Roytman**, *Chief Data Scientist, Kenna Security*

The presenters wondered why only some vulnerabilities were exploited in the wild. Their research led them on a journey towards a few dozen data points that helped them understand the probability of exploitation.

TRACK	SESSION LENGTH	BADGE ACCESS
Hackers & Threats Advanced	50 MIN	FC

### Behavior and Misbehavior: The First Ever RSAC SOC Report HTA-F03

**Jessica Bair**, *Senior Manager, Advanced Threat Solutions, Cisco Security*; **Percy Tucker**, *Senior Manager, RSA*; **Neil Wyler**, *Threat Hunter, RSA*

One of the first things an attendee to any conference is looking for is the WiFi password, and RSA Conference is no different. But just what are you connecting to? What's happening on the back end? And really, just who're you sharing this network with?

TRACK	SESSION LENGTH	BADGE ACCESS
Human Element	50 MIN	FC

### Autism, Cybercriminals, Cybercrime and Employment HUM-F03

**Rebecca Ledingham**, *Vice President Cybersecurity, Mastercard*

A significant number of cyber-offenders present with Autism disorders. Learn about people involved in the cybercrime environment by understanding the issues of offenders, victims and employees.

TRACK	SESSION LENGTH	BADGE ACCESS
Identity	50 MIN	FC

### Are Spoof-Proof Biometrics Really Possible? IDY-F03

**Stephanie Schuckers**, *Director, Professor, Clarkson University, Center for Identification Technology Research*

Get the latest in spoof attack detection, testing and certification, and come away with best practices for secure biometric implementations from a globally recognized biometric security expert.

TRACK	SESSION LENGTH	BADGE ACCESS
Mobile & IoT Security	50 MIN	FC

### Changing the World with the UK's Code of Practice for Consumer IoT Security MBS-F03

**David Rogers**, *Mobile Technology, Cyber Security & Standards Adviser, Department for Digital, Culture, Media & Sport (DCMS), UK*

The UK's Code of Practice for Consumer IoT Security, backed by open data global IoT security and privacy recommendations, aims to ensure products are secure by design. Learn how it works and what's coming next.

# FRIDAY SESSION DETAILS

BADGE ACCESS: **FC** = Open to Full Conference Registrants only • **ALL** = Open to all attendees

## 11:10 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Policy & Government	50 MIN	FC

### Laboratories of Cyber Innovation—States Leading the Way PNG-F03

**MODERATOR:** *David Forscey*, Senior Policy Analyst, National Governors Association

**PANELISTS:** *Deborah Blyth*, Chief Information Security Officer, State of Colorado; *Stephanie Helm*, Director, Massachusetts Cyber Center at Mass Tech Collaborative, Commonwealth of Massachusetts; *Peter Liebert*, Chief Information Security Office & Director, Office of Information Security, State of California; *Shawn Riley*, Chief Information Officer, State of North Dakota; *Mike Steinmetz*, State Cybersecurity Officer & Principal Homeland Security Advisor, State of Rhode Island

Listen to a diverse group of cybersecurity leaders speak about the specific challenges and opportunities for states in cybersecurity and technology.

Professional Development	50 MIN	FC
--------------------------	--------	----

### Retaining and Growing Cybersecurity Talent: A Proven Model PROF-F03

**Deidre Diamond**, Founder and CEO, CyberSN and Brainbabe

To improve cybersecurity workforce retention companies must develop career development plans based on standardized, common-language projects and tasks. Fortune 500 case study to be shared.

Protecting Data & the Supply Chain Ecosystem	50 MIN	FC
--	--------	----

### Tales from the PSIRT: 10 Years of Bugs, Vulnerabilities and CVEs PDAC-F03

**Jon Green**, VP and Chief Security Technologist, Aruba

The Product Security Incident Response Team (PSIRT) is a critical part of keeping your IT infrastructure secure. But how do they function? We'll see how product companies go from discovery to CVE.

## 11:10 AM, CONTINUED

TRACK	SESSION LENGTH	BADGE ACCESS
Security Mashup	50 MIN	FC

### Cybersecurity and Hospital Infection Control: Overlaps and Opportunities MASH-F03

**Meghan Brett**, Hospital Epidemiologist, University of New Mexico School of Medicine; **Howard Poston**, Cyber R&D, The Cybermaniacs

Cybersecurity and infection control are fields similar in threats and containment techniques. We provide an in-depth comparison between the fields focused on threat landscape and best practice.

Security Strategy & Architecture	50 MIN	FC
----------------------------------	--------	----

### 10 Lies You Tell Your Security Vendors—And What to Do Instead STR-F03

**Michael Adler**, VP, Product – NetWitness Platform, RSA

This session will review some of the issues that make it difficult for security vendors to meet the needs of customers and how to avoid those issues.

Technology Infrastructure & Operations	50 MIN	FC
--	--------	----

### Passwords and Patching: The Forgotten Building Blocks of Enterprise Security TECH-F03

**Andrea Fisher**, Security Specialist, Microsoft; **Jon Wojan**, Partner Technical Architect, Microsoft

The NSA hasn't responded to a zero-day attack in 24 months. Patching remains the biggest security issue until 2020. Get back to the basics and overcome foundational issues with patching and passwords.

Technology Infrastructure & Operations	50 MIN	FC
--	--------	----

### Election Hacking is No Longer Theoretical: Russians Are Pwning Our Votes TECH-R02R

**James Foster**, CEO, ZeroFOX; **Avi Rubin**, Professor, Johns Hopkins University

Election hacking is real. The vulnerability of modern elections has never been greater and the advanced challengers to the systems, processes and infrastructure are quickly gaining more ground.

# ASSOCIATIONS

## EDUCATION SPONSORS

**CompTIA** (the Computing Technology Industry Association) is the world's leading, not-for-profit, technology association, with approximately 2,000 corporate member companies, 5,000 IT professional members, 3,000 academic and training partners, 100,000+ registered users and over two million IT certifications issued. CompTIA provides networking, education, thought leadership, certifications and is an advocate for technology companies and IT professionals. CompTIA also gives back to the industry through philanthropic efforts through the Creating IT Futures Foundation. CompTIA's unparalleled range of programs foster workforce skills development and generate critical knowledge and insight—building the foundation for technology's future. Visit [www.comptia.org](http://www.comptia.org) to learn more.

**GIAC Certifications** develops and administers premier, professional information security certifications. More than 30 certifications align with SANS training and ensure mastery in critical, specialized infosec domains. GIAC certifications provide the highest and most rigorous assurance of cybersecurity knowledge and skill available to industry, government and military clients across the world.

The **International Association of Privacy Professionals (IAPP)** is the largest and most comprehensive global information privacy community and resource, helping practitioners develop and advance their careers and organizations manage and protect their data. Founded in 2000, the IAPP is a not-for-profit association that helps define, support and improve the privacy profession through networking, education and certification. More than just a professional association, the IAPP provides a home for privacy professionals around the world to gather, share experiences and enrich their knowledge.

The impact and sophistication of cybersecurity threats have created a global demand for professionals with cybersecurity expertise that is outpacing the supply. **ISACA**® developed Cybersecurity Nexus™ (CSX) to help fill the growing cybersecurity skills gap, provide cybersecurity guidance, training, credentials and career development for professionals at every stage of their careers, and help enterprises develop their cyber workforce. CSX, an innovative, holistic resource for cybersecurity solutions serves to highlight ISACA's continuing commitment to addressing the global need for skilled cybersecurity professionals.

**(ISC)²** is an international nonprofit membership association focused on inspiring a safe and secure cyber world. Best known for the acclaimed Certified Information Systems Security Professional (CISSP®) certification, (ISC)² offers a portfolio of credentials that are part of a holistic, programmatic approach to security. Our membership, over 130,000 strong, is made up of certified cyber, information, software and infrastructure security professionals who are making a difference and helping to advance the industry. Our vision is supported by our commitment to educate and reach the general public through our charitable foundation—The Center for Cyber Safety and Education™. Visit [www.isc2.org](http://www.isc2.org).

**SANS** is the most trusted and by far the largest source for information security training and security certification in the world. It also develops, maintains, and makes available at no cost, the largest collection of research documents about various aspects of information security, and it operates the Internet's early warning system—the Internet Storm Center.

## CLE ACCREDITATION SPONSOR

**The American Bar Association Section of Science & Technology Law (SciTech)** sponsors the Law Track at RSA Conference 2019. SciTech has applied for Continuing Legal Education Credits in many mandatory CLE states for all sessions in this track. To sign-in for CLE credit, please visit the CLE Information Table during the Law Track Sessions in Marriott Marquis. Contact SciTech at (312) 988-5594 with any questions.

## ASSOCIATION SPONSORS

**APWG** is the international coalition unifying the global response to cybercrime across industry, government and law-enforcement sectors, and NGO communities. APWG's membership worldwide is as global as its outlook with its directors, managers and research fellows advising national governments; global governance bodies such as the Organisation for Economic Co-operation and Development, the International Telecommunications Union and ICANN; hemispheric and global trade groups; and multilateral treaty organizations such as the European Commission, the Commonwealth of Nations, the G8 High Technology Crime Subgroup, Council of Europe's Convention on Cybercrime, the United Nations Office on Drugs and Crime and the Organization of American States. Operationally, APWG conducts its mission through: an exchange clearing more than 500 million data elements per month; the APWG.EU, the institution's European research chapter in Spain; and the STOP.THINK.CONNECT. cybersecurity awareness campaign.

**CForum** is an association of industry experts focused on continuing the discussion started during development of the "Framework for Improving Critical Infrastructure Cybersecurity" (the "Framework"). CForum provides an online community for information sharing and best practices to assist organizations in securing their environments. CForum's goal is to be an industry-led forum that discusses the topics surrounding the security practices, Framework, and how to evolve the Framework through version 2.0. Through the collaboration enabled by CForum we can help one another improve our security programs.

The **Cloud Security Alliance** is a not-for-profit organization with a mission to promote best practices and spread industry-wide education on security assurance within Cloud Computing. CSA is led by a broad coalition of industry practitioners, corporations, consumers, associations and other key stakeholders and serves as an incubator for international cloud standards. CSA's ever-expanding research and initiatives provide the industry with critical resources such as the Security Guidance and GRC Stack papers, Cloud Controls Matrix, CCSK training and certification, and the publicly accessible registry, CSA STAR.

**DevOps.com** is where the world meets DevOps. DevOps.com features the largest collection of original DevOps related content with new and fresh content served daily. DevOps.com also produces DevOps Connect conferences and other DevOps education and training.

**Data Security Council of India (DSCI)** is a premier industry body on data protection in India, setup by NASSCOM®, committed to making the cyberspace safe, secure and trusted by establishing best practices, standards and initiatives in cybersecurity and privacy. DSCI works together with the Government and their agencies, Law Enforcement Agencies, industry sectors including IT-BPM, BFSI, CII, Telecom, industry associations, data protection authorities and think tanks for public advocacy, thought leadership, capacity building and outreach initiatives. For more information, visit: [www.dsci.in](http://www.dsci.in).

Founded in 2002, the **Executive Women's Forum** ([www.ewf-usa.com](http://www.ewf-usa.com)) is the largest member organization serving emerging leaders as well as the most prominent and influential female executives in Information Security, IT Risk Management Privacy. Our mission is to attract, retain and advance women in our field through education, leadership development and the creation of trusted relationships. We are committed to developing future leaders through our scholarship program and keeping kids safe online with the Cyber Security School Challenge. The dialogue that begins at our National Conference hosted by Alta Associates ([www.altaassociates.com](http://www.altaassociates.com)) on October 15 – 17, 2019, continues throughout the year during regional meetings, Cheer dinners, meet & greet events, mentoring and Leadership Journey programs. Our EWF Connect extends the access that occurs during EWF events via an 24/7 online interactive community. Become a member today!

# ASSOCIATIONS

**GlobalPlatform** is a nonprofit industry association driven by approximately 100 member companies. Members share a common goal to develop GlobalPlatform's specifications, which are today highly regarded as the international standard for enabling digital services and devices to be trusted and securely managed throughout their lifecycle. GlobalPlatform protects digital services by standardizing and certifying a security hardware/firmware combination, known as a secure component, which acts as an on-device trust anchor. This facilitates collaboration between service providers and device manufacturers, empowering them to ensure the right level of security within all devices to protect against threats. Market sectors adopting GlobalPlatform technology include automotive, healthcare, government and enterprise ID, payments, premium content, smart cities, smart home, telecoms, transportation and utilities.

Founded by Internet pioneers, the **Internet Society** is a nonprofit organization dedicated to ensuring the open development, evolution and use of the Internet. Working through a global community of chapters and members, the Internet Society collaborates with a broad range of groups to promote the technologies that keep the Internet safe and secure, and advocates for policies that enable universal access. The Internet Society is also the organizational home of the Internet Engineering Task Force (IETF) and the Online Trust Alliance (OTA), which identifies and promotes security and privacy best practices that build consumer confidence in the Internet.

The **Information Systems Security Association (ISSA)** is dedicated to developing and connecting cybersecurity leaders globally. ISSA is the community of choice for international cybersecurity professionals dedicated to advancing individual growth, managing technology risk, and protecting critical information and infrastructure. The primary goal of ISSA is to promote management practices that will ensure the confidentiality, integrity and availability of information resources. ISSA facilitates interaction and education to create a successful environment for global information systems security and for the professionals involved. Members include practitioners at all levels of the security field in a broad range of industries such as communications, education, healthcare, manufacturing, financial and government.

The **National Cyber Security Alliance (NCSA)** is the nation's leading nonprofit, public-private partnership promoting cybersecurity and privacy education and awareness. NCSA works with a broad array of stakeholders in government, industry and civil society. NCSA's primary partners are DHS and NCSA's Board of Directors, which includes representatives from ADP; AT&T Services Inc.; Bank of America; CDK Global, LLC; CertNexus; Cisco; Cofense; Comcast Corporation; ESET North America; Facebook; Google; Intel Corporation; Marriott International; Mastercard; Microsoft Corporation; Mimecast; NXP Semiconductors; Raytheon; Salesforce; Symantec Corporation; Visa; and Wells Fargo. NCSA's core efforts include National Cyber Security Awareness Month (October); Data Privacy Day (Jan. 28); STOP. THINK. CONNECT.™, the global online safety awareness and education campaign co-founded by NCSA and the Anti-Phishing Working Group with federal government leadership from DHS; and CyberSecure My Business™, which offers webinars, web resources and workshops to help businesses be resistant to and resilient from cyberattacks. For more information on NCSA, please visit [staysafeonline.org/about-us/overview](http://staysafeonline.org/about-us/overview).

**OASIS** is a nonprofit consortium that advances open standards and open source development on a global scale. It offers standards and open source projects a path to recognition in international policy and procurement. Any initiative for developing code, APIs, specifications or reference implementations can find a home at OASIS. Each project operates independently under industry-approved process and IPR policies. Some of the most widely adopted standards are developed at OASIS including: KMIP, STIX, TAXII, OpenC2 and SAML. Many of these have gone on to be published as ISO, IEC or ITU standards. New work is encouraged, and all are welcome to participate. OASIS members can be found in 100+ countries on virtually every continent. Major multinational companies, SMEs, government agencies, universities, research institutions, consulting groups and individuals are represented.

The OpenStack Foundation (OSF) supports the development and adoption of open infrastructure globally, across a community of 100,000 individuals in 187 countries, by hosting open source projects including OpenStack, Airship, Kata Containers, StarlingX, and Zuul, as well as supporting communities of practice, including datacenter cloud, edge computing, NFV, CI/CD and container infrastructure. [www.openstack.org/foundation](http://www.openstack.org/foundation)

Industry association **SIMAlliance** advocates the protection of sensitive connected and mobile services to drive their creation, deployment and remote management across multiple industries and use cases, including IoT. It promotes the essential role of a tamper resistant secure hardware component in delivering secure applications and services across all devices that can access wireless networks. SIMAlliance facilitates delivery of secure connected services globally, by: anticipating market needs and developing enabling specs; collaborating with industry stakeholders to ensure new use cases and business models can be securely supported; clarifying and recommending existing technical standards relevant to the implementation of strong device security; promoting the availability of its members' standardised, global security infrastructure, together with an established process landscape, which offers an instant solution to many challenges associated with bringing mobile services to market and managing them remotely.

## NON-PROFIT SPONSOR

The **Global Cyber Alliance** (GCA) is an international, cross-sector effort dedicated to eradicating cyber-risk and improving our connected world. We achieve our mission by uniting global communities, implementing concrete solutions, and measuring the effect. GCA, a 501(c)3, was founded in September 2015 by the Manhattan District Attorney's Office, the City of London Police and the Center for Internet Security. Learn more at [www.globalcyberalliance.org](http://www.globalcyberalliance.org).

## Your Data.

## Our Mission.

### Is Your Data Safe?

At Varonis, protecting your file and email systems from cyberattacks and insider threats is our primary focus. We're fighting a different battle - so your data is protected first. Not Last.

Booth N 5579

# EXPLORE THE EXPO

## EXPO HOURS

Monday, March 4	Tuesday, March 5	Wednesday, March 6	Thursday, March 7
Welcome Reception 5:00 PM – 7:00 PM	10:00 AM – 6:00 PM	10:00 AM – 6:00 PM Expo Pub Crawl 4:30 PM – 6:00 PM	10:00 AM – 3:00 PM

### BROWSE EXHIBITORS

in Alphabetical Order with Company Descriptions, on pages 119–179.  
Alphabetical Order Listing on pages 187–189.

You can also find Expo information on our website—or download our app! Visit [www.rsaconference.com/app1](http://www.rsaconference.com/app1) or scan this QR code to get started.

SEE EXPO FLOOR PLANS on pages 190–193.

## DON'T MISS THESE SPECIAL HIGHLIGHTS:

### WELCOME RECEPTION

**Monday,  
5:00 PM – 7:00 PM**

Join your peers in the North and South Expos while kicking off RSA Conference in style at the Welcome Reception. Enjoy drinks and light fare on Monday evening from 5 to 7 PM. Get exclusive access to the exhibitors you've been waiting to meet; network with peers as you preview cutting-edge products from over 650 leading information security companies.

Sponsored by:

### BRIEFING CENTER

**Tuesday – Thursday,  
Ongoing**

Stop by one of the two Briefing Centers for 20- to 30-minute technical demos featuring top companies in information security. Obtain answers to challenges currently facing your company and further enhance your security strategies for the coming year. For the presentation schedule, see pages 115–118; for session abstracts consult the sessions detail pages for each day.

### EXPO PUB CRAWL

**Wednesday,  
4:30 PM – 6:00 PM**

Enjoy your choice of complimentary beer, wine and non-alcoholic beverages as you visit sponsoring companies' booths to learn about their latest products, services and innovations. Located at select sponsor booths within both expo halls on Wednesday, March 6, from 4:30 to 6 PM.

PUB CRAWL SPONSORS:

# BRIEFING CENTER SCHEDULE

Stop by one of the two Briefing Centers for 20- to 30-minute technical demos featuring top companies in information security. Obtain answers to challenges currently facing your company and further enhance your security strategies for the coming year. Briefing Center presentations are open to all badge types.

For session abstracts see the [Session Details](#) pages for each day.

## TUESDAY, MARCH 5

### NORTH EXPO

All Briefing Center sessions in the North Expo are 30 minutes long.

10:20 AM		<b>Kubernetes Deployments: How Not to Get Hacked</b> BC-T1N <i>Sol Cates, VP of Technology Strategy, CTO, Thales eSecurity Inc.</i>
11:00 AM		<b>Context-Wrapped Security: Driving Down Business Risk</b> BC-T2N <i>Colin McKinty, Cyber Strategy – Americas, BAE Systems</i>
11:40 AM		<b>Leverage the Latest Threat Intelligence to Stay Ahead of Cyberthreats</b> BC-T3N <i>Dmitriy Ayrapetov, Executive Director, Product Management, SonicWall</i>
12:20 PM		<b>Zero-Trust Privilege for the Modern Threatscape</b> BC-T4N <i>David McNeely, Chief Strategy Officer, Centrify</i>
1:00 PM		<b>Hunting the Hunters: Going Behind Enemy Lines</b> BC-T5N <i>Brian Hussey, VP, Cyber Threat Detection and Response, Trustwave</i>
1:40 PM		<b>Highlighting Security Blind Spots in the DevOps Butler</b> BC-T6N <i>Nimrod Stoler, Security Researcher, CyberArk</i>
2:20 PM		<b>Next-Gen Cloud Security Architectures for the Cloud-First Future</b> BC-T7N <i>Christopher Park, Chief Technical Implementation Officer, iboss</i>
3:00 PM		<b>The Five Stages of Security Change in the World of Converged IT/IoT/OT</b> BC-T8N <i>Ellen Sundra, VP, Systems Engineering, ForeScout</i>
3:40 PM		<b>Protecting Your Organizations' Very Attacked People</b> BC-T9N <i>Jennifer Cheng, Director, Product Marketing, Proofpoint</i>
4:20 PM		<b>Mind the Gap: Four Key Areas Where Infosec Expectations Fall Short of Reality</b> BC-T10N <i>Raymond Pompon, Principal Threat Research Evangelist, F5 Networks</i>
5:00 PM		<b>Authentication and Security at the Speed of Conversation</b> BC-T11N <i>Vijay Balasubramaniyan, CEO and Co-Founder, Pindrop</i>

# BRIEFING CENTER SCHEDULE

## SOUTH EXPO

All Briefing Center sessions in the South Expo are 20 minutes long.

10:40 AM		<b>An Intelligent Approach to Beating Global Cybersecurity Threats</b> BC-T15 <i>Laurent Gil, Security Evangelist, Oracle Cloud Infrastructure (OCI), Oracle</i>
11:10 AM		<b>Identity = Security</b> BC-T25 <i>Michael Kaczmarek, VP, Product and Solutions Marketing, Neustar</i>
11:40 AM		<b>Get Your Head Out of the Cloud. Zero Trust Access for Hybrid IT.</b> BC-T35 <i>Bryan Embrey, Sr. Product Marketing Manager, Pulse Secure</i>
12:10 PM		<b>In Nine Months, You Could Be Fined for a CCPA Violation. Want to Know Why?</b> BC-T45 <i>Nick Cavalancia, Founder and Chief Techvangelist, Netwrix</i>
12:40 PM		<b>Detect and Block Web App Attacks—Before They Strike Your Business</b> BC-T55 <i>Rusty Carter, VP, Product Management, Arxan Technologies</i>
1:10 PM		<b>The Scarlet Email: A Look at the Financial Underbelly of BEC Criminal Groups</b> BC-T65 <i>Josh Wilson, Field CTO, Agari</i>
1:40 PM		<b>Is DNS Part of Your Cybersecurity Strategy?</b> BC-T75 <i>Craig Sanderson, VP Product Management – Security, Infoblox</i>
2:10 PM		<b>Cloud Revolution—Digital Transformation and Disruption of Data Protection</b> BC-T85 <i>Gary Marsden, Senior Director, Encryption Products and Cloud Solutions, Gemalto</i>
2:40 PM		<b>Edge Computing: New Hope against Insider Threat?</b> BC-T95 <i>Hoke Smith, Director, Security and Analytics, Nuix</i>
3:10 PM		<b>Spartacus as a Service: Privacy, Obfuscation and the Right to Be Forgotten</b> BC-T105 <i>Mike Kiser, Strategist and Evangelist, Office of the CTO, SailPoint</i>
3:40 PM		<b>Attack Simulation: Exfiltrating Data from an Organization without Hacking It</b> BC-T115 <i>Clifford Vazquez, Director Enterprise Architect Capgemini's Cybersecurity Global Service Line, Capgemini</i>
4:10 PM		<b>Three Things Every Boardroom Wants to Know</b> BC-T125 <i>Jonathan Goldberger, VP and General Manager, Security Solutions, Unisys</i>
4:40 PM		<b>The Nightmare on Cyber-Hygiene Street</b> BC-T135 <i>Nicola Whiting, Chief Strategy Officer, Titania</i>

# BRIEFING CENTER SCHEDULE

## WEDNESDAY, MARCH 6

### NORTH EXPO

All Briefing Center sessions in the North Expo are 30 minutes long.

10:30 AM		<b>Building Effective Cyber-Defense Strategies against Privileged Attacks</b> BC-W1N <i>Tal Guest, Director of Product Management, BeyondTrust</i>
11:10 AM		<b>Preparing Your Organization for Security Orchestration and Automation</b> BC-W2N <i>Jadon Cruz Montero, Senior Product Manager, Rapid7</i>
12:00 PM		<b>Continuous Endpoint Monitoring at Scale for the Global Enterprise</b> BC-W3N <i>Anthony Di Bello, VP, Strategic Development, OpenText</i>
12:40 PM		<b>Creating a Modern AppSec Toolchain to Quantify Service Risks</b> BC-W4N <i>Tim Mackey, Senior Technology Evangelist, Synopsys</i>
1:20 PM		<b>One Person Can Change the World: The Story Behind GDPR</b> BC-W5N <i>Helge Husemann, Global Technical Evangelist, Malwarebytes</i>
2:00 PM		<b>A New Paradigm for Security</b> BC-W6N <i>Jason Garbis, VP, Products, Cyxtera</i>
2:40 PM		<b>Got Breached? Determining the Extent of Your Intrusion</b> BC-W7N <i>Tim Bandos, Vice President, Cybersecurity, Digital Guardian</i>
3:20 PM		<b>What a Cyberattack Looks Like When You're Watching Your Data</b> BC-W8N <i>Brian Vecci, Technical Evangelist, Varonis</i>
4:00 PM		<b>Red vs. Blue? Why Not Purple? Doing Good While Knowing Evil.</b> BC-W9N <i>David DeSanto, Director, Products and Threat Research, Spirent</i>

### SOUTH EXPO

All Briefing Center sessions in the South Expo are 20 minutes long.

10:40 AM		<b>The Art of Remediation</b> BC-W1S <i>Austin Murphy, Vice President, Managed Services, CrowdStrike</i>
11:10 AM		<b>There's No Intelligence in AI without Security Data Management</b> BC-W2S <i>Scott Mongeau, Cybersecurity Data Scientist, SAS Institute, Inc.</i>
11:40 AM		<b>Security for a Zero-Trust World</b> BC-W3S <i>Jay Bhansali, Product Marketing Engineer (Director), MobileIron</i>
12:10 PM		<b>Hybrid Security for Your Hybrid Enterprise</b> BC-W4S <i>Todd Peterson, IAM Evangelist, One Identity</i>
12:40 PM		<b>Simplicity: Access Management and the Future of Dynamic Authorization</b> BC-W5S <i>Eve Maler, VP of Innovation and Emerging Technology, ForgeRock</i>

# BRIEFING CENTER SCHEDULE

1:10 PM		<b>Secure Your Digital Crown Jewels with Micro-Segmentation</b> BC-W6S <i>Faraz Aladin, Head of Technical Product Marketing, Illumio</i>
1:40 PM		<b>Applied Prediction: Using Forecasts to Get Proactive about Security</b> BC-W7S <i>Ed Bellis, Chief Technology Officer, Kenna Security</i>
2:10 PM		<b>Seven Hells! We Need One Language to Communicate about IT Assets</b> BC-W8S <i>Alejando Lavie, Director, Strategy, Flexera</i>
2:40 PM		<b>Unhackable: Why Businesses Are Turning to Hardware-Enforced Cybersecurity</b> BC-W9S <i>Dennis Lanahan, Director of Sales, Owl Cyber Defense Solutions</i>
3:10 PM		<b>TLS Redirection: How to Make MitM on HTTPS Possible</b> BC-W10S <i>Aleksei Tiurin, Senior Security Researcher, Acunetix</i>
3:40 PM		<b>GDPR Security Post-Mortems: Lessons Learned from Facebook, Uber and Others</b> BC-W11S <i>Scott M. Giordano, Esq., VP, Data Protection, Spirion</i>
4:10 PM		<b>As Cyber Criminals Raise Their Game, So Should Security Awareness Programs</b> BC-W12S <i>Craig Kunitani, COO, Security Mentor; Marie White, CEO, Security Mentor</i>

## THURSDAY, MARCH 7

### NORTH EXPO

All Briefing Center sessions in the North Expo are 30 minutes long.

10:30 AM		<b>Don't Let the Lights Go Out: Inside the Mind of a Power Hacker</b> BC-R1N <i>Joseph Carson, Chief Security Scientist and Advisory CISO, Thycotic</i>
11:10 AM		<b>Identity Iceberg Ahead: Machine Identities and Their Need for Protection</b> BC-R2N <i>Michael Thelander, Director, Product Marketing, Venafi</i>
12:00 PM		<b>Managing Effective Security Policies in a Hybrid Enterprise Network</b> BC-R3N <i>Reuven Harrison, Chief Technology Officer, Tufin</i>
12:40 PM		<b>From Endpoint to Any Point: Defending the New Perimeter with Cloud Security</b> BC-R4N <i>Gill Langston, Senior Product Manager, Avast</i>

### SOUTH EXPO

All Briefing Center sessions in the South Expo are 20 minutes long.

10:30 AM		<b>Resolve and Evolve: Machine Learning for Email Threat Protection</b> BC-R1S <i>Dena Bauckman, CISSP, VP, Product Management, Zix</i>
----------	---	--

# EXHIBITING COMPANIES

## (ISC)<sup>2</sup>

S 164

(ISC)<sup>2</sup> is an international nonprofit membership association focused on inspiring a safe and secure cyber-world. Best known for the acclaimed Certified Information Systems Security Professional (CISSP®) certification, (ISC)<sup>2</sup> offers a portfolio of credentials that are part of a holistic, programmatic approach to security.  
[www.isc2.org](http://www.isc2.org)

## 1E, Inc. ★

S 3241

*Critical infrastructure, software code vulnerability analysis, risk management, risk & vulnerability assessment, patch management, infrastructure security, incident response, hackers & threats, governance risk & compliance, endpoint security*

It's never been more important to be able to properly manage your endpoints. Today, one breach could destroy your organization's reputation and cost millions of dollars. You need to ensure all your organization's software is patched and up-to-date, including the OS. 1E gives you unprecedented control and visibility over your entire IT estate, delivered at speed and at scale.  
[www.1E.com](http://www.1E.com)

## 1Password

S 2456

*Cloud security, security services, password management, network security, mobile security, managed security services, infrastructure security, hackers & threats, data security, critical infrastructure.*

The best way to keep you and your family, team and business safe online. Go ahead. Forget your passwords.  
<https://1password.com>

## 360ESG

S 1061

*BYOD, zero trust, threat intelligence, security analytics, endpoint security, cloud security, behavioral analytics, authentication, artificial intelligence/machine learning, SIEM*

360ESG is the leader in cybersecurity market in China. The mission is to protect the security of the era of big data, and data-driven security as the technological idea. It has created a new generation of collaborative defense systems that comprehensively cover big data security analysis, gateway, endpoint, web and mobile security products and solutions to over one million enterprise customers.

## 802 Secure, Inc. ★

S 2444

*Internet of Things, security intelligence, risk management, risk & vulnerability assessment, operational technology (OT Security), network security, intrusion prevention/detection, infrastructure security, hackers & threats, PII*

**NEW PRODUCT** 802 Secure is the leader in cyber-physical security, bridging the convergence gap between cyber and physical systems. AirShield protects companies from risks stemming from the growing number of IoT, IIoT and OT devices and networks. This wireless visibility and deep intelligence goes beyond the traditional network to remove network blindspots, prevent nefarious activities and mitigate data loss.  
[www.802Secure.com](http://www.802Secure.com)

## A10 Networks

S 1653

*Application security, threat intelligence, software defined networking, security intelligence, security architecture, network security, hackers & threats, firewalls, denial of service, cloud security*

A10 Networks (NYSE: ATEN) is a provider of intelligent and automated cybersecurity solutions, providing a portfolio of high-performance secure application solutions that enable intelligent automation with machine learning to ensure business critical applications are secure and always available.  
[www.a10networks.com](http://www.a10networks.com)

## AAEON

S 2355

*BYOD, network security, intrusion prevention/detection, firewalls, endpoint security, cryptography, cloud security, application security, access control, Internet of Things*

**NEW PRODUCT** Network appliances for SD-WAN, NFV, Firewall, UTM, VPN, load balancing, bandwidth management, Gateway security, WAN acceleration solutions. AAEON's team of experienced network engineers has helped dozens of companies deploy reliable network appliances around the globe based on state-of-the-art hardware platforms, unmatched service quality and long-term support.  
[www.aaeon.com](http://www.aaeon.com)

## AC Global Risk ★

S 3136

## Acalvio Technologies

N 4511

[www.acalvio.com](http://www.acalvio.com)

## Active Countermeasures ★

S 3116

*Internet of Things, threat management, security analytics, security & threat visualization, network security, intrusion prevention/detection, hackers & threats, endpoint security, behavioral analytics, artificial intelligence/machine learning*

Take the Fight to the Enemy with AI-Hunter™. Active Countermeasures offers AI-Hunter, a cybersecurity threat-hunting solution that identifies compromised hosts on a network and IoT devices regardless of the operating system or hardware. The simple-to-use interface is focused on enabling threat-hunting success for everyone from junior analyst to seasoned pros. Visit us at booth 3116 to learn more.  
[www.acm.re](http://www.acm.re)

## Acunetix

N 6552

*Application security, zero-day vulnerability, web services security, risk & vulnerability assessment, penetration testing, hackers & threats, governance risk & compliance, exploit of vulnerability, data security, cloud security*

Acunetix is an industry-leading solution used by many governments and Fortune 500 firms to identify flaws in web code. It automatically and comprehensively scans HTML5, JavaScript and single-page applications, audits complex, authenticated webapps and reports on a wide range of web vulnerabilities, including SQLi, XSS and out-of-band vulnerabilities.  
[www.acunetix.com](http://www.acunetix.com)

## Adaptiva

S 3238

*Endpoint security, zero day vulnerability, threat management, security operations, risk & vulnerability assessment, policy management, patch management, orchestration & automation, incident response, exploit of vulnerability*

Adaptiva is a leading global provider of endpoint management and security solutions. The company's peer-to-peer technology products empower enterprise IT teams to secure endpoints with unparalleled speed and at massive scale. Leading Fortune 1000 organizations, including T-Mobile, HSBC, Walgreens and the US Army, use Adaptiva products to automate countless endpoint management tasks.  
[www.adaptiva.com](http://www.adaptiva.com)

## Aewin Tech Inc. ★

N 4405

*Anti-malware, software defined networking, network security, identity management & governance, firewalls, data security, cloud security, big data analytics, artificial intelligence/machine learning, anti-spam*

**NEW PRODUCT** AEWIN was founded in 2000 and is headquartered in Taipei, Taiwan. With ISO-9001 and 14001 certified Intelligent PC ODM solution provider. AEWIN has developed the strong technical experience and ability to create a different platform in the network, server, embedded and gaming solution.  
[www.aewinusa.com](http://www.aewinusa.com)

# EXHIBITING COMPANIES

- Agari** **N 6459, S 1353**  
*Artificial intelligence/machine learning, zero day vulnerability, threat intelligence, social engineering, phishing, insider threats, incident response, identity theft, hackers & threats, cloud security*  
Agari is transforming the legacy Secure Email Gateway with its next-generation Secure Email Cloud™ powered by predictive AI. Leveraging data science and real-time intelligence from trillions of emails, the Agari Identity Graph™ detects, defends, and deters business email compromise, spear phishing and account takeover. Learn more at:  
[www.agari.com](http://www.agari.com)
- AIC** **S 1868**  
AIC is a leading provider of both standard OTS (off-the-shelf) and OEM/ODM server and storage solutions. With expert in-house design, manufacturing and validation capabilities, AIC's products are highly flexible and configurable to any form factor, standard or custom. AIC leads the industry with 20+ years of experience in mechanical, electronic and system-level engineering.  
[www.aicipc.com](http://www.aicipc.com)
- Akamai Technologies** **N 6153**  
*Access control, zero trust, zero-day vulnerability, malware, firewalls, exploit of vulnerability, denial of service, cloud security, botnets, application security*  
Akamai provides a global cloud platform to stop attacks at the edge before they reach your apps, infrastructure and people. We harness visibility into more traffic (1 trillion DNS requests, 1.3 billion devices and 100 million IP addresses daily) and more attacks (178 billion WAF rule triggers daily) to stay ahead of the latest DDoS and web application attacks, evolving automated threats, and advanced targeted threats—including responding to the latest zero-day vulnerabilities. Akamai's managed security services, backed by 24/7/365 security operations centers, give you the choice to offload security management, monitoring and threat mitigation to Akamai security experts.  
[www.akamai.com](http://www.akamai.com)
- Alert Logic** **S 265, S 1627**  
*Cloud security, threat management, threat intelligence, security services, security operations, security intelligence, security analytics, log management, hackers & threats, endpoint security*  
Alert Logic seamlessly connects an award-winning security platform, cutting-edge threat intelligence, and expert defenders—to provide security and peace of mind 24/7. More than 4,000 organizations rely on Alert Logic SIEMless™ Threat Management to provide the right level of security and compliance at a lower cost  
[www.alertlogic.com](http://www.alertlogic.com)
- AlgoSec** **S 2045**  
[www.algosec.com](http://www.algosec.com)
- Alibaba** **S 1365**  
*GDPR, security & threat visualization, network security, managed security services, infrastructure security, hackers & threats, exploit of vulnerability, data security, cloud security, big data analytics*  
<https://bit.ly/2FKORDd>
- AlienVault** **S 1235**  
*SIEM, threat intelligence, security analytics, orchestration & automation, network security, managed security services, incident response, hackers & threats, cloud security, artificial intelligence/machine learning*  
AT&T Cybersecurity's edge-to-edge technologies provide phenomenal threat intelligence, collaborative defense, security without the seams, and solutions that fit your business. Our unique, collaborative approach integrates best-of-breed technologies with unrivaled network visibility and actionable threat intelligence from Alien Labs researchers, Security Operations Center analysts, and machine learning—helping to enable our customers around the globe to anticipate and act on threats to protect their business.  
[www.alienvault.com](http://www.alienvault.com)
- Allegro Software** **N 4614**  
*Internet of Things, security architecture, operational technology (OT Security), network security, mobile security, key management, endpoint security, data security, cryptography*  
Secure Software for the Internet of Things. Allegro Software is a leading provider of embedded Internet software toolkits to OEMs worldwide. Field proven in 250,000,000+ devices, our solutions enable OEMs (medical, military, energy, more) to create connected secure devices using TLS, Suite B, FIPS 140-2 capabilities and more.  
[www.allegrosoft.com](http://www.allegrosoft.com)
- Alta Associates** **N 6474**  
*Cloud security, threat management, threat intelligence, security operations, security consulting, security architecture, risk management, risk & vulnerability assessment, identity management & governance, governance risk & compliance*  
Alta Associates is the most prominent boutique executive search firm specializing in information security, IT risk management, GRC and privacy. Alta is known for placing "C-level" executives and building the teams that support them. Alta has unique access to the women in our field through the EWF on Information Security, Risk Management and Privacy founded by Alta's CEO Joyce Brocaglia.  
[www.altaassociates.com](http://www.altaassociates.com)
- AMAX** **N 4618**  
*Application security, supply chain, security services, security operations, infrastructure security, critical infrastructure, cloud security, business continuity & disaster recovery, big data analytics, artificial intelligence/machine learning*  
Leveraging decades of engineering expertise, AMAX builds cutting-edge server appliances for today's leading security experts. With a strong focus on custom system design, rigorous quality testing and a global manufacturing and logistics footprint, AMAX provides fully scalable support for all your appliance needs. We are the hardware solution to your software innovation.  
[www.amax.com](http://www.amax.com)
- Amazon Web Services, Inc.** **S 1227**  
*DevSecOps, security & threat visualization, intrusion prevention/detection, infrastructure security, identity management & governance, data security, cryptography, cloud security, application security, access control*  
For over 12 years, Amazon Web Services has been the most comprehensive and broadly adopted cloud platform. AWS offers services for compute, storage, databases, networking, analytics, robotics, machine learning, AI, IoT, mobile, security, hybrid, virtual reality, application development and management. AWS services are trusted by customers to power infrastructure, make them agile and lower cost.  
<http://aws.amazon.com/security>

**Anitian Corporation** ★

S 3328

Cloud security, threat intelligence, security architecture, risk & vulnerability assessment, network security, managed security services, incident response, governance risk & compliance, endpoint security, data security

At Anitian, we believe security is a force for good. We fulfill our mission to make security and compliance easy with a complete suite of security solutions and services. Our flagship Sherlock Platform dramatically reduces the complexity and cost of security and compliance in the cloud. As the oldest information security firm in the nation, Anitian is honored to serve globally recognized brands.

[www.anitian.com](http://www.anitian.com)

**Anomali**

S 2033

Cloud security, zero-day vulnerability, threat management, threat intelligence, security intelligence, security awareness, network security, data security

Anomali detects adversaries and tells you who they are. Organizations rely on the Anomali Threat Platform to detect threats, understand the adversary and respond effectively. Anomali arms security teams with machine learning optimized threat intelligence and identifies hidden threats targeting their environments.

[www.anomali.com](http://www.anomali.com)

**Antiy Labs**

N 4131

Ransomware, threat intelligence, security services, security & threat visualization, network security, mobile security, malware, endpoint security, critical infrastructure, anti-malware

Antiy is a dynamic cybersecurity vendor that leads the development of threat detection and defense capability. Antiy has developed a series of products (including IEP, PTF, PTD, ACS, PTA and TDS), building the safety cornerstone of endpoint protection, boundary protection, flow monitoring, diversion capture, in-depth analysis and emergency handling for customers.

[www.antiy.cn](http://www.antiy.cn)

**APCON**

S 3404

Audit, security analytics, security & threat visualization, risk & vulnerability assessment, network security, hackers & threats, data security, cloud security, cloud access security brokers (CASB), big data analytics

For more than 25 years, APCON consistently delivers smart, stable and scalable technology solutions that provide unmatched confidence to organizations seeking total visibility and security of physical, private and public cloud networks. With customers around the world, APCON assures superior network monitoring while supporting traffic analysis and streamlined network management and security.

[www.apcon.com](http://www.apcon.com)

**Aporeto** ★

S 3126

DevSecOps, zero trust, web services security, virtualization, containerization & segmentation, network security, firewalls, cloud security, authentication, application security

Aporeto is a zero-trust security solution for microservices, containers and the cloud. The Aporeto platform protects cloud applications from attack by authenticating and authorizing all communications with a cryptographically signed identity assigned to every workload. A distributed homogenous security policy is enforced per workload independent of network or infrastructure configuration.

[www.aporeto.com](http://www.aporeto.com)

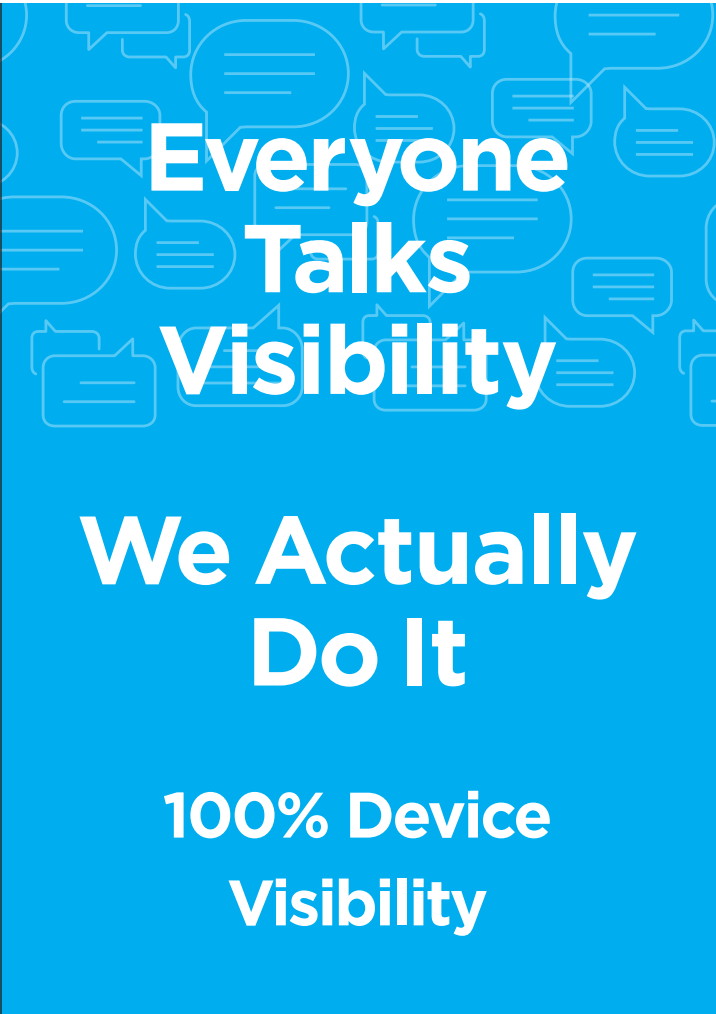

**AppGuard**

S 2467

Internet of Things, zero trust, zero day vulnerability, mobile security, malware, endpoint security, data security, data loss prevention, application security, Ransomware

**NEW PRODUCT** AppGuard delivers simple, effective zero trust endpoint solutions to the complex security challenges that threaten the interests of organizations as well as those of their customers. These endpoints range from personal computers to servers, smartphones, tablets to IoT devices. AppGuard solutions prevent endpoint compromise.

## BAE Systems

N 5877

*Artificial intelligence/machine learning, threat management, threat intelligence, security operations, security consulting, security analytics, managed security services, incident response, fraud, behavioral analytics*

We help nations, governments and businesses around the world defend themselves against cybercrime, reduce their risk in the connected world, comply with regulation and transform their operations. We do this using our unique set of solutions, systems, experience and processes—often collecting and analysing huge volumes of data. These, combined with our Cyber Special Forces—some of the most skilled people in the world, enable us to defend against cyberattacks, fraud and financial crime, enable intelligence-led policing and solve complex data problems. We employ over 4,000 people across 18 countries in the Americas, APAC, UK and EMEA.

## Baffle, Inc.

S 2067

*GDPR, insider threats, governance risk & compliance, encryption strategy & trends, data loss prevention, cryptography, application security*

Baffle prevents data breaches by securing the end-to-end data access model for applications and databases. With its patented technology, Baffle is the only company that can enable encryption of data at rest, in use, in memory and in the search index without impacting the app using AES encryption and enables secure data processing on a commercial app and database to guarantee data protection.

<http://baffle.io>

## Bandura Systems

S 3428

*Ransomware, threat intelligence, security intelligence, phishing, network security, intrusion prevention/detection, hackers & threats, firewalls, cloud security, botnets*

Our pioneering Bandura Threat Intelligence Gateway (Bandura TIG™), developed in part with the U.S. Department of Defense, blocks millions of known threats from entering and exiting company networks—serving as a first and last line of defense. The Bandura TIG reduces staff workload by automating manual workflows including threat feed management, firewall rule updates, and manual log analysis.

<http://bandurasystems.com>

## baramundi software ★

N 4117

*Application security, zero-day vulnerability, risk & vulnerability assessment, patch management, network security, mobile security, malware, infrastructure security, hackers & threats, endpoint security*

baramundi is a leading innovator in the field of unified endpoint management and provides companies and organizations with efficient, secure and cross-platform management of their workstation and mobile environments. Over 3,000 customers worldwide of all sizes and from every sector benefit from the German manufacturer's many years of experience and outstanding products.

[www.baramundi.com](http://www.baramundi.com)

## Bastille

### **Beyond Security** N 5459

*DevSecOps, zero-day vulnerability, software code vulnerability analysis, risk & vulnerability assessment, penetration testing, network security, exploit of vulnerability, data loss prevention, cloud security, application security*

Our network and application security testing solutions accurately assess and help resolve security weaknesses in networks, web applications and software. beSECURE—network and web app vulnerability assessment; beSTORM—dynamic software, application and equipment testing; beSOURCE—source code security testing.

[www.beyondsecurity.com](http://www.beyondsecurity.com)

### **BeyondTrust** N 6265

*Access control, threat management, policy management, password management, network security, insider threats, identity management & governance, governance risk & compliance, endpoint security, audit*

BeyondTrust is the worldwide leader in Privileged Access Management, offering the most seamless approach to preventing data breaches related to stolen credentials, misused privileges and compromised remote access. Our extensible platform empowers organizations to easily scale privilege security as threats evolve across endpoint, server, cloud, DevOps and network device environments. BeyondTrust gives organizations the visibility and control they need to reduce risk, achieve compliance objectives and boost operational performance. We are trusted by 20,000 customers, including half of the Fortune 100 and a global partner network. Learn more at:

[www.beyondtrust.com](http://www.beyondtrust.com)

### **BI.ZONE** S 2266

*Application security, threat intelligence, penetration testing, network security, mobile security, infrastructure security, incident response, forensics & e-discovery, endpoint security, data security*

Founded in 2016, BI.ZONE is disrupting the global cybersecurity industry with its visionary and innovative approach to protecting client's networks and assets. Headquartered in Moscow, the company currently employs 300 security experts, including experienced forensic criminalists, penetration testers, security solutions developers, load testing engineers and other highly qualified specialists.

[www.bi.zone](http://www.bi.zone)

### **Big Switch Networks** N 4610

*Application security, software defined networking, security intelligence, security architecture, security analytics, network security, managed security services, infrastructure security, data security, cloud security*

Big Switch is the Cloud-First Networking company, bringing public cloud-style networking and hybrid cloud consistency by providing data center switching, monitoring, visibility and security solutions for on-premises enterprise cloud, public cloud and multi-cloud environments, enabling organizations to increase operational efficiency and business agility, while reducing networking costs.

# EXHIBITING COMPANIES

## BigID, Inc.

S 3129

GDPR, risk management, privacy, governance risk & compliance, data security, data loss prevention, big data analytics, PII

Today, enterprises lack dedicated purpose built technology to help them track and govern their customer data at scale. By bringing data science to data privacy, BigID aims to give enterprises the ability to understand, safeguard and steward the most important asset organizations manage: their customer data. BigID was named "Most Innovative Startup" at the 2018 RSAC Innovation Sandbox contest.

[bigid.com](http://bigid.com)

## Binary Defense ★

S 3325

Binary Defense is your managed security partner—real people, detecting real threats, in real time. We manage every aspect of endpoint security to identify and isolate all endpoint threats. Experience advanced endpoint solutions that will predict, prevent, detect, deceive and respond to keep your company ahead of all next-generation attacks.

[www.binarydefense.com](http://www.binarydefense.com)

## BioCatch

N 5350

[www.biocatch.com](http://www.biocatch.com)

## Bitdefender

S 2051

Internet of Things, threat management, threat intelligence, patch management, network security, incident response, endpoint security, cloud security, anti-malware, Ransomware

Bitdefender is a global cybersecurity leader protecting over 500 million systems in more than 150 countries. Since 2001, Bitdefender innovation has consistently delivered award-winning security products and threat intelligence for the smart connected home, mobile users, modern businesses and their networks, devices, data centers and cloud infrastructure.

[www.bitdefender.com](http://www.bitdefender.com)

## Bitglass

N 4235

BYOD, zero-day vulnerability, data loss prevention, cloud security, cloud access security brokers (CASB), SSO

Bitglass the Next-Gen CASB company is based in Silicon Valley. The company's solutions deliver zero-day, agentless data and threat protection for any app, any device, anywhere. Bitglass is backed by Tier 1 investors and was founded in 2013 by industry veterans with a track record of innovation.

[www.bitglass.com](http://www.bitglass.com)

## BitSight Technologies

S 3434

Critical infrastructure, security intelligence, risk management, risk & vulnerability assessment, network security, infrastructure security, hackers & threats, governance risk & compliance, data security, cyber-insurance

**NEW PRODUCT** BitSight's Security Ratings Platform continuously analyzes vast amounts of external data on security issues and behaviors to help organizations manage third-party risk, underwrite cyber-insurance policies, benchmark performance, conduct M&A due diligence and assess aggregate risk.

[www.bitsight.com](http://www.bitsight.com)

## Bloombase

N 5365

GDPR, virtualization, containerization & segmentation, infrastructure security, governance risk & compliance, encryption strategy & trends, data loss prevention, data lakes, cryptography, cloud security, artificial intelligence/machine learning

**NEW PRODUCT** Bloombase is the Intelligent Storage Firewall company providing turnkey, agentless, nondisruptive, application-transparent data-at-rest encryption security from physical and virtual data centers, through hyperconverged infrastructure, to the cloud, enabling organizations to lock down their crown jewels, mitigate data exfiltration threats, and help meet regulatory compliance requirements easily and cost-effectively.

[www.bloombase.com](http://www.bloombase.com)

## Blue Hexagon ★

N 4204

intrusion prevention/detection, threat management, threat intelligence, network security, malware

Blue Hexagon is an advanced deep learning company focused on protecting organizations from cyberattacks. Our real-time Deep Learning Platform uses a proprietary architecture of artificial neural networks to detect known and unknown network and email threats in subseconds.

Headquartered in Sunnyvale, CA, we are backed by Benchmark & Altimeter Capital. Follow us @bluehexagonai and:

[www.bluehexagon.ai](http://www.bluehexagon.ai)

## Blueliv

S 2345

Botnets, threat management, threat intelligence, security operations, security intelligence, risk management, risk & vulnerability assessment, phishing, malware, hackers & threats

Blueliv is an award-winning cyberthreat intelligence provider from Barcelona, Spain. We scour the open, deep and dark web to deliver fresh, automated and actionable threat intelligence to organizations, backed up by a world-class analyst team. We collaborate with cybersecurity teams of all sizes, accelerating security and business performance with our modular, pay-as-you-need solutions.

[www.blueliv.com](http://www.blueliv.com)

## Boldon James

S 246

BYOD, security awareness, insider threats, government regulations, governance risk & compliance, data security, data loss prevention, cloud security, PII, GDPR

Boldon James is an industry specialist, delivering globally recognized innovation, service excellence and technology solutions that work. Part of the QinetiQ group, a major UK plc and FTSE 250 company, we integrate with powerful data security and governance ecosystems to enable customers to effectively manage data, streamline operations and proactively respond to regulatory change.

[www.boldonjames.com](http://www.boldonjames.com)

## Bricata

N 4139

Bricata provides comprehensive network protection through unparalleled network visibility, full-spectrum threat detection, true threat hunting and post-detection actions in a single, self-managing system. Its automated detection and workflow-driven GUIs make it easy-to-use, while its fine-grained controls, extensive metadata and SmartPCAPs give experts the power they demand.

[www.bricata.com](http://www.bricata.com)

## Brivo ★

S 3204

Access control, security operations, security intelligence, physical security, mobile security, log management, identity management & governance, cloud security, biometrics, authentication

Brivo is the original innovator of cloud-based physical security solutions for commercial buildings. Currently serving over 10M users, Brivo offers a unified security platform including access control, mobile credentials, video surveillance, identity federation, visitor management and elevator control through a subscription-based service that is reliable, scalable, cyber-hardened technology.

[www.brivo.com](http://www.brivo.com)

## BSI Group ★

N 6472

BSI is a leading provider of business improvement solutions. Comprised of management system certifications, compliance software, training programs, advisory services and supply chain solutions, BSI helps organizations manage risk, performance and sustainability activities that transform best practice into habits of excellence.

# EXHIBITING COMPANIES

## **BUFFERZONE**

**N 4301**

*Anti-malware, zero trust, virtualization, containerization & segmentation, malware, intrusion prevention/detection, endpoint security*

BUFFERZONE is an exciting concept of security, allowing users to do more without risking their business. It is a virtual container operating on real and virtual desktops. BUFFERZONE protects against all malicious exploits. The advantage of this is clear: When malware strikes, no matter how new it is and what evasion techniques it implements—it cannot cause any damage to the organizational.  
[www.bufferzonesecurity.com](http://www.bufferzonesecurity.com)

## **C2SEC** ★

**N 6572**

*Artificial intelligence/machine learning, supply chain, security awareness, security analytics, risk management, risk & vulnerability assessment, governance risk & compliance, cyber-insurance, cloud security, big data analytics*

C2SEC provides an innovative analytics (SaaS) platform that assesses and quantifies the cyber-risks in financial terms for all-sized enterprises and cyber-insurance industry as well, based on combining patented big data, AI and cybersecurity technologies. We make the cyber-risk assessment as simple as the online search. For more details, please visit [www.c2sec.com](http://www.c2sec.com) or email to [info@c2sec.com](mailto:info@c2sec.com).  
[www.c2sec.com](http://www.c2sec.com)

## **Capgemini**

**N 6365**

*GDPR, threat intelligence, security services, security operations, managed security services, identity management & governance, endpoint security, consulting & professional services, cloud security, Internet of Things*

A global leader in consulting, technology services and digital transformation, Capgemini is at the forefront of innovation to address the entire breadth of clients' opportunities in the evolving digital world. We offer a complete range of cybersecurity services to guide and secure the digital transformation of companies and administrations. We help clients transforming security into a source of strength, value and competitive advantage.  
[www.capgemini.com](http://www.capgemini.com)

## **Carbon Black**

**N 5663**

*Cloud security, security awareness, hackers & threats, endpoint security*

Carbon Black is a leading provider of next-generation endpoint security. Leveraging its big data and analytics cloud platform—the CB Predictive Security Cloud—Carbon Black consolidates prevention, detection, response, threat-hunting and managed services into a single platform, making it easier for organizations to consolidate security stacks and achieve better protection. Carbon Black has pioneered multiple endpoint security categories, including application control, endpoint detection and response (EDR), and next-generation antivirus (NGAV) enabling customers to defend against the most advanced threats. More than 4,600 global customers, including 34 of the Fortune 100, trust Carbon Black to keep their organizations safe.

## CASwell Americas, Inc. ★ N 2461

*Internet of Things, software defined networking, security operations, security architecture, orchestration & automation, network security, infrastructure security, firewalls, cloud security*

**NEW PRODUCT** CASwell, Inc. was founded in 2007 to create dynamic system solutions for embedded applications. While CASwell is a young company, it became part of the Ennoconn and Foxconn Groups in 2014 and has proved to deliver with advanced technology, professional service and superior design and manufacturing capability by offering a great portfolio of network devices for NFV, SD-WAN and similar solutions.  
[www.cas-well.com](http://www.cas-well.com)

## Cavirin N 4210

*DevSecOps, risk & vulnerability assessment, governance risk & compliance, cyber-insurance, cloud security, artificial intelligence/machine learning, GDPR*

Cavirin is a global provider of risk, cybersecurity and compliance posture intelligence for the enterprise hybrid cloud. Cavirin is the only organization that delivers machine learning driven CyberPosture intelligence for the hybrid cloud by providing real-time risk and cybersecurity posture management and continuous compliance, while further integrating security into DevOps.  
[www.cavirin.com](http://www.cavirin.com)

## CDW N 4126

CDW is a leading multibrand technology solutions provider to business, government, education and healthcare organizations in the United States, Canada and the United Kingdom. A Fortune 500 company with multinational capabilities, CDW was founded in 1984 and employs more than 8,600 coworkers. For more information about CDW, please visit:  
[www.cdw.com](http://www.cdw.com)

## Centrify N 6445

*DevSecOps, zero trust, password management, insider threats, infrastructure security, identity management & governance, behavioral analytics, artificial intelligence/machine learning, access control*

Centrify is redefining the legacy approach to privileged access management by delivering cloud-ready Zero Trust Privilege to secure modern enterprise use cases. Centrify Zero Trust Privilege helps customers grant least privilege access based on verifying who is requesting access, the context of the request and the risk of the access environment. By implementing least privilege access, Centrify minimizes the attack surface, improves audit and compliance visibility, and reduces risk, complexity and costs for the modern, hybrid enterprise. Over half of the Fortune 100, all trust Centrify to stop the leading cause of breaches—privileged credential abuse.  
[www.centrify.com](http://www.centrify.com)

## CenturyLink S 1927

*Artificial intelligence/machine learning, threat management, security analytics, orchestration & automation, network security, managed security services, log management, denial of service, cloud security, botnets*

The more you see, the more you can stop. CenturyLink's expansive global network delivers the threat visibility and cloud-based security you need to protect critical business data and applications. We are transforming the network into a threat sensor and active defense platform to prevent, detect and block threats before they become business impacting events. Visit CenturyLink, South Expo booth S 1927.

[www.centurylink.com/business.html](http://www.centurylink.com/business.html)

## CERT Division at Software Engineering Institute, Carnegie Mellon University S 2227

*DevSecOps, software code vulnerability analysis, secure coding, risk management, insider threats, governance risk & compliance, forensics & e-discovery, critical infrastructure, business continuity & disaster recovery, artificial intelligence/machine learning*

CERT® helps ensure that appropriate technology and systems management practices are used to resist attacks on networked systems, limit damage and ensure continuity of critical services in spite of attacks. The CERT Division and the CERT Coordination Center has built partnerships worldwide to increase internet security awareness, responsiveness and education/training.  
[www.sei.cmu.edu](http://www.sei.cmu.edu)

## Check Point Software Technologies Ltd. N 4519, N 6079

*Ransomware, network security, mobile security, intrusion prevention/detection, infrastructure security, endpoint security, data security, data loss prevention, cloud security, anti-malware*

Check Point Software Technologies Ltd. ([www.checkpoint.com](http://www.checkpoint.com)) is a leading provider of cybersecurity solutions to corporate enterprises and governments globally. Its solutions protect customers from fifth-generation cyberattacks with an industry-leading catch rate of malware, ransomware and other targeted attacks. Check Point offers a multilevel security architecture with our new Gen V advanced threat prevention that protects all networks, cloud and mobile operations of a business against all known attacks combined with the industry's most comprehensive and intuitive single point of control management system. Check Point protects over 100,000 organizations of all sizes.  
[www.checkpoint.com](http://www.checkpoint.com)

## Checkmarx S 1453

*DevSecOps, software code vulnerability analysis, secure coding, risk & vulnerability assessment, application security*

Checkmarx is the Software Exposure Platform for the enterprise. 1,400+ organizations rely on Checkmarx to manage software security risk at the speed of DevOps. Checkmarx serves five of the world's top 10 software vendors, four of the top American banks, and many government organizations and Fortune 500 enterprises. Visit:  
[www.checkmarx.com](http://www.checkmarx.com)

## Chronicle ★ S 2251

*Artificial intelligence/machine learning, threat intelligence, security intelligence, security awareness, security & threat visualization, malware, incident response, hackers & threats, cloud security, big data analytics*

Chronicle was born in 2016 as a project within X, Alphabet's moonshot factory. We aim to give enterprises, and the people within them, tools to win the fight against cybercrime. Our cybersecurity intelligence platform can help organizations better manage and understand their own data, provide greater insights into areas of likely vulnerability, and give security teams time to protect themselves.  
<http://chronicle.security>

## CipherCloud N 4503

CipherCloud, a leader in cloud security, provides end-to-end protection for data resident in the cloud. Our cloud access security broker (CASB+) delivers comprehensive visibility, data security, threat protection and compliance for cloud-based assets.  
[www.ciphercloud.com](http://www.ciphercloud.com)

# EXHIBITING COMPANIES

## Circadence ★

N 6583

Artificial intelligence/machine learning, security & threat visualization, penetration testing, hackers & threats

Circadence® is a leader in next-generation cybersecurity education and training. Circadence provides a fully immersive, AI-powered cybersecurity training and assessment platform for government and enterprise organizations. Circadence's solutions modernize cybersecurity training with an advanced online gaming platform that delivers persistent, immersive and real-to-life experiences.

[www.circadence.com](http://www.circadence.com)

## Cisco Systems

N 6045

Ransomware, threat intelligence, intrusion prevention/detection, incident response, hackers & threats, firewalls, endpoint security, cloud security, big data analytics, access control

Cisco (NASDAQ: CSCO) is the worldwide technology leader that has been making the Internet work since 1984. Our people, products and partners help society securely connect and seize tomorrow's digital opportunity today. Cisco integrates security across the network, endpoint, cloud, Internet and email for a more effective security posture that sees a threat once and protects against it everywhere. With a portfolio of products designed to fit and work together we keep organizations safer, respond faster and deliver automation for a force multiplier effect for IT teams so IT resources go farther. The Talos Group, Cisco's elite Threat Intelligence and Research Group, detects and correlates threats in real time using the world's largest threat detection network, protecting against known and emerging cybersecurity threats to better protect the Internet.

[www.cisco.com/go/security](http://www.cisco.com/go/security)

## Cisco Umbrella

S 1027

Ransomware, threat intelligence, security intelligence, policy management, managed security services, incident response, endpoint security, cloud security, cloud access security brokers (CASB), anti-malware

Cisco Umbrella is a cloud security platform that provides the first line of defense against threats on the Internet wherever users go. And because it's built into the foundation of the Internet and delivered from the cloud, Umbrella is the simplest security product to deploy and delivers powerful, effective protection.

<https://umbrella.cisco.com>

## Citrix

S 961

Citrix aims to power a world where people, organizations and things are securely connected and accessible to make the extraordinary possible. We help customers reimagine the future of work by providing the most comprehensive secure digital workspace that unifies the apps, data and services people need to be productive, and simplifies IT's ability to adopt and manage complex cloud environments.

## Comodo Cybersecurity

S 1727

SIEM, threat intelligence, orchestration & automation, managed security services, endpoint security, cloud security, artificial intelligence/machine learning, application security, anti-spam, anti-malware

**NEW PRODUCT** Where preventing all cyberattacks is impossible, Comodo Cybersecurity delivers innovative solutions to protect organizations on endpoints and LANs, across the web and cloud. Comodo secures customer systems and data against all types of threats, including zero-day attacks. For over 20 years Comodo spans 193 countries, protects 100 million endpoints and serves 200,000 customers and businesses worldwide.

[www.enterprise.comodo.com/partners](http://www.enterprise.comodo.com/partners)

## CompTIA

S 3206

Cryptography, security operations, security architecture, security analytics, risk management, risk & vulnerability assessment, penetration testing, network security, incident response, exploit of vulnerability

**NEW PRODUCT** CompTIA is the world's leading not-for-profit technology association. CompTIA provides networking, education, thought leadership, certifications and is an advocate for technology companies and IT professionals. CompTIA's programs foster workforce skills development and generate critical knowledge and insight—building the foundation for technology's future.

[www.comptia.org](http://www.comptia.org)

## Contrast Security

N 6578

DevSecOps, cloud security, application security

Contrast Security enables applications to automatically detect and fix vulnerabilities, identify attacks, and defend themselves. Contrast employs security instrumentation to strengthen applications before they deploy, protect in production and provide visibility throughout the application lifecycle. More information can be found at:

[www.contrastsecurity.com](http://www.contrastsecurity.com)

## Corelight

N 4308

Network security, threat intelligence

Corelight is the most powerful network visibility solution that helps information security professionals better understand their network traffic and detect and stop cyber attacks. The Corelight Sensor appliance provides organizations with an easy-to-deploy, enterprise-grade version of Zeek (formerly Bro), the powerful open source framework that generates rich, real-time logs of all network traffic.

[www.corelight.com](http://www.corelight.com)

## Corero Network Security

S 1853

Cyberterrorism, network security, managed security services, hackers & threats, denial of service

Corero Network Security is a leader in real-time, high-performance DDoS defense solutions. Organizations rely on Corero's award-winning technology to eliminate the DDoS threat through automatic detection and mitigation, coupled with complete network visibility, analytics and reporting. This industry-leading technology provides cost-effective and scalable protection against DDoS attacks.

S 147

[www.coro.net](http://www.coro.net)

## Corsa ★

S 2454

Cloud security, threat intelligence, software defined networking, security operations, security architecture, security analytics, network security, intrusion prevention/detection, infrastructure security, encryption strategy & trends

Corsa is the leading provider of security service load balancers for service chaining physical and virtual network security functions. This lets networks scale their inspection to 100 percent traffic visibility without impacting network throughput performance. Even with SSL/TLS encrypted traffic, Corsa platforms work with existing security functions to give security architects 100 percent traffic inspection.

[www.corsa.com](http://www.corsa.com)

## CoSoSys

N 5477

GDPR, privacy, legislation, insider threats, government regulations, governance risk & compliance, endpoint security, data loss prevention, audit, access control

Endpoint Protector is an advanced all-in-one data loss prevention solution for Windows, macOS and Linux, that puts an end to data leaks and data theft and offers seamless control of portable storage devices. Its content filtering capabilities for data at rest and in motion range from file type to predefined content based on dictionaries, regular expressions or regulations such as GDPR, HIPAA, etc.

## CounterCraft

S 3342

Data loss prevention, threat management, threat intelligence, security intelligence, network security, intrusion prevention/detection, insider threats, incident response, hackers & threats, deception-based security

**NEW PRODUCT** CounterCraft empowers organizations to strengthen their security posture more efficiently. The Cyber Deception Platform facilitates threat hunting and early threat detection, accelerates incident response, and significantly reduces security spend. Our award-winning solution provides detailed insights in to lateral movements and enables users to understand their adversaries' motivations and mindset.

[www.countercraft.eu](http://www.countercraft.eu)

## cPacket Networks

S 3210

Cloud security, software defined networking, security architecture, security analytics, orchestration & automation, network security, incident response, firewalls, critical infrastructure

**NEW PRODUCT** cPacket's network packet brokering solution for security tools, is network visibility you can trust. Only cPacket inspects, filters and reports on all the packets delivering reliable real-time data to security tools without packet drops. cPacket delivers the relevant data to security tools with guaranteed performance, reducing tool overload and cost, helping decrease time to threat identification.

[www.cpacket.com](http://www.cpacket.com)

## Cradlepoint

N 4319

Internet of Things, software defined networking, network security, managed security services

**NEW PRODUCT** Cradlepoint is the global leader in software-defined 4G LTE network solutions for always-on connectivity for people, places, and things—anywhere. Cradlepoint's cloud-based platform combines software-defined networking and radio technologies with virtualized services to deliver 4G LTE and overlay networks that are secure, end-to-end, agile to deploy, and ultra-reliable.

[www.cradlepoint.com](http://www.cradlepoint.com)

## Crossmatch (part of HID Global)

N 5461

SSO, password management, insider threats, identity theft, identity management & governance, fraud, biometrics, behavioral analytics, authentication, access control

Crossmatch helps organizations solve identity management challenges through advanced authentication solutions. DigitalPersona provides the broadest set of risk-based authentication options allowing IT administrators to create the right security posture for each user, each application and each device.

[www.crossmatch.com](http://www.crossmatch.com)

## CrowdStrike

N 5458, S 1435

Artificial intelligence/machine learning, threat intelligence, security services, security intelligence, mobile security, incident response, endpoint security, consulting & professional services, cloud security, behavioral analytics

CrowdStrike is the leader in cloud-delivered endpoint protection. Leveraging artificial intelligence, the CrowdStrike Falcon® platform offers instant visibility and protection across the enterprise and prevents attacks on endpoints on or off the network. It seamlessly unifies next-gen AV with best-in-class endpoint detection and response, backed by 24/7 managed hunting. Powered by the CrowdStrike Threat Graph™, Falcon instantly correlates over one trillion security events per week from across the globe to immediately prevent and detect threats.

## CSPI

N 6480

*DevSecOps, network security, government regulations, governance risk & compliance, data security, data loss prevention, cryptography, application security, PII, GDPR*

Organizations trust CSPI to secure critical assets from breach. Our award-winning ARIA SDS solution works on-prem and in the cloud to protect PII data—no matter how it's accessed or used. ARIA secures DevOps applications and provides visibility into all network traffic to automatically verify and stop threats, while applying infosec policies to increase security posture. Visit:

[www.cspi.com/security](http://www.cspi.com/security)

## CyberArk

N 6253

*DevSecOps, security operations, password management, insider threats, endpoint security, cloud security, authentication, audit, application security, access control*

CyberArk, the #1 provider of privileged access security, provides a critical layer of IT security to protect data, infrastructure and assets across the enterprise, in the cloud and throughout the DevOps pipeline. CyberArk delivers the most complete solution to reduce risk created by privileged credentials and secrets. The company is trusted by the world's leading organizations, including more than 50 percent of the Fortune 100, to protect against external attackers and malicious insiders, and address audit and compliance requirements. CyberArk is the only public company 100 percent focused on privileged-access security, delivering innovative solutions to stay one step ahead of attackers.

[www.cyberark.com](http://www.cyberark.com)

## Cyberbit

S 449

*Critical infrastructure, security operations, risk management, risk & vulnerability assessment, professional development & workforce, orchestration & automation, operational technology (OT Security), infrastructure security, incident response, endpoint security*

A world-leading provider of cyber-ranges for cybersecurity training and simulation. Cyberbit offers a unique platform provides consolidated detection and response protecting an organization's entire attack surface across IT, OT and IoT networks. Cyberbit's investors include Elbit Systems (NASDAQ: ESLT) and Claridge Israel with offices in Israel, US, Europe and Asia.

[www.cyberbit.com](http://www.cyberbit.com)

## Cybereason

S 327

*Ransomware, security services, malware, incident response, endpoint security, data lakes, behavioral analytics, artificial intelligence/machine learning, anti-malware*

Cybereason, creators of the leading AI threat-hunting platform, gives the advantage back to the defender through a completely new approach to cybersecurity. Cybereason offers endpoint detection and response (EDR), next-generation antivirus (NGAV) and active monitoring services, all powered by its proprietary data analytics platform.

[www.cybereason.com](http://www.cybereason.com)

## CyberGRX

S 3424

*Data security, supply chain, risk management, risk & vulnerability assessment, hackers & threats*

CyberGRX provides organizations and their third parties with the most cost-effective and scalable approach to third-party cyber-risk management today. Built on the market's first global cyber-risk exchange, CyberGRX arms organizations with a dynamic stream of third-party data and advanced analytics so they can efficiently and collaboratively manage risk in their shared ecosystems.

[www.cybergrx.com](http://www.cybergrx.com)

## Cyberinc ★

S 2362

*Ransomware, zero trust, zero day vulnerability, web services security, phishing, malware, endpoint security, anti-malware*

Cyberinc helps you experience a safer internet by proactively stopping web, email, and document-based threats. Cyberinc's Isla platform uses cutting-edge isolation technology to neutralize threats and prevent them before they have a chance to act, simplifying the security strategy and delivering immediate protection. Cyberinc is trusted by businesses of all sizes and governments around the world.

[www.cyberinc.com](http://www.cyberinc.com)

## CyberInt

S 355

*SIEM, threat intelligence, security services, penetration testing, managed security services, insider threats, incident response, hackers & threats, fraud, forensics & e-discovery*

CyberInt provides managed detection and response services to digital businesses in retail, gaming and financial industries. Leveraging Argos™ Digital Risk Protection Platform, a global cyber-analyst team, managed SOC, threat hunting, deep investigations, real-time incident response and cyber readiness assessments, CyberInt provides holistic end-to-end protection to digital enterprises.

[www.cyberint.com](http://www.cyberint.com)

## CyberVista

S 3205

*Governance risk & compliance, professional development & workforce*

CyberVista provides cybersecurity training, education and workforce development. With a mission is to arm organizations and individuals with the knowledge and skills they need to defend against ever-evolving cyberthreats, we offer cybersecurity training for the boardroom, the SOC and everywhere in between.

[www.cybervista.net](http://www.cybervista.net)

## Cyigna Labs Corp

S 3329;

*GDPR, identity management & governance, governance risk & compliance, cloud security, audit*

Cyigna Labs is a leading provider of compliance solutions that grant unparalleled visibility across Microsoft-hybrid IT infrastructures. Built from the ground up to protect data regardless of its location, Cyigna Auditor delivers insight into user behavior, system configuration and data sensitivity. For more information, visit:

## DivvyCloud Corporation ★

N 4207

*DevSecOps, risk management, risk & vulnerability assessment, policy management, orchestration & automation, infrastructure security, governance risk & compliance, exploit of vulnerability, cloud security, GDPR*

DivvyCloud minimizes security and compliance risk by providing virtual guardrails for security, compliance, and governance to customers like General Electric, Discovery Communications and Fannie Mae who embrace the dynamic, self-service nature of public cloud and container infrastructure (AWS, Azure, GCP, Alibaba and Kubernetes).

[www.divvycloud.com](http://www.divvycloud.com)

## DNIF

N 4300

*SIEM, security operations, security analytics, orchestration & automation, insider threats, incident response, governance risk & compliance, data lakes, big data analytics, artificial intelligence/machine learning*

DNIF is a first of its kind next gen SIEM with advanced security analytics and response automation that's built on big data analytics platform for real-time threat detection and response. It provides SOAR, UEBA, security analytics, threat hunting and security data lake solutions on a single platform to bring in process efficiency, better manageability and reduced risks.

[www.dnif.it](http://www.dnif.it)

## DomainTools

S 127

*Artificial intelligence/machine learning, threat intelligence, phishing, orchestration & automation, network security, incident response, fraud*

DomainTools helps security analysts turn threat data into threat intelligence. We take indicators from your network and connect them with nearly every active domain on the Internet. Fortune 1000 companies, global government agencies, and leading security solution vendors use the DomainTools platform as a critical ingredient in their threat investigation and mitigation work.

[www.domaintools.com](http://www.domaintools.com)

## Duo Security

S 1835

*BYOD, zero trust, network security, mobile security, endpoint security, data security, cloud security, authentication, application security, access control*

Duo Security, now part of Cisco, is the leading provider of Trusted Access security and multi-factor authentication. Duo is a trusted partner to more than 14,000 customers globally, including Dresser-Rand, Etsy, Facebook, Paramount Pictures, Random House, Zillow and more. # EXHIBITING COMPANIES

## Fidelis Cybersecurity

S 1441

*Data loss prevention, threat management, security operations, network security, managed security services, incident response, hackers & threats, endpoint security, deception-based security, data security*

Fidelis Cybersecurity is a leading provider of threat detection, hunting and response solutions. We combat cybercrime, data theft and espionage by providing full visibility across hybrid cloud/on-prem environments, automating threat and data theft detection, empowering threat hunting and optimizing incident response with context, speed and accuracy.

Visit us at:

[www.fidelissecurity.com](http://www.fidelissecurity.com)

## FIDO Alliance, Inc.

S 3319

The 250+ member, cross-industry FIDO Alliance provides specifications and certifications to enable an interoperable ecosystem of on-device authenticators that can be used for simpler, stronger authentication to many compliant mobile apps and websites.

<https://fidoalliance.org/about/overview>

## FireEye

N 5959

*SIEM, threat intelligence, network security, managed security services, incident response, endpoint security, data security, consulting & professional services, cloud security*

FireEye is the only cyber security company that combines the automation of world-class technology with the power of unparalleled frontline human expertise, including industry-recognized services and nation-state grade threat intelligence. We put it all at your fingertips in a unified security operations platform that integrates and analyzes data from your security assets in order to give you real answers about the threats that matter. Best of all, you are not alone. Our experts can function as an extension of your security team—on a click, by phone, or in your corner when you need them most.

[www.fireeye.com](http://www.fireeye.com)

## FireMon

S 443

*Access control, security architecture, security analytics, security & threat visualization, risk & vulnerability assessment, policy management, orchestration & automation, network security, firewalls, cloud security*

FireMon delivers continuous security for hybrid enterprises through a fusion of vulnerability management, continuous compliance and orchestration. Since creating the first-ever network security management solution 15 years ago, FireMon solutions have delivered visibility into and control over complex network security infrastructure, policies and risk for more than 1,500 customers worldwide.

Implement Security Changes  
in Minutes Instead of Days

Reduce Complexity of Managing  
Hybrid and Fragmented  
Networks

Ensure Continuous Compliance  
with Security Standards

Visit Tufin at booth N 5777 to learn how more than 2,000 enterprises achieve business agility with continuous compliance using an automated, policy-driven approach to security.

# EXHIBITING COMPANIES

## Flowmon Networks

S 154

*Behavioral analytics, threat management, security operations, security analytics, security & threat visualization, network security, insider threats, infrastructure security, denial of service, cloud security*

Flowmon Networks empowers businesses to manage and secure their computer networks confidently. Through our high performance network monitoring technology and lean-forward behavior analytics, IT pros worldwide benefit from absolute network traffic visibility to enhance network and application performance and deal with modern cyberthreats.

[www.flowmon.com](http://www.flowmon.com)

## Fluency Corp.

N 4529

*GDPR, threat intelligence, security analytics, risk & vulnerability assessment, privacy, orchestration & automation, cloud security, behavioral analytics, artificial intelligence/machine learning, PII*

Fluency is an advanced central log management and analytics cloud solution that meets privacy and compliance requirements delivering unmatched speed, scalability, data retention and storage capacity not available through SIEMs. Fluency's patented database, correlation and risk scoring technology is the only fully industry compliant offering that achieves privacy regulations through our pseudonym model.

<https://fluencysecurity.com>

## Forcepoint

N 5969

*GDPR, security analytics, network security, insider threats, firewalls, data security, data loss prevention, critical infrastructure, cloud security, behavioral analytics*

Forcepoint is transforming cybersecurity by focusing on what matters most—people's behavior as they interact with critical data and systems. This human-centric approach frees employees to innovate by understanding the normal rhythm of user behavior and the flow of data in and out of an organization and only enforces security policies when elevated risk is detected at an individual level. Forcepoint's behavior-based solutions provide risk-adaptive security to protect network users and cloud access, prevent confidential data from leaving the corporate network, and eliminate breaches caused by insiders. Based in Austin, Texas, Forcepoint helps secure thousands of enterprise and government customers in more than 150 countries.

[www.forcepoint.com](http://www.forcepoint.com)

## ForceShield

N 4114

*Internet of Things, zero-day vulnerability, threat management, intrusion prevention/detection, hackers & threats, fraud, denial of service, cloud security, botnets, application security*

**NEW PRODUCT** The dynamic application guardian for web/mobile and IoT. The traditional signature-based security technologies were failing in the face of evermore frequent and sophisticated automated attacks. ForceShield developed new bot management technology—Dynamic Transformation—that shifted the security approach from reactive to proactive protection while increasing complexity and cost for attackers.

[www.forceshield.com](http://www.forceshield.com)

## ForeScout

N 5983

ForeScout Technologies is transforming security through visibility, providing Global 2000 enterprises and government agencies with agentless visibility and control of traditional endpoints, IoT devices and operational technologies the instant they connect to the network. Our technology continuously assesses, remediates and monitors devices and works with disparate security tools to help accelerate incident response, break down silos, automate work flows and optimize existing investments. As of March 31, 2018, more than 2,800 customers in over 80 countries improve their network security and compliance posture with ForeScout solutions. See devices. Control them. Orchestrate system-wide threat response. Learn how at:

[www.forescout.com](http://www.forescout.com)

## ForgeRock

N 5576

*DevSecOps, privacy, password management, identity management & governance, authentication, access control, SSO, Internet of Things, GDPR*

ForgeRock® is the Digital Identity Management company transforming the way organizations build trust and securely interact with customers, employees, devices and things. Organizations adopt ForgeRock to monetize customer relationships, address stringent regulations for privacy and consent (GDPR, HIPAA, open banking, etc.), and leverage the IoT. We serve hundreds of brands, including Morningstar, Vodafone, GEICO and Toyota, and governments worldwide. Follow us at @ForgeRock and:

[www.forgerock.com](http://www.forgerock.com)

## Fortanix

N 4518

*Application security, virtualization, containerization & segmentation, policy management, operational technology (OT Security), key management, governance risk & compliance, data security, cryptography, cloud security, blockchain & distributed ledger*

**NEW PRODUCT** Fortanix, the Runtime Encryption® company, introduced the first commercial solutions utilizing Intel SGX. RTE: The industry's first data-in-use encryption solution, running both as a cloud service (IBM Data Shield) and on-prem. SDKMS: A distributed, cloud-scale, integrated key management, tokenization and HSM platform. Scales automatically, easy to use and featuring the lowest TCO in the industry.

N 5869

[www.fortinet.com](http://www.fortinet.com)

## Fudo Security

N 6442

*GDPR, password management, key management, insider threats, identity theft, identity management & governance, data security, authentication, artificial intelligence/machine learning, access control*

Fudo Security is a leading privileged access management solutions firm, one of a select few in the world situated at the highest echelons of the industry. Our global customers include financial institutions, energy companies as well as the public sector. Our distribution channel covers a network of 80 partners across 30 countries, with the HQ located in Bay Area (Newark, CA).

[www.fudosecurity.com](http://www.fudosecurity.com)

## Futurex

S 343

*Internet of Things, security architecture, secure payments & cryptocurrencies, key management, endpoint security, encryption strategy & trends, data security, cryptography, cloud security, application security*

For over 35 years, Futurex has been a globally recognized provider of hardened, enterprise-class data security solutions. Over 15,000 customers worldwide have trusted Futurex's innovative Hardened Enterprise Security Platform and the VirtuCrypt Hardened Enterprise Security Cloud to provide market-leading solutions for the encryption, storage, transmission and certification of sensitive data.

[www.futurex.com](http://www.futurex.com)

## G2 Crowd ★

S 134

*Internet of Things, supply chain, standards, social networking, security awareness, infrastructure security, consulting & professional services*

Until recently, selecting business solutions was hard, risky and inherently biased. G2 Crowd empowers business buying decisions by highlighting the voice of the customer. Our review platform leverages more than 500,000 independent and authenticated user reviews read by more than 2 million buyers each month. Our model brings transparency to B2B buying—changing the way decisions are made.

[www.g2.com](http://www.g2.com)

### Garner Products

S 2063

*GDPR, zero trust, risk management, policy management, network security, government regulations, data security, cloud security, audit*

Garner Products is the trusted world-leading innovator in designing, manufacturing and selling of data elimination equipment and data destruction services. Our products ensure your data is unrecoverable and data theft protected! Protect your data from security breaches from stored, stockpiled, discarded, and recycled magnetic and solid-state media that you thought was erased.

<https://garnerproducts.com>

### Garrison ★

N 4304

*Ransomware, phishing, malware, endpoint security, data loss prevention, anti-malware*

Garrison has pioneered an innovative security platform to counter the threat of persistent and targeted attacks which exploit corporate Internet connectivity. Garrison's approach to secure browsing uses hardware to provide risk-free web access that is commercially affordable, highly secure, and delivers a great user experience at scale.

[www.garrison.com](http://www.garrison.com)

### Gemalto

N 5564

*Internet of Things, secure payments & cryptocurrencies, key management, identity management & governance, encryption strategy & trends, data security, cryptography, cloud security, authentication, SSO*

Gemalto is the global leader in digital security, with 2017 annual revenues of €3 billion and customers in over 180 countries. We bring trust to an increasingly connected world. From secure software to biometrics and encryption, our technologies and services enable businesses and governments to authenticate identities and protect data so they stay safe and enable services in personal devices, connected objects, the cloud and in between. Our solutions authenticate people, transactions and objects, encrypt data and create value for software.

## Global Learning Systems

S 3304

GDPR, security awareness, phishing, Ransomware

**NEW PRODUCT** Global Learning Systems provides security awareness and compliance training programs for employees that effectively promote behavior change, protect your organization and Strengthen Your Human Firewall®. In addition to carefully tailoring program materials to client needs, we offer an online learning platform, phishing simulation tool, courseware customization and high-touch customer service.

[www.globallearningsystems.com](http://www.globallearningsystems.com)

## GlobalSign

S 1941

BYOD, secure coding, mobile security, key management, identity management & governance, endpoint security, authentication, access control, Internet of Things, DevSecOps

**NEW PRODUCT** GlobalSign is the leading certificate authority provider of high-scale PKI automation for mixed endpoint environments and trusted identity solutions supporting the billions of services, devices, people and things comprising the Internet of Everything (IoE). The company has offices in the Americas, Europe and Asia. For more information, visit:

[www.globalsign.com](http://www.globalsign.com)

## GoAnywhere MFT

S 150

GDPR, security analytics, orchestration & automation, log management, key management, governance risk & compliance, encryption strategy & trends, data security, data loss prevention, PII

GoAnywhere MFT streamlines and automates file movement through a centralized, user-friendly interface. The software allows organizations to connect to internal and external systems and exchange secured data using industry standard protocols and encryption (e.g. FTPS, SFTP, HTTPS, AS2). Learn more at:

[www.goanywhere.com](http://www.goanywhere.com)

## GoSecure CounterTack Inc.

S 1049

Anti-malware, threat management, managed security services, endpoint security, consulting & professional services, behavioral analytics

GoSecure leverages its CounterTack EndPoint Protection Platform (EPP) as well as its unique expertise in behaviorally based threat detection, binary analysis and malware forensics to deliver a full suite of managed detection and response (MDR), incident response (IR), advisory and assessment services. The CounterTack platform also powers the MDR offerings of several market leading global MSSPs.

[www.countertack.com](http://www.countertack.com)

## GrammaTech

N 4127

GrammaTech is a leading developer of software-assurance tools and advanced cybersecurity solutions. GrammaTech helps organizations develop and release high quality software, free of harmful defects that cause system failures, enable data breaches and increase corporate liabilities in today's connected world. GrammaTech's CodeSonar is used by embedded developers worldwide.

[www.grammatech.com](http://www.grammatech.com)

## GreatHorn

N 4200

Ransomware, zero-day vulnerability, threat intelligence, security awareness, phishing, malware, incident response, hackers & threats, anti-malware

GreatHorn simplifies email security by automating the cycle of email security—through continuous threat detection, defense and incident response. Office 365 and G Suite customers not only gain enterprise-class protection against both sophisticated phishing attacks and traditional threats, they also reduce complexity, manual remediation time and negative impact on business operations.

[www.greathorn.com](http://www.greathorn.com)

## GreenNet

S 149

Internet of Things, software defined networking, phishing, network security, governance risk & compliance, denial of service, botnets, big data analytics, anti-malware, access control

Wuhan GreeNet Information Service Co., Ltd., specializes in the communication network traffic processing field, mainly engaged in DPI (Deep Packet Inspection) series products, including two product lines: fixed-line DPI and mobile network DPI, providing various solutions for communication operators, information security systems, etc.
